Preface

The 2012 International Conference on Web Information Systems and Mining (WISM 2012) was held during October 26–28, 2012 in Chengdu, China. WISM 2012 received 418 submissions from 10 countries and regions. After rigorous reviews, 87 high-quality papers were selected for publication in the WISM 2012 proceedings. The acceptance rate was 21%.

The aim of WISM 2012 was to bring together researchers working in many different areas of web information systems and web mining to exchange new ideas and promote international collaboration. In addition to the large number of submitted papers and invited sessions, there were several internationally well-known keynote speakers.

On behalf of the Organizing Committee, we thank Xihua University and Leshan Normal University for its sponsorship and logistics support. We also thank the members of the Organizing Committee and the Program Committee for their hard work. We are very grateful to the keynote speakers, session chairs, reviewers, and student helpers. Last but not least, we thank all the authors and participants for their great contributions that made this conference possible.
