Preface

Following the highly successful conferences held in Antibes (ECCV '90), Santa Margherita Ligure (ECCV '92), Stockholm (ECCV '94), and Cambridge (ECCV '96), the Fifth European Conference on Computer Vision (ECCV '98) will take place from 2–6 June 1998 at the University of Freiburg, Germany. It is an honour for us to host this conference which has turned out to be one of the major events for the computer vision community. The conference will be held under the auspices of the European Vision Society (EVS) and the German Association for Pattern Recognition (DAGM).

ECCV is a single track conference consisting of highest quality, previously unpublished, contributed papers on new and original research on computer vision presented either orally or as posters. 223 manuscripts were reviewed double-blind each by three reviewers from the program committee. Forty-two papers were selected to be delivered orally and seventy to be presented at poster sessions.

Based on a generous donation from the OLYMPUS Europe Foundation “Science for Life” 10,000.- DM will be awarded for the best papers.

ECCV '98 is being held at the University of Freiburg, located in the lovely surroundings of the Black Forest. It is one of the oldest universities in Germany, founded in 1457, with an outstanding international reputation. This university with a long tradition has been recently enriched through the foundation of a new 15th Faculty for Applied Sciences consisting of two Institutes: the Institute of Computer Science which will host the ECCV '98 and the Institute of Microsystem Technology.

We wish to thank the members of the program committee and the conference board for their help in the reviewing process. It is their competence and hard work which provides the key for the continuing success of this conference series.

Our thanks are extended also to the University of Freiburg and its rector W. Jäger for hosting this conference; to Springer-Verlag in Heidelberg for their support of this conference through the proceedings; and to k&k for the local organization.

Finally we would like to express our appreciation to the members of our institutes and especially to Nikos Canterakis, to Christoph Schnörr, and to Helen Brodie for their never-ending patience and humour.

We wish all participants a successful and inspiring conference and a pleasant stay in Freiburg.

Contents of Volume I

Multiple View Geometry

A common framework for multiple view tensors	3
<i>A. Heyden</i>	
Computation of the quadrifocal tensor	20
<i>R. I. Hartley</i>	
Self-calibration of a 1D projective camera and its application to the self-calibration of a 2D projective camera	36
<i>O. Faugeras, L. Quan, P. Sturm</i>	

Stereo Vision and Calibration I

Multi viewpoint stereo from uncalibrated video sequences	55
<i>R. Koch, M. Pollefeys, L. Van Gool</i>	
Recognition of planar point configurations using the density of affine shape	72
<i>R. Berthilsson, A. Heyden</i>	
Autocalibration from planar scenes	89
<i>B. Triggs</i>	

Multiple View Geometry / Stereo Vision and Calibration / Geometry and Invariance / Structure from Motion

A new characterization of the trifocal tensor	109
<i>T. Papadopoulo, O. Faugeras</i>	
Threading fundamental matrices	124
<i>S. Avidan, A. Shashua</i>	
Use your hand as a 3D mouse, or, Relative orientation from extended sequences of sparse point and line correspondences using the affine trifocal tensor	141
<i>L. Bretzner, T. Lindeberg</i>	
Do we really need an accurate calibration pattern to achieve a reliable camera calibration?	158
<i>J.-M. Lavest, M. Viala, M. Dhome</i>	
Optimal estimation of three-dimensional rotation and reliability evaluation	175
<i>N. Ohta, K. Kanatani</i>	
From regular images to animated heads: A least squares approach	188
<i>P. Fua, C. Miccio</i>	

