Preface

This edited volume consists of extended papers selected from the 2013 International Conference on ICT in Teaching and Learning (ICT 2013). As the conference theme highlights, the contents of the papers discuss issues of “Knowledge Sharing Through Technology.” They explore the sharing of knowledge with innovative technology and effective pedagogy.

Knowledge sharing, the exchange of knowledge among individuals, has become an integral part of modern education. By implementing an integrated approach to identifying, capturing, evaluating, retrieving, and sharing one’s information assets, along with the support of effective pedagogy and innovative technology, teaching and learning can be effectively enhanced. By unleashing the potentials of related tools and means, online education can be taken to a new era.

In this volume, the papers are organized into four groups, namely, Management and Application of Open Education Resources, Application of ICT in Support of Knowledge Sharing, Application of Mobile Devices and Social Media to Knowledge Sharing, and Knowledge Sharing for Teaching and Learning.

Our many sincere thanks go to the Organizing Committee of the conference for their effective administration and unfailing support. Our great thanks also go to the Program Committee. The high quality of this book could not have been maintained without their professional comments and advice in the paper-review process.
