# Preface

We are proud to introduce the proceedings of the 7th International Conference on Evolvable Systems: From Biology to Hardware (ICES 2007) held in Wuhan, China, September 21–23, 2007. ICES 2007 successfully attracted 123 submissions. After rigorous reviews, 41 high-quality papers were included in the proceedings of ICES 2007, representing an acceptance rate of 33%.

ICES conferences are the first series of international conferences on evolvable systems. The idea of evolvable systems, whose origins can be traced back to the cybernetics movement of the 1940s and the 1950s, has recently led to bio-inspired systems with self-reproduction or self-repair of the original hardware structures, and evolvable hardware with the autonomous reconfiguration of hardware structures by evolutionary algorithms.

Following the workshop Towards Evolvable Hardware taking place in Lausanne, Switzerland, in October 1995, the 1st International Conference on Evolvable Systems: From Biology to Hardware (ICES 1996) was held in Tsukuba, Japan (1996). Subsequent ICES conferences were held in Lausanne, Switzerland (1998), Edinburgh, UK (2000), Tokyo, Japan (2001), Trondheim, Norway (2003), and Barcelona, Spain (2005) where it was decided that China University of Geosciences, Wuhan, would be the location of ICES 2007 with Lishan Kang as the General Chair.

ICES 2007 addressed the theme “From Laboratory to Real World” by explaining how to shorten the gap between evolvable hardware research and design for real-world applications in semiconductor engineering and mechanical engineering. ICES 2007 featured the most up-to-date research and applications in digital hardware evolution, analog hardware evolution, bio-inspired systems, mechanical hardware evolution, evolutionary algorithms in hardware design, and hardware implementations of evolutionary algorithms. ICES 2007 also provided a venue to foster technical exchanges, renew everlasting friendships, establish new connections, and presented the Chinese cultural traditions to overcome cultural barriers.

On behalf of the Organizing Committee, we would like to thank warmly the sponsors, China University of Geosciences and Chinese Society of Astronautics, who helped in one way or another to achieve our goals for the conference. We wish to express our appreciation to Springer, for publishing the proceedings of ICES 2007 in the *Lecture Notes in Computer Science*. We would also like to thank also the authors for submitting their work, as well as the Program Committee members and reviewers for their enthusiasm, time and expertise.

The invaluable help of active members of the Organizing Committee, including Xuesong Yan, Qiuming Zhang, Yan Guo, Siqing Xue, Ziyi Chen, Xiang Li, Guang Chen, Rui Wang, Hui Wang, and Hui Shi, in setting up and maintaining the online submission systems, assigning the papers to the reviewers, and

preparing the camera-ready version of the proceedings was highly appreciated and we would like to thank them personally for their efforts to make ICES 2007 a success.

September 2007

Lishan Kang  
Yong Liu  
Sanyou Zeng

# Organization

ICES 2007 was organized by the School of Computer Science and Research Center for Space Science and Technology, China University of Geosciences, sponsored by China University of Geosciences and Chinese Society of Astronautics.

## Honorary Conference Chair

Yanxin Wang                      China University of Geosciences, China

## General Chair

Lishan Kang                      China University of Geosciences, China

## Program Chair

Yong Liu                            University of Aizu, Japan  
Tetsuya Higuchi                 National Institute of Advanced Industrial  
   Science and Technology, Japan

## Local Chair

Sanyou Zeng                      China University of Geosciences, China

## Program Committee

Elhadj Benkhelifa	University of the West of England, UK
Peter J. Bentley	University College London, UK
Stefano Cagnoni	Università degli Studi di Parma, Italy
Carlos A. Coello Coello	Depto. de Computación, Mexico
Peter Dittrich	Friedrich Schiller University, Germany
Marco Dorigo	Université Libre de Bruxelles, Belgium
Rolf Drechsler	University of Bremen, Germany
Marc Ebner	Universitaet Wuerzburg, Germany
Manfred Glesner	Darmstadt University, Germany
Darko Grundler	University of Zagreb, Croatia
Pauline C. Haddow	The Norwegian University of Science and Technology, Norway
Alister Hamilton	Edinburgh University, UK
Morten Hartmann	Norwegian University of Science and Technology, Norway
Jingsong He	University of Science and Technology of China, China

