Center for Global Studies, University of Bonn, Germany

Managing Editor:

Enrico Fels

Center for Global Studies, University of Bonn, Germany

International Advisory Board:

Luis Fernandes, Pontificia Universidade Catolica do Rio de Janeiro, Brazil

G. John Ikenberry, Princeton University, USA

Canrong Jin, Renmin University of Beijing, China

Srikanth Kondapalli, Jawaharlal Nehru University, India

Dingli Shen, Fudan University, China

Kazuhiko Togo, Kyoto Sanyo University, Japan

Roberto Zoboli, Catholic University of Milan, Italy

Ample empirical evidence points to recent power shifts in multiple areas of international relations taking place between industrialized countries and emerging powers, and between states and non-state actors. Yet there is a dearth of theoretical interpretation and synthesis of these findings, and a growing need for coherent approaches to understand and measure the transformation. This edited series aims to bring together scholars from all major world regions as well as different disciplines in order to discuss and possibly blend their different approaches and provide new frameworks for the understanding of global affairs and the governance of global power shifts.

Acknowledgements

Since we have started working on this project about 2 years ago we have been receiving an enormous amount of support from institutions, colleagues, and friends. Since the initial phase, the support and encouragement especially of JP Singh, Sheila Jasanoff, Johan Eriksson, and Stefan Fritsch were crucial. The discussions with many colleagues at the ISA annual conventions (2011–2013) and elsewhere were a warm welcome for us to pursue this project: gather the diverse research on the global politics of science and technology as a subfield of International Relations. Many more authors than we initially had expected were willing to contribute with their ideas, insights, and comments. Thus, the original plan of editing a book rapidly turned into the two volumes collection we have now the pleasure to present. We hope that this handbook will be not only helpful as an empirical and conceptual overview, a collection of theories, and a toolbox of research frameworks. It also aims at encouraging students and experts in IR and other disciplines to deepen their collaborations and jointly further this important area of study.

We want to thank all contributing authors and interview partners for their persistent engagement and dedication throughout all steps of this project. As there was no opportunity to invite all authors to a conference, the constant exchange and development of ideas between authors, interviewees, reviewers, and the editors—mostly via e-mail conversation—became very fruitful for improving the coherence, comprehensiveness, and structure of this compendium. In this journey, we are especially grateful to those researchers coming from “outside” IR. Their patience, willingness to an extended engagement, and inspiring perspectives were responsible for some of the highlights within this project. Merging further the knowledge of their fields of expertise with the discipline of IR is a worthwhile task. Special thanks go, at this point, also to Peer Schouten who has contributed one interview to the double-volume and offered to cooperate with his website [Theory Talks](#).

Unwavering support of our home institutions was instrumental for realising the intellectual and practical parts of this project. We want to thank the Center for Global Studies, University of Bonn, and especially its student assistants who did a brilliant and precise job on formatting and checking chapters as well as transcribing interviews. Similarly important was the support of the Institute of Development Research

and Development Policy, Ruhr-University Bochum, the Institute of Political Science and Sociology, University of Bonn, and GIGA German Institute of Global and Area Studies Hamburg. We are especially thankful to Douglas Howland, Peer Schouten, Anna Agathangelou, and Christian Bueger for their critical engagement with our two introductory texts. We furthermore want to thank Barbara Fess, Marion Kreisel, G. Ramya Prakash and the entire team of the section Economics and Political Science at Springer publishing for their guidance and kind assistance throughout the project. Finally, we are very grateful to our families and close friends for all their support and understanding.

