Contents

A. MORPHOLOGY

I. <u>Cytology</u>	1
a) <u>General and Molecular Cytology</u> . By Professor Dr. WERNER W. FRANKE, Professor Dr. D. JAMES MORRE, Dr. WERNER HERTH and Dr. HEIDE ZERBAN	1
1. Structure of the Golgi Apparatus and Association with Other Cell Components	1
2. Cytochemistry of Golgi Apparatus	6
3. Biochemistry of the Plant Golgi Apparatus	7
References	9
b) <u>Special Cytology: Cytology and Morphogenesis of the Prokaryotic Cell</u> . By Professor Dr. GERHART DREWS	17
1. Cell Envelopes	17
a) Slime and Capsular Material	17
b) Cysts	17
c) Endospores	18
d) Myxospores	19
e) Heterocysts, Akinetes	19
f) Cell Wall	19
2. Fimbriae and Pili	19
3. Membranes	20
References	20
c) <u>Special Cytology: Morphology and Morphogenesis of Eukaryotic Algal Cells</u> . By Professor Dr. GORDON F. LEEDALE ...	23
1. Organisation of Vegetative Cells	23
a) Chloroplasts, Including Chloroplast DNA	23
b) Flagella	24
c) Cell Coverings, Including Periplasts and Loricae .	24
d) Other Studies	25
2. Nuclear Structure and Division, Cytokinesis	26
3. Reproductive Stages and Spores	27

VI Contents

4. Pinocytosis and Ingestion	29
5. Aging	29
References	29
II. <u>Morphologie und Anatomie der höheren Pflanzen</u>	32
a) <u>Vegetationsorgane</u> . Von Professor Dr. WOLFGANG HAGEMANN .	32
1. Epidermis-Strukturen	33
2. Grundgewebestrukturen sowie Sonderstrukturen des Leit- gewebesystems	34
3. Leitgewebesystem	35
Literatur	41
b) <u>Reproduktionsorgane</u> . Von Professor Dr. ULRICH HAMANN ...	46
1. Allgemeines	46
2. Blüte, Blütenstand, Frucht und Samen	46
a) Blütenmorphologie und -anatomie	46
b) Blütenökologische Aspekte, Nektarien, Elaiophoren und Osmophoren	48
c) Blütenstände	48
d) Frucht und Samen	50
3. Embryologie und Pollenmorphologie	50
a) Antherenentwicklung	50
b) Pollenmorphologie und Pollenentwicklung	51
c) Samenanlage, Embryosack und Endosperm	52
d) Embryogenese	54
Literatur	54

B. PHYSIOLOGY

I. <u>Plant Lectins (Phytohemagglutinins)</u> . By HEINRICH KAUSS. <u>With 1 Figure</u>	58
1. What are Lectins?	58
2. Biochemistry of Lectins	59
a) Structure and Specificity	59
b) Problems Related to Assay and Isolation Methods ..	61
3. Lectin Properties Relevant to Physiological Role	62
a) Interaction with Cell Surface Receptors	62
b) Differentiation of Cellular Slime Molds	64
c) Lectins Associated with Walls and Membranes of Plant Cells	64

d) Host Plant-Microorganism Interaction	66
e) Further Properties of Possible Biological Significance	67
4. Conclusions	68
References	68
II. <u>Mineral Metabolism. Short and Long Distance Transport.</u>	
By Professor Dr. HORST MARSCHNER	71
1. Short Distance Transport	71
a) Uptake Mechanism	71
b) Membrane Composition and Ion Flux	71
c) Growth Substances	72
d) Initial Uptake	72
e) Role of ATP	73
f) Ion Interaction	73
g) Nitrate Reduction	73
h) Effect of Temperature and Ion Concentration	74
i) Uptake in Different Root Zones	74
j) Radial Transport across the Roots	75
2. Long Distance Transport	75
a) Xylem Transport	75
b) Phloem Transport	75
3. Localization and Binding Stage of Mineral Elements in Tissue and Cells	76
4. Genetic Aspects of Mineral Nutrition	76
References	77
III. <u>Photosynthesis. Biochemical and Physiological Aspects of Carbon Metabolism.</u>	
By Professor Dr. ERWIN LATZKO and Dr. GRAHAME J. KELLY. With 1 Figure	81
1. Introduction	81
2. Enzymology of the Reductive Pentose Phosphate Cycle .	81
a) RuDP Carboxylase	81
b) Glyceraldehyde-3-P Dehydrogenase	83
c) Fructose-1,6-diphosphatase	83
d) Other RPP Cycle Enzymes	84
e) Light Mediated Activation of RPP Cycle Enzymes ...	84
f) Carbonic Anhydrase	85
3. Studies with Isolated Chloroplasts	85
4. Communication between Chloroplast and Cytoplasm	87
5. Starch and Sucrose Metabolism	87
6. Photorespiration and Glycollate Metabolism	90
a) Glycollate Synthesis	90
b) Glycollate Utilization	91
7. C ₄ Metabolism	92
References	94

