Preface

Grid and Pervasive Computing (GPC) is an annual international conference on the emerging areas of grid computing and pervasive computing, aimed at providing an exciting platform and paradigm for all-the-time, everywhere services. GPC 2010 provided a high-profile, leading-edge forum for researchers and developers from industry and academia to present their latest research in the field of grid and pervasive computing.

Three workshops were held in conjunction with the GPC 2010 conference:

- The First International Workshop on Intelligent Management of Networked Environment (IMNE 2010)
- International Workshop on Multimedia Applications for Cloud (MAC 2010)
- The 6th International Workshop on Mobile Commerce and Services (WMCS 2010)

The proceedings of these workshop are also included in this volume. We received 184 papers originating from 22 countries. The Program Committee finally selected 67 papers for presentation at the conference and inclusion in this LNCS volume. At GPC 2010, we were very pleased to have four distinguished invited speakers, who delivered state-of-the-art information on the conference topics:

- A grid based virtual laboratory for HIV drug-ranking by Peter Sloot (University of Amsterdam, The Netherlands)
- Solving the scalability dilemma with clouds, crowds, and algorithms by Michael J. Franklin (University of California, Berkeley, USA)
- The trend of cloud computing — from industry’s perspective by Enwei Xie (Microsoft Greater China Region, China)
- Towards ubiquitous affective learning by Bin Hu (The Birmingham City University, UK)

The conference would not have been possible without the support of many people and organizations that helped in various ways to make it a success. In particular, we would like to thank the National Science Council and the Computer Center of MOE for their financial support and we therefore gratefully acknowledge their help in the realization of this conference.

May 2010

Paolo Bellavista
Ruay-Shiung Chang
Han-Chieh Chao
Shin-Feng Lin
Peter Sloot

Table of Contents

Keynote Speeches

A Grid Based Virtual Laboratory for HIV Drugranking ...................... 1
Peter Sloot

Solving the Scalability Dilemma with Clouds, Crowds, and
Algorithms .................................................................................. 2
Michael J. Franklin

The Trend of Cloud Computing – From Industry’s Perspective........... 3
Enwei Xie

Towards to Ubiquitous Affective Learning ................................. 4
Bin Hu

Track 1: Cloud and Grid Computing

Collaboration of Reconfigurable Processors in Grid Computing for
Multimedia Kernels ................................................................. 5
Mahmood Ahmadi, Asadollah Shahbahrami, and Stephan Wong

Multi-core Code in a Cluster – A Meaningful Option? ................. 15
Martin Štava and Pavel Tvrďák

A New Heuristic for Broadcasting in Cluster of Clusters ............. 27
Hazem Fkaier, Christophe Cérin, Luiz Angelo Steffenel, and
Mohamed Jemni

SLA-Driven Automatic Bottleneck Detection and Resolution for Read
Intensive Multi-tier Applications Hosted on a Cloud .................. 37
Waheed Iqbal, Matthew N. Dailey, David Carrera, and Paul Janecek

An Effective Job Replication Technique Based on Reliability and
Performance in Mobile Grids ...................................................... 47
Daeyong Jung, SungHo Chin, KwangSik Chung, Taewon Suh,
HeonChang Yu, and JoonMin Gil

A Matrix Scheduling Strategy with Multi-QoS Constraints in
Computational Grid ................................................................. 59
Ding Ding, Siwei Luo, and Zhan Gao
**Track 2: Peer-to-Peer and Pervasive Computing**

The Mini-Grid Framework: Application Programming Support for Ad-Hoc, Peer-to-Peer Volunteer Grids .................................................. 69
   Jakob E. Bardram and Neelanarayanan Venkataraman

Human Movement Detection Algorithm Using 3-Axis Accelerometer Sensor Based on Low-Power Management Scheme for Mobile Health Care System ................................................................. 81
   Jaewan Shin, Dongkyoo Shin, Dongil Shin, Sungmin Her,
   Soohan Kim, and Myungsoo Lee

A Genetic Context Interpreter for Context-Aware Systems in Pervasive Computing Environments ...................................................... 91
   Been-Chian Chien and Shiang-Yi He

Supporting Filename Partial Matches in Structured Peer-to-Peer Overlay ................................................................. 101
   Guanling Lee, Jia-Sin Huang, and Yi-Chun Chen

EEG: A Way to Explore Learner’s Affect in Pervasive Learning Systems ................................................................. 109
   Jizheng Wan, Bin Hu, and Xiaowei Li

**Track 3: Sensor and Mobile Networks**

The Mission-Oriented Self-deploying Methods for Wireless Mobile Sensor Networks ................................................................. 120
   Shih-Chang Huang