Contents

A Toolbox for Studying the Global Politics of Science and Technology	1
Maximilian Mayer, Mariana Carpes, and Ruth Knoblich	
Part I Interactional Techno-Politics	
A Bullock Cart on Nuclear-Powered Wheels: Nuclear Science, Indigeneity and the National Development Narrative in India	21
Jayita Sarkar	
The Politics of European Collaboration in Big Science	31
Olof Hallonsten	
Of Red Threads and Green Dragons: Austrian Sociotechnical Imaginaries About STI Cooperation with China	47
Ruth Müller and Nina Witjes	
Liberal Preferences as an Explanation for Technology Choices. The Case of Military Robots as a Solution to the West’s Casualty Aversion	67
Niklas Schörnig	
The “Tight Oil Revolution” and the Misinterpretation of the Power of Technology	83
Susanne Peters and Werner Zittel	
The Socio-Technical Construction of Technology in German-Argentine ICT Cooperation	101
Alejandra S. Kern and Hernán E. Thomas	
Hidden in Plain View: Exploring the Knowledge Power of States	117
Katharina C. Below, Sarah Herweg, Ruth Knoblich, and Krystin Unverzagt	

Conflict and Cooperation in the Development of US–China Relations in Science and Technology: Empirical Observations and Theoretical Implications	143
Richard P. Suttmeier and Denis Fred Simon	
Part II Co-Productionist Techno-Politics	
Making and Remaking the Measurement of Science and Technology: The International Dimension	163
Benoît Godin and Joseph Lane	
Wither Anarchy? Harvesting the ‘Global’ Bio-tech Body, Indian Markets and Biomedical Technologies	179
Anna M. Agathangelou	
International Relations, Cybersecurity, and Content Analysis: A Constructivist Approach	205
Johan Eriksson and Giampiero Giacomello	
Information Technology Challenges for Energy and Environmental Policy Research	221
Sean S. Costigan and Erica M. Dingman	
Global Diabetes Encounters: Accounting for Health Technologies in the Global	235
Annegrete Juul Nielsen and Henriette Langstrup	
Chukudu Politics: The Relevance of Infrastructural Absences for Governmental Power and State Failure in the Post-Colonial world	253
Peer Schouten	
The Power of Large-Scale Interactions Through Information Technologies and Changes in Cultural Identity Politics	271
J.P. Singh	
How Much Is Enough? The Politics of Technology and Weaponless Nuclear Deterrence	287
Anne Harrington and Matthias Englert	

Volume II: Perspectives, Cases and Methods

Anna M. Agathangelou teaches at York University and is co-editor with Nevzat Soguk of *Arab Revolutions and World Transformations* (Routledge, 2013), co-author with L.H.M. Ling of *Transforming World Politics: From Empire to Multiple Worlds* (Routledge, 2009), and author of *Global Political Economy of Sex: Desire, Violence, and Insecurity in Mediterranean Nation-States* (MacMillan, 2004).

Katharina C. Below M.A. works at the research group ‘Global Processes’ at the University of Konstanz. She studied political science in Bonn and Istanbul and holds a master’s degree from University of Bonn. Her main research interests lie in the field of International Relations Theories and Science and Technology Studies with special emphasis on large-scale research as well as knowledge and innovation.

Mariana Carpes is a research fellow and Ph.D. candidate at the GIGA German Institute of Global and Area Studies where she is working on a historical comparative analysis of the nuclear strategies of Brazil, India, and South Africa. Her main areas of interest are history and theory of IR, nuclear politics, and foreign policy analysis. Recently Mariana has also started to work on strategic partnership between EU and Brazil. In 2012 and 2013 she held presentations on this topic at the European External Action Service (EEAS). She holds a bachelor’s degree in History from the Universidade Federal Fluminense (Brazil) and a master’s degree in International Relations from the Pontificia Universidade Catolica do Rio de Janeiro.

Sean S. Costigan is an educator and consultant in technology and security. His current work includes an educational initiative in environmental policy and an international project on emerging security challenges. From 2010–2012 he led MIT CogNet at the Massachusetts Institute of Technology prior to which he was Visiting Fellow at the University of Calcutta’s Institute of Foreign Policy Studies. He currently teaches information technology and international affairs at the New School University in New York and lectures at The NATO School in Oberammergau, Germany. From 2008 to 2010 he led a US Department of Energy initiative examining energy, economic, and environmental security, prior to which he was Director for Strategic Initiatives, Center for Security Studies, ETH Zurich. Mr. Costigan is Senior

Adviser to the NATO/GCSP/PfPC Emerging Security Challenges study group, co-chair of the Economics of Security Study Group, and Chair of the Editorial Board, Partnership for Peace Consortium of Defense Academies and Security Studies Institutes. His most recent book is *Cyberspaces and Global Affairs*.