Stereo vision-based navigation in unknown indoor environment	203
<i>O. Schreer</i>	
Epipolar geometry of panoramic cameras	218
<i>T. Svoboda, T. Pajdla, V. Hlaváč</i>	
Occlusions, discontinuities, and epipolar lines in stereo	232
<i>H. Ishikawa, D. Geiger</i>	
Symmetry in perspective	249
<i>S. Carlsson</i>	
Projective and illumination invariant representation of disjoint shapes	264
<i>S. Startchik, R. Milanese, T. Pun</i>	
Robust techniques for the estimation of structure from motion in the uncalibrated case	281
<i>M. J. Brooks, W. Chojnacki, A. van den Hengel, L. Baumela</i>	
A factorization method for projective and Euclidean reconstruction from multiple perspective views via iterative depth estimation	296
<i>T. Ueshiba, F. Tomita</i>	
Automatic camera recovery for closed or open image sequences	311
<i>A. W. Fitzgibbon, A. Zisserman</i>	
Structure and motion from points, lines and conics with affine cameras	327
<i>F. Kahl, A. Heyden</i>	
Simultaneous estimation of viewing geometry and structure	342
<i>T. Brodský, C. Fermüller, Y. Aloimonos</i>	
What is computed by structure from motion algorithms?	359
<i>C. Fermüller, Y. Aloimonos</i>	
Stereo Vision and Calibration II	
Complete dense stereovision using level set methods	379
<i>O. Faugeras, R. Keriven</i>	
The geometry and matching of curves in multiple views	394
<i>C. Schmid, A. Zisserman</i>	
Automatic modelling and 3D reconstruction of urban house roofs from high resolution aerial imagery	410
<i>T. Moons, D. Frère, J. Vandekerckhove, L. Van Gool</i>	
Closed-form solutions for the Euclidean calibration of a stereo rig	426
<i>G. Csurka, D. Demirdjian, A. Ruf, R. Horaud</i>	
Colour and Indexing	
Is machine colour constancy good enough?	445
<i>B. Funt, K. Barnard, L. Martin</i>	

Colour model selection and adaptation in dynamic scenes..... 460
Y. Raja, S. J. McKenna, S. Gong

Comprehensive colour image normalization..... 475
G. D. Finlayson, B. Schiele, J. L. Crowley

Invariant-based shape retrieval in pictorial databases 491
M. Kliot, E. Rivlin

Grouping and Segmentation

Concerning Bayesian motion segmentation, model averaging,
 matching and the trifocal tensor 511
P. H. S. Torr, A. Zisserman

Self inducing relational distance and its application to image
 segmentation 528
J. Shi, J. Malik

Contour continuity in region based image segmentation..... 544
T. Leung, J. Malik

Colour and Indexing / Grouping and Segmentation / Tracking

On spatial quantization of color images..... 563
J. Ketterer, J. Puzicha, M. Held, M. Fischer, J. M. Buhmann, D. Fellner

Using ifs and moments to build a quasi invariant image index..... 578
J. M. Marie-Julie, H. Essafi

Determining a structured spatio-temporal representation of video
 content for efficient visualization and indexing 595
M. Gelgon, P. Bouthemy

Demosaicing: Image reconstruction from color CCD samples..... 610
R. Kimmel

Perceptual smoothing and segmentation of colour textures..... 623
M. Petrou, M. Mirmehdi, M. Coors

Visual recognition using local appearance 640
V. C. de Verdière, J. L. Crowley

A factorization approach to grouping..... 655
P. Perona, W. Freeman

Faithful least-squares fitting of spheres, cylinders, cones and
 tori for reliable segmentation..... 671
G. Lukács, R. Martin, D. Marshall

Multi-step procedures for the localization of 2D and 3D point
 landmarks and automatic ROI size selection..... 687
S. Frantz, K. Rohr, H. S. Stiehl

