This volume contains the proceedings of the 11th International Conference on Logic Programming and Nonmonotonic Reasoning (LPNMR-11) held during May 16–19, 2011 in Vancouver, British Columbia, Canada.

LPNMR is a forum for exchanging ideas on declarative logic programming, nonmonotonic reasoning and knowledge representation. The aim of the conference is to facilitate interaction between researchers interested in the design and implementation of logic-based programming languages and database systems, and researchers who work in the areas of knowledge representation and nonmonotonic reasoning. LPNMR strives to encompass theoretical and experimental studies that have led or will lead to the construction of practical systems for declarative programming and knowledge representation.

The conference program included invited talks by Chitta Baral, David Pearce, and David Poole, as well as 16 long papers (13 technical papers, 1 application description, and 2 system descriptions) and 26 short papers (16 technical papers, 3 application descriptions, and 7 system descriptions), which were selected by the Program Committee after a thorough reviewing process. The conference also hosted three workshops and the award ceremony of the Third ASP Competition, held and organized prior to the conference by Francesco Calimeri, Giovambattista Ianni, and Francesco Ricca at the University of Calabria, Italy.

We would like to thank the members of the Program Committee and the additional reviewers for their efforts to produce fair and thorough evaluations of the submitted papers, the local Organizing Committee, especially Aaron Hunter and Jiahui Xu, and of course the authors of the scientific papers. Furthermore we are grateful to the sponsors for their generous support: Artificial Intelligence Journal, Pacific Institute of the Mathematical Sciences (PIMS), Association of Logic Programming (ALP), Simon Fraser University, and the University of Calabria. Last, but not least, we thank the people of EasyChair for providing resources and a marvelous conference management system.

March 2011

# Table of Contents

## Invited Talks

Logic, Probability and Computation: Foundations and Issues of Statistical Relational AI ........................................ 1  
*David Poole*

Foundations and Extensions of Answer Set Programming: The Logical Approach ....................................................... 10  
*David Pearce*

Lessons from Efforts to Automatically Translate English to Knowledge Representation Languages ................................. 12  
*Chitta Baral*

## Technical Papers

### Long Technical Papers

Modularity of P-Log Programs ........................................ 13  
*Carlos Viegas Damásio and João Moura*

Symmetry Breaking for Distributed Multi-Context Systems .......... 26  
*Christian Drescher, Thomas Eiter, Michael Fink, Thomas Krennwallner, and Toby Walsh*

Splitting an Argumentation Framework ............................... 40  
*Ringo Baumann*

Reactive Answer Set Programming .................................... 54  
*Martin Gebser, Torsten Grote, Roland Kaminski, and Torsten Schaub*

Communicating ASP and the Polynomial Hierarchy ................. 67  
*Kim Bauters, Steven Schockaert, Dirk Vermeir, and Martine De Cock*

Loop Formulas for Splitable Temporal Logic Programs ............ 80  
*Felicidad Aguado, Pedro Cabalar, Gilberto Pérez, and Concepción Vidal*

Pushing Efficient Evaluation of HEX Programs by Modular Decomposition ......................................................... 93  
*Thomas Eiter, Michael Fink, Giovambattista Ianni, Thomas Krennwallner, and Peter Schüller*
Approximations for Explanations of Inconsistency in Partially Known Multi-Context Systems ........................................... 107
Thomas Eiter, Michael Fink, and Peter Schüller

Relational Information Exchange and Aggregation in Multi-Context Systems ............................................................ 120
Michael Fink, Lucantonio Ghionna, and Antonius Weinzierl

Stepping through an Answer-Set Program ........................................ 134
Johannes Oetsch, Jörg Pührer, and Hans Tompits

Dynamic Magic Sets for Programs with Monotone Recursive Aggregates .............................................................. 148
Mario Alviano, Gianluigi Greco, and Nicola Leone

Strong Equivalence of Logic Programs with Abstract Constraint Atoms ................................................................. 161
Guohua Liu, Randy Goebel, Tomi Janhunen, Ilkka Niemelä, and Jia-Huai You

Back and Forth between Rules and SE-Models .............................. 174
Martin Slota and João Leite

Short Technical Papers

What Are the Necessity Rules in Defeasible Reasoning? ................. 187
Ho-Pun Lam and Guido Governatori

Partial Preferences and Ambiguity Resolution in Contextual Defeasible Logic ............................................................ 193
Antonis Bikakis and Grigoris Antoniou

On Influence and Contractions in Defeasible Logic Programming ...... 199
Diego R. García, Sebastián Gottifredi, Patrick Krümpelmann, Matthias Thimm, Gabriele Kern-Isberner, Marcelo A. Falappa, and Alejandro J. García

