Advancing Science Through Computation

I knock at the stone’s front door.
“It’s only me, let me come in.
I’ve come out of pure curiosity.
Only life can quench it.
I mean to stroll through your palace,
then go calling on a leaf, a drop of water.
I don’t have much time.
My mortality should touch you.”

Wisława Szymborska,
Conversation with a Stone, in Nothing Twice, 1997

The International Conference on Computational Science (ICCS 2008) held in Kraków, Poland, June 23–25, 2008, was the eighth in the series of highly successful conferences: ICCS 2007 in Beijing, China; ICCS 2006 in Reading, UK; ICCS 2005 in Atlanta; ICCS 2004 in Krakow, Poland; ICCS 2003 held simultaneously in Melbourne, Australia and St. Petersburg, Russia; ICCS 2002 in Amsterdam, The Netherlands; and ICCS 2001 in San Francisco, USA.

The theme for ICCS 2008 was “Advancing Science Through Computation,” to mark several decades of progress in computational science theory and practice, leading to greatly improved applications in science. This conference was a unique event focusing on recent developments in novel methods and modeling of complex systems for diverse areas of science, scalable scientific algorithms, advanced software tools, computational grids, advanced numerical methods, and novel application areas where the above novel models, algorithms, and tools can be efficiently applied, such as physical systems, computational and systems biology, environment, finance, and others. ICCS 2008 was also meant as a forum for scientists working in mathematics and computer science as the basic computing disciplines and application areas, who are interested in advanced computational methods for physics, chemistry, life sciences, and engineering. The main objective of this conference was to discuss problems and solutions in all areas, to identify new issues, to shape future directions of research, and to help users apply various advanced computational techniques. During previous editions of ICCS, the goal was to build a computational science community; the main challenge in this edition was ensuring very high quality of scientific results presented at the meeting and published in the proceedings.

Keynote lectures were delivered by:

– Maria E. Orłowska: Intrinsic Limitations in Context Modeling
– Jesus Villasante: EU Research in Software and Services: Activities and Priorities in FP7
– Stefan Blügel: Computational Materials Science at the Cutting Edge
– Martin Walker: *New Paradigms for Computational Science*
– Yong Shi: *Multiple Criteria Mathematical Programming and Data Mining*
– Hank Childs: *Why Petascale Visualization and Analysis Will Change the Rules*
– Fabrizio Gagliardi: *HPC Opportunities and Challenges in e-Science*
– Pawel Gepner: *Intel’s Technology Vision and Products for HPC*
– Jarek Nieplocha: *Integrated Data and Task Management for Scientific Applications*

We would like to thank all keynote speakers for their interesting and inspiring talks and for submitting the abstracts and papers for these proceedings.

![Number of papers in the general track by topic](image)

Fig. 1. Number of papers in the general track by topic

The main track of ICSS 2008 was divided into approximately 20 parallel sessions (see Fig. 1) addressing the following topics:

1. e-Science Applications and Systems
2. Scheduling and Load Balancing
3. Software Services and Tools
4. New Hardware and Its Applications  
5. Computer Networks  
6. Simulation of Complex Systems  
7. Image Processing and Visualization  
8. Optimization Techniques  
9. Numerical Linear Algebra  
10. Numerical Algorithms

Fig. 2. Number of papers in workshops

The conference included the following workshops (Fig. 2):

1. 7th Workshop on Computer Graphics and Geometric Modeling  
2. 5th Workshop on Simulation of Multiphysics Multiscale Systems  
3. 3rd Workshop on Computational Chemistry and Its Applications  
4. Workshop on Computational Finance and Business Intelligence  
5. Workshop on Physical, Biological and Social Networks  
6. Workshop on GeoComputation  
7. 2nd Workshop on Teaching Computational Science  
8. Workshop on Dynamic Data-Driven Application Systems  
9. Workshop on Bioinformatics’ Challenges to Computer Science  
10. Workshop on Tools for Program Development and Analysis in Computational Science
Selection of papers for the conference was possible thanks to the hard work of the Program Committee members and about 510 reviewers; each paper submitted to ICCS 2008 received at least 3 reviews. The distribution of papers accepted for the conference is presented in Fig. 3. ICCS 2008 participants represented all continents; their geographical distribution is presented in Fig. 4.