Erica Dingman is an Associate Fellow at the World Policy Institute whose work focuses on a broad spectrum of issues facing the Arctic. From the geopolitical theatre of Arctic stakeholders to interested non-Arctic parties, Erica's research turns to the interconnection between climate change, hydrocarbon and mineral exploration, and the political participation of Inuit, one of the Arctic's indigenous groups. She holds a Master's in International Affairs from The New School.

Matthias Englert is a researcher at the Interdisciplinary Research Group Science Technology and Security (IANUS) at Darmstadt University of Technology in Germany where he also earned his Ph.D. in physics. Before joining IANUS he was a postdoctoral fellow at Stanford's Center for International Security and Cooperation (CISAC) from 2009 to 2011. His research interests include nonproliferation, disarmament, arms control, nuclear postures, and warheads; fissile material and production technologies; the civil use of nuclear power and its role in future energy scenarios; and the historical, social, and political aspects of the use of nuclear technologies.

Johan Eriksson is Head of Research at the Swedish Institute of International Affairs and Professor of Political Science at Södertörn University, Stockholm. His research interests are international relations, foreign and security policy, ethnopolitics and regionalism, the politics of expertise, emerging technologies, and territoriality. Eriksson has published more than 70 academic texts, including seven books, and numerous peer-reviewed articles. His most recent articles are "On the Policy Relevance of Grand Theory" (*International Studies Perspectives*, 2013) and "Governance Beyond the Global: Who Controls the Extraterrestrial?" (*Globalizations*, 2013, with Lindy M. Newlove-Eriksson).

Giampiero Giacomello is Assistant Professor of strategic studies with Department of Social and Political Sciences, University of Bologna, Italy. He has held research and teaching positions at Cornell University, Columbia University, the Dickinson College, and the James Madison University. His research interests include strategic theory, cybersecurity, simulation techniques, and foreign policy analysis. He has authored and co-edited five volumes and published in several peer-reviewed journals such as *European Political Science*, *International Studies Review*, *European Security*, *Contemporary Politics*, and *International Political Science Review*.

Benoît Godin is professor at Institut National de la Recherche Scientifique (Montreal, Canada). He holds a DPhil in science policy from Sussex University (UK). He has written extensively on science policy and statistics. Since 2000, he has conducted a project on the history of science and technology statistics from which two books have been published: *Measurement and Statistics on S&T: 1920 to the Present*, London: Routledge, 2005, and *La science sous observation: cent ans de mesures sur les scientifiques, 1906–2006*, Québec: Presses de l'Université Laval, 2005. More

recently, he has launched a large-scale project on the intellectual history of innovation as a category, from the Renaissance to the present day.

Olof Hallonsten holds a Ph.D. in Research Policy and is currently postdoctoral researcher at the University of Gothenburg, Sweden, and Wuppertal University, Germany. His main research interest is in the history, politics, and sociology of Big Science, and he has published extensively on several aspects of this broad topic.

Anne I. Harrington is an American Political Science Association Congressional Fellow in Washington, DC. Since earning her doctorate from the Department of Political Science at the University of Chicago, she has held postdoctoral fellowships at Stanford University's Center for International Security and Cooperation and at the James Martin Center for Nonproliferation Studies. Her award-winning articles have appeared in the *Nonproliferation Review* and *Millennium: Journal of International Studies*.

Sarah Herweg M.A. holds a master's degree from Free University Berlin. She studied political science in Bonn, Paris, and Berlin. Her research interests include the transnational regulation of knowledge and information as well as the interrelation of Intellectual Property Rights and innovation.

Alejandra S. Kern. Ph.D. in Social Science at FLACSO Argentina (2009). She studied International Relations in Universidad del Salvador, Argentina, and specialised in international cooperation. She is Director of the Research Center on International Cooperation and Development at the National University of San Martín in Argentina.

