Computing Nature
Turing Centenary Perspective

Springer
Contents

Computing Nature

Computing Nature – A Network of Networks of Concurrent Information
Processes ................................................................. 1
Gordana Dodig-Crnkovic, Raffaela Giovagnoli

A Framework for Computing like Nature .......................... 23
Ron Cottam, Willy Ranson, Roger Vounckx

The Coordination of Probabilistic Inference in Neural Systems .... 61
William A. Phillips

Neurobiological Computation and Synthetic Intelligence .......... 71
Craig A. Lindley

A Behavioural Foundation for Natural Computing and a
Programmability Test ..................................................... 87
Hector Zenil

Alan Turing’s Legacy: Info-Computational Philosophy of Nature .... 115
Gordana Dodig-Crnkovic

Dualism of Selective and Structural Manifestations of Information in
Modelling of Information Dynamics ................................ 125
Marcin J. Schroeder

Intelligence and Reference: Formal Ontology of the Natural
Computation .............................................................. 139
Gianfranco Basti

Representation, Analytic Pragmatism and AI ........................ 161
Raffaela Giovagnoli
Salient Features and Snapshots in Time: An Interdisciplinary Perspective on Object Representation .................................................. 171
Veronica E. Arriola-Rios, Zoe P. Demery, Jeremy Wyatt, Aaron Sloman, Jackie Chappell

Toward Turing’s A-Type Unorganised Machines in an Unconventional Substrate: A Dynamic Representation in Compartmentalised Excitable Chemical Media .................................................. 185
Larry Bull, Julian Holley, Ben De Lacy Costello, Andrew Adamatzky

Learning to Hypercompute? An Analysis of Siegelmann Networks ........ 201
Keith Douglas

Oracle Hypermachines Faced with the Verification Problem .............. 213
Florent Franchette

Does the Principle of Computational Equivalence Overcome the Objections against Computationalism? .............................. 225
Alberto Hernández-Espinosa, Francisco Hernández-Quiroz

Some Constraints on the Physical Realizability of a Mathematical Construction ............................................................. 235
Francisco Hernández-Quiroz, Pablo Padilla

From the Closed Classical Algorithmic Universe to an Open World of Algorithmic Constellations .......................................... 241
Mark Burgin, Gordana Dodig-Crnkovic

What Makes a Computation Unconventional? ............................ 255
S. Barry Cooper

Author Index ........................................................................... 271
