Foreword

INTERACT 2013 was the 14th of a series of INTERACT international conferences supported by the International Federation for Information Processing (IFIP) Technical Committee 13 on Human–Computer Interaction.

This year, INTERACT was held in Cape Town (South Africa), organized by the Nelson Mandela Metropolitan University (Port Elizabeth) and the Meraka Institute of Council for Scientific and Industrial Research (Pretoria) in collaboration with the University of Cape Town.

The Conference theme for INTERACT 2013, “Designing for Diversity,” recognizes the interdisciplinary, multidisciplinary and intercultural spirit of human–computer interaction (HCI) research and practice. The conference welcomes research and reports of practice that acknowledge diverse disciplines, abilities, cultures, and societies, and that address both the technical and social aspects of HCI. Within the broad umbrella of HCI, the conference sought contributions addressing new and emerging HCI disciplines, bridging cultural differences, and tackling important social problems.

Like its predecessors, INTERACT 2013 highlighted, to both the academic and the industrial world, the importance of the HCI discipline and its most recent breakthroughs on current applications. Both experienced HCI researchers and professionals, as well as newcomers to the HCI field, interested in designing or evaluating interactive software, developing new interaction technologies, or investigating overarching theories of HCI, found in INTERACT 2013 an exciting forum for communication with people of similar interests, to encourage collaboration and to learn.

INTERACT 2013 brought the conference to South Africa and Africa for the very first time. The African tradition of HCI focuses very much on the human and social aspects of HCI, recognizing the diversity of its people and the circumstance in which they go about their everyday lives. We hope that INTERACT 2013 will be remembered as a conference that brought the diversity of HCI research to the forefront, making the computerized world a better place for all, regardless of where they come from.

INTERACT 2013 took place 29 years after the first INTERACT held in September 1984 in London, UK. The IFIP Technical Committee 13 aims to develop the science and technology of the interaction between humans and computing devices through different Working Groups and Special Interests Groups, all of which, together with their officers, are listed within these proceedings.

We thank all the authors who chose INTERACT 2013 as the venue to publish their research. This was again an outstanding year for the conference in terms of submissions in all the technical categories, especially since the conference moved away from the traditional predominantly European venues. In total, we received 639 submissions. Of these, 270 submissions were accepted:

- 128 as full research papers
- 77 as short research papers
- 31 as interactive posters
- 2 as industrial programme papers
- 4 as panels
- 1 as a special interest group
- 1 as a tutorial
- 9 as workshops
- 9 to the African Masters Consortium
- 8 to the Doctoral Consortium

The acceptance rate for the full and short research papers was 31% and 45%, respectively.

A Programme Committee meeting consisting of the Technical Programme Chairs and the Track Chairs, as well as member of IFIP Technical Committee 13, preceded the final decision on which submissions to accept. This powerful effort was only possible thanks to the diligent work of many people. Our sincere gratitude goes to the almost 700 members of our International Programme Committee who willingly assisted and ensured the high quality of the INTERACT Conference papers was properly maintained. Although some people had to be bullied into reviewing (sorry about that), everyone submitted their reviews on time without a murmur of complaint. Thank you all for the effort that you so obviously put into this task. A special thank you must go to our Track Chairs, who put in a tremendous amount of work to ensure that quality was maintained throughout.

In addition, we have to thank the members of the Organizing Committee, the staff at the Council for Industrial and Scientific Research, Nelson Mandela Metropolitan University and the University of Cape Town for their unflagging assistance with all aspects of planning and managing the many administrative and organizational issues. We also have to thank our student volunteers for making sure that everything ran smoothly at the conference itself.

Finally, we wish to express a special thank you to the Proceedings Publication Chair, Marco Winckler, who painstakingly put this volume together.

September 2013

IFIP TC13

Established in 1989, the International Federation for Information Processing Technical Committee on Human-Computer Interaction (IFIP TC13) is an international committee of 30 member national societies and seven Working Groups, representing specialists in human factors, ergonomics, cognitive science, computer science, design, and related disciplines. INTERACT is its flagship conference, staged biennially in different countries in the world.

IFIP TC13 aims to develop the science and technology of human-computer interaction (HCI) by encouraging empirical research, promoting the use of knowledge and methods from the human sciences in design and evaluation of computer systems; promoting better understanding of the relationship between formal design methods and system usability and acceptability; developing guidelines, models and methods by which designers may provide better human-oriented computer systems; and, cooperating with other groups, inside and outside IFIP, to promote user-orientation and humanization in system design. Thus, TC13 seeks to improve interactions between people and computers, encourage the growth of HCI research, and disseminate these benefits worldwide.

