Preface

This book contains the proceedings of the 5th International Conference on Trust, Privacy and Security in Digital Business (TrustBus 2008), held in Turin, Italy on 4–5 September 2008. Previous events in the TrustBus series were held in Zaragoza, Spain (2004), Copenhagen, Denmark (2005), Krakow, Poland (2006), and Regensburg, Germany (2007). TrustBus 2008 brought together academic researchers and industrial developers to discuss the state of the art in technology for establishing trust, privacy and security in digital business. We thank the attendees for coming to Turin to participate and debate upon the latest advances in this area.

The conference program included one keynote presentation and six technical paper sessions. The keynote speech was delivered by Andreas Pfitzmann from the Technical University of Dresden, Germany, on the topic of “Biometrics – How to Put to Use and How Not at All”. The reviewed paper sessions covered a broad range of topics, including trust and reputation systems, security policies and identity management, privacy, intrusion detection and authentication, authorization and access control. Each of the submitted papers was assigned to five referees for review. The program committee ultimately accepted 18 papers for inclusion in the proceedings.

We would like to express our thanks to the various people who assisted us in organizing the event and formulating the program. We are very grateful to the program committee members and the external reviewers for their timely and thorough reviews of the papers. Thanks are also due to the DEXA organizing committee for supporting our event, and in particular to Gabriela Wagner for her assistance and support with the administrative aspects.

Finally we would like to thank all the authors that submitted papers for the event, and contributed to an interesting set of conference proceedings.

September 2008

Organization

Program Committee

General Chairperson

Antonio Lioy
Politecnico di Torino, Italy

Conference Program Chairpersons

Steven Furnell, University of Plymouth, UK
Sokratis Katsikas University of Piraeus, Greece

Program Committee Members

Vijay Atluri Rutgers University, USA
Marco Casassa Mont HP Labs Bristol, UK
David Chadwick University of Kent, UK
Nathan Clarke University of Plymouth, UK
Richard Clayton University of Cambridge, UK
Frederic Cuppens ENST Bretagne, France
Ernesto Damiani Università degli Studi di Milano, Italy
Ed Dawson Queensland University of Technology, Australia
Sabrina De Capitani di Vimercati University of Milan, Italy
Hermann De Meer University of Passau, Germany
Jan Eloff University of Pretoria, South Africa
Eduardo B. Fernandez Florida Atlantic University, USA
Carmen Fernandez-Gago University of Malaga, Spain
Elena Ferrari University of Insubria, Italy
Simone Fischer-Huebner University of Karlstad, Sweden
Carlos Flavian University of Zaragoza, Spain
Juan M. Gonzalez-Nieto Queensland University of Technology, Australia
Rüdiger Grimm University of Koblenz, Germany
Dimitris Gritzalis Athens University of Economics and Business, Greece
Stefanos Gritzalis University of the Aegean, Greece
Ehud Gudes Ben-Gurion University, Israel
Sigrid Gürgens Fraunhofer Institute for Secure Information Technology, Germany
Carlos Gutierrez University of Castilla-La Mancha, Spain
Marit Hansen  Independent Center for Privacy Protection, Germany
Audun Jøsang  Queensland University of Technology, Australia
Tom Karygiannis  NIST, USA
Dogan Kesdogan  NTNU Trondheim, Norway
Hiroaki Kikuchi  Tokai University, Japan
Spyros Kokolakis  University of the Aegean, Greece
Costas Lambrinoudakis  University of the Aegean, Greece
Leszek Lilien  Western Michigan University, USA
Javier Lopez  University of Malaga, Spain
Antonio Mana Gomez  University of Malaga, Spain
Olivier Markowitch  Université Libre de Bruxelles, Belgium
Fabio Martinelli  CNR, Italy

External Reviewers

Carlos A. Gutierrez Garcia  University of Castilla-La Mancha, Spain
Andrea Perego  University of Insubria, Italy
Table of Contents

Invited Lecture

Biometrics – How to Put to Use and How Not at All? ............................. 1
Andreas Pfitzmann

Trust

A Map of Trust between Trading Partners .............................................. 8
John Debenham and Carles Sierra

Implementation of a TCG-Based Trusted Computing in Mobile Device ........................................................................ 18
SuGil Choi, JinHee Han, JeongWoo Lee, JongPil Kim, and SungIk Jun

A Model for Trust Metrics Analysis ....................................................... 28
Isaac Agudo, Carmen Fernandez-Gago, and Javier Lopez

Authentication, Authorization and Access Control

Patterns and Pattern Diagrams for Access Control ............................ 38
Eduardo B. Fernandez, Günther Pernul, and Maria M. Larrondo-Petrie

A Spatio-temporal Access Control Model Supporting Delegation for Pervasive Computing Applications .............................. 48
Indrakshi Ray and Manachai Toahchoodee

A Mechanism for Ensuring the Validity and Accuracy of the Billing Services in IP Telephony .............................................. 59
Dimitris Geneiatakis, Georgios Kambourakis, and Costas Lambrinoudakis

Reputation Systems

Multilateral Secure Cross-Community Reputation Systems for Internet Communities ...................................................... 69
Franziska Pingel and Sandra Steinbrecher

Fairness Emergence through Simple Reputation ................................ 79
Adam Wierzbicki and Radoslaw Nielek
Combining Trust and Reputation Management for Web-Based Services

Audun Jøsang, Touhid Bhuiyan, Yue Xu, and Clive Cox

Security Policies and Identity Management

Controlling Usage in Business Process Workflows through Fine-Grained Security Policies

Benjamin Aziz, Alvaro Arenas, Fabio Martinelli, Ilaria Matteucci, and Paolo Mori

Spatiotemporal Connectives for Security Policy in the Presence of Location Hierarchy

Subhendu Aich, Shamik Sural, and Arun K. Majumdar

BusiROLE: A Model for Integrating Business Roles into Identity Management

Ludwig Fuchs and Anton Preis

Intrusion Detection and Applications of Game Theory to IT Security Problems

The Problem of False Alarms: Evaluation with Snort and DARPA 1999 Dataset

Gina C. Tjhai, Maria Papadaki, Steven M. Furnell, and Nathan L. Clarke

A Generic Intrusion Detection Game Model in IT Security

Ioanna Kantzavelou and Sokratis Katsikas

On the Design Dilemma in Dining Cryptographer Networks

Jens O. Oberender and Hermann de Meer

Privacy

Obligations: Building a Bridge between Personal and Enterprise Privacy in Pervasive Computing

Susana Alcalde Bagüés, Jelena Mitic, Andreas Zeidler, Marta Tejada, Ignacio R. Matias, and Carlos Fernandez Valdivielso

A User-Centric Protocol for Conditional Anonymity Revocation

Suriadi Suriadi, Ernest Foo, and Jason Smith

Preservation of Privacy in Thwarting the Ballot Stuffing Scheme

Wesley Brandi, Martin S. Olivier, and Alf Zugenmaier
