Multimedia Communications, Services and Security

5th International Conference, MCSS 2012
Krakow, Poland, May 31–June 1, 2012
Proceedings
Preface

The 5th Conference on Multimedia Communications, Services and Security, MCSS 2012, reflected the growing number of applications of innovative ICT technologies in the area of public security.

Of special importance are the technologies and applications which help to increase the privacy of citizens and to protect sensitive data. The conference continues to present research and development activities contributing to theoretical and experimental aspects of the considered domain.

The following areas were of main interest at MCSS 2012:

- Privacy and data protection using digital watermarking and other technologies
- Object and threat detection
- Data protection and distribution
- Human—centric multimedia analysis and synthesis
- Cybercrime—threats detection and counteracting

Similarly to the previous editions of the conference, oral sessions were accompanied by demonstration and poster sessions. Demonstration sessions at MCSS are a very good opportunity to present and discuss the outcomes and solutions of the performed research and to experience in practice the emerging implementations and research prototypes.

The conference was again an occasion for the exchange of knowledge among specialists involved in multimedia and security research.

May 2012
Andrzej Dziech
The International Conference on Multimedia Communications, Services and Security (MCSS 2012) was organized by the AGH University of Science and Technology in the scope of and under the auspices of the INDECT project.

Table of Contents

Web-Based Knowledge Acquisition and Management System Supporting Collaboration for Improving Safety in Urban Environment ................................................................. 1
Weronika T. Adrian, Przemysław Ciężkowski, Krzysztof Kacoz, Antoni Ligęza, and Grzegorz J. Nalepa

Unsupervised Feature Selection for Spherical Data Modeling: Application to Image-Based Spam Filtering ................................................................. 13
Ola Amayri and Nizar Bouguila

Classification of Malware Network Activity ................................................................. 24
Gilles Berger-Sabbatel and Andrzej Duda

Analysis of Impact of Lossy Audio Compression on the Robustness of Watermark Embedded in the DWT Domain for Non-blind Copyright Protection ................................................................. 36
Piotr Czyżyk, Janusz Cichowski, Andrzej Czyżewski, and Bożena Kostek

Platon Scientific HD TV Platform in PIONIER Network ................................................................. 47
Mirosław Czyrnek, Jędrzej Jajor, Ewa Kusmierek, Cezary Mazurek, Maciej Stroiński, and Jan Weglarz

Multi-camera Vehicle Tracking Using Local Image Features and Neural Networks ................................................................. 58
Piotr Dalka

Polish Speech Dictation System as an Application of Voice Interfaces ................. 68
Grażyna Demenko, Robert Cecko, Marcin Szymański, Mariusz Owsiany, Piotr Francuzik, and Marek Lange

Latent Semantic Analysis Evaluation of Conceptual Dependency Driven Focused Crawling ................................................................. 77
Krzysztof Dorosz and Michał Korzycki

Speaker Recognition Based on Multilevel Speech Signal Analysis on Polish Corpus ................................................................. 85
Szymon Drgas and Adam Dabrowski

Face Detection and Facial Expression Recognition Using a Novel Variational Statistical Framework ................................................................. 95
Wentao Fan and Nizar Bouguila