VIII Contents

IV. <u>Metabolism of Organic Acids.</u> By Professor Dr. MANFRED KLUGE	100
1. Crassulacean Acid Metabolism	100
a) The Pathway of Carbon During CAM	100
b) Studies on CAM Using the Leaf Slice Technique ...	101
c) Gas Exchange in CAM	101
2. Metabolism of Organic Acids in Relation to Mineral Transport or Mineral Balance	102
3. Metabolism of Glycollic Acid	103
a) The Primary Source of Glycollate in Photorespiration	103
b) Glycollate Metabolism in Single Cell Organisms ...	103
c) Glycollate Metabolism in Isolated Cells or Cell Organelles	104
4. Biosynthesis, Metabolism and Biologic Properties of Organic Acids Other than Malate and Glycollate	104
References	105
Va) <u>Metabolism of Inorganic Nitrogen Compounds.</u> By Professor Dr. ERICH KESSLER	108
1. Dinitrogen Reduction	108
a) Dinitrogen Reduction by Free-Living Organisms ...	108
b) Symbiotic Dinitrogen Reduction	110
2. Nitrate Reduction	111
a) Assimilatory Nitrate Reduction	111
b) Dissimilatory Nitrate Reduction	113
3. Nitrification	114
References	114
Vb) <u>Metabolism of Organic N-Compounds. Ammonium Assimilation in Microorganisms and Plants.</u> By Professor Dr. THOMAS HARTMANN. With 1 Figure	118
1. Introduction	118
2. Bacterial Glutamate Synthase (GOGAT)	119
3. Ammonium Assimilation in Bacteria	119
a) Pathways	119
b) Regulation	119
4. Ammonium Assimilation in Fungi	121
a) Pathways	121
b) Regulation	122
c) Role of NADP-GDH in Ammonium Repression	122

5. Ammonium Assimilation in Plants	123
a) Ammonium Assimilation in Autotrophic Tissues	123
b) Ammonium Assimilation in Heterotrophic Tissues ...	124
c) Role of Plant GDH	124
References	125
VI. <u>Secondary Plant Substances. Monoterpenes.</u> By Professor Dr. HORST-ROBERT SCHÜTTE. With 8 Figures	129
1. Introduction	129
2. Mevalonate as Precursor	129
3. Time Course Experiments for Investigation of Biogenetic Sequences and Interconversions	133
4. Nerylpyrophosphate as Precursor of the Cyclic Mono- terpenes	135
5. The Labeling Pattern after Mevalonate Feeding	136
6. Cannabinoids	140
7. Nepetalactone	140
8. Irregular Monoterpenes	141
9. Some Biological Aspects of Monoterpenes	143
References	144
VII. <u>Growth.</u> By KARL DÖRFFLING. With 4 Figures	148
1. Auxins	148
a) Methods of Determination	148
b) Occurrence	148
c) Transport	149
d) Metabolism	150
e) Mechanism of Action	151
2. Abscisic Acid and Related Compounds	153
a) Techniques for Extraction, Purification and Quanti- fication, Bioassays	153
b) Occurrence and Quantitative Variation in Plants ..	153
c) Biosynthesis and Metabolism	155
d) Mechanism of Action	156
3. Ethylene	157
a) Occurrence, Biosynthesis, Metabolism	157
b) Mechanism of Action	159
4. Further Plant Growth Regulators	160
References	162

X Contents

VIII. Developmental Physiology. By Professor Dr. GÜNTER FELLE-
BERG. With 1 Figure 167

- 1. Light and Development 167
 - a) Daylight 167
 - b) Red Light 168
 - c) Early Phytochrome Effects 169
 - d) Effects upon Cell Metabolism 170
 - e) Phytochrome and Phytohormones 171
 - f) Function of Phytochrome in the Natural Environ-
ment 171
- 2. Flower Formation 171
 - a) Flower Formation and Phytohormones 171
 - b) Flower Induction and Flower Hormone 172
 - c) Flower Initiation and Environmental Factors 173
 - d) Self-Inducing Plants 174
 - e) Metabolic Changes in the Vegetation Tip 174
 - f) Conclusion 175
- 3. Development of the Cell Wall 175
 - a) Compounds of the Primary Cell Wall 175
 - b) Elongation of the Cell Wall 176
 - c) Cessation of Growth and Maturation of the Cell
Wall 177
 - d) Stabilization of Cell Walls 178
 - e) Cell Wall of Pollen Tubes 178
- 4. Adventitious Root Formation 179
 - a) Dependence on Properties of Organs and Tissues ... 179
 - b) Seasonal Changes 180
 - c) Environmental Factors 180
 - d) Effect of Phytohormones 181
 - e) Protein and Enzyme Synthesis 181
 - f) Cell Cycle 182

