Preface

The papers in this volume were selected for presentation at the *Fourth Annual International Computing and Combinatorics Conference* (COCOON’98), held on August 12–14, 1998, in Taipei. The topics cover most aspects of theoretical computer science and combinatorics related to computing.

Submissions to the conference this year was only conducted electronically. Thanks to the excellent software developed by the system team of the Institute of Information Science, we were able to make virtually all communications through the World Wide Web.

A total of 69 papers was submitted in time to be considered, of which 36 papers were accepted for presentation at the conference. In addition to these contributed papers, the conference also included four invited presentations by Christo Papadimitriou, Michael Fishcher, Fan Chung Graham and Rao Kosaraju. It is expected that most of the accepted papers will appear in a more complete form in scientific journals. Moreover, selected papers will appear in a special issue of Theoretical Computer Science.

We thank all program committee members, their support staff and referees for excellent work within demanding time constraints. We thank all authors who submitted papers for consideration. We are especially grateful to our colleagues who worked hard and offered widely differing talents to make the conference both possible and enjoyable.

August 1998

Wen-Lian Hsu and Ming-Yang Kao
Program Co-chairs
COCOON’98
Organization

COCOON’98 is organized by the Institute of Information Science, Academia Sinica, Taipei, Taiwan, ROC and in cooperation with Institute of Information and Computing Machinery (IICM), Taiwan, ROC.

Program Committee

Dana Angluin (Yale U., USA)
Ricardo Baeza-Yates (U. Chile, Chile)
Allan Borodin (U. Toronto, Canada)
Francis Chin (U. Hong Kong, Hong Kong)
Anne Condon (U. Wisconsin, USA)
Joan Feigenbaum (AT&T Labs, USA)
Mordecai J. Golin (U. Science and Technology, Hong Kong)
Xin He (SUNY Buffalo, USA)
Jan-Ming Ho (Academia Sinica, ROC)
Michael Houle (U. Newcastle, Australia)
Wen-Lian Hsu (Academia Sinica, ROC, co-chair)
Xiaodong Hu (Academy of Science, PRC)
Frank Hwang (Chiao Tung U., ROC)
Toshihide Ibaraki (Kyoto U., Japan)
Hiromi Imai (Tokyo U., Tokyo)
Ravi Janardan (U. Minnesota, USA)
Ming-Yang Kao (Yale U., USA, co-chair)
Philip Klein (Brown U., USA)
Andrzej Lingas (Lund U., Sweden)
Richard J. Lipton (Princeton U., USA)
Rolf Möehring (Technische Universität Berlin, Germany)
Maurice Nivat (U. Paris, France)
Sartaj Sahni (U. Florida, USA)
Uwe Schöning (Universität Ulm, Germany)
Paul Spirakis (U. Patras, Greece)
Tandy Warnow (U. Pennsylvania, USA)
Louxin Zhang (U. Singapore, Singapore)
VIII Organization

Executive Committee

Organizing: Wen-Lian Hsu (Academia Sinica, ROC)
                      Ming-Tat Ko (Academia Sinica, ROC)
Local arrangement:  Jan-Ming Ho (Academia Sinica, ROC)
                      Ming-Tat Ko (Academia Sinica, ROC)
                      Ya-Chiung Lee (Academia Sinica, ROC)
                      Tze-Heng Ma (Academia Sinica, ROC)
                      Kuo-Hui Tsai (Academia Sinica, ROC)
Web:                  Wen-Jyi Sen (Academia Sinica, ROC)
                      Chiu-Feng Wang (Academia Sinica, ROC)
Finance:              Da-Wei Wang (Academia Sinica, ROC)
Publicity and Publication: Tsan-sheng Hsu (Academia Sinica, ROC)

Sponsoring Institutions

ACM Taipei/Taiwan Chapter.
National Science Council, Taiwan, ROC.
# Table of Contents

## Invited Presentations

Algorithmic Approaches to Information Retrieval and Data Mining........ 1  
*Christos H. Papadimitriou*

Combinatorial Problems Arising in Massive Data Sets ...................... 2  
*Fan Chung Graham*

Estimating Parameters of Monotone Boolean Functions ..................... 3  
*Michael J. Fischer*

De-amortization of Algorithms ........................................... 4  
*S. Rao Kosaraju and Mihai Pop*

## Computational Geometry

On Computing New Classes of Optimal Triangulations with Angular  
Constraints ................................................................. 15  
*Yang Dai and Naoki Katoh*

Maximum Weight Triangulation and Its Application on Graph Drawing ... 25  
*Cao An Wang, Francis Y. Chin and Bo Ting Yang*

The Colored Sector Search Tree: A Dynamic Data Structure for Efficient  
High Dimensional Nearest-Foreign-Neighbor Queries .................... 35  
*T. Graf, V. Kamakoti, N. S. Janaki Latha and C. Pandu Rangan*