VIII Organization

Arturo Hernandez Aguirre	Tulane University, USA
Francisco Herrera	University of Granada, Spain
Tetsuya Higuchi	National Institute of Advanced Industrial Science and Technology, Japan
Masaya Iwata	National Institute of Advanced Industrial Science and Technology, Japan
Yaochu Jin	Honda Research Institute Europe, Germany
Didier Keymeulen	Jet Propulsion Laboratory, USA
Jason Lohn	NASA Ames Research Center, USA
Michael Lones	Department of Electronics, University of York, UK
Wenjian Luo	University of Science and Technology of China, China
Juan Manuel Moreno Arostegui	Technical University of Catalonia (UPC), Spain
Karlheinz Meier	University of Heidelberg, Germany
Julian Miller	Department of Electronics University of York, UK
Masahiro Murakawa	National Institute of Advanced Industrial Science and Technology, Japan
Michael Orlov	Ben-Gurion University, Israel
Marek Perkowski	Portland State University, USA
Eduardo Sanchez	Logic Systems Laboratory, Switzerland
Lukas Sekanina	Brno University of Technology, Czech Republic
Moshe Sipper	Ben-Gurion University, Israel
Adrian Stoica	Jet Propulsion Lab, USA
Kiyoshi Tanaka	Shinshu University, Japan
Gianluca Tempesti	University of York, UK
Christof Teuscher	University of California, San Diego (UCSD), USA
Yann Thoma	École d'ingénieurs de Genève, Switzerland
Adrian Thompson	University of Sussex, UK
Jon Timmis	University of York, UK
Jim Torresen	University of Oslo, Norway
Jochen Triesch	J.W. Goethe University, Germany
Edward Tsang	University of Essex, UK
Gunnar Tufte	The Norwegian University of Science and Technology, Norway
Andy Tyrrell	University of York, UK
Youren Wang	Nanjing University of Aeronautics and Astronautics, China
Xin Yao	University of Birmingham, UK
Ricardo Zebulum	Jet Propulsion Lab, USA
Sanyou Zeng	China University of Geosciences, China
Qingfu Zhang	University of Essex, UK
Shuguang Zhao	Xidian University, China

## Steering Committee

Pauline C. Haddow	The Norwegian University of Science and Technology, Norway
Tetsuya Higuchi	National Institute of Advanced Industrial Science and Technology, Japan
Julian F. Miller	University of Birmingham, UK
Jim Torresen	University of Oslo, Norway
Andy Tyrrell (Chair)	University of York, UK

# Table of Contents

## Digital Hardware Evolution

An Online EHW Pattern Recognition System Applied to Sonar Spectrum Classification . . . . .	1
<i>Kyrre Glette, Jim Torresen, and Moritoshi Yasunaga</i>	
Design of Electronic Circuits Using a Divide-and-Conquer Approach . . . . .	13
<i>Guoliang He, Yuanxiang Li, Li Yu, Wei Zhang, and Hang Tu</i>	
Implementing Multi-VRC Cores to Evolve Combinational Logic Circuits in Parallel . . . . .	23
<i>Jin Wang, Chang Hao Piao, and Chong Ho Lee</i>	
An Intrinsic Evolvable Hardware Based on Multiplexer Module Array . . . . .	35
<i>Jixiang Zhu, Yuanxiang Li, Guoliang He, and Xuewen Xia</i>	
Estimating Array Connectivity and Applying Multi-output Node Structure in Evolutionary Design of Digital Circuits . . . . .	45
<i>Jie Li and Shitan Huang</i>	
Research on the Online Evaluation Approach for the Digital Evolvable Hardware . . . . .	57
<i>Rui Yao, You-ren Wang, Sheng-lin Yu, and Gui-jun Gao</i>	
Research on Multi-objective On-Line Evolution Technology of Digital Circuit Based on FPGA Model . . . . .	67
<i>Guijun Gao, Youren Wang, Jiang Cui, and Rui Yao</i>	
Evolutionary Design of Generic Combinational Multipliers Using Development . . . . .	77
<i>Michal Bidlo</i>	

## Analog Hardware Evolution

Automatic Synthesis of Practical Passive Filters Using Clonal Selection Principle-Based Gene Expression Programming . . . . .	89
<i>Zhaohui Gan, Zhenkun Yang, Gaobin Li, and Min Jiang</i>	
Research on Fault-Tolerance of Analog Circuits Based on Evolvable Hardware . . . . .	100
<i>Qingjian Ji, Youren Wang, Min Xie, and Jiang Cui</i>	

Analog Circuit Evolution Based on FPTA-2 . . . . . 109  
*Qiongqin Wu, Yu Shi, Juan Zheng, Rui Yao, and Youren Wang*

**Bio-inspired Systems**

Knowledge Network Management System with Medicine Self Repairing Strategy . . . . . 119  
*JeongYon Shim*

Design of a Cell in Embryonic Systems with Improved Efficiency and Fault-Tolerance . . . . . 129  
*Yuan Zhang, Youren Wang, Shanshan Yang, and Min Xie*

Design on Operator-Based Reconfigurable Hardware Architecture and Cell Circuit . . . . . 140  
*Min Xie, Youren Wang, Li Wang, and Yuan Zhang*

Bio-inspired Systems with Self-developing Mechanisms . . . . . 151  
*André Stauffer, Daniel Mange, Joël Rossier, and Fabien Vannel*

Development of a Tiny Computer-Assisted Wireless EEG Biofeedback System . . . . . 163  
*Haifeng Chen, Ssanghee Seo, Donghee Ye, and Jungtae Lee*