The ICCS 2008 proceedings consist of three volumes; the first one, LNCS 5101, contains the contributions presented in the general track, while volumes 5102 and 5103 contain papers accepted for workshops. Volume LNCS 5102 is related to various computational research areas and contains papers from Workshops 1–7, while volume LNCS 5103, which contains papers from Workshops 8–14, is mostly related to computer science topics. We hope that the ICCS 2008 proceedings will serve as an important intellectual resource for computational and computer science researchers, pushing forward the boundaries of these two fields and enabling better collaboration and exchange of ideas. We would like to thank Springer for fruitful collaboration during the preparation of the proceedings. At the conference, the best papers from the general track and workshops were nominated and presented on the ICCS 2008 website; awards were funded by Elsevier and Springer. A number of papers will also be published as special issues of selected journals.
Fig. 4. Number of participants by country

We owe thanks to all workshop organizers and members of the Program Committee for their diligent work, which ensured the very high quality of ICCS 2008. We would like to express our gratitude to the Kazimierz Wiatr, Director of ACC CYFRONET AGH, and to Krzysztof Zieliński, Director of the Institute of Computer Science AGH, for their personal involvement. We are indebted to all the members of the Local Organizing Committee for their enthusiastic work towards the success of ICCS 2008, and to numerous colleagues from ACC CYFRONET AGH and the Institute of Computer Science for their help in editing the proceedings and organizing the event. We very much appreciate the help of the computer science students during the conference. We own thanks to the ICCS 2008 sponsors: Hewlett-Packard, Intel, Qumak-Secom, IBM, Microsoft, ATM, Elsevier (Journal Future Generation Computer Systems), Springer, ACC CYFRONET AGH, and the Institute of Computer Science AGH for their generous support.

We wholeheartedly invite you to once again visit the ICCS 2008 website (http://www.iccs-meeting.org/iccs2008/), to recall the atmosphere of those June days in Kraków.

June 2008

Marian Bubak
G. Dick van Albada
Peter M.A. Sloot
Jack J. Dongarra
ICCS 2008 was organized by the Academic Computer Centre Cyfronet AGH in cooperation with the Institute of Computer Science AGH (Kraków, Poland), the University of Amsterdam (Amsterdam, The Netherlands) and the University of Tennessee (Knoxville, USA).

All the members of the Local Organizing Committee are staff members of ACC Cyfronet AGH and ICS AGH.

**Conference Chairs**

Conference Chair: Marian Bubak (AGH University of Science and Technology, Kraków, Poland)

Workshop Chair: Dick van Albada (University of Amsterdam, The Netherlands)

Overall Scientific Co-chair: Jack Dongarra (University of Tennessee, USA)

Overall Scientific Chair: Peter Sloot (University of Amsterdam, The Netherlands)

**Local Organizing Committee**

Kazimierz Wiatr
Marian Bubak
Zofia Mosurska
Maria Stawiarska
Milena Zając
Mietek Pilipczuk
Karol Frańczak

**Sponsoring Institutions**

Hewlett-Packard Company
Intel Corporation
Qumak-Sekom S.A. and IBM
Microsoft Corporation
ATM S.A.
Elsevier
Springer

Workshops Organizers

7th Workshop on Computer Graphics and Geometric Modeling
A. Iglesias (University of Cantabria, Spain)

5th Workshop on Simulation of Multiphysics Multiscale Systems
V.V. Krzhizhanovskaya and A.G. Hoekstra (University of Amsterdam, The Netherlands)

3rd Workshop on Computational Chemistry and Its Applications
P. Ramasami (University of Mauritius, Mauritius)

Workshop on Computational Finance and Business Intelligence
Y. Shi (Chinese Academy of Sciences, China)