Space-Efficient Algorithms for Approximating Polygonal Curves in Two  
Dimensional Space ......................................................... 45  
*Danny Z. Chen and Ovidiu Daescu*

Parallel Geometric Algorithms in Coarse-Grain Network Models .......... 55  
*Mikhail J. Atallah and Danny Z. Chen*

## Algorithms and Data Structures

On the Bahncard Problem ..................................................... 65  
*Rudolf Fleischer*

The Ultimate Strategy to Search on m Rays? ................................ 75  
*Alejandro López-Ortiz and Sven Schäfer*

Better Approximation of Diagonal-Flip Transformation and Rotation  
Transformation ........................................................... 85  
*Ming Li and Louxin Zhang*
A Cost Optimal Parallel Algorithm for Computing Force Field in N-Body Simulations .......................................................... 95
Guoliang Xue

Efficient 2 and 3-Flip Neighborhood Search Algorithms for the MAX SAT 105
Mutsunori Yagura and Toshihide Ibaraki

Algorithms for Almost-uniform Generation with an Unbiased Binary Source ................................................................. 117
Ömer Egecioglu and Marcus Peinado

Improved Algorithms for Chemical Threshold Testing Problems .......... 127
Annalisa De Bonis, Luisa Gargano and Ugo Vaccaro

Min-Max-Boundary Domain Decomposition .................................. 137
Marcos Kiwi, Daniel A. Spielman and Shang-Hua Teng

Computational Complexity

On Boolean Lowness and Boolean Highness ................................. 147
Steffen Reith and Klaus W. Wagner

The Inherent Dimension of Bounded Counting Classes .................... 157
Ulrich Hertrampf

An Exact Characterization of Symmetric Functions in $\text{qAC}^0[2]$ ........ 167
Chi-Jen Lu

Robust Reductions ................................................................. 174
Jin-Yi Cai, Anne A. Hemaspaandra and Gerhard Wechsung

Approaches to Effective Semi-continuity of Real Functions ............ 184
Vasco Brattka, Klaus Weihrauch and Xizhong Zheng

On the Power of Additive Combinatorial Search Model ................. 194
Vladimir Grubisni

Parallel and Distributed Processing, and Switching Networks

The Number of Rearrangements in a 3-stage Clos Network Using an Auxiliary Switch ......................................................... 204
Frank K. Hwang and Wen-Dar Lin

Lower Bounds for Wide-Sense Non-blocking Clos Network ............... 213
Kuo-Hui Tsai and Da-Wei Wang

Multirate Multicast Switching Networks .................................... 219
Dongsun S. Kim and Ding-Zhu Du
Efficient Randomized Routing Algorithms on the Two-Dimensional Mesh of Buses .......................................................... 229
Kazuo Iwama, Eiji Miyano, Satoshi Tajima and Hisao Tamaki

Executing Divisible Jobs on a Network with a Fixed Number of Processors 241
Tsan-sheng Hsu and Dian Rae Lopez

Graph Theory

On the Ádám Conjecture on Circulant Graphs ......................... 251
Bernard Mans, Francesco Pappalardi and Igor Shpilrain

Proof of Toft’s Conjecture: Every Graph Containing No Fully Odd $K_4$ Is 3-Colorable .......................................................... 261
Wenan Zang

A New Family of Optimal 1-Hamiltonian Graphs with Small Diameter .. 269
Jeng-Jung Wang, Ting-Yi Sung, Lih-Hsing Hsu and Men-Yang Lin

A Linear-Time Algorithm for Constructing an Optimal Node-Search Strategy of a Tree ................................................. 279
Sheng-Lung Peng, Chin-Wen Ho, Tsan-sheng Hsu, Ming-Tat Ko and Chuan Yi Tang

A Graph Optimization Problem in Virtual Colonoscopy ............... 289
Jie Wang and Yaorong Ge

Approximation and Exact Algorithms for Constructing Minimum Ultrametric Trees from Distance Matrices .......................... 299
Bang Ye Wu, Kun-Mao Chao and Chuan Yi Tang

An Optimal Algorithm for Finding the Minimum Cardinality Dominating Set on Permutation Graphs .................................. 309
H. S. Chao, F. R. Hsu and R. C. T. Lee

Combinatorics and Cryptography

Similarity in Two-Dimensional Strings ................................. 319
Ricardo A. Baeza-Yates

On Multi-dimensional Hilbert Indexings ................................ 329
Jochen Alber and Rolf Niedermeier

Combinatorial Properties of Classes of Functions Hard to Compute in Constant Depth ..................................................... 339
Anna Bernasconi

Eulerian Secret Key Exchange .............................................. 349
Takaaki Mizuki, Hiroki Shizuya and Takao Nishizeki
Table of Contents

One-Time Tables for Two-Party Computation .................. 361

Donald Beaver

Author Index ....................................................... 371