References 183

C. GENETICS

I. Mutation. Repair Processes in Mutation Induction. By
Professor Dr. HANS-J. RHAESE. With 1 Figure 187

- 1. Introduction 187
- 2. Premutational Damage in DNA 188
 - a) Ultraviolet Irradiation 188
 - b) Alkylating Agents 188
- 3. Direct Mutagenesis Following DNA Lesions 189
 - a) Base-Pair Substitutions 189
 - b) Frame-Shifts 189

4. Repair of Lesions in DNA	190
a) Photoreactivation (Photorepair)	190
b) Excision-Resynthesis Repair	190
c) Post-Replication Repair	190
5. Repair Mutagenesis	191
a) Error-Prone Repair of Excision Gaps	191
b) SOS Repair Hypothesis	191
6. Conclusion	193
References	193

II. Function of the Genetic Material. Organization and Function of the Eukaryotic Genome. By Univ.-Doz. Dr. FRANK HERZFELD. With 2 Figures 196

1. Introduction	196
2. Estimation of Gene Numbers	196
a) One Chromomere - One Gene	196
b) Mutation Load and the Number of Genes	197
c) Nucleic Acid Hybridization and the Coding Potential of DNA	197
3. The Genetic Control of Development	198
a) Genes Controlling Developmental Pathways	198
b) Combinatorial Principles in the Determination of Development	199
4. Unique and Repetitive Sequences of DNA under the Aspect of Gene Regulation	199
a) Control Sites Adjacent to Protein Coding Sequences	199
b) Intermediate Repetitive DNA	200
c) Function of Intermediate Repetitive Sequences	200
d) Cloning of DNA Sequences	201
References	203

III. Extrakaryotic Inheritance. By Dr. GEORG MICHAELIS 205

1. Introduction	205
2. Mitochondrial Morphology	205
3. Mitochondrial DNA (mtDNA)	206
a) Structure	206
b) Replication and Repair	206
c) Physical Maps	207
4. Mitochondrial Genetics	208
a) Mutations in Mitochondrial DNA	208
b) Segregation and Recombination	209

XII Contents

c) Mapping Studies	209
5. RNA Coded for by Mitochondrial DNA	210
6. Mitochondrial Proteins	211
7. Extrakaryotic Inheritance not Associated with Mitochondrial or Chloroplast Genomes	212
References	212
IV. <u>Genetic Control of Reproduction. Sexual Reproduction in Lower Plants.</u> By Priv.-Doz. Dr. ROLF BLAICH	218
1. Introduction	218
2. Definitions	218
a) Breeding Systems	218
b) Propagative Units of Lower Plants	221
3. Homogenic Incompatibility	221
a) Bipolar Systems	221
b) Tetrapolar Systems	222
c) Hexapolar System	223
4. Dioecism	223
a) Algae	223
b) Phycomycetes	224
c) Yeasts	225
5. Additional Systems Which Influence Outbreeding	226
a) Heterogenic Incompatibility	226
b) Heterokaryosis	226
c) Pseudocompatibility	227
6. Conclusion	228
References	228
V. <u>Population Genetics.</u> By Dr. ROBERT LICHTER	230
1. Introduction	230
2. Gene Frequencies and Population Structure	230
a) Linkage	231
b) Mutation and Gene Substitution	231
c) Gene Flow and Genetic Divergence Between Populations	232
d) Maintenance of Polymorphisms	233
3. Selection	235
a) Response to Selection	235
b) Environmental Conditions	236
c) Selection Indexes	237
d) Fitness	237
4. Inbreeding and Heterosis (Breeding Systems)	237
5. Heritability	239

6. Competition	239
7. Evolution of Synthetic Varieties	240
8. Populations of Polyploids, Especially Autotetraploids	241
References	242

D. TAXONOMY

I. <u>Systematik und Phylogenie der Algen.</u> Von Dr. DIETER MÖLLENHAUER	246
1. Allgemeines zur Situation der Phykologie	246
2. Arbeiten, die alle Algensippen betreffen	253
3. Cyanophyta	253
4. Chlorophyta	254
5. Rhodophyta	255
6. Phaeophyta	256
7. Chrysophyceae s.l.	256
8. Bacillariophyceae	257
9. Dinophyceae	257
10. Cryptophyceae	257
Literatur	257
II. <u>Taxonomy and Phylogeny of Fungi.</u> By Professor Dr. EMIL MÜLLER	264
1. General Considerations and Phylogeny	264
2. Myxomycotina	265
3. Eumycotina	266
a) Oomycetes	266
b) Chytridiomycetes	267
c) Zygomycetes-Trichomycetes	267
d) Ascomycetes	268
e) Basidiomycetes	272
f) Deuteromycetes	275
References	276
III. <u>Systematik der Flechten.</u> Bericht über die Jahre 1974 und 1975 mit einigen Nachträgen. Von Professor Dr. HANNES HERTEL. Mit 5 Abbildungen	280
1. Allgemeiner Teil	280