Workshop on Physical, Biological and Social Networks
B. Tadic (Jožef Stefan Institute, Ljubljana, Slovenia)

Workshop on GeoComputation
Y. Xue (London Metropolitan University, UK)

2nd Workshop on Teaching Computational Science
Q. Luo (Wuhan University of Science and Technology Zhongnan Branch, China), A. Tirado-Ramos (University of Amsterdam, The Netherlands), Y.-W. Wu
Workshop on Dynamic Data Driven Application Systems
C.C. Douglas (University of Kentucky, USA) and F. Darema (National Science Foundation, USA)

Bioinformatics’ Challenges to Computer Science
M. Cannataro (University Magna Gracia of Catanzaro, Italy), M. Romberg (Research Centre Jülich, Germany), J. Sundness (Simula Research Laboratory, Norway), R. Weber dos Santos (Federal University of Juiz de Fora, Brazil)

Workshop on Tools for Program Development and Analysis in Computational Science
A. Knüpfer (University of Technology, Dresden, Germany), J. Tao (Forschungszentrum Karlsruhe, Germany), D. Kranzlmüller (Johannes Kepler University Linz, Austria), A. Bode (University of Technology, München, Germany) and J. Volkert (Johannes Kepler University Linz, Austria)

Workshop on Software Engineering for Large-Scale Computing
D. Rodríguez (University of Alcala, Spain) and R. Ruiz (Pablo de Olavide University, Spain)

Workshop on Collaborative and Cooperative Environments
C. Anthes (Johannes Kepler University Linz, Austria), V. Alexandrov (University of Reading, UK), D. Kranzlmüller, G. Widmer and J. Volkert (Johannes Kepler University Linz, Austria)

Workshop on Applications of Workflows in Computational Science
Z. Zhao and A. Belloum (University of Amsterdam, The Netherlands)

Workshop on Intelligent Agents and Evolvable Systems
K. Cetnarowicz, R. Schaefer (AGH University of Science and Technology, Kraków, Poland) and B. Zheng (South-Central University For Nationalities, Wuhan, China)
# Table of Contents – Part II

## 7th International Workshop on Computer Graphics and Geometric Modeling

Andrés Iglesias

Sliding-Tris: A Sliding Window Level-of-Detail Scheme ............... 5

Oscar Ripolles, Francisco Ramos, and Miguel Chover

Efficient Interference Calculation by Tight Bounding Volumes ........ 15

Masatake Higashi, Yasuyuki Suzuki, Takeshi Nogawa, Yoichi Sano, and Masakazu Kobayashi

Modeling of 3D Scene Based on Series of Photographs Taken with Different Depth-of-Field ........................................ 25

Marcin Denkowski, Michał Chlebiej, and Paweł Mikolajczak

A Simple Method of the TeX Surface Drawing Suitable for Teaching Materials with the Aid of CAS ........................................ 35

Masataka Kaneko, Hajime Izumi, Kiyoshi Kitahara, Takayuki Abe, Kenji Fukazawa, Masayoshi Sekiguchi, Yuuki Tadokoro, Satoshi Yamashita, and Setsuo Takato

Family of Energy Conserving Glossy Reflection Models ............... 46

Michał Radziszewski and Witold Alda

Harmonic Variation of Edge Size in Meshing CAD Geometries from IGES Format ...................................................... 56

Maharavo Randrianarivony

Generating Sharp Features on Non-regular Triangular Meshes ........ 66

Tetsuo Oya, Shinji Seo, and Masatake Higashi

A Novel Artificial Mosaic Generation Technique Driven by Local Gradient Analysis ................................................... 76

Sebastiano Battiato, Gianpiero Di Blasi, Giovanni Gallo, Giuseppe Claudio Guarnera, and Giovanni Puglisi

Level-of-Detail Triangle Strips for Deforming Meshes ................. 86

Francisco Ramos, Miguel Chover, Jindra Parus, and Ivana Kolingerova

Triangular Bézier Approximations to Constant Mean Curvature Surfaces ................................................................. 96

