These are the proceedings of the Ninth International Conference on Logic Programming and Nonmonotonic Reasoning (LPNMR 2007). LPNMR is a forum for exchanging ideas on declarative logic programming, nonmonotonic reasoning, and knowledge representation. LPNMR encompasses theoretical studies, design and implementation of logic-based programming languages and database systems, and development of experimental systems.

The conference included invited talks by Nicola Leone and Jorge Lobo, 18 technical papers, 7 system descriptions, and 5 posters. Keynote speaker was Jack Minker who gave a talk entitled

Reminiscences on Logic Programming and Nonmonotonic Reasoning
and Future Directions

There was again an answer set programming competition (Torsten Schaub and Mirek Truszczyński, organizers), whose results are reported in these proceedings. Prior to the conference there were three workshops: Software Engineering and Answer Set Programming (Marina de Vos and Torsten Schaub, organizers), Correspondence and Equivalence for Nonmonotonic Theories (David Pearce), and Argumentation and Nonmonotonic Reasoning (Paolo Torroni and Guillermo Simari).

The organizers of LPNMR 2007 thank the Program Committee and all reviewers for their commitment and hard work on the program. Special thanks for support are due to Arizona State University and to its School of Computing and Informatics.

LPNMR 2007 was dedicated to the memory of Marco Cadoli, who died November 21, 2006. He was a professor at the University of Rome La Sapienza and a long-time leader in the LPNMR research areas, as well as a Program Committee member for this conference. He was a brilliant researcher, whose work ranged from nonmonotonic logic and knowledge compilation to databases, software development tools, and to computational complexity. Our community has lost an excellent scientist and a wonderful person.

February 2007

Chitta Baral
Gerhard Brewka
John Schlipf
Conference Organization

Program Chairs
Gerhard Brewka  John Schlipf

Local Chair
Chitta Baral

Competition Chairs
Torsten Schaub  Mirosław Truszczyński

Program Committee
José Alferes  Michael Gelfond  David Pearce
Chitta Baral  Enrico Giunchiglia  Chiaki Sakama
Marco Cadoli  Katsumi Inoue  Torsten Schaub
James Delgrande  Tomi Janhunen  Tran Cao Son
Marc Denecker  Tony Kakas  Evgenia Ternovska
Jürgen Dix  Nicola Leone  Hans Tompits
Thomas Eiter  Vladimir Lifschitz  Mirosław Truszczyński
Wolfgang Faber  Fangzhen Lin  Dirk Vermeir
Paolo Ferraris  Jorge Lobo  Marina de Vos
Norman Foo  Ilkka Niemelä  Yan Zhang

Additional Reviewers
Ofer Arieli  Aaron Hunter  Magdalena Ortiz
Marcello Balduccini  Matthias Knorr  Luigi Palopoli
Federico Banti  Ninghui Li  Axel Polleres
Pedro Cabalar  Marco Maratea  Enrico Pontelli
Francesco Calimeri  Maarten Mariën  Davy Van Nieuwenborgh
Michael Fink  Veena Mellarkod  Joost Vennekens
Alfredo Gabaldon  Thomas Meyer  Richard Watson
Martin Gebser  David Mitchell  Johan Wittocx
Gianluigi Greco  Johannes Oetsch  Stefan Woltran
Table of Contents

I. Invited Talks/Competition

Logic Programming and Nonmonotonic Reasoning: From Theory to Systems and Applications ........................................... 1
   Nicola Leone

Policy-Based Computing: From Systems and Applications to Theory ... 2
   Jorge Lobo

The First Answer Set Programming System Competition ............ 3
   Martin Gebser, Lengning Liu, Gayathri Namasivayam, André Neumann, Torsten Schaub, and Mirosław Truszczynski

II. Technical Papers

CR-models: An Inference Engine for CR-Prolog .................... 18
   Marcello Balduccini

Debugging ASP Programs by Means of ASP ........................ 31
   Martin Brain, Martin Gebser, Jörg Pührer, Torsten Schaub, Hans Tompits, and Stefan Woltran

A Purely Model-Theoretic Semantics for Disjunctive Logic Programs with Negation ................................................... 44
   Pedro Cabalar, David Pearce, Panos Rondogiannis, and William W. Wadge

