Preface

The 2010 edition of the European Conference on Computer Vision was held in Heraklion, Crete. The call for papers attracted an absolute record of 1,174 submissions. We describe here the selection of the accepted papers:

- Thirty-eight area chairs were selected coming from Europe (18), USA and Canada (16), and Asia (4). Their selection was based on the following criteria: (1) Researchers who had served at least two times as Area Chairs within the past two years at major vision conferences were excluded; (2) Researchers who served as Area Chairs at the 2010 Computer Vision and Pattern Recognition were also excluded (exception: ECCV 2012 Program Chairs); (3) Minimization of overlap introduced by Area Chairs being former student and advisors; (4) 20% of the Area Chairs had never served before in a major conference; (5) The Area Chair selection process made all possible efforts to achieve a reasonable geographic distribution between countries, thematic areas and trends in computer vision.
- Each Area Chair was assigned by the Program Chairs between 28–32 papers. Based on paper content, the Area Chair recommended up to seven potential reviewers per paper. Such assignment was made using all reviewers in the database including the conflicting ones. The Program Chairs manually entered the missing conflict domains of approximately 300 reviewers. Based on the recommendation of the Area Chairs, three reviewers were selected per paper (with at least one being of the top three suggestions), with 99.7% being the recommendations of the Area Chairs. When this was not possible, senior reviewers were assigned to these papers by the Program Chairs, with the consent of the Area Chairs. Upon completion of this process there were 653 active reviewers in the system.
- Each reviewer got a maximum load of eight reviews—in a few cases we had nine papers when re-assignments were made manually because of hidden conflicts. Upon the completion of the reviews deadline, 38 reviews were missing. The Program Chairs proceeded with fast re-assignment of these papers to senior reviewers. Prior to the deadline of submitting the rebuttal by

the authors, all papers had three reviews. The distribution of the reviews was the following: 100 papers with an average score of weak accept and higher, 125 papers with an average score toward weak accept, 425 papers with an average score around borderline.

- For papers with strong consensus among reviewers, we introduced a procedure to handle potential overwriting of the recommendation by the Area Chair. In particular for all papers with weak accept and higher or with weak reject and lower, the Area Chair should have sought for an additional reviewer prior to the Area Chair meeting. The decision of the paper could have been changed if the additional reviewer was supporting the recommendation of the Area Chair, and the Area Chair was able to convince his/her group of Area Chairs of that decision.
- The discussion phase between the Area Chair and the reviewers was initiated once the review became available. The Area Chairs had to provide their identity to the reviewers. The discussion remained open until the Area Chair meeting that was held in Paris, June 5–6. Each Area Chair was paired to a buddy and the decisions for all papers were made jointly, or when needed using the opinion of other Area Chairs. The pairing was done considering conflicts, thematic proximity, and when possible geographic diversity. The Area Chairs were responsible for taking decisions on their papers. Prior to the Area Chair meeting, 92% of the consolidation reports and the decision suggestions had been made by the Area Chairs. These recommendations were used as a basis for the final decisions.
- Orals were discussed in groups of Area Chairs. Four groups were formed, with no direct conflict between paper conflicts and the participating Area Chairs. The Area Chair recommending a paper had to present the paper to the whole group and explain why such a contribution is worth being published as an oral. In most of the cases consensus was reached in the group, while in the cases where discrepancies existed between the Area Chairs' views, the decision was taken according to the majority of opinions.
- The final outcome of the Area Chair meeting, was 38 papers accepted for an oral presentation and 284 for poster. The percentage ratios of submissions/ acceptance per area are the following:

