Preface

Business information systems is a rapidly developing domain. There are many topics that deserve attention but have not yet found a place in canonical research. Workshops give researchers the possibility to share preliminary ideas, first experimental results, or to discuss research hypotheses. Discussions held during presentations strengthen the paper and prepare it for publication. From our experience, workshops are a perfect instrument with which to create a community around very specific research topics, thus offering the opportunity to promote it. Topics that do not find critical feedback at the main International Conference on Business Information Systems (BIS) may experience fruitful discussion when confronted with a well-focused audience.

Over the last few decades, business information systems have been one of the most important factors of the transition toward a knowledge-based economy. At the same time they have been subject to continuous rapid development and innovation driven both by industry and by academia. For the last 12 years these innovations were carefully observed but also shaped by researchers attending BIS yearly.

Recently, apart from the main conference, workshops covering specific topics in the area of business information systems have been organized. Since 2007, BIS has featured several workshops. Their proceedings were published on-line, later in the LNBIP series, and outstanding workshop papers were included in special issues of international journals. This year, four workshops were successfully organized in conjunction with BIS 2010, covering topics of applications and economics of knowledge-based technologies (AKTB), business and IT alignment (BITA), information logistics (ILOG), and legal information systems (LIT). This volume contains papers that were accepted and presented at the BIS 2010 workshops. Additionally it features an invited speech given at the LIT workshop by Tom Gordon.

Workshop papers included in this volume underwent a thorough review procedure. Each of the submitted papers received between two and three reviews (a total of 172 reviews were received, with an average of 2.5 reviews per paper) by over 89 members of the Program Committees of the workshops. Out of 74 submitted papers and work-in-progress reports, 33 were accepted and presented at the conference (accounting for 48% of all submissions).

On this occasion, we would like to express our thanks to everyone who made the BIS 2010 workshops a success: all Workshop Chairs, members of the Workshop Program Committees, authors of submitted papers, invited speakers and finally all workshop participants. We cordially invite you to visit the BIS website at http://bis.kie.ue.poznan.pl/ and to join us at future BIS conferences.

# Table of Contents

**AKTB Workshop**

AKTB 2010 Workshop Chairs’ Message ................................................................. 1  
*Virgilius Sakalauskas and Dalia Kriksciuniene*

Case-Based System for Innovation Management in Electric Power Enterprises .................................................. 3  

Credit Risk Evaluation Using SVM-Based Classifier ................. 7  
*Paulius Danenas and Gintautas Garsva*

Logistic Analysis of Price Bubble and Current Situation in USA Real Estate .......................................................... 13  
*Stasys Girdzijauskas and Marius Dubnikovas*

Using Multi-criteria Decision Making to Choose Process Representation Format for a Process Repository .......................... 19  
*Mturi Elias and Khurram Shahzad*

On Valuing Advanced Technologies in Greenfield Projects .......... 25  
*Vilde Hushovd Godø, Darijus Strasunskas, and Asgeir Tomasgard*

Self-adapting Intelligent Business Processes Execution Analysis ....... 29  
*Dalia Kriksciuniene and Sandra Strigunaite*

MDA Compatible Knowledge Based IS Development Process ........ 33  
*Audrius Lopata and Martas Ambraziunas*

Incomplete Information within Relative Pairwise Comparisons as Utilized by the AHP ............................................. 39  
*Edward W.N. Bernroider, Konradin Maier, and Volker Stix*

Short Term Trading Strategy Based on Chart Pattern Recognition and Trend Trading in Nasdaq Biotechnology Stock Market .......... 51  
*Saulius Masteika*

A Model of Employee Selection for SME Based on Innovation Transfer ................................................................. 57  
*Justyna Patalas-Maliszewska and Irene Krebs*