Termination of Grounding Is Not Preserved by Strongly Equivalent Transformations .................................................... 205
Yuliya Lierler and Vladimir Lifschitz

Aggregates in Answer Set Optimization ........................................ 211
Emad Saad and Gerhard Brewka

Optimizing the Distributed Evaluation of Stratified Programs via Structural Analysis ................................................. 217
Rosamaria Barilaro, Francesco Ricca, and Giorgio Terracina
Contingency-Based Equilibrium Logic ........................................ 223
   Luis Fariñas del Cerro and Andreas Herzig

Weight Constraints with Preferences in ASP ............................. 229
   Stefania Costantini and Andrea Formisano

Parametrized Equilibrium Logic ........................................... 236
   Ricardo Gonçalves and José Júlio Alferes

Random vs. Structure-Based Testing of Answer-Set Programs:
   An Experimental Comparison ........................................... 242
   Tomi Janhunen, Ilkka Niemelä, Johannes Oetsch, Jörg Pührer, and
   Hans Tompits

Integrating Rules and Ontologies in the First-Order Stable Model
   Semantics (Preliminary Report) ........................................ 248
   Joohyung Lee and Ravi Palla

Gentzen-Type Refutation Systems for Three-Valued Logics with an
   Application to Disproving Strong Equivalence ....................... 254
   Johannes Oetsch and Hans Tompits

New Semantics for Epistemic Specifications .............................. 260
   Michael Gelfond

cMUS: A Tool for Circumscription-Based MUS Membership
   Testing ........................................................................ 266
   Mikoláš Janota and Joao Marques-Silva

Transaction Logic with External Actions ................................. 272
   Ana Sofia Gomes and José Júlio Alferes

An Application of Clasp in the Study of Logics ......................... 278
   Mauricio Osorio, José Luis Carballido, and Claudia Zepeda

Application Descriptions

Long Application Description

Industrial-Size Scheduling with ASP+CP ................................ 284
   Marcello Balduccini

Short Application Descriptions

Secommunity: A Framework for Distributed Access Control .......... 297
   Steve Barker and Valerio Genovese
Itemset Mining as a Challenge Application for Answer Set Enumeration .................................................... 304
  Matti Järvisalo

Causal Reasoning for Planning and Coordination of Multiple Housekeeping Robots .................................................... 311
  Erdi Aker, Ahmetcan Erdogan, Esra Erdem, and Volkan Patoglu

System Descriptions

Long System Descriptions

ASPIDE: Integrated Development Environment for Answer Set Programming .................................................... 317
  Onofrio Febbraro, Kristian Reale, and Francesco Ricca

ASP-Prolog for Negotiation among Dishonest Agents .................. 331
  Ngoc-Hieu Nguyen, Tran Cao Son, Enrico Pontelli, and Chiaki Sakama

Short System Descriptions

Advances in gringo Series 3 ........................................ 345
  Martin Gebser, Roland Kaminski, Arne König, and Torsten Schaub

A Portfolio Solver for Answer Set Programming: Preliminary Report ... 352
  Martin Gebser, Roland Kaminski, Benjamin Kaufmann, Torsten Schaub, Marius Thomas Schneider, and Stefan Ziller

plasp: A Prototype for PDDL-Based Planning in ASP ................ 358
  Martin Gebser, Roland Kaminski, Murat Knecht, and Torsten Schaub

Cluster-Based ASP Solving with claspar ............................ 364
  Martin Gebser, Roland Kaminski, Benjamin Kaufmann, Torsten Schaub, and Bettina Schnor

STeLP – A Tool for Temporal Answer Set Programming ............... 370
  Pedro Cabalar and Martín Diéguez

Compiling Answer Set Programs into Event-Driven Action Rules....... 376
  Neng-Fa Zhou, Yi-Dong Shen, and Jia-Huai You

VIDEAS: A Development Tool for Answer-Set Programs Based on Model-Driven Engineering Technology ....................... 382
  Johannes Oetsch, Jörg Pührer, Martina Seidl, Hans Tompits, and Patrick Zwickl
ASP Competition

The Third Answer Set Programming Competition: Preliminary Report of the System Competition Track ........................................ 388
Francesco Calimeri, Giovambattista Ianni, Francesco Ricca,
Mario Alviano, Annamaria Bria, Gelsomina Catalano,
Susanna Cozza, Wolfgang Faber, Onofrio Febbraro,
Nicola Leone, Marco Manna, Alessandra Martello, Claudio Panetta,
Simona Perri, Kristian Reale, Maria Carmela Santoro,
Marco Sirianni, Giorgio Terracina, and Pierfrancesco Veltri

Author Index .......................................................... 405