Thematic area	# submitted	% over submitted	# accepted	% over accepted	% acceptance in area
Object and Scene Recognition	192	16.4%	66	20.3%	34.4%
Segmentation and Grouping	129	11.0%	28	8.6%	21.7%
Face, Gesture, Biometrics	125	10.6%	32	9.8%	25.6%
Motion and Tracking	119	10.1%	27	8.3%	22.7%
Statistical Models and Visual Learning	101	8.6%	30	9.2%	29.7%
Matching, Registration, Alignment	90	7.7%	21	6.5%	23.3%
Computational Imaging	74	6.3%	24	7.4%	32.4%
Multi-view Geometry	67	5.7%	24	7.4%	35.8%
Image Features	66	5.6%	17	5.2%	25.8%
Video and Event Characterization	62	5.3%	14	4.3%	22.6%
Shape Representation and Recognition	48	4.1%	19	5.8%	39.6%
Stereo	38	3.2%	4	1.2%	10.5%
Reflectance, Illumination, Color	37	3.2%	14	4.3%	37.8%
Medical Image Analysis	26	2.2%	5	1.5%	19.2%

- We received 14 complaints/reconsideration requests. All of them were sent to the Area Chairs who handled the papers. Based on the reviewers' arguments and the reaction of the Area Chair, three papers were accepted—as posters—on top of the 322 at the Area Chair meeting, bringing the total number of accepted papers to 325 or **27.6%**. The selection rate for the 38 orals was **3.2%**. The acceptance rate for the papers submitted by the group of Area Chairs was 39%.
- Award nominations were proposed by the Area and Program Chairs based on the reviews and the consolidation report. An external award committee was formed comprising David Fleet, Luc Van Gool, Bernt Schiele, Alan Yuille, Ramin Zabih. Additional reviews were considered for the nominated papers and the decision on the paper awards was made by the award committee. We thank the Area Chairs, Reviewers, Award Committee Members, and the General Chairs for their hard work and we gratefully acknowledge Microsoft Research for accommodating the ECCV needs by generously providing the CMT Conference Management Toolkit. We hope you enjoy the proceedings.

Organization

General Chairs

Argyros, Antonis	University of Crete/FORTH, Greece
Trahanias, Panos	University of Crete/FORTH, Greece
Tziritas, George	University of Crete, Greece

Program Chairs

Daniilidis, Kostas	University of Pennsylvania, USA
Maragos, Petros	National Technical University of Athens, Greece
Paragios, Nikos	Ecole Centrale de Paris/INRIA Saclay île-de-France, France

Workshops Chair

Kutulakos, Kyros	University of Toronto, Canada
------------------	-------------------------------

Tutorials Chair

Lourakis, Manolis	FORTH, Greece
-------------------	---------------

Demonstrations Chair

Kakadiaris, Ioannis	University of Houston, USA
---------------------	----------------------------

Industrial Chair

Pavlidis, Ioannis	University of Houston, USA
-------------------	----------------------------

Travel Grants Chair

Komodakis, Nikos	University of Crete, Greece
------------------	-----------------------------

Area Chairs

Bach, Francis	INRIA Paris - Rocquencourt, France

Face Recognition with Patterns of Oriented Edge Magnitudes	313
<i>Ngoc-Son Vu and Alice Caplier</i>	
Spatial-Temporal Granularity-Tunable Gradients Partition (STGGP) Descriptors for Human Detection	327
<i>Yazhou Liu, Shiguang Shan, Xilin Chen, Janne Heikkila, Wen Gao, and Matti Pietikainen</i>	
Being John Malkovich	341
<i>Ira Kemelmacher-Shlizerman, Aditya Sankar, Eli Shechtman, and Steven M. Seitz</i>	
Facial Contour Labeling via Congealing	354
<i>Xiaoming Liu, Yan Tong, Frederick W. Wheeler, and Peter H. Tu</i>	