A. Arnal, A. Lluch, and J. Monterde
Procedural Graphics Model and Behavior Generation ........................ 106
  J.L. Hidalgo, E. Camahort, F. Abad, and M.J. Vicent

Particle Swarm Optimization for Bézier Surface Reconstruction .... 116
  Akemi Galvez, Angel Cobo, Jaime Puig-Pey, and Andrés Iglesias

Geometrical Properties of Simulated Packings of Spherocylinders..... 126
  Monika Bargiel

Real-Time Illumination of Foliage Using Depth Maps ................. 136
  Jesus Gumbau, Miguel Chover, Cristina Rebollo, and
  Inmaculada Remolar

On-Line 3D Geometric Model Reconstruction ............................. 146
  H. Zolfaghari and K. Khalili

Implementation of Filters for Image Pre-processing for Leaf Analyses
  in Plantations .......................................................... 153
  Jacqueline Gomes Mertes, Norian Marranghello, and
  Aledir Silveira Pereira

5th Workshop on Simulation of Multiphysics
  Multiscale Systems

Simulation of Multiphysics Multiscale Systems, 5th International
  Workshop .............................................................. 165
  Valeria V. Krzhizhanovskaya and Alfons G. Hoekstra

A Hybrid Model of Sprouting Angiogenesis ............................. 167
  Florian Milde, Michael Bergdorff, and Petros Koumoutsakos

Particle Based Model of Tumor Progression Stimulated by the Process
  of Angiogenesis ...................................................... 177
  Rafal Wcislo and Witold Dzwinel

A Multiphysics Model of Myoma Growth ................................. 187
  Dominik Szczerba, Bryn A. Lloyd, Michael Bajka, and Gábor Székely

Computational Implementation of a New Multiphysics Model for Field
  Emission from CNT Thin Films ...................................... 197
  N. Sinha, D. Roy Mahapatra, R.V.N. Melnik, and J.T.W. Yeow

A Multiphysics and Multiscale Software Environment for Modeling
  Astrophysical Systems .............................................. 207
  Simon Portegies Zwart, Steve McMillan, Breandán Ó Nualláin,
  Douglas Heggie, James Lombardi, Piet Hut, Sambaran Barnerjee,
  Houria Belkus, Tassos Fragos, John Fregeau, Michiko Fuji,
  Evghenii Gaburov, Evert Glebbeek, Derek Groen, Stefan Harfst,
  Rob Izzard, Mario Jurić, Stephen Justham, Peter Teuben,
  Joris van Bever, Ofer Yaron, and Marcel Zemp

A Kernel-Based Technique for Direction-of-Change Financial Time Series Forecasting ........................................... 441
    Andrew Skabar

An Optimization-Based Classification Approach with the Non-additive Measure ..................................................... 450
    Nian Yan, Zhengxin Chen, Rong Liu, and Yong Shi

A Selection Method of ETF's Credit Risk Evaluation Indicators ...... 459
    Ying Zhang, Zongfang Zhou, and Yong Shi

Estimation of Market Share by Using Discretization Technology: An Application in China Mobile ........................................ 466
    Xiaohang Zhang, Jun Wu, Xuecheng Yang, and Tingjie Lu

A Rough Set-Based Multiple Criteria Linear Programming Approach for Classification .......................................... 476
    Zhiwang Zhang, Yong Shi, Peng Zhang, and Guangxia Gao

Predictive Modeling of Large-Scale Sequential Curves Based on Clustering ......................................................... 486
    Wen Long and Huiwen Wang

Estimating Real Estate Value-at-Risk Using Wavelet Denoising and Time Series Model ............................................ 494
    Kaijian He, Chi Xie, and Kin Keung Lai

The Impact of Taxes on Intra-week Stock Return Seasonality ......... 504
    Virgilijus Sakalauskas and Dalia Kriksciuniene

A Survey of Formal Verification for Business Process Modeling ........ 514
    Shoichi Morimoto
Workshop on Physical, Biological and Social Networks