Multi-Dimensional Resilient Statistical En-Route Filtering in Wireless Sensor Networks ................................................................. 130
   Feng Yang, Xuehai Zhou, and Qiyuan Zhang

Cross-Layer Based Rate Control for Lifetime Maximization in Wireless Sensor Networks ................................................................. 140
   Xiaoyan Yin, Xingshe Zhou, Zhigang Li, and Shining Li

A 2D Barcode Validation System for Mobile Commerce ............... 150
   David Kuo, Daniel Wong, Jerry Gao, and Lee Chang

A Petri-Net Based Context Representation in Smart Car Environment ................................................................. 162
   Jie Sun, Yongping Zhang, and Kejia He
# Track 4: Service-Oriented Computing

A New Distributed and Hierarchical Mechanism for Service Discovery in Grid Environment .................................................. 174  
Leyli Mohamad Khanli and Saeed Ebadi

DSOA: A Service Oriented Architecture for Ubiquitous Applications ........................ 183  
Fabricio Nogueira Buzeto, Carlos Botelho de Paula Filho, Carla Denise Castanho, and Ricardo Pezzuol Jacobi

Monitoring Service Using Markov Chain Model in Mobile Grid Environment ......................................................... 193  
JiSu Park, KwangSik Chung, EunYoung Lee, YoungSik Jeong, and HeonChang Yu

Modeling Grid Workflow by Coloured Grid Service Net ........................................ 204  
Hong Feng Lai

A Lower Bound on Greedy Embedding in Euclidean Plane .................................................. 214  
Lei Cao, Andrew Strelzoff, and Jonathan Z. Sun

Performance of Parallel Bit-Reversal with Cilk and UPC for Fast Fourier Transform .................................................. 224  
Tien-Hsiung Weng, Sheng-Wei Huang, Wei-Duen Liau, and Kuan-Ching Li

# Track 5: Resource Management and Scheduling

Variable-Sized Map and Locality-Aware Reduce on Public-Resource Grids .................................................. 234  
Po-Cheng Chen, Yen-Liang Su, Jyh-Biau Chang, and Ce-Kuen Shieh

Actor Garbage Collection Using Vertex-Preserving Actor-to-Object Graph Transformations .................................................. 244  
Wei-Jen Wang, Carlos Varela, Fu-Hau Hsu, and Cheng-Hsien Tang

Scalable Grid Resource Allocation for Scientific Workflows Using Hybrid Metaheuristics .................................................. 256  
Georg Buss, Kevin Lee, and Daniel Veit

Pareto Front Based Realistic Soft Real-Time Task Scheduling with Multi-objective Genetic Algorithm in Unstructured Heterogeneous Distributed System .................................................. 268  
Nafiseh Sedaghat, Hamid Tabatabaee-Yazdi, and Mohammad-R Akbarzadeh-T

Job Scheduling Techniques for Distributed Systems with Temporal Constraints .................................................. 280  
Ping-Yi Lin and Pangfeng Liu
Replica-Aware Job Scheduling in Distributed Systems ................. 290
Wei-Cheng Liao and Jan-Jan Wu

Online Scheduling of Workflow Applications in Grid Environment ...... 300
Chih-Chiang Hsu, Kuo-Chan Huang, and Feng-Jian Wang

Securing Interoperable Grid Services in ARC Grid Middleware......... 311
Weizhong Qiang, Aleksandr Konstantinov, Mattias Ellert, and Hai Jin

A New Game Theoretical Resource Allocation Algorithm for Cloud Computing ................................................................. 321
Fei Teng and Frédéric Magoulès

Track 6: Grid and Pervasive Applications

CPRS: A Cloud-Based Program Recommendation System for Digital TV Platforms ................................................................. 331
Lai Chin-Feng, Chang Jui-Hung, Hu Chia-Cheng, Huang Yueh-Min, and Chao Han-Chieh

Monitoring and Status Representation of Devices in Wireless Grids..... 341
Mahantesh N. Birje and Sunilkumar S. Manvi

Diagnosis from Bayesian Networks with Fuzzy Parameters – A Case in Supply Chains ................................................................. 353
Han-Ying Kao, Chia-Hui Huang, Chu-Ling Hsu, and Chiao-Ling Huang

Packaging and Generating Mechanism of Image Processing Services on Heterogeneous Grid Platforms ............................... 363
Ran Zheng, Jian Lan, Qin Zhang, and Hai Jin

