Preface

We welcome you to the joint proceedings of the 9th NEW2AN (Next-Generation Teletraffic and Wired/Wireless Advanced Networking) and the Second ruSMART conferences held in St. Petersburg, Russia during September 15-17, 2009.

This year NEW2AN featured significant contributions to various aspects of networking. Presented topics encompassed several layers of communication networks: from physical layers to transport protocols. In particular, issues of QoS in wireless and IP-based multi-service networks were dealt with. Cross-layer optimization, traffic characterization were also addressed within the program. It is also worth mentioning the emphasis placed on wireless networks, including, but not limited to, cellular networks, wireless local area networks, personal area networks, mobile ad hoc networks, and sensor networks.

The Second Conference on Smart Spaces, ruSMART 2009, was targeted at attracting the attention of academic and industrial researchers to an emerging area of smart spaces that creates completely new opportunities for making fully customized applications and services for the users. The conference is a meeting place for leading experts from top affiliations around the world, with particularly active participation and strong interest from Russian attendees that have a good reputation for high-quality research and business in innovative service creation and applications development.

The NEW2AN/ruSMART 2009 call for papers attracted 82 papers from 22 countries, resulting in an acceptance rate of 39%. With the help of the excellent Technical Program Committee and a number of associated reviewers, the best 32 high-quality papers were selected for publication. The conference was organized in seven single track sessions.

We wish to thank the Technical Program Committee members of both conferences and the associated reviewers for their hard work and important contribution to the conference.

The Technical Program of both conferences benefited from two keynote speakers:

- Aaron J. Quigley, University College Dublin, Ireland
- Manfred Schneps-Schneppe, Ventspils University College, Latvia

This year the conferences were supported by the sponsor packages provided by NOKIA, Nokia Siemens Networks, Ubitel (Russia) and Baltic IT Ltd (Russia) and organized in cooperation with ITC (International Teletraffic Congress), IEEE, and Popov Society. The support of these organizations is gratefully acknowledged.

Finally, we wish to thank many people who contributed to the organization. In particular, Jakub Jakubiak (TUT, Finland) carried a substantial load of the submissions and reviews, website maintaining, did an excellent job on the compilation of camera-ready papers and liaising with Springer. Many thanks go to...
Natalia Avdeenko and Ekaterina Antonyuk (Monomax Meetings & Incentives) for their excellent local organization efforts and the conference’s social program preparation. We believe that the 9th NEW2AN and the Second ruSMART conferences provided an interesting and up-to-date scientific program. We hope that the participants enjoyed the technical and social conference program, Russian hospitality and the beautiful city of St. Petersburg.

# Table of Contents

## I ruSMART

### Invited Talk

ITU G.hn Concept and Home Automation .......................... 1  
*Manfred Schneps-Schneppe*

### Session I

Extending Context Spaces Theory by Predicting Run-Time Context . . . 8  
*Andrey Boytsov, Arkady Zaslavsky, and Kåre Synnes*

Cross-Domain Interoperability: A Case Study ........................ 22  
*Jukka Honkola, Hannu Laine, Ronald Brown, and Ian Oliver*

A Topology Based Approach for Context-Awareness in Smart Environments ................................................... 32  
*Antonio Coronato and Giuseppe De Pietro*

Anonymous Agent Coordination in Smart Spaces: State-of-the-Art 42  
*Alexander Smirnov, Alexey Kashevnik, Nikolay Shilov, Ian Oliver, Sergey Balandin, and Sergey Boldyrev*

### Session II

On-the-Fly Situation Composition within Smart Spaces ................ 52  
*Prem Prakash Jayaraman, Arkady Zaslavsky, and Jerker Delsing*

Empower Mobile Workspaces by Wireless Networks and Wearable Computing ......................................................... 66  
*Michael Lawo, Otthein Herzog, Michael Boronowski, and Peter Knackfuß*

Multimodal Interaction with Intelligent Meeting Room Facilities from Inside and Outside ........................................... 77  
*A.L. Ronzhin and V.Yu. Budkov*

