# Preface

International Conference on Computational Intelligence and Information Technology (CIIT 2011), sponsored and organized by The Association of Computer Electronics and Electrical Engineers (ACEEE), was held during November 7–8, 2011, in Pune, India. The mission of the CIIT conference is to bring together innovative academics and industrial experts in the field of computer science, information technology, computational engineering, mobile communication and security to a common forum, where a constructive dialog on theoretical concepts, practical ideas and results of the state of the art can be developed. In addition, the participants of the symposium have a chance to hear from renowned keynote speakers.

CIIT 2011 received 483 submissions overall. Only 157 papers were accepted and registered for these proceedings. We thank Alfred Hofmann, for the constant support and guidance in publishing the proceedings in the Springer CCIS series. We would like to express our gratitude to the Springer LNCS-CCIS editorial team, especially Leonie Kunz, for producing such a wonderful quality proceedings book.

The conference would not be successful without the help of so many people. First, we would like to express our deep gratitude to Janahanlal Stephen, Yogesh Chaba, and Gylson Thomas. Together with their Program Committee, they assembled a strong program from submissions and invited papers. We would like to thank the Program Chairs, organization staff, and the members of the Program Committees for their hard work. We would like to thank all our colleagues who served on different committees and acted as reviewers to identify the set of high-quality research papers presented at CIIT 2011.