Ruth Knoblich is a research fellow at the Institute of Development Research and Development Policy (IEE), Ruhr-University Bochum and at the Institute of Political Science and Sociology, University of Bonn; she teaches courses in both institutes and at the South African – German Centre for Development Research, University of the Western Cape. She studied in Bonn and Madrid and holds a master's degree in Political Science, History, and Philosophy from the University of Bonn as well as two basic degrees in Medicine. Her research interests include innovation policies and innovation systems, emerging economies and South-South science and technology cooperation, global politics of intellectual property rights, science and technology in the international political economy, and national policy making in the context of globalisation and global governance.

Joseph P. Lane engages government, academic, and industry sectors in the deliberate and systematic generation of technology-based innovations with beneficial socio-economic impacts, through the related processes of knowledge translation (KT) of scientific discoveries, the technology transfer (TT) of engineering inventions, and commercial transactions (CT) for industrial innovations. The combined strategies of supply push, demand pull, and corporate collaboration have brokered the market launch of over 50 new products, while advancing understanding of the underlying mechanisms through several dozen peer-reviewed articles and hundreds of conference presentations. Mr. Lane directs a national centre funded by the US Department

of Education (<http://www.kt4tt.buffalo.edu>), as part of an organised research unit (<http://www.cat.buffalo.edu>) within State University of New York, at Buffalo.

Henriette Langstrup is associate professor at Department of Public Health, Center for Medical Science and Technology at the University of Copenhagen. Henriette's research is particularly concerned with the role of Information and Communication Technologies in shaping identities, relations, and institutions in healthcare.

Maximilian Mayer is program co-chair of STAIR (Science, Technology, Arts and International Relations) a newly established section of the International Studies Association. He studied in Bochum and Shanghai and holds a master's degree in East Asian politics from the Ruhr-University Bochum. He received scholarships from the German National Academic Foundation twice from 2004 to 2007 and from 2009 to 2010. He joined the CGS in October 2009 and has worked there as managing assistant (2009–2013). He leads the CGS research group on “rising knowledge powers”. His research interests include the global politics/policy of science, innovation, and technology; Chinese foreign and energy policy and International Relation theories.

Ruth Müller is a postdoctoral fellow at the Research Policy Group, Lund University, Sweden. Her (inter)disciplinary background is Science & Technology Studies, Sociology, Gender Studies and Molecular Biology. Besides her work on the internalisation of STI, her research focuses on the relations between research policy and scientific work practices. This paper is based on research conducted during her time as a postdoctoral fellow at the Austrian Institute for International Affairs, Vienna.

Annegrete Juul Nielsen is assistant professor at Department of Public Health, Center for Medical Science and Technology Studies at the University of Copenhagen. Currently, her research is concerned with ethnographic explorations of the sociopolitical and organisational implications of transferring health technologies from one health-care system to another.

Susanne Peters is currently teaching international relations for Kent State and Webster University in Geneva. Her research areas cover energy politics, geopolitics of energy, and European security policy. She holds a Doctorate in Political Science from the European University Institute in Florence.

Jayita Sarkar is a Ph.D. candidate in the Department of International History at the Graduate Institute Geneva, where she is writing a dissertation on Franco-Indian nuclear relations and US counter-proliferation efforts during the Cold War. Jay was a Gallatin pre-doctoral fellow at Yale University's MacMillan Center in 2013 and has held visiting positions at the Woodrow Wilson International Center for Scholars in Washington, DC, the Institute for Defence Studies and Analyses in New Delhi, and the Norwegian Institute for Defence Studies in Oslo. An earlier version of this chapter was presented at the 2013 annual meeting of the History of Science Society in Boston, MA.

Niklas Schörnig is a Senior Research Fellow at the Peace Research Institute Frankfurt (PRIF) and received his Ph.D. from the Goethe University Frankfurt, where he was appointed substitute Professor in Winter 2011/2012. In 2012 he received the ZIB-Award from the *Zeitschrift für Internationale Beziehungen* (German Journal of International Relations) for best article 2006–2011. His most recent publications include ‘Killer Drones – The Silver Bullet of Democratic Warfare?’ (*Security Dialogue* 43 (4), 2012; with Frank Sauer) and ‘*The Militant Face of Democracy – Liberal Forces for Good*’ (Cambridge University Press, 2013, edited with Anna Geis and Harald Müller).