Network Modeling of Complex Dynamic Systems ......................... 525
Bosiljka Tadić

Clustering Organisms Using Metabolic Networks ......................... 527
Tomasz Arodź

Influence of Network Structure on Market Share in Complex Market Structures ....................................................... 535
Makoto Uchida and Susumu Shirayama

When the Spatial Networks Split? ................................................. 545
Joanna Natkaniec and Krzysztof Kuślakowski

Search of Weighted Subgraphs on Complex Networks with Maximum Likelihood Methods ..................................................... 551
Marija Mitrović and Bosiljka Tadić

Spectral Properties of Adjacency and Distance Matrices for Various Networks ............................................................. 559
Krzysztof Malarz

Simplicial Complexes of Networks and Their Statistical Properties ..... 568
Slobodan Maletić, Milan Rajković, and Danijela Vasiljević

Movies Recommendation Networks as Bipartite Graphs ............... 576
Jelena Grujić

Dynamical Regularization in Scalefree-Trees of Coupled 2D Chaotic Maps ................................................................. 584
Zoran Levnajić

Physics Based Algorithms for Sparse Graph Visualization ............ 593
Milovan Šuvakov

Workshop on GeoComputation

High Performance Geocomputation - Preface .......................... 603
Yong Xue, Dingsheng Liu, Jianwen Ai, and Wei Wan

Study on Implementation of High-Performance GIServices in Spatial Information Grid ......................................................... 605
Fang Huang, Dingsheng Liu, Guoqing Li, Yi Zeng, and Yunxuan Yan

Numerical Simulation of Threshold-Crossing Problem for Random Fields of Environmental Contamination .................. 614
Robert Jankowski
A Context-Driven Approach to Route Planning ............................... 622
Hissam Tawfik, Atulya Nagar, and Obinna Anya

InterCondor: A Prototype High Throughput Computing Middleware
for Geocomputation .......................................................... 630
Yong Xue, Yanguang Wang, Ying Luo, Jianping Guo, Jianqin Wang,
Yincui Hu, and Chaolin Wu

Discrete Spherical Harmonic Transforms: Numerical Preconditioning
and Optimization ............................................................... 638
J.A. Rod Blais

A Data Management Framework for Urgent Geoscience Workflows ..... 646
Jason Cope and Henry M. Tufo

2nd Workshop on Teaching Computational Science

Second Workshop on Teaching Computational Science – WTCS 2008 ... 657
A. Tirado-Ramos and Q. Luo

Using Metaheuristics in a Parallel Computing Course ..................... 659
Ángel-Luis Calvo, Ana Cortés, Domingo Giménez, and
Carmela Pozuelo

Improving the Introduction to a Collaborative Project-Based Course
on Computer Network Applications ..................................... 669
Felix Freitag, Leandro Navarro, and Joan Manuel Marquès

Supporting Materials for Active e-Learning in Computational Models ... 678
Mohamed Hamada

Improving Software Development Process Implemented in Team
Project Course ................................................................. 687
Iwona Dubielewicz and Bogumila Hnatkowska

An Undergraduate Computational Science Curriculum .................... 697
Angela B. Shiflet and George W. Shiflet

Cryptography Adapted to the New European Area of Higher
Education ............................................................................ 706
A. Queiruga Dios, L. Hernández Encinas, and D. Queiruga

An Introductory Computer Graphics Course in the Context of the
European Space of Higher Education: A Curricular Approach ........... 715
Akemi Galvez, Andrés Iglesias, and Pedro Corcuera

Collaborative Environments through Dialogues and PBL to Encourage
the Self-directed Learning in Computational Sciences .................... 725
Fernando Ramos-Quintana, Josefina Sámano-Galindo, and
Víctor H. Zárate-Silva
The Simulation Course: An Innovative Way of Teaching Computational Science in Aeronautics ........................................ 735
Ricard González-Cinca, Eduard Santamaria, and J. Luis A. Yebra

Author Index .................................................. 745
