The predecessor of CEE-SET was the Polish Conference on Software Engineering, KKIO, organized annually since 1999. In 2006 KKIO changed to an international conference on Software Engineering Techniques SET 2006 sponsored by Technical Committee 2 (Software: Theory and Practice) of the International Federation for Information Processing, IFIP [http://www.ifip.org/]. In 2007 the conference got a new name: IFIP TC2 Central and East-European Conference on Software Engineering Techniques, CEE-SET. In 2008 the conference took place in Brno, Czech Republic, and lasted for three days, October 13–15, 2008 (the details are on the conference website http://www.cee-set.put.poznan.pl/2008/). The conference aim was to bring together software engineering researchers and practitioners, mainly from Central and East-European countries (but not only), and to allow them to share their ideas and experiences.

The conference was technically sponsored by:

– IFIP Technical Committee 2, Software: Theory and Practice
– Czech Society for Cybernetics and Informatics (CSKI)
– Gesellschaft für Informatik, Special Interest Group Software Engineering
– John von Neumann Computer Society (NJSZT), Hungary
– Lithuanian Computer Society
– Polish Academy of Sciences, Committee for Informatics
– Polish Information Processing Society
– Slovak Society for Computer Science

The financial support was provided by Visegrad Fund, CSKI, and Brno University of Technology.

The conference program consisted of three keynote speeches given by Krzysztof Czarnecki (University of Waterloo, Canada), Thomas Gschwind (IBM Zurich Research Lab, Switzerland), and Mauro Pezz (University of Milano Bicocca, Italy), 21 regular presentations selected from 69 submissions (success rate was about 30%), and 20 work-in-progress presentations.

The International Program Committee decided that the Best Paper Award would be presented to: Łukasz Olek, Jerzy Nawrocki and Miroslaw Ochodek for the paper “Enhancing Use Cases with Screen Designs.”

This volume contains a keynote speech by Thomas Gschwind and regular presentations given at the conference. We believe that publishing these high-quality papers will support a wider discussion on software engineering techniques.

Janis Osis Riga Technical University, Latvia
Erhard Ploedereder University of Stuttgart, Germany
Saulius Ragaisis Vilnius University, Lithuania
Felix Redmill Newcastle University, UK
Marek Rychlý Brno University of Technology, Czech Republic
Krzysztof Sacha Warsaw University of Technology, Poland
Wilhelm Schaefer University of Paderborn, Germany
Giancarlo Succi Free University of Bolzano-Bozen, Italy
Tomasz Szmuc AGH University of Science and Technology, Poland
Marcin Szpyrka AGH University of Science and Technology, Poland
Andrey Terekhov St. Petersburg State University, Russia
Richard Torkar Blekinge Institute of Technology, Sweden
Corrado Aaron Visaggio University of Sannio, Italy
Tomas Vojnar Brno University of Technology, Czech Republic
Bartosz Walter Poznań University of Technology, Poland
Jaroslav Zendulka Brno University of Technology, Czech Republic
Krzysztof Zielinski AGH University of Science and Technology, Poland

Additional Reviewers

Adamek, Jiri Bleul, Steffen Fryzlewicz, Zbigniew Gall, Dariusz Habermehl, Peter Henkler, Stefan Hirsch, Martin Holik, Lukas Khan, Mohammad Ullah Krena, Bohuslav Letko, Zdenek Michalik, Bartosz Ochodek, Mirosław Parizek, Pavel Reichle, Roland Skubch, Hendrik Sudmann, Oliver von Detten, Markus Vranic, Valentino
# Table of Contents

## Keynote
Towards a Compiler for Business-IT Systems: A Vision Statement
Complemented with a Research Agenda........................................... 1

*Jana Koehler, Thomas Gschwind, Jochen Küster,*
*Hagen Völzer, and Olaf Zimmermann*

## Requirements Specification
Towards Use-Cases Benchmark .................................................. 20

*Bartosz Alchimowicz, Jakub Jurkiewicz, Jerzy Nawrocki, and*
*Miroslaw Ochodek*

Automated Generation of Implementation from Textual System
Requirements.................................................................................... 34

*Jan Franců and Petr Hnětynka*

Enhancing Use Cases with Screen Designs....................................... 48

*Lukasz Olek, Jerzy Nawrocki, and Miroslaw Ochodek*

## Design
Mining Design Patterns from Existing Projects Using Static and
Run-Time Analysis........................................................................... 62

*Michal Dobiš and L'ubomír Majtás*

Transformational Design of Business Processes for SOA.................. 76

*Andrzej Ratkowski and Andrzej Zalewski*

Service-Based Realization of Business Processes Driven by Control-Flow
Patterns............................................................................................. 91

*Petr Weiss*

## Modeling
SMA—The Smyle Modeling Approach............................................. 103

*Benedikt Bollig, Joost-Pieter Katoen, Carsten Kern, and*
*Martin Leucker*