Cascaded Confidence Filtering for Improved Tracking-by-Detection	369
<i>Severin Stalder, Helmut Grabner, and Luc Van Gool</i>	
Inter-camera Association of Multi-target Tracks by On-Line Learned Appearance Affinity Models	383
<i>Cheng-Hao Kuo, Chang Huang, and Ram Nevatia</i>	
Multi-person Tracking with Sparse Detection and Continuous Segmentation	397
<i>Dennis Mitzel, Esther Horbert, Andreas Ess, and Bastian Leibe</i>	
Closed-Loop Adaptation for Robust Tracking	411
<i>Jialue Fan, Xiaohui Shen, and Ying Wu</i>	
Gaussian-Like Spatial Priors for Articulated Tracking	425
<i>Søren Hauberg, Stefan Sommer, and Kim Steenstrup Pedersen</i>	
Dense Point Trajectories by GPU-Accelerated Large Displacement Optical Flow	438
<i>Narayanan Sundaram, Thomas Brox, and Kurt Keutzer</i>	
Improving Data Association by Joint Modeling of Pedestrian Trajectories and Groupings	452
<i>Stefano Pellegrini, Andreas Ess, and Luc Van Gool</i>	
Globally Optimal Multi-target Tracking on a Hexagonal Lattice	466
<i>Anton Andriyenko and Konrad Schindler</i>	
Discriminative Spatial Attention for Robust Tracking	480
<i>Jialue Fan, Ying Wu, and Shengyang Dai</i>	
Object, Scene and Actions: Combining Multiple Features for Human Action Recognition	494
<i>Nazli Ikizler-Cinbis and Stan Sclaroff</i>	
Representing Pairwise Spatial and Temporal Relations for Action Recognition	508
<i>Pyry Matikainen, Martial Hebert, and Rahul Sukthankar</i>	
Compact Video Description for Copy Detection with Precise Temporal Alignment	522
<i>Matthijs Douze, Hervé Jégou, Cordelia Schmid, and Patrick Pérez</i>	
Modeling the Temporal Extent of Actions	536
<i>Scott Satkin and Martial Hebert</i>	
Content-Based Retrieval of Functional Objects in Video Using Scene Context	549
<i>Sangmin Oh, Anthony Hoogs, Matthew Turek, and Roderic Collins</i>	

Anomalous Behaviour Detection Using Spatiotemporal Oriented Energies, Subset Inclusion Histogram Comparison and Event-Driven Processing	563
<i>Andrei Zaharescu and Richard Wildes</i>	
Tracklet Descriptors for Action Modeling and Video Analysis	577
<i>Michalis Raptis and Stefano Soatto</i>	
Word Spotting in the Wild	591
<i>Kai Wang and Serge Belongie</i>	
A Stochastic Graph Evolution Framework for Robust Multi-target Tracking	605
<i>Bi Song, Ting-Yueh Jeng, Elliot Staudt, and Amit K. Roy-Chowdhury</i>	

Spotlights and Posters M2

Backprojection Revisited: Scalable Multi-view Object Detection and Similarity Metrics for Detections	620
<i>Nima Razavi, Juergen Gall, and Luc Van Gool</i>	
Multiple Instance Metric Learning from Automatically Labeled Bags of Faces	634
<i>Mathieu Guillaumin, Jakob Verbeek, and Cordelia Schmid</i>	
Partition Min-Hash for Partial Duplicate Image Discovery	648
<i>David C. Lee, Qifa Ke, and Michael Isard</i>	
Automatic Attribute Discovery and Characterization from Noisy Web Data	663
<i>Tamara L. Berg, Alexander C. Berg, and Jonathan Shih</i>	
Learning to Recognize Objects from Unseen Modalities	677
<i>C. Mario Christoudias, Raquel Urtasun, Mathieu Salzmann, and Trevor Darrell</i>	
Building Compact Local Pairwise Codebook with Joint Feature Space Clustering	692
<i>Nobuyuki Morioka and Shin'ichi Satoh</i>	
Image-to-Class Distance Metric Learning for Image Classification	706
<i>Zhengxiang Wang, Yiqun Hu, and Liang-Tien Chia</i>	
Extracting Structures in Image Collections for Object Recognition	720
<i>Sandra Ebert, Diane Larlus, and Bernt Schiele</i>	
Size Does Matter: Improving Object Recognition and 3D Reconstruction with Cross-Media Analysis of Image Clusters	734
<i>Stephan Gammeter, Till Quack, David Tingdahl, and Luc Van Gool</i>	

Avoiding Confusing Features in Place Recognition	748
<i>Jan Knopp, Josef Sivic, and Tomas Pajdla</i>	
Semantic Label Sharing for Learning with Many Categories	762
<i>Rob Fergus, Hector Bernal, Yair Weiss, and Antonio Torralba</i>	
Efficient Object Category Recognition Using Classemes	776