### Session III

Ubi-Check: A Pervasive Integrity Checking System .................. 89  
*Michel Banâtre, Fabien Allard, and Paul Couderc*
Towards a Lightweight Security Solution for User-Friendly Management of Distributed Sensor Networks ........................................ 97
   *Pentti Tarvainen, Mikko Ala-Louko, Marko Jaakola, Ilkka Uusitalo, Spyros Lalis, Tomasz Paczesny, Markus Taumberger, and Pekka Savolainen*

Cross-Site Management of User Online Attributes ..................... 110
   *Jin Liu*

## II NEW2AN

### Teletraffic Issues

Analysis and Optimization of Aggregation in a Reconfigurable Optical ADD/DROP Multiplexer ........................................ 120
   *J.M. Fourneau, N. Izri, and D. Verchère*

Teletraffic Capacity Performance of WDM/DS-OCDMA Passive Optical Network ................................................ 132
   *Mohammad Gharaei, Catherine Lepers, Olfa Affes, and Philippe Gallion*

Estimation of GoS Parameters in Intelligent Network ................... 143
   *Irina Buzyukova, Yulia Gaidamaka, and Gennady Yanovsky*

Multi-Skill Call Center as a Grading from “Old” Telephony .......... 154
   *Manfred Schneps-Schneppe and Janis Sedols*

### Traffic Measurements, Modeling, and Control

A Real-Time Algorithm for Skype Traffic Detection and Classification ................................................... 168
   *D. Adami, C. Callegari, S. Giordano, M. Pagano, and T. Pepe*

HTTP Traffic Measurements on Access Networks, Analysis of Results and Simulation ........................................ 180
   *Vladimir Deart, Vladimir Mankov, and Alexander Pilugin*

The Video Streaming Monitoring in the Next Generation Networks .... 191
   *A. Paramonov, D. Tarasov, and A. Koucheryavy*

The Poisson Cluster Process Runs as a Model for the Internet Traffic .................................................... 206
   *Jerzy Martyna*
Peer-to-Peer Systems

Proactive Peer-to-Peer Traffic Control When Delivering Large Amounts of Content within a Large-Scale Organization ........................................ 217
  Chih-Chin Liang, Chia-Hung Wang, Hsing Luh, Ping-Yu Hsu, and Wuyi Yue

ISP-Driven Managed P2P Framework for Effective Real-Time IPTV Service ................................................................. 229
  Seil Jeon, Younghan Kim, Jonghwa Yi, and Shingak Kang

Fault-Tolerant Architecture for Peer to Peer Network Management Systems ................................................................. 241
  Maryam Barshan, Mahmood Fathy, and Saleh Yousefi

Security Issues

Public Key Signatures and Lightweight Security Solutions in a Wireless Environment ............................................................. 253
  Dmitrij Lagutin and Sasu Tarkoma

On the Operational Security Assurance Evaluation of Networked IT Systems ........................................................................ 266
  Artur Hecker and Michel Riguidel

Trust Management Using Networks of Volunteers in Ubiquitous Computing Environments ....................................................... 279
  Mijeom Kim, Mohan Kumar, and Sukju Jung

A Fast and Efficient Handover Authentication Achieving Conditional Privacy in V2I Networks ............................................... 291
  Jaeduck Choi, Souhwan Jung, Younghan Kim, and Myungsik Yoo

Wireless Networks: Ad Hoc and Mesh

Robust and Efficient Routing in Wireless Mesh Networks with Unreliable Nodes ................................................................. 301
  Apostolia Papapostolou, Vasilis Friderikos, Tara A. Yahiya, and Hakima Chaouchi

Video Compression for Wireless Transmission: Reducing the Power Consumption of the WPAN Hi-Speed Systems .................... 313
  Andrey Belogolovy, Eugine Belyaev, Anton Sergeev, and Andrey Turlikov

Link Stability-Aware Ad Hoc Routing Protocol with Multiple Sampling Rates ................................................................. 323
  Myungsik Yoo, Junwon Lee, Younghan Kim, and Souhwan Jung
