Wilhelm, Jochen, 1945-
Objectives and multi-objective decision making under
uncertainty.

(Lecture notes in economics and mathematical systems ;
112) (Mathematical economics)

Bibliography: p.

Includes index.

1. Decision-making--Mathematical models. I. Title.

II. Series. III. Series: Mathematical economics.

Contents

1.	The Concept of Objectives	1
1.1.	The Decision Situation under Consideration	2
1.2.	The Concept of Objectives under Certainty	6
1.2.1.	"Aspects" and "Points of View"	6
1.2.2.	The Category of Ordered Topological Spaces. The Ordinal and the Cardinal Category	11
1.2.3.	The Definition of an Objective Under Certainty	12
1.2.4.	An Illustration of the Introduced Concepts	17
1.2.5.	Side Conditions under Certainty	18
1.3.	The Concept of Objectives under Uncertainty	21
1.3.1.	Excursus: Axiomactical Treatment of the Bernoulli-Principle. Some Results on Continuity and Integrability of Utility Functions	25
1.3.1.1.	The Natural σ -Algebra and the Interval Topology	26
1.3.1.1.1.	Measurable Structures	26
1.3.1.1.2.	Topological Structures	29
1.3.1.1.3.	Connections between the Measurable and the Topological Structures of Preference Ordered Sets	33
1.3.1.2.	The Expected-Utility-Theorem	34
1.3.1.3.	A Special Case: The Utility Function as an Algebraic Homomorphism	40
1.3.2.	Substantiation of the Information Requirements of the Objective-Concept	41
1.3.3.	An Example	46
1.4.	Partial Objectives and Managerial Decisions	47
2.	Formal Statement of the Problem	50
2.1.	Complete Systems of Objectives	50
2.2.	Criteria Vectors	52
2.3.	The Treatment of the Problem on Principle	55
2.4.	Excursus: The Vector Maximum Problem	58
2.4.1.	The Concept of a Solution	58
2.4.2.	The Treatment of the Vector Maximum Problem in the Literature	63
2.4.3.	The 2-dimensional Vector Maximum Problem	66

2.4.3.1.	Abstract Treatment of the Problem	66
2.4.3.2.	The Algorithm for the Case of Two Dimensions	68
2.4.4.	Linear Preference Structures and the Determination of Weights	70
2.4.5.	Hyperbolic Preferences and the Determination of the Exponential Weights	74
2.4.6.	Generalization	77
2.4.7.	Sketch of an Algorithm to the n-dimensional Vector Maximum Problem	78
3.	Solution Approaches to the Problem of Multi-Objective Decision Making under Uncertainty	81
3.1.	The Linear Model	81
3.2.	The Quadratic Model	85
3.3.	The Hyperbolic Model	88
3.3.1.	An Axiomactical Treatment of Hyperbolic Preferences	88
3.3.2.	On the Uniqueness of the Utility Function	90
3.4.	A Collection of Models	91
4.	Application	94
	Appendix	104
	References	106