The main orientation is toward users, especially the non-computer professional users, and how to improve human-computer relations. Areas of study include: the problems people have with computers; the impact on people in individual and organizational contexts; the determinants of utility, usability, and acceptability; the appropriate allocation of tasks between computers and users; modeling the user to aid better system design; and harmonizing the computer to user characteristics and needs.

While the scope is thus set wide, with a tendency toward general principles rather than particular systems, it is recognized that progress will only be achieved through both general studies to advance theoretical understanding and specific studies on practical issues (e.g., interface design standards, software system consistency, documentation, appropriateness of alternative communication media, human factors guidelines for dialogue design, the problems of integrating multimedia systems to match system needs and organizational practices, etc.).

In 1999, TC13 initiated a special IFIP Award, the Brian Shackel Award, for the most outstanding contribution in the form of a refereed paper submitted to and delivered at each INTERACT. The award draws attention to the need for a comprehensive human-centered approach in the design and use of information technology in which the human and social implications have been taken into account. Since the process to decide the award takes place after papers are submitted for publication, the award is not identified in the proceedings.

IFIP TC13 stimulates working events and activities through its Working Groups (WGs) and Special Interest Groups (SIGs). WGs and SIGs consist of HCI experts from many countries, who seek to expand knowledge and find solutions to HCI issues and concerns within their domains, as outlined below.

- WG13.1 (Education in HCI and HCI Curricula) aims to improve HCI education at all levels of higher education, coordinate and unite efforts to develop HCI curricula and promote HCI teaching.
- WG13.2 (Methodology for User-Centered System Design) aims to foster research, dissemination of information and good practice in the methodical application of HCI to software engineering.
- WG13.3 (HCI and Disability) aims to make HCI designers aware of the needs of people with disabilities and encourage development of information systems and tools permitting adaptation of interfaces to specific users.
- WG13.4 (also WG2.7) (User Interface Engineering) investigates the nature, concepts and construction of user interfaces for software systems, using a framework for reasoning about interactive systems and an engineering model for developing user interfaces.
- WG13.5 (Human Error, Safety and System Development) seeks a framework for studying human factors relating to systems failure, develops leading-edge techniques in hazard analysis and safety engineering of computer-based systems, and guides international accreditation activities for safety-critical systems.
- WG13.6 (Human-Work Interaction Design) aims at establishing relationships between extensive empirical work-domain studies and HCI design. It will promote the use of knowledge, concepts, methods and techniques that enable user studies to procure a better apprehension of the complex interplay between individual, social and organizational contexts and thereby a better understanding of how and why people work in the ways that they do.
- WG13.7 (Human-Computer Interaction and Visualization) is the newest of the working groups under the TC13. It aims to establish a study and research program that will combine both scientific work and practical applications in the fields of HCI and visualization. It will integrate several additional aspects of further research areas, such as scientific visualization, data mining, information design, computer graphics, cognition sciences, perception theory, or psychology, into this approach.
- SIG 13.1 (HCI and International Development) aims to promote the application of interaction design research, practice and education to address the needs, desires and aspirations of people in the developing world; support and develop the research, practice and education capabilities of HCI institutions and organizations based in the developing world; develop links between the HCI community in general, and IFIP TC13 in particular, with other relevant communities involved in development, especially IFIP WG 9.4 Computers in Developing Countries.

- SIG 13.2 (Interaction Design and Children) aims to provide a forum for all things relating to interaction design and HCI where the intended users or appropriators of the technology or service are children. The definition of children is broad rather than narrow, including toddlers and teenagers, but the core work, currently at least, is with children in junior schools.

New Working Groups and Special Interest Groups are formed as areas of significance to HCI arise. Further information is available at the IFIP TC13 website: <http://www.tc13.org>

Table of Contents – Part III

Long and Short Papers (Continued)

Mobile Usage and Techniques

- Designing Mobile Phone Interfaces for Age Diversity in South Africa:
“One-World” Versus Diverse “Islands” 1
Karen Renaud, Rénette Blignaut, and Isabella Venter
- PointerPhone: Using Mobile Phones for Direct Pointing Interactions
with Remote Displays 18
Julian Seifert, Andreas Bayer, and Enrico Rukzio
- Situating Asynchronous Voice in Rural Africa 36
Nicola J. Bidwell and Masbulele Jay Siya

Mobile UX and Privacy Concerns

- A Field Trial on Mobile Crowdsourcing of News Content: Factors
Influencing Participation 54
Heli Vääätäjä, Esa Sirkkunen, and Mari Ahvenainen
- Nudging People Away from Privacy-Invasive Mobile Apps through
Visual Framing 74
Eun Kyoung Choe, Jaeyeon Jung, Bongshin Lee, and Kristie Fisher
- The Impact of Encumbrance on Mobile Interactions 92
Alexander Ng, Stephen A. Brewster, and John Williamson