Object oriented motion estimation in color image sequences	704
<i>V. Rehrmann</i>	
Multi-scale and snakes for automatic road extraction	720
<i>H. Mayer, I. Laptev, A. Baumgartner</i>	
A model-free voting approach for integrating multiple cues	734
<i>C. G. Bräutigam, J.-O. Eklundh, H. I. Christensen</i>	
Finding boundaries in natural images: A new method using point descriptors and area completion	751
<i>S. Belongie, J. Malik</i>	
A smoothing filter for CONDENSATION	767
<i>M. Isard, A. Blake</i>	
Camea-based ID verification by signature tracking	782
<i>M. E. Munich, P. Perona</i>	
Model based tracking for navigation and segmentation	797
<i>B. Southall, J. A. Marchant, T. Hague, B. F. Buxton</i>	
Beginning a transition from a local to a more global point of view in model-based vehicle tracking	812
<i>M. Haag, H.-H. Nagel</i>	
View-based adaptive affine tracking	828
<i>F. de la Torre, S. Gong, S. McKenna</i>	
An efficient combination of 2D and 3D shape descriptions for contour based tracking of moving objects	843
<i>J. Denzler, B. Heigl, H. Niemann</i>	
Tracking, CONDENSATION	
2D-Object tracking based on projection-histograms	861
<i>S. Huwer, H. Niemann</i>	
W4S: A real-time system for detecting and tracking people in 2 1/2D	877
<i>I. Haritaoglu, D. Harwood, L. S. Davis</i>	
ICONDENSATION: Unifying low-level and high-level tracking in a stochastic framework	893
<i>M. Isard, A. Blake</i>	
A probabilistic framework for matching temporal trajectories: CONDENSATION-based recognition of gestures and expressions	909
<i>M. J. Black, A. D. Jepson</i>	
Author Index	925

Contents of Volume II

Matching and Registration

Matching hierarchical structures using association graphs	3
<i>M. Pelillo, K. Siddiqi, S. W. Zucker</i>	
Stereo matching with Implicit detection of occlusions	17
<i>R. Trapp, S. Drüe, G. Hartmann</i>	
A solution for the registration of multiple 3D point sets using unit quaternions	34
<i>R. Benjema, F. Schmitt</i>	
Robust registration of dissimilar single and multimodal images	51
<i>C. Nikou, F. Heitz, J.-P. Armspach</i>	

Image Sequences and Video

Decoupling Fourier components of dynamic image sequences: A theory of signal separation, image segmentation, and optical flow estimation	69
<i>D. Vernon</i>	
Spatiotemporally adaptive estimation and segmentation of OF-fields	86
<i>H.-H. Nagel, A. Gehrke</i>	
Robust video mosaicing through topology inference and local to global alignment	103
<i>H. S. Sawhney, S. Hsu, R. Kumar</i>	

Matching and Registration / Shape and Shading / Motion and Flow / Medical Image Understanding and Rendering

Flexible syntactic matching of curves	123
<i>Y. Gdalyahu, D. Weinshall</i>	
Holistic matching	140
<i>A. D. J. Cross, E. R. Hancock</i>	
Creaseness from level set extrinsic curvature	156
<i>A. M. López, F. Lumbresas, J. Serrat</i>	
Multichannel shape from shading techniques for moving specular surfaces ..	170
<i>G. Balschbach, J. Klinke, B. Jähne</i>	
Modelling objects having quadric surfaces incorporating geometric constraints	185
<i>N. Werghi, R. Fisher, C. Robertson, A. Ashbrook</i>	

XIV

Surface reconstruction with multiresolution discontinuity analysis.....	202
<i>N. F. Law, R. Chung</i>	
Shape from Chebyshev nets.....	215
<i>J. Koenderink, A. van Doorn</i>	
Changes in surface convexity and topology caused by distortions of stereoscopic visual space	226
<i>G. Baratoff, Y. Aloimonos</i>	
Reconstruction of smooth surfaces with arbitrary topology adaptive splines.....	241
<i>A. J. Stoddart, M. Baker</i>	
(Mis?-) Using DRT for generation of natural language text from image sequences.....	255
<i>R. Gerber, H.-H. Nagel</i>	
The structure of the optic flow field	271
<i>M. Nielsen, O. F. Olsen</i>	
Optical flow using overlapped basis functions for solving global motion problems	288
<i>S. Srinivasan, R. Chellappa</i>	
The role of total least squares in motion analysis.....	305
<i>M. Mühlich, R. Mester</i>	
Study of dynamical processes with tensor-based spatiotemporal image processing techniques.....	322
<i>B. Jähne, H. Haußecker, H. Scharr, H. Spies, D. Schmundt, U. Schurr</i>	
Motion recovery from image sequences: Discrete viewpoint vs. differential viewpoint	337
<i>Y. Ma, J. Košecká, S. Sastry</i>	
Discrete wavelet analysis: A new framework for fast optic flow computation	354
<i>C. P. Bernard</i>	
Automatic detection and labelling of the human cortical folds in magnetic resonance data sets.....	369
<i>G. Lohmann, D. Y. von Cramon</i>	
Efficient 3-D scene visualization by image extrapolation	382
<i>T. Werner, T. Pajdla, V. Hlaváč</i>	

