Spine Trauma
Spine Trauma

Surgical Techniques
To Sir Ludwig Gutman, who personally changed medicine’s attitude and approach toward catastrophic spine injuries, thus opening the door for innovative concepts of reconstructing traumatic spine injuries. Sir Gutman was knighted for his work with injured soldiers during World War II.

The editors also dedicate this book to their families for their continuous support and understanding of the time and energy involved in treating spine injury patients.
Many textbooks already exist in the ever-changing world of spine surgery, few, however, focus on spine trauma. The spine trauma books that are available provide comprehensive historical and mechanistic perspectives on spine trauma with excellent reviews on the thought process and recommendations of treatment. They do not, however, provide the technical information that is often needed in the trauma setting when surgeons must make quick decisions and quick plans for surgical treatment. This is especially important for the junior attending surgeon and, perhaps, for those who do not cover spine trauma on a daily basis. Thus, the focus of this text is exactly that situation. It is meant to be used as a quick reference when planning surgical treatment for spine trauma victims. Internationally renowned authors have been assembled to provide details on the basic steps of trauma care including preoperative planning, patient positioning, equipment needed, surgical steps, postoperative care, and avoidance and treatment of complications. This is a book that every spine surgeon should have as a reference and refresher when covering spine trauma call.

To Heidi Armbruster for her tireless efforts in the organization and logistics of this endeavor.
Contents

Part I: Cervical

1 Cervical Spinal Stability and Decision Making  3
   Alpesh A. Patel

2 Clearing the Cervical Spine  11
   Ronald W. Lindsey and Zbigniew Gugala

3 Imaging of Spinal Trauma  33
   Brian Petersen

4 Immunological Response to Spinal Cord Injury:
   Impact on the Timing of Spine Fixation  73
   Michael A. Flierl, Kathryn M. Beauchamp,
   Anthony Dwyer, and Philip F. Stahel

5 The Role of Orthosis in Spinal Injury  85
   David F. Apple, Courtney W. Brown, and Lesley M. Hudson

6 The Halovest  95
   Anthony Dwyer

7 Direct Anterior Screw Fixation of Odontoid Fractures  107
   Andrew T. Dailey, Todd D. McCall, and Ronald I. Apfelbaum

8 Occiput–Cervical Fixation  119
   Ciro G. Randazzo, Bryan LeBude, John Ratliff,
   and James Harrop

9 C1–2 Fixation: Transarticular Screws  129
   Sohail Bajammal and R. John Hurlbert

10 C1–2 Fixation: Lateral Mass/Pars Screw-Rod Fixation  145
    Jeffery A. Rihn, David T. Anderson, Ravi Patel,
    and Todd J. Albert
11 Closed Reduction of Unilateral and Bilateral Facet Dislocations ........................................... 157
Thomas J. Puschak and Paul A. Anderson

12 Cervical Open Posterior Reduction of Facet Dislocation .................. 163
Eric Klineberg and Munish Gupta

13 Open Anterior Reduction of Cervical Facet Dislocation ............... 171
Anh X. Le

14 Anterior Cervical Discectomy and Fusion for Traumatic Disc Herniation ............................................. 177
Ben B. Pradhan

15 Posterior Cervical Fusion for Trauma .......................................................... 185
F. Cumhur Oner

16 Corpectomy for Burst Fracture .............................................................. 191
Harel Arzi and Paul M. Arnold

17 Posterior Pedicle Screw Fixation .......................................................... 199
Yasutsugu Yukawa

Part II: Thoracic

18 Thoracic Spinal Stability: Decision Making ................................. 213
Jeremy Smith and Nitin N. Bhatia

19 Anterior Corpectomy with Fixation, Thoracic ............... 229
Peter G. Whang, Jonathan N. Grauer, and Alexander R. Vaccaro

20 Kyphoplasty, Osteoporotic and Traumatic ...................... 243
Yu-Po Lee and Robert A. Keller

21 Costotransversectomy .............................................................. 253
Kern Singh

Part III: Thoracolumbar and Lumbar

22 Lumbar Spinal Stability: Decision Making ................................. 263
George M. Whaba and Nitin N. Bhatia

23 Posterior Instrumentation for Thoracolumbar and Lumbar Fracture Dislocation ...................... 271
Christian P. DiPaola and Brian K. Kwon

24 Posterior Decompression Technique for Thoracolumbar Burst Fracture ............................................. 283
F. Cumhur Oner
Contents

25 Anterior Treatment of Thoracolumbar Burst Fractures ............. 291
Gene Choi, Eric Klineberg, and Munish Gupta

26 Anterior and Posterior Surgery and Fixation for Burst Fractures ........................................... 299
Yasutsugu Yukawa

27 Percutaneous/Minimally Invasive Treatment for Thoracolumbar Fractures ................................. 311
Neel Anand, Eli M. Baron, and Mark Dekutoski

Part IV: Sacral

28 Surgical Stabilization Options for Fractures and Fracture-Dislocations at the Lumbosacral Junction and for Posterior Pelvic Ring Reconstruction ............................................. 321
Thomas A. Schildhauer, Carlo Bellabarba, M.L. Chip Routt, and Jens R. Chapman

29 Sacral Screw Fixation .............................................. 335
Todd McCall, Daniel Fassett, and Andrew Dailey

30 Percutaneous Placement of Iliosacral Screws .................... 341
John C. France

31 Iliac Fixation in Trauma ..................................... 351
Robert Morgan

Part V: Special Circumstances

32 Minimally Invasive Treatment for Ankylosing Spondylitis and DISH Thoracolumbar Fractures .............................. 359
Neel Anand, Eli M. Baron, Rebecca Rosemann, and Mark Dekutoski

33 Surgical Treatment of Thoracic or Thoracolumbar Fractures of Ankylosing Spondylitis (AS) or Diffuse Idiopathic Skeletal Hyperostosis (DISH) ........................................ 365
Courtney W. Brown

34 Traumatic Dural Tears ....................................... 369
Amgad S. Hanna, Ahmad Nassr, and James S. Harrop

35 Civilian Gunshot Injury to the Spine .......................... 377
Zbigniew Gugala and Ronald W. Lindsey

36 Complications in Spine Surgery ............................... 399
Evalina Burger