Peer Schouten holds a PhD from the School of Global Studies, University of Gothenburg. He is also editor-in-chief of Theory Talks. Finally, Peer regularly does consultancy work on issues related to the nexus of transnational corporations, security governance, and resource extraction in Sub-Sahara Africa.

Denis Fred Simon serves as Vice-Provost for International Strategic Initiatives at Arizona State University. He also is Foundation Professor of Contemporary Chinese Affairs. Dr. Simon was awarded the China National Friendship Award by former Premier Wen Jiabao in the Great Hall of the People in 2006. He also was made an Honorary Citizen of Dalian by former Mayor Xia Deren in 2008. Currently, he is a member of the American Experts Group as part of the US–China Innovation Dialogue. Dr. Simon has written and spoken extensively about science and technology policy, innovation strategy, and the supply and demand of high-end talent in China. He holds an M.A. in Asian Studies (1975) and a Ph.D. in Political Science (1980) from UC Berkeley.

JP Singh is Professor of Global Affairs and Cultural Studies at George Mason University. Singh has authored four monographs, edited two books, and published dozens of scholarly articles. His book *Globalized Arts: The Entertainment Economy and Cultural Identity* (Columbia, 2011) won the American Political Science Association’s award for best book in information technology and politics in 2012. He has advised international organisations such as UNESCO, the World Bank, and the World Trade Organization, played a leadership role in several professional organisations, and served as Editor from 2006 to 2009 and dramatically increased the impact of *Review of Policy Research*, the journal specialising in the politics and policy of science and technology. He holds a Ph.D. in Political Economy and Public Policy from the University of Southern California.

Richard P. Suttmeier is a Professor of Political Science, Emeritus, at the University of Oregon. He has written widely on science and technology development issues in China. Dr. Suttmeier has served as Senior Analyst, Office of Technology Assessment, and Director of the Beijing Office, National Academy of Sciences/Committee on Scholarly Communication with the People’s Republic of China, and as a consultant to the World Bank, the UNDP, and the US government. He was appointed a Senior Visiting Scholar at the Institute of Policy and Management of the Chinese Academy of Sciences in 2010. He holds the A.B. from Dartmouth College and the Ph.D. from Indiana University.

Hernán Thomas. Ph.D. in Scientific and Technological Policy at Universidad de Campinas (Brazil). He is currently Director of the Institute of Studies on Science and Technology at the Universidad Nacional de Quilmes. He is also Principal Researcher at the CONICET. His recent research includes the analysis of Strategic Technologies, knowledge-intensive technologies, as well as the development and implementation of Technologies for Social Inclusion.

Krystin Unverzagt B.A. holds a Bachelor's degree from the University of Bonn. She has studied political science in Bonn and Copenhagen. Her main research interest centres on the politics of information and communications technology.

Nina Witjes is a scientific researcher at the Austrian Institute for International Affairs in Vienna and a lecturer at Vienna University, Department for Development Studies. Her studies include history, European cultural studies, international development, and sociology. Nina is currently conducting a research project on the internationalisation of STI with a particular focus on knowledge bases and research landscapes. Her research interests include the (new) geographies of science and the circulation of knowledge.

Werner Zittel studied Physics at the Ludwig-Maximilians-Universität in Munich and received his Ph.D. from Technical University Darmstadt. In 1989 he joined the Ludwig-Bölkow-Systemtechnik GmbH (LBST) in Ottobrunn, a strategy and technology consulting firm for sustainable energy and transport concepts where he works as Senior Scientist. Fields of interest are studies on resource availability, sustainable energy systems, and material flow analysis. He is a founding member of ASPO international in 2001. Since 2011 he is head of the Ludwig-Boelkow-Foundation.