Model-Based User Interface Design

- Conception of Ambiguous Mapping and Transformation Models 110
*Christopher Martin, Matthias Freund, Henning Hager, and
Annerose Braune*
- Model Assisted Creativity Sessions for the Design of Mixed Interactive
Systems: A Protocol Analysis 126
Christophe Bortolaso and Emmanuel Dubois
- Model-Based Self-explanatory UIs for Free, but Are They Valuable? 144
*Alfonso García Frey, Gaëlle Calvary, Sophie Dupuy-Chessa, and
Nadine Mandran*

Multimodal User Interface Design

Comparing Input Modalities for Peripheral Interaction: A Case Study on Peripheral Music Control	162
<i>Doris Hausen, Hendrik Richter, Adalie Hemme, and Andreas Butz</i>	
Linetic: Technical, Usability and Aesthetic Implications of a Ferrofluid-Based Organic User Interface	180
<i>Jeffrey Tzu Kwan Valino Koh, Kasun Karunanayaka, and Ryohei Nakatsu</i>	
When Paper Meets Multi-touch: A Study of Multi-modal Interactions in Air Traffic Control	196
<i>Cheryl Savery, Christophe Hurter, Rémi Lesbordes, Maxime Cordeil, and T.C. Nicholas Graham</i>	

Multimodality, Cross-Platform Studies

3D Visualization and Multimodal Interaction with Temporal Information Using Timelines	214
<i>Giannis Drossis, Dimitris Grammenos, Ilia Adami, and Constantine Stephanidis</i>	
Activity Theory as a Tool for Identifying Design Patterns in Cross-Modal Collaborative Interaction	232
<i>Oussama Metatla, Nick Bryan-Kinns, Tony Stockman, and Fiore Martin</i>	
Cross-Communicability: Evaluating the Meta-communication of Cross-Platform Applications	241
<i>Rodrigo de A. Maués and Simone Diniz Junqueira Barbosa</i>	
On-Line Sketch Recognition Using Direction Feature	259
<i>Wei Deng, Lingda Wu, Ronghuan Yu, and Jiazhe Lai</i>	

Narratives in Design

Beyond Rhetoric to Poetics in IT Invention	267
<i>Annie Gentes and Ted Selker</i>	
Storytelling in Visual Analytics Tools for Business Intelligence	280
<i>Micheline Elias, Marie-Aude Aufaure, and Anastasia Bezerianos</i>	
Using Narrative Research and Portraiture to Inform Design Research	298
<i>Connie Golsteijn and Serena Wright</i>	

Navigation Aids

Hoptrees: Branching History Navigation for Hierarchies	316
<i>Michael Brooks, Jevin D. West, Cecilia R. Aragon, and Carl T. Bergstrom</i>	
User-Centric vs. System-Centric Evaluation of Recommender Systems	334
<i>Paolo Cremonesi, Franca Garzotto, and Roberto Turrin</i>	
Video Navigation with a Personal Viewing History	352
<i>Abir Al-Hajri, Gregor Miller, Sidney Fels, and Matthew Fong</i>	

Novel User Interfaces

A New Approach to Walking in Place	370
<i>Luís Bruno, João Pereira, and Joaquim Jorge</i>	
Disambiguation Canvas: A Precise Selection Technique for Virtual Environments	388
<i>Henrique G. Debarba, Jerônimo G. Grandi, Anderson Maciel, Luciana Nedel, and Ronan Boulic</i>	
Full Semantic Transparency: Overcoming Boundaries of Applications . . .	406
<i>Andrea Kohlhase, Michael Kohlhase, Constantin Jucovschi, and Alexandru Toader</i>	

Passwords: e-Authentication

A Comprehensive Study of the Usability of Multiple Graphical Passwords	424
<i>Soumyadeb Chowdhury, Ron Poet, and Lewis Mackenzie</i>	
Security for Diversity: Studying the Effects of Verbal and Imagery Processes on User Authentication Mechanisms	442
<i>Marios Belk, Christos Fidas, Panagiotis Germanakos, and George Samaras</i>	
Survival of the Shortest: A Retrospective Analysis of Influencing Factors on Password Composition	460
<i>Emanuel von Zezschwitz, Alexander De Luca, and Heinrich Hussmann</i>	
Travel Routes or Geography Facts? An Evaluation of Voice Authentication User Interfaces	468
<i>Alina Hang, Alexander De Luca, Katharina Frison, Emanuel von Zezschwitz, Massimo Tedesco, Marcel Kockmann, and Heinrich Hussmann</i>	

