Foreword

Grid and distributed computing is an area that attracts many professionals from academia and industry for research and development. The goal of the GDC conference is to bring together researchers from academia and industry as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of grid and distributed computing.

We would like to express our gratitude to all of the authors of submitted papers and to all attendees for their contributions and participation.

We acknowledge the great effort of all the Chairs and the members of Advisory Boards and Program Committees of the above-listed event. Special thanks go to SERSC (Science and Engineering Research Support Society) for supporting this conference.

We are grateful in particular to the speakers who kindly accepted our invitation and, in this way, helped to meet the objectives of the conference.

December 2011

Chairs of GDC 2011
Preface

We would like to welcome you to the proceedings of the 2011 Grid and Distributed Computing (GDC 2011) Conference—one of the partnering events of the Third International Mega-Conference on Future-Generation Information Technology (FGIT 2011) held during December 8–10, 2011, at Jeju Grand Hotel, Jeju Island, Korea.

GDC 2011 focused on various aspects of advances in grid and distributed computing. It provided a chance for academic and industry professionals to discuss recent progress in the related areas. We expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.

We would like to acknowledge the great efforts of the GDC 2011 International Advisory Board, Special Session Organizers, as well as all the organizations and individuals who supported the idea of publishing this volume of proceedings, including the SERSC and Springer.

We are grateful to the following keynote, plenary and tutorial speakers who kindly accepted our invitation: Hsiao-Hwa Chen (National Cheng Kung University, Taiwan), Hamid R. Arabnia (University of Georgia, USA), Sabah Mohammed (Lakehead University, Canada), Ruay-Shiung Chang (National Dong Hwa University, Taiwan), Lei Li (Hosei University, Japan), Tadashi Dohi (Hiroshima University, Japan), Carlos Ramos (Polytechnic of Porto, Portugal), Marcin Szczuka (The University of Warsaw, Poland), Gerald Schaefer (Loughborough University, UK), Jinan Fiaidhi (Lakehead University, Canada) and Peter L. Stanchev (Kettering University, USA), Shusaku Tsumoto (Shimane University, Japan), Jemal H. Abawajy (Deakin University, Australia).

We would like to express our gratitude to all of the authors and reviewers of submitted papers and to all attendees, for their contributions and participation, and for believing in the need to continue this undertaking in the future.

Last but not the least, we give special thanks to Ronnie D. Caytiles and Yvette E. Gelogo of the graduate school of Hannam University, who contributed to the editing process of this volume with great passion.

This work was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government.

Table of Contents

Appropriate Education to Improve Computer-Aided Patient Record Ability for Apprentice Doctors ........................................... 1
   Seong-Ran Lee and Kwang-Hwan Kim

An Image Processing for Omnidirectional Image Based on the Bresenham Raster Algorithm .................................................. 8
   Jin Shin and Soo-Yeong Yi

A Novel Half-Bridge Resonant Inverter for CCFL-Driving ............. 17
   Gang-Youl Jeong

Quorum Based Mutual Exclusion in Asynchronous Systems with Unreliable Failure Detectors .................................................. 25
   Sung-Hoon Park and Seon-Hyong Lee

Location Prediction for Grid-Based Geographical Routing in Vehicular Ad-Hoc Networks ...................................................... 35
   Si-Ho Cha and Keun-Wang Lee

Hybrid Routing Algorithm Considering Moving Direction of Vehicles in VANETs .............................................................. 42
   Min-Woo Ryu, Si-Ho Cha, Keun-Wang Lee, and Kuk-Hyun Cho

Development of an Active Ranging System Based on Structured Light Image for Mobile Robot Application ...................... 49
   Jin Shin and Soo-Yeong Yi

A Study on Fault Analysis of Wind Power (DFIG) in Distribution Systems Based on the PSCAD/EMTDC ............................... 59
   Jintaek Jeon, Joonho Son, Munseok Lee, Munkbaht, and Dae-seok Rho

Poor Periodontal Health in Type 1 Diabetic Youth ....................... 67
   Ji-Hye Park, Youn-Hee Choi, Cheol-Woo Ko, Heung-Sik Kim, Sang-Gyu Lee, Hyung-Gyoo Kim, and Keun-Bae Song

Performance Evaluation of MapReduce Applications on Cloud Computing Environment, FutureGrid ........................................... 77
   Yunhee Kang and Geoffrey C. Fox

Development of Evaluation Simulator of New Power Sources Using the LabVIEW Software ................................................. 87
   Kyung-Sang Ryu, Byung-ki Kim, Suk-hwan Song, Seob-han Kim, and Dae-Seok Rho
