Formal Methods: Foundations and Applications

14th Brazilian Symposium, SBMF 2011
São Paulo, Brazil, September 26-30, 2011
Revised Selected Papers

Springer
Preface

This volume contains the papers presented at SBMF 2011: the 14th Brazilian Symposium on Formal Methods. The conference was held in the city of São Paulo, Brazil, colocated with CBSoft 2011, the Second Brazilian Conference on Software: Theory and Practice.

The conference program included two invited talks, given by Catuscia Palamidessi (INRIA Saclay, France) and John Harrison (Intel Corporation, USA).

A total of 13 research papers were presented at the conference and are included in this volume; they were selected from 37 submissions. The submissions came from 12 countries: Algeria, Brazil, China, Finland, France, Germany, India, Ireland, Malaysia, Portugal, Spain, the UK and the USA. There were also sessions specially devoted to a track of short papers, and these are published separately as a technical report including papers describing work in progress.

The deliberations of the Program Committee and the preparation of these proceedings were handled by EasyChair, which indeed made our lives much easier.

We are grateful to the Program Committee, and the additional reviewers, for their hard work in evaluating submissions and suggesting improvements. SBMF 2011 was organized by Escola de Artes, Ciências e Humanidades da Universidade de São Paulo (EACH/USP) and Faculdade de Computação e Informática da Universidade Presbiteriana Mackenzie (FCI/Mackenzie) under the auspices of the Brazilian Computer Society (SBC). We are very thankful to the organizers of this year’s conference, Fatima L.S. Nunes Marques (EACH/USP) and Ana Cristina Vieira de Melo (IME/USP), and we are specially thankful to CBSoft 2011’s organizers Marcelo Fantinato (EACH/USP) and Luciano Silva (FCI/Mackenzie), who arranged everything and made the conference run smoothly.

The conference was sponsored by the following organizations, which we thank for their generous support:

- CNPq, the Brazilian Scientific and Technological Research Council
- CAPES, the Brazilian Higher Education Funding Council
- FAPESP, São Paulo Research Foundation
- Google Inc.
- Universidade de São Paulo
- Universidade Presbiteriana Mackenzie

August 2011

# Table of Contents

Model Transformation and Induced Instance Migration: A Universal Framework ................................................................. 1  
  Harald König, Michael Löwe, and Christoph Schulz

SPARKSkein: A Formal and Fast Reference Implementation of Skein ... 16  
  Roderick Chapman, Eric Botcazou, and Angela Wallenburg

Full Abstraction at Package Boundaries of Object-Oriented Languages .................................................................................. 28  
  Yannick Welsch and Arnd Poetzsch-Heffter

B to CSP Migration: Towards a Formal and Automated Model-Driven Engineering of Hardware/Software Co-design ............. 44  
  Marcel Vinicius Medeiros Oliveira, David B.P. Déharbe, and Luís C.D.S. Cruz

Simulation and Verification of Synchronous Set Relations in Rewriting Logic ........................................................................... 60  
  Camilo Rocha and César Muñoz

PiStache: Implementing π-Calculus in Scala ........................................... 76  
  Pedro Matiello and Ana C.V. de Melo

Sound and Complete Abstract Graph Transformation ............................ 92  
  Dominik Steenken, Heike Wehrheim, and Daniel Wonisch

  Christiano Braga, Roberto Menezes, Thiago Comicio, Cassio Santos, and Edson Landim

Modular Embedding of the Object Constraint Language into a Programming Language ......................................................... 124  
  Fabian Büttner and Martin Gogolla

Algebra of Monotonic Boolean Transformers ........................................... 140  
  Viorel Preoteasa

Behavioural Preservation in Fault Tolerant Patterns ............................... 156  
  Diego Machado Dias and Juliano Manabu Iyoda
