Models in Software Engineering

Workshops and Symposia at MoDELS 2007
Nashville, TN, USA, September 30 - October 5, 2007
Reports and Revised Selected Papers

Springer
Following the tradition of previous instances of the MoDELS conference series, 11 workshops and two symposia were hosted in 2007. These satellite events complemented the main conference by providing room for important subject areas and enabling a high degree of interactivity.

The selection of the workshops was organized like in former instances of the MoDELS conference series by a Workshop Selection Committee. The following well-known experts agreed to serve on this committee:

- Gabor Karsai, Vanderbilt University, USA
- Thomas Kühne, Darmstadt University of Technology, Germany
- Jochen Küster, IBM Research Zurich, Switzerland
- Henry Muccini, University of L’Aquila, Italy
- Sebastian Uchitel, Imperial College London, UK

The workshops provided collaborative forums for particular topics. They enabled a group of participants to exchange recent and/or preliminary results, to conduct intensive discussions, or to coordinate efforts between representatives of a technical community. They served as forums for lively discussion of innovative ideas, recent progress, or practical experience on model-driven engineering for specific aspects, specific problems, or domain-specific needs.

As in previous editions, there were a Doctoral Symposium and an Educators’ Symposium. The Doctoral Symposium provided specific support for PhD students to discuss their work and receive useful guidance for the completion of their dissertation research. The Educators’ Symposium addressed how to educate students as well as practitioners to move from traditional thinking to an engineering approach based on models.

These satellite-event proceedings published after the conference include summaries as well as revised versions of up to two best papers from the workshops, the Doctoral Symposium, and the Educators’ Symposium.

I am grateful to the members of the Selection Committee who did a great job in reviewing the workshop proposals and selecting the best workshops. In particular Thomas Kühne (member of the Selection Committee and my predecessor as Workshop Chair) was of great help to me and eased my work by generously sharing his experiences from the former year with me.

# Table of Contents

## Aspect-Oriented Modeling

11th International Workshop on Aspect-Oriented Modeling .......................... 1  
*Jörg Kienzle, Jeff Gray, Dominik Stein, Walter Cazzola, Omar Aldawud, and Tzilla Elrad*

A Generic Approach for Automatic Model Composition ............................ 7  
*Franck Fleurey, Benoit Baudry, Robert France, and Sudipto Ghosh*

MATA: A Tool for Aspect-Oriented Modeling Based on Graph Transformation .......... 16  
*Jon Whittle and Praveen Jayaraman*

## Language Engineering

4th International Workshop on Language Engineering (ATEM 2007) .................. 28  
*Jean-Marie Favre, Dragan Gašević, Ralf Lämmel, and Andreas Winter*

Designing Syntax Embeddings and Assimilations for Language Libraries .............. 34  
*Martin Bravenboer and Eelco Visser*

A Comparison of Standard Compliant Ways to Define Domain Specific Languages .......... 47  
*Ingo Weisemöller and Andy Schürr*

## Model Driven Development of Advanced User Interfaces

Third International Workshop on Model Driven Development of Advanced User Interfaces .............................................................. 59  
*Andreas Pleuß, Jan Van den Bergh, Stefan Sauer, Daniel Görlich, and Heinrich Hüßmann*

Domain-Specific Methods and Tools for the Design of Advanced Interactive Techniques ...................................................... 65  
*Guillaume Gauffre, Emmanuel Dubois, and Remi Bastide*

Transforming Discourse Models to Structural User Interface Models ............ 77  
*Sevan Kavaldjian, Cristian Bogdan, Jürgen Falb, and Hermann Kaindl*
Model Size Metrics

Second International Workshop on Model Size Metrics .................. 89
Michel Chaudron and Christian F.J. Lange

On the Relation between Class-Count and Modeling Effort ............... 93
Ariadi Nugroho and Christian F.J. Lange

Measuring the Level of Abstraction and Detail of Models in the Context of MDD ...................................................... 105
Jens von Pilgrim

Model-Based Design of Trustworthy Health Information Systems

First International Workshop on the Model-Based Design of Trustworthy Health Information Systems .......................... 115
Ákos Lédeczi, Ruth Breu, Bradley Malin, and Janos Sztipanovits

Rigorously Defining and Analyzing Medical Processes: An Experience Report .................................................. 118
Stefan Christov, Bin Chen, George S. Avrunin, Lori A. Clarke, Leon J. Osterweil, David Brown, Lucinda Cassells, and Wilson Mertens

Modeling and Enforcing Advanced Access Control Policies in Healthcare Systems with SECTET .......................... 132
Michael Hafner, Mukhtiar Memon, and Muhammad Alam

Model-Driven Engineering, Verification and Validation

4th International Workshop on Model Driven Engineering, Verification, and Validation: Integrating Verification and Validation in MDE ........ 145
Benoit Baudry, Alain Faivre, Sudipto Ghosh, and Alexander Pretschner

Deriving Input Partitions from UML Models for Automatic Test Generation .................................................. 151
Stephan Weißleder and Bernd-Holger Schlingloff

Putting Performance Engineering into Model-Driven Engineering: Model-Driven Performance Engineering ............................ 164
Mathias Fritzsche and Jendrik Johannes