Steps Forward to Evolve Bio-inspired Embryonic Cell-Based Electronic Systems . . . . . 174  
*Elhadj Benkhelifa, Anthony Pipe, Mokhtar Nibouche, and Gabriel Dragffy*

Evolution of Polymorphic Self-checking Circuits . . . . . 186  
*Lukas Sekanina*

**Mechanical Hardware Evolution**

Sliding Algorithm for Reconfigurable Arrays of Processors . . . . . 198  
*Natalia Dowding and Andy M. Tyrrell*

System-Level Modeling and Multi-objective Evolutionary Design of Pipelined FFT Processors for Wireless OFDM Receivers . . . . . 210  
*Erfu Yang, Ahmet T. Erdogan, Tughrul Arslan, and Nick Barton*

Reducing the Area on a Chip Using a Bank of Evolved Filters . . . . . 222  
*Zdenek Vasicek and Lukas Sekanina*

**Evolutionary Design**

Walsh Function Systems: The Bisectional Evolutional Generation Pattern . . . . . 233  
*Nengchao Wang, Jianhua Lu, and Baochang Shi*

Extrinsic Evolvable Hardware on the RISA Architecture . . . . .	244
<i>Andrew J. Greensted and Andy M. Tyrrell</i>	
Evolving and Analysing “Useful” Redundant Logic . . . . .	256
<i>Asbjørn Djupdal and Pauline C. Haddow</i>	
Adaptive Transmission Technique in Underwater Acoustic Wireless Communication . . . . .	268
<i>Guoqing Zhou and Taebo Shim</i>	
Autonomous Robot Path Planning Based on Swarm Intelligence and Stream Functions . . . . .	277
<i>Chengyu Hu, Xiangning Wu, Qingzhong Liang, and Yongji Wang</i>	
Research on Adaptive System of the BTT-45 Air-to-Air Missile Based on Multilevel Hierarchical Intelligent Controller . . . . .	285
<i>Yongbing Zhong, Jinfu Feng, Zhizhuan Peng, and Xiaolong Liang</i>	
The Design of an Evolvable On-Board Computer . . . . .	292
<i>Chen Shi, Shitan Huang, and Xuesong Yan</i>	

## Evolutionary Algorithms in Hardware Design

Extending Artificial Development: Exploiting Environmental Information for the Achievement of Phenotypic Plasticity . . . . .	297
<i>Gunnar Tuftte and Pauline C. Haddow</i>	
UDT-Based Multi-objective Evolutionary Design of Passive Power Filters of a Hybrid Power Filter System . . . . .	309
<i>Shuguang Zhao, Qiu Du, Zongpu Liu, and Xianghe Pan</i>	
Designing Electronic Circuits by Means of Gene Expression Programming II . . . . .	319
<i>Xuesong Yan, Wei Wei, Qingzhong Liang, Chengyu Hu, and Yuan Yao</i>	
Designing Polymorphic Circuits with Evolutionary Algorithm Based on Weighted Sum Method . . . . .	331
<i>Houjun Liang, Wenjian Luo, and Xufa Wang</i>	
Robust and Efficient Multi-objective Automatic Adjustment for Optical Axes in Laser Systems Using Stochastic Binary Search Algorithm . . . . .	343
<i>Nobuharu Murata, Hirokazu Nosato, Tatsumi Furuya, and Masahiro Murakawa</i>	
Minimization of the Redundant Sensor Nodes in Dense Wireless Sensor Networks . . . . .	355
<i>Dingxing Zhang, Ming Xu, Wei Xiao, Junwen Gao, and Wenshen Tang</i>	

Evolving in Extended Hamming Distance Space: Hierarchical Mutation Strategy and Local Learning Principle for EHW ..... 368  
*Jie Li and Shitan Huang*

**Hardware Implementation of Evolutionary Algorithms**

Adaptive and Evolvable Analog Electronics for Space Applications ..... 379  
*Adrian Stoica, Didier Keymeulen, Ricardo Zebulum, Mohammad Mojarradi, Srinivas Katkoori, and Taher Daud*

Improving Flexibility in On-Line Evolvable Systems by Reconfigurable Computing ..... 391  
*Jim Torresen and Kyrre Glette*

Evolutionary Design of Resilient Substitution Boxes: From Coding to Hardware Implementation ..... 403  
*Nadia Nedjah and Luiza de Macedo Mourelle*

A Sophisticated Architecture for Evolutionary Multiobjective Optimization Utilizing High Performance DSP ..... 415  
*Quanxi Li and Jingsong He*

FPGA-Based Genetic Algorithm Kernel Design ..... 426  
*Xunying Zhang, Chen Shi, and Fei Hui*

Using Systolic Technique to Accelerate an EHW Engine for Lossless Image Compression ..... 433  
*Yunbi Chen and Jingsong He*
