Advances in Software Engineering

International Conference on Advanced Software Engineering and Its Applications, ASEA 2009
Held as Part of the Future Generation Information Technology Conference, FGIT 2009
Jeju Island, Korea, December 10-12, 2009
Proceedings
Foreword

As future generation information technology (FGIT) becomes specialized and fragmented, it is easy to lose sight that many topics in FGIT have common threads and, because of this, advances in one discipline may be transmitted to others. Presentation of recent results obtained in different disciplines encourages this interchange for the advancement of FGIT as a whole. Of particular interest are hybrid solutions that combine ideas taken from multiple disciplines in order to achieve something more significant than the sum of the individual parts. Through such hybrid philosophy, a new principle can be discovered, which has the propensity to propagate throughout multifaceted disciplines.

FGIT 2009 was the first mega-conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple events related to particular disciplines of IT, conducted by separate scientific committees, but coordinated in order to expose the most important contributions. It included the following international conferences: Advanced Software Engineering and Its Applications (ASEA), Bio-Science and Bio-Technology (BSBT), Control and Automation (CA), Database Theory and Application (DTA), Disaster Recovery and Business Continuity (DRBC; published independently), Future Generation Communication and Networking (FGCN) that was combined with Advanced Communication and Networking (ACN), Grid and Distributed Computing (GDC), Multimedia, Computer Graphics and Broadcasting (MulGraB), Security Technology (SecTech), Signal Processing, Image Processing and Pattern Recognition (SIP), and u- and e-Service, Science and Technology (UNESST).

We acknowledge the great effort of all the Chairs and the members of advisory boards and Program Committees of the above-listed events, who selected 28% of over 1,050 submissions, following a rigorous peer-review process. Special thanks go to the following organizations supporting FGIT 2009: ECSIS, Korean Institute of Information Technology, Australian Computer Society, SERSC, Springer LNCS/CCIS, COEIA, ICC Jeju, ISEP/IPP, GECAD, PoDIT, Business Community Partnership, Brno University of Technology, KISA, K-NBTC and National Taipei University of Education.

We are very grateful to the following speakers who accepted our invitation and helped to meet the objectives of FGIT 2009: Ruay-Shiung Chang (National Dong Hwa University, Taiwan), Jack Dongarra (University of Tennessee, USA), Xiaohua (Tony) Hu (Drexel University, USA), Irwin King (Chinese University of Hong Kong, Hong Kong), Carlos Ramos (Polytechnic of Porto, Portugal), Timothy K. Shih (Asia University, Taiwan), Peter M.A. Sloot (University of Amsterdam, The Netherlands), Kyu-Young Whang (KAIST, South Korea), and Stephen S. Yau (Arizona State University, USA).
We would also like to thank Rosslin John Robles, Maricel O. Balitanas, Farkhod Alisherov Alisherovish, and Feruza Sattarova Yusfoyna – graduate students of Han-nam University who helped in editing the FGIT 2009 material with a great passion.

Preface

We would like to welcome you to the proceedings of the 2009 International Conference on Advanced Software Engineering & Its Applications (ASEA 2009), which was organized as part of the 2009 International Mega-Conference on Future Generation Information Technology (FGIT 2009), held during December 10–12, 2009, at the International Convention Center Jeju, Jeju Island, South Korea.

ASEA 2009 focused on various aspects of advances in software engineering and its applications with computational sciences, mathematics and information technology. It provided a chance for academic and industry professionals to discuss recent progress in the related areas. We expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.

We would like to acknowledge the great effort of all the Chairs and members of the Program Committee. Out of around 150 submissions to ASEA 2009, we accepted 46 papers to be included in the proceedings and presented during the conference. This gives an acceptance ratio firmly below 30%. Five of the papers accepted for ASEA 2009 were published in the special FGIT 2009 volume, LNCS 5899, by Springer. The remaining 41 accepted papers can be found in this CCIS volume.

We would like to express our gratitude to all of the authors of submitted papers and to all of the attendees, for their contributions and participation. We believe in the need for continuing this undertaking in the future.

Once more, we would like to thank all the organizations and individuals who supported FGIT 2009 as a whole and, in particular, helped in the success of ASEA 2009.

Organization

Organizing Committee

General Chair  Haeng-kon Kim (Catholic University of Daegu, Korea)

Advisory Board  Tien N. Nguyen (Iowa State University, USA)
Jose Luis Arciniegas Herrera (University of Cauca, Colombia)
Byeong-Ho Kang (University of Tasmania, Australia)

Publication Chair  Yong-ik Yoon (Sookmyung Women's University, Korea)

Program Chairs  Tai-hoon Kim (Hannam University, Korea)
Akingbehin Kiumi (University of Michigan-Dearborn, USA)

Publicity Chairs  Tao Jiang (Huazhong University of Sci. and Tech., China)
June Verner (University of New South Wales, Australia)
Silvia Abrahao (Camino de Vera, Spain)