Complexity of Default Logic on Generalized Conjunctive Queries ...... 58
   Philippe Chapdelaine, Miki Hermann, and Ilka Schnoor

A Preference-Based Framework for Updating Logic Programs.......... 71
   James P. Delgrande, Torsten Schaub, and Hans Tompits

Well-Founded Semantics and the Algebraic Theory of Non-monotone Inductive Definitions ........................................... 84
   Marc Denecker and Joost Vennekens

On the Complexity of Answer Set Programming with Aggregates ...... 97
   Wolfgang Faber and Nicola Leone

Experimenting with Look-Back Heuristics for Hard ASP Programs .... 110
   Wolfgang Faber, Nicola Leone, Marco Maratea, and Francesco Ricca
Complexity of Rule Redundancy in Non-ground Answer-Set Programming over Finite Domains ........................................ 123
   Michael Fink, Reinhard Pichler, Hans Tompits, and Stefan Woltran

Conflict-Driven Answer Set Enumeration ............................................. 136
   Martin Gebser, Benjamin Kaufmann, André Neumann, and Torsten Schaub

Head-Elementary-Set-Free Logic Programs ........................................ 149
   Martin Gebser, Joohyung Lee, and Yuliya Lierler

A Deductive System for PC(ID) ...................................................... 162
   Ping Hou, Johan Wittocx, and Marc Denecker

Modularity Aspects of Disjunctive Stable Models .............................. 175
   Tomi Janhunen, Emilia Oikarinen, Hans Tompits, and Stefan Woltran

A Characterization of Strong Equivalence for Logic Programs with Variables ..................................................... 188
   Vladimir Lifschitz, David Pearce, and Agustín Valverde

A Unified Semantics for Constraint Handling Rules in Transaction Logic ........................................................................ 201
   Marc Meister, Khalil Djelloul, and Jacques Robin

Conditional Planning with External Functions .................................. 214
   Davy Van Nieuwenborgh, Thomas Eiter, and Dirk Vermeir

Logic Programs with Abstract Constraints: Representaton, Disjunction and Complexities ................................................. 228
   Jia-Huai You, Li Yan Yuan, Guohua Liu, and Yi-Dong Shen

General Default Logic ................................................................. 241
   Yi Zhou, Fangzhen Lin, and Yan Zhang

### III. System Descriptions

The \textit{LP-OD} System: Logic Programming Meets Outlier Detection . . . 254
   Fabrizio Angiulli, Gianluigi Greco, Luigi Palopoli, and Domenico Trimboli

\textit{clasp}: A Conflict-Driven Answer Set Solver ............................. 260
   Martin Gebser, Benjamin Kaufmann, André Neumann, and Torsten Schaub

\textit{GrinGo}: A New grounder for Answer Set Programming ............... 266
   Martin Gebser, Torsten Schaub, and Sven Thiele
Using Answer Sets to Solve Belief Change Problems .......................... 272  
   *Aaron Hunter, James P. Delgrande, and Joel Faber*

An **Smodels** System with Limited Lookahead Computation ............ 278  
   *Gayathri Namasivayam and Mirosław Truszczynski*

Programming Applications in CIFF ............................................. 284  
   *Paolo Mancarella, Fariba Sadri, Giacomo Terreni, and Francesca Toni*

CPP: A Constraint Logic Programming Based Planner with Preferences .......................... 290  
   *Phan Huy Tu, Tran Cao Son, and Enrico Pontelli*

**IV. Posters**

An Application of Defeasible Logic Programming to Decision Making in a Robotic Environment .................................................. 297  
   *Edgardo Ferretti, Marcelo Errecalde, Alejandro J. García, and Guillermo R. Simari*

On the Effectiveness of Looking Ahead in Search for Answer Sets ...... 303  
   *Guohua Liu and Jia-Huai You*

Enhancing ASP Systems for Planning with Temporal Constraints ...... 309  
   *Veena S. Mellarkod and Michael Gelfond*

Semantics for Possibilistic Disjunctive Programs .......................... 315  
   *Juan Carlos Nieves, Mauricio Osorio, and Ulises Cortés*

Modularity in **SMODELS** Programs .......................... 321  
   *Emilia Oikarinen*

**Author Index** .......................................................... 327