AvPM: An Avatar-Based Personal Messenger for Low Bandwidth Networks ................................................................. 373
Yu-En Wu and Cheng-Chin Chiang

Virtual EZ Grid: A Volunteer Computing Infrastructure for Scientific Medical Applications ............................................. 385
Mohamed Ben Belgacem, Nabil Abdennadher, and Marko Nuimimaki

Towards Complex Negotiation for Cloud Economy ..................... 395
Kwang Mong Sim
# Track 7: Semantic Grid and Ontologies

A Novel E-Newspapers Publication System Using Provably Secure Time-Bound Hierarchical Key Assignment Scheme and XML Security .......................................................... 407

*Hung-Yu Chien, Ying-Lun Chen, Chien-Feng Lo, and Yuh-Ming Huang*

A Tree-Based Reliability Model for Composite Web Service with Common-Cause Failures ........................................ 418

*Bo Zhou, Keting Yin, Shuai Zhang, Honghong Jiang, and Aleksander J. Kaus*

Efficient Astronomical Data Classification on Large-Scale Distributed Systems .......................................................... 430

*Cheng-Hsien Tang, Min-Feng Wang, Wei-Jen Wang, Meng-Feng Tsai, Yuji Urata, Chow-Choong Ngeow, Induk Lee, Kuaiyun Huang, and Wen-Ping Chen*

Ontology-Based Personal Annotation Management on Semantic Peer Network to Facilitating Collaborations .............................. 441

*Ching-Long Yeh, Chun-Fu Chang, Po-Shen Lin, Yu-Peng Wang, and Yi-Chun Tsai*

On the Design of Semi-structured Multi-star Hybrid-Overlays for Multi-attribute Range Queries .................................... 451

*You-Fu Yu, Po-Jung Huang, Quan-Jie Chen, Tian-Liang Huang, and Kuan-Chou Lai*

Distributed Island-Based Query Answering for Expressive Ontologies ... 461

*Sebastian Wandelt and Ralf Moeller*

An Extended Description Logic for Event Ontology ...................... 471

*Wei Liu, Wenjie Xu, Jianfeng Fu, Zongtian Liu, and Zhaomang Zhong*

# Track 8: Mobile Commerce and Services

An Empirical Analysis of Revisit Behaviors of Monthly Subscription-Based Mobile Video Services ................................. 482

*Toshihiko Yamakami*

A One-Seg Service Development Model: Ecosystem Considerations in the Context of Mobile Communication/Broadcast Convergence 492

*Toshihiko Yamakami*
A Mechanism for Solving the Sequential Inconsistent Event in a Peer-to-Peer Network Virtual Environment ...................................... 502
   Jui-Fa Chen, Wei-Chuan Lin, Kun-Hsiao Tsai, Yu-Yu Cho, and Cheng-Yu Yu

Enhanced Generic Information Services Using Mobile Messaging .......... 510
   Muhammad Saleem, Ali Zahir, Yasir Ismail, and Bilal Saeed

A Focused Crawler with Ontology-Supported Website Models for Information Agents ................................................................. 522
   Sheng-Yuan Yang

An Efficient Technique for OFDM System Using Discrete Wavelet Transform .......................................................... 533
   W. Saad, N. El-Fishawy, S. EL-Rabaie, and M. Shokair

Marginalized Particle Filter for Maneuvering Target Tracking Application .............................................................. 542
   Fei Zhou, Wei-jun He, and Xin-yue Fan

Business Independent Model of Mobile Workforce Management ........... 552
   Volker Gruhn and Thomas Richter

**Track 9: Multimedia Applications for Cloud**

An Adaptive Job Allocation Strategy for Heterogeneous Multi-cluster Systems ........................................................................ 562
   Chao-Tung Yang, Keng-Yi Chou, and Kuan-Chou Lai

Privacy Protection of Grid Service Requesters through Distributed Attribute Based Access Control Model ......................... 573
   Ali Esmaeeli and Hamid Reza Shahriari

Detecting and Resolving a Loop in the Tree-Based Mobility Management Protocol ............................................................. 583
   Trung-Dinh Han and Hoon Oh

Data-Centric Trust Framework for High Integrity Wireless Sensor Networks .................................................................................. 593
   Mingming Li, Jianbin Hu, and Nike Gui

Shuffle: An Enhanced QoS Control by Balancing Energy Consumption in Wireless Sensor Networks ........................................ 603
   Rong-Guei Tsai and Hao-Li Wang

Scheduling of Job Combination and Dispatching Strategy for Grid and Cloud System ......................................................... 612
   Tai-Lung Chen, Ching-Hsien Hsu, and Shih-Chang Chen