Shading and Shape

What shadows reveal about object structure	399
<i>D. J. Kriegman, P. N. Belhumeur</i>	
Shape representations from shading primitives.....	415
<i>J. Haddon, D. Forsyth</i>	

A comparison of measures for detecting natural shapes in cluttered backgrounds	432
<i>L. R. Williams, K. K. Thornber</i>	
Bias-variance tradeoff for adaptive surface meshes	449
<i>R. C. Wilson, E. R. Hancock</i>	

Appearance and Recognition

Recognizing 3-D objects with linear support vector machines	469
<i>M. Pontil, S. Rogai, A. Verri</i>	
Active appearance models	484
<i>T. F. Cootes, G. J. Edwards, C. J. Taylor</i>	
Estimating coloured 3D face models from single images: An example based approach	499
<i>T. Vetter, V. Blanz</i>	
A comparison of active shape model and scale decomposition based features for visual speech recognition	514
<i>I. Matthews, J. A. Bangham, R. Harvey, S. Cox</i>	

Motion Segmentation

Motion segmentation and depth ordering based on morphological segmentation	531
<i>L. Bergen, F. Meyer</i>	
Image sequence restoration: A PDE based coupled method for image restoration and motion segmentation	548
<i>P. Kornprobst, R. Deriche, G. Aubert</i>	
Joint estimation-segmentation of optic flow	563
<i>É. Mémin, P. Pérez</i>	

Recognition / Robotics and Active Vision

Face recognition using active appearance models	581
<i>G. J. Edwards, T. F. Cootes, C. J. Taylor</i>	
Face recognition using evolutionary pursuit	596
<i>C. Liu, H. Wechsler</i>	
Recognizing faces by weakly orthogonalizing against perturbations	613
<i>K. Nagao, M. Sohma</i>	
A probabilistic approach to object recognition using local photometry and global geometry	628
<i>M. C. Burl, M. Weber, P. Perona</i>	

Hypothesis verification in model-based object recognition with a Gaussian error model	642
<i>F. Jurie</i>	
Continuous audio-visual speech recognition	657
<i>J. Luettin, S. Dupont</i>	
Finding surface correspondence for object recognition and registration using pairwise geometric histograms	674
<i>A. P. Ashbrook, R. B. Fisher, C. Robertson, N. Werghi</i>	
Integrating iconic and structured matching	687
<i>R. B. Fisher, A. MacKirdy</i>	
Combining multiple views and temporal associations for 3-D object recognition	699
<i>A. Massad, B. Mertsching, S. Schmalz</i>	
Model-based recognition of 3D objects from one view	716
<i>I. Weiss, M. Ray</i>	
A two-stage probabilistic approach for object recognition	733
<i>S. Z. Li, J. Hornegger</i>	
Combining geometric and probabilistic structure for active recognition of 3D objects	748
<i>S. Herbin</i>	
Spatial dependence in the observation of visual contours	765
<i>J. MacCormick, A. Blake</i>	
Handling uncertainty in 3d object recognition using Bayesian networks	782
<i>B. Krebs, M. Burkhardt, B. Korn</i>	
Optimal robot self-localization and reliability evaluation	796
<i>K. Kanatani, N. Ohta</i>	
Mobile robot localisation using active vision	809
<i>A. J. Davison, D. W. Murray</i>	
Structure from Motion	
From reference frames to reference planes: Multi-view parallax geometry and applications	829
<i>M. Irani, P. Anandan, D. Weinshall</i>	
Duality, rigidity and planar parallax	846