Physical Ergonomics

- Exploring the Use of Distributed Multiple Monitors within an Activity-Promoting Sit-and-Stand Office Workspace 476
Kathrin Probst, David Lindlbauer, Florian Perteneder, Michael Haller, Bernhard Schwartz, and Andreas Schrempf
- Modeless Pointing with Low-Precision Wrist Movements 494
Theophanis Tsandilas, Emmanuel Dubois, and Mathieu Raynal
- Wands Are Magic: A Comparison of Devices Used in 3D Pointing Interfaces 512
Martin Henschke, Tom Gedeon, Richard Jones, Sabrina Caldwell, and Dingyun Zhu

Road Safety

- Assisting the Driver with Distance Estimation: Usability Evaluation of Graphical Presentation Alternatives for Local Traffic Events 520
Angela Mahr, Sandro Castronovo, Rafael Math, and Christian Müller
- Culturally Independent Gestures for In-Car Interactions 538
Sebastian Loehmann, Martin Knobel, Melanie Lamara, and Andreas Butz
- Don't Text While Driving: The Effect of Smartphone Text Messaging on Road Safety during Simulated Driving 546
Kaspar Lyngsie, Martin S. Pedersen, Jan Stage, and Kim F. Vestergaard

Seniors and Usability

- Ageing, Technology Anxiety and Intuitive Use of Complex Interfaces . . . 564
Raghavendra Reddy Gudur, Alethea Blackler, Vesna Popovic, and Doug Mahar
- Emerging Technologies and the Contextual and Contingent Experiences of Ageing Well 582
Toni Robertson, Jeannette Durick, Margot Breerton, Kate Vaisutis, Frank Vetere, Bjorn Nansen, and Steve Howard
- Question-Answer Cards for an Inclusive Micro-tasking Framework for the Elderly 590
Masatomo Kobayashi, Tatsuya Ishihara, Akihiro Kosugi, Hironobu Takagi, and Chieko Asakawa

Social Behaviour, Collaboration and Presence

An Experimental Study of Chinese Shopping Related Sharing Behaviors	608
<i>Min Li, Jun Zhang, Zhengjie Liu, and Graham I. Johnson</i>	
Perceptions of Facebook Privacy and Career Impression Management ...	616
<i>Danielle Pilcer and Andrew Thatcher</i>	
Simplifying Remote Collaboration through Spatial Mirroring	624
<i>Fabian Hennecke, Simon Voelker, Maximilian Schenk, Hauke Schaper, Jan Borchers, and Andreas Butz</i>	
Social Influence from Personalized Recommendations to Trusting Beliefs of Websites: Intermediate Role of Social Presence	632
<i>Yanan Li and Yong Wang</i>	
Social Network Users' Religiosity and the Design of Post Mortem Aspects	640
<i>Cristiano Maciel and Vinicius Carvalho Pereira</i>	

Social Collaborative Interaction

A Tale of Two Puppets, Two Avatars and Two Countries	658
<i>Yoram I. Chisik, Monchu Chen, and M. Clara Correia Martins</i>	
Avalanche! Reanimating Multiple Roles in Child Computer Interaction Design	666
<i>Timo Göttel</i>	
Likeness and Dealbreakers: Interpreting Interpersonal Compatibility from Online Music Profiles	674
<i>Mo Kudeki and Karrie Karahalios</i>	
Paraplay: Exploring Playfulness Around Physical Console Gaming	682
<i>John Downs, Frank Vetere, and Steve Howard</i>	

Social Media

Exploring Twitter Interactions through Visualization Techniques: Users Impressions and New Possibilities	700
<i>Guilherme Coletto Rotta, Vinicius Silva de Lemos, Ana Luiza Moura da Cunha, Isabel Harb Manssour, Milene Selbach Silveira, and André Fagundes Pase</i>	
Helping Me Helping You: Designing to Influence Health Behaviour through Social Connections	708
<i>Noreen Kamal, Sidney Fels, Joanna McGrenere, and Kara Nance</i>	

Who Would Pay for Facebook? Self Esteem as a Predictor of User Behavior, Identity Construction and Valuation of Virtual Possessions . . . 726
Jiaqi Nie and S. Shyam Sundar

Software Development

Authoring Support for Post-WIMP Applications 744
Katharina Gerken, Sven Frechenhäuser, Ralf Dörner, and Johannes Luderschmidt

Existing but Not Explicit - The User Perspective in Scrum Projects in Practice 762
Åsa Cajander, Marta Larusdottir, and Jan Gulliksen

Fast Train to DT: A Practical Guide to Coach Design Thinking in Software Industry 780
Muktha Hiremath and Visvapriya Sathiyam

Author Index 789
