Principles and Practice of Constraint Programming – CP98

4th International Conference, CP98
Pisa, Italy, October 26-30, 1998
Proceedings
Preface

Constraints have emerged as the basis of a representational and computational paradigm that draws from many disciplines and can be brought to bear on many problem domains. This volume contains papers dealing with all aspects of computing with constraints. In particular, there are several papers on applications of constraints, reflecting the practical usefulness of constraint programming.

The papers were presented at the 1998 International Conference on Principles and Practice of Constraint Programming (CP’98), held in Pisa, Italy, 26–30 October, 1998. It is the fourth in this series of conferences, following conferences in Cassis (France), Cambridge (USA), and Schloss Hagenberg (Austria).

We received 115 high quality submissions. In addition, 7 abstracts submissions were not followed by a full paper, hence were not counted as submissions. The program committee selected 29 high quality papers after thorough refereeing by at least 3 experts and further discussion by committee members.

We thank the referees and the program committee for the time and effort spent in reviewing the papers. The program committee invited three speakers:

– Joxan Jaffar
– Peter Jeavons
– Patrick Prosser

Their papers are in this volume.

In addition to the invited and contributed talks, the conference also contained a poster session, which provided attendees with a wider view of the active research in constraint programming. One-page abstracts of the posters appear at the end of this volume. The program also contained four tutorials, presented by Alexander Bockmayr and Thomas Kasper, Rina Dechter, Claude Le Pape and Mark Wallace, and Makoto Yokoo. Following the conference there were five workshops on a range of constraint-based computing topics.

This year, a pre-conference competition was run for the best use of constraints to tackle telecommunication applications. The competition was sponsored by Telecom Italia. The judges were Henry Kautz, Ora Lassila, Claude Le Pape, Michael Maher, Remo Pareschi, and Jean-Francois Puget. The winning entry was “Optimal placement of base stations in wireless indoor telecommunications” by Thom Fruwirth and Pascal Brisset. This application was presented in the program of the conference and a summary appears in this proceedings.
The success of a conference depends primarily on organization. We thank Francesca Rossi, the conference chair, for the excellent job she did organizing the conference, and for her cooperation and proactive support in preparing the conference program. We also thank Stefano Bistarelli for his work as publicity chair and local organizer, and Roland Yap for his work as workshop chair.

CP’98 was organized in cooperation with AAAI and EATCS. The conference was jointly sponsored by AI IA, APT Pisa, Compulog Net, Cosytec, ILOG, Prologia, SINTEF, ToscoDati, and GNIM-CNR.

September 1998
Michael Maher
Jean-Francois Puget
CP’98 Program Co-Chairs
Organization

Conference Chair
Francesca Rossi (U. Pisa, Italy)

Program Committee
Peter van Beek (U. Alberta, Canada)
Christian Bessiere (LIRMM-CNRS, France)
Alexander Bockmayr (Max Planck Institute, Germany)
Alex Brodsky (George Mason U., USA)
Yves Caseau (Bouygues, France)
Philippe Codognet (INRIA and Sony CSL, France)
Rina Dechter (U. California - Irvine, USA)
Yves Deville (U. Catholique de Louvain, Belgium)
Boi Faltings (EPFL, Switzerland)
Maurizio Gabrrielli (U. Pisa, Italy)
Ian Gent (U. Strathclyde, UK)
Nevin Heintze (Bell Laboratories, USA)
Manolis Koubarakis (UMIST, UK)
Jimmy Lee (The Chinese U. Hong Kong, China)
Alan Mackworth (U. British Columbia, Canada)
Michael Maher (Griffith U., Australia), Co-Chair
Kim Marriott (Monash U., Australia)
Wim Nuijten (ILOG, France)
Catuscia Palamidessi (Pennsylvania State U., USA)
Jean-Francois Puget (ILOG, France), Co-Chair
Francesca Rossi (U. Pisa, Italy)
Helmut Simonis (Csytec, France)
Barbara Smith (U. Leeds, UK)
Peter Stuckey (U. Melbourne, Australia)
Ralf Treinen (U. Paris - Sud, France)
Michel Van Caneghem (U. Marseilles and Prologia, France)
Dirk Van Gucht (Indiana U., USA)
Makoto Yokoo (NTT, Japan)

Workshop Chair
Roland Yap (National U. Singapore, Singapore)
VIII  Organization

Publicity Chair

Stefano Bistarelli (U. Pisa, Italy)

Organizing Committee

Alan Borning (U. of Washington)
Jacques Cohen (Brandeis U.)
Alain Colmerauer (U. of Marseille)
Eugene Freuder (U. of New Hampshire), Executive Chair
Herve Gallaire (Xerox)
Jean-Pierre Jouannaud (U. of Paris Sud)
Jean-Louis Lassez (New Mexico Tech)
Ugo Montanari (U. of Pisa)
Anil Nerode (Cornell U.)
Vijay Saraswat (AT&T Research)
Gert Smolka (DFKI and U. des Saarlandes)
Ralph Wachter (Office of Naval Research)
Referees

A. Aggoun
Akira Aiba
Chris Beck
Nicolas Beldiceanu
B. Bennett
F.S. de Boer
Alan Borning
Eric Bourreau
J.T. Buchanan
Jim Caldwell
Wiold Charatonik

## Table of Contents

### Invited Papers

**Open Constraint Programming** ............................................. 1  
*Joxan Jaffar and Roland Yap*

**Constructing Constraints** ................................................... 2  
*Peter Jeavons*

**The Dynamics of Dynamic Variable Ordering Heuristics** ................. 17  
*Patrick Prosser*

### Submitted Papers

**On Completion of Constraint Handling Rules** ............................. 25  
*Slim Abdennadher and Thom Fruehwirth*

**Error-Correcting Source Code** ................................................. 40  
*Yasuhiro Ajiro, Kazunori Ueda and Kenta Cho*

**Optimized Q-pivot for Exact Linear Solvers** ............................... 55  
*David-Olivier Azulay and Jean-François Pique*

**Constraint Techniques for Solving the Protein Structure Prediction Problem** ................................................................. 72  
*Rolf Backofen*

**Global Constraints for Partials CSPs: A Case-Study of Resource and Due Date Constraints** .................................................... 87  
*Philippe Baptiste, Claude Le Pape and Laurent Peridy*

**Using Graph Decomposition for Solving Continuous CSPs** ............... 102  
*Christian Bliek, Bertrand Neveu and Gilles Trombettoni*

**Anytime Lower Bounds for Constraint Violation Minimization Problems** 117  
*Bertrand Cabon, Simon de Givry and Gerard Verfaillie*

**Introducing External Functions in Constraint Query Languages** ........ 132  
*Barbara Catania, Alberto Belussi and Elisa Bertino*

**A Note on Partial Consistencies over Continuous Domains** ............. 147  
*Helene Collavizza, François Delobel and Michel Rueher*

**Consistency Techniques in Ordinary Differential Equations** .......... 162  
*Yves Deville, Micha Janssens and Pascal Van Hentenryck*

**Early Projection in CLP(R)** .................................................... 177  
*Andreas Fordan and Roland H.C. Yap*