Program Committee

Chia-Chu Chiang  Jiro Tanaka  Morshed Chowdhury
A. Hamou-Lhadj  Jonathan Lee  Olga Ormandjieva
Ami Marowka  Jongmoon Baik  Praveen R. Srivastava
Andrea De Lucia  Jose L. Arciniegas  Rattikorn Hewett
Chima Adiele  Joseph Balikuddembe  Ricardo Campos
Doo-Hwan Bae  Karel Richta  Robert Glass
Emilia Mendes  Kendra Cooper  Rudolf Ferenc
Gongzhu Hu  Kin Fun Li  Shawkat Ali
Harvey Siy  Kurt Wallnau  Silvia Abrahao
Hironori Washizaki  Laurence Duchien  Tokuro Matsuo
Houari Sahraoui  Luigi Buglione  Wuwei Shen
Hyeon Soo Kim  Maria Bielikova  Yijun Yu
Jennifer Pérez Benédí  Maria Tortorella
# Table of Contents

A Systematic Literature Review of Software Process Improvement in Small and Medium Web Companies ........................................ 1  
*Muhammad Sulayman and Emilia Mendes*

An XCP Based Distributed Calibration System ...................... 9  
*Yang He and Xiaomin Sun*

Structural and Behavioral Detection of Design Patterns ............. 16  
*Nadia Bouassida and Hanene Ben-Abdallah*

Test Case Minimization and Prioritization Using CMIMX Technique ... 25  
*Praveen Ranjan Srivastava, Mahesh Ray, Julian Dermoudy, Byeong-Ho Kang, and Tai-hoon Kim*

Embedded Control Software Design with Aspect Patterns ............ 34  
*Takahiro Soeda, Yuta Yanagidate, and Takanori Yokoyama*

Towards a Consistent Semantics for Unsafe Time Petri Nets .......... 42  
*Abdelkrim Abdelli*

A Multiple Viewed Interrelated Ontology Model for Holistic Component Specification and Retrieval ........................................ 50  
*Chengpu Li, Xiaodong Liu, and Jessie Kennedy*

A Conflict-Based Model for Problem-Oriented Software Engineering and Its Applications Solved by Dimension Change and Use of Intermediary .............................................................. 61  
*Jung Suk Hyun and Chan Jung Park*

Requirements Engineering Problems and Practices in Software Companies: An Industrial Survey ................................................. 70  
*Badariah Solemon, Shamsul Sahibuddin, and Abdul Azim Abd Ghani*

A Formal Methodology for Semantics and Time Consistency Checking of UML Dynamic Diagrams ............................................ 78  
*Youcef Hammal*

A Process Model for Forensic Analysis of Symbian Smart Phones ...... 86  
*Xian Yu, Lie-Hui Jiang, Hui Shu, Qing Yin, and Tie-Ming Liu*

Reliability Analysis Method for Supporting Traceability Using UML ... 94  
*Joonhoon Lee, Beoungil Cho, Hyunsang Youn, and Eunseok Lee*

Applying Agility Framework in Small and Medium Enterprises ...... 102  
*Suphak Suwanya and Werasak Kurutach*
Using Area-Team to Evaluate the Software Architecture for an Online Banking System: A Case Study .................................................. 111

Muhammad Sulayman, Mehwish Riaz, Husnain Naqvi, and Muhammad Amir Aman

Architectural Decay during Continuous Software Evolution and Impact of ‘Design for Change’ on Software Architecture ....................... 119

Mehwish Riaz, Muhammad Sulayman, and Husnain Naqvi

Saeed Parsa, Mojtaba Vahidi-Asl, Somaye Arabi, and Behrouz Minaei-Bidgoli

Applying Formal Methods to Process Innovation .......................... 135

Antonella Santone and Maria Tortorella

Abstracting Models from Execution Traces for Performing Formal Verification ............................................................. 143

Thierry Bodhuin, Federico Pagnozzi, Antonella Santone, Maria Tortorella, and Maria Luisa Villani

A Hybrid Model in Dynamic Software Updating for C .................. 151

Mehdi Jalili, Saeed Parsa, and Habib Seifzadeh

A Function Point Logic File Identification Technique Using UML Analysis Class Diagrams ..................................................... 160

José Antonio Pow-Sang, Loretta Gasco, and Arturo Nakasone

Reliable Mobile Application Modeling Based on Open API ............ 168

Sera Jang and Eunseok Lee

An Improved Steganography Covert Channel .............................. 176

Md Amiruzzaman, Hassan Peyravi, M. Abdullah-Al-Wadud, and Yoojin Chung

Software Test Data Generation Based on Multi-agent .................... 188

Siwen Yu, Jun Ai, and Yifu Zhang

Knowledge Creation and Creativity in Agile Teams ....................... 196

Broderick Crawford and Claudio León de la Barra

TEST: Testing Environment for Embedded Systems Based on TTCN-3 in SILS .............................................................. 204

Hochang Chae, Xiulin Jin, Seonghun Lee, and Jeonghun Cho

A Framework for Measuring the Alignment between Business Processes and Software Systems ................................................. 213

Lerina Aversano, Carmine Grasso, and Maria Tortorella
