Preface

This book contains a brief overview of selected works presented at the “X Meeting on Diamond, Amorphous Carbon, Nanotubes and related Materials” held at Pelotas-RS- Brazil, June 2011. This book remarks the advances occurring since the past decade to date and presents good perspectives of future research in the carbon nanotube field.

On behalf of the organizer committee, we would like to thank the authors who produced excellent chapters from which the readers interested in carbon nanotubes and related materials will greatly benefit, and to Springer-Verlag for cooperating with us in implanting this project. We also acknowledge the financial support from the Brazilian funding agencies CNPq and FAPERGS.
