Contents

ALGEBRAIC THEORY	1
1 Picard-Vessiot rings	4
1.1 Existence and uniqueness of Picard-Vessiot rings	7
1.2 The Galois group	8
1.3 Galois correspondence for difference equations	16
1.4 Difference modules and fibre functors	23
2 Algorithms for difference equations	28
2.1 Difference equations of order one	28
2.2 Difference equations in diagonal form	31
2.3 Difference equations of order two	33
3 The inverse problem for difference equations	35
4 The ring \mathcal{S} of sequences	45
5 An excursion in positive characteristic	52
5.1 Generalities	52
5.2 Modules over $K[T, T^{-1}]$	56
5.3 Difference Galois groups	57
5.4 Comparing characteristic 0 and p	58
6 Difference modules over \mathcal{P}	60
6.1 Classification of difference modules over \mathcal{P}	60
6.2 The universal Picard-Vessiot ring of \mathcal{P}	63
6.3 Fields of constants which are not algebraically closed	65

6.4	Automorphisms of the universal Picard-Vessiot ring of \mathcal{P}	65
6.5	Difference equations over $C((z^{-1}))$ and the formal Galois group.	66
ANALYTIC THEORY		68
7	Classification and canonical forms	71
7.1	A classification of singularities	71
7.2	Canonical forms	75
8	Semi-regular difference equations	77
8.1	Introduction	77
8.2	Some easy asymptotics	78
8.3	The connection matrix of a semi-regular equation	80
8.4	The theorem of Malgrange and Sibuya	84
8.5	Regular difference equations	86
8.6	Inverse problems for semi-regular equations	88
9	Mild difference equations	95
9.1	Asymptotics for mild equations	95
9.2	Connection matrices of mild equations	96
9.3	Tame differential modules	105
9.4	Inverse problems for mild equations	106
10	Examples of equations and Galois groups	111
10.1	Calculating connection matrices	111
10.2	Classification of order one equations	116
10.3	More on difference Galois groups	119
10.4	Mild difference and differential equations	122
10.5	Very mild difference modules and multisummability	124
10.6	Very mild differential modules	125
11	Wild difference equations	127
11.1	Introduction	127
11.2	Multisummability of formal solutions	128
11.3	The Quadrant Theorem	129
11.4	On the Gamma function	130

11.5	An example	131
11.6	Solutions on a right half plane	133
11.7	Solutions on an upper half plane	137
11.8	Analytic equivalence classes of difference equations	140
11.9	An example	144
12	q-difference equations	149
12.1	Formal aspects	149
12.2	Analytic properties	153
12.2.1	Regular singular equations over k_0	154
12.2.2	Equations over $\mathbf{C}(z)$	156
12.3	Construction of the connection map	157
12.3.1	Meromorphic vector bundles	157
12.3.2	The connection map of a regular equation	159
12.3.3	The connection map of a regular singular equation	162
12.3.4	Inverse problems	166
	Bibliography	175
	Index	179
	Notations	180