XIV Contents

a) Morphologie	280
b) Chemie	283
c) Ökologie	284
d) Geographie	286
e) Soziologie	287
2. Systematischer Teil	287
a) Allgemeine Systematik	287
b) System	287
c) Floristik	289
Literatur	290
IV. <u>Systematik der Moose</u> . Von Professor Dr. WOLFRAM SCHULTZE- MOTEL	298
1. Allgemeines	298
2. Wichtige Monographien und Revisionen	299
3. Bryogeographie und Bryofloristik	300
Literatur	301
V. <u>Systematik der Farnpflanzen</u> . Von Dr. DIETER MEYER	305
1. Bibliographie, Biographie, Sammlungen	305
2. Systematik	305
3. Cytologie, Bastardierung	306
4. Floristik	307
5. Morphologie, Anatomie, Paläobotanik u.a.	308
Literatur	310

E. GEOBOTANY

I. <u>Areal- und Florenkunde (Floristische Geobotanik)</u> . Von Dr. ECKEHART J. JÄGER. Mit 2 Abbildungen	314
1. Neue Floren	314
a) Sowjetunion	314
b) Orient	315
c) Süd- und Südostasien	315
d) Afrika	316
e) Südamerika	316
f) Pazifik und Australien	318
g) Neufunde	318
2. Kartierung	318
3. Taxonomische Beiträge zur floristischen Pflanzengeo- graphie	319

4. Ökologische Deutung der Pflanzenareale	320
a) Klima	320
b) Edaphische Faktoren	321
c) Konkurrenz, Kulturareale	321
5. Areal- und Sippendifferenzierung	322
6. Arealkunde und Großschollentektonik	322
7. Synanthrope Arealveränderungen	323
8. Florenelemente und Arealtypen	324
9. Verwandtschaft der Inselfloren	324
10. Artenreichtum der Angiospermen-Floren	326
11. Höhenverbreitung	326
Literatur	326
II. <u>The History of Flora and Vegetation During the Quaternary.</u> By Professor Dr. BURKHARD FRENZEL	331
1. History of Climate During the Pleistocene	331
2. Postglacial History of Climate	333
3. Radiocarbon Datings and Related Problems	333
4. Palaeomagnetism	334
5. Deep Sea Sediments	334
6. Methodology of Pollen-Analytical Work	335
7. Diatom Floras	336
References	337
III. <u>Vegetation Science (Sociological Geobotany).</u> By Professor Dr. RÜDIGER KNAPP	340
1. Reviews, Textbooks, Bibliographies	340
2. General Results and Methods	340
a) Mutual Influences Between Species and Individuals in Plant Communities and in Vegetation	340
b) Vegetation Changes and Successions	341
c) Vegetation Mapping	342
3. Temperate and Alpine Vegetation of Europe, Northern Asia, and North America	343
a) High Mountain Vegetation in Holarctic Asia and the Urals	343
b) Ecotone Communities	343
4. Arid Meridional and Subtropical Vegetation	344
a) North American Desert and Semidesert Vegetation ..	344
b) Indian Arid Vegetation	344
5. Tropical Vegetation	345
a) Central American and Caribbean Vegetation	345

XVI Contents

b) Vegetation of Papua-New Guinea	345
6. Antarctic Vegetation	346
References	346
IV. <u>Experimental Ecology</u> . By Dr. WOLFGANG SCHMIDT	352
1. General	352
2. Relations to Environmental Factors	352
a) Climate, Mainly Temperature	352
b) Light	354
c) Water	354
d) Soil, Mainly Mineral Nutrients	356
e) Other Chemical Factors	357
f) Allelopathy	359
3. Productivity and Ecosystem Research	359
a) Photosynthesis	359
b) Biomass and Productivity	360
c) Litter Fall and Nutrient Cycle	361
References	363
<u>Subject Index</u>	367

List of Editors

Section A: Professor Dr. E. SCHNEPF, Lehrstuhl für Zellenlehre der Universität Heidelberg, D-6900 Heidelberg, Im Neuenheimer Feld 230

Section B: Professor Dr. H. ZIEGLER, Institut für Botanik und Mikrobiologie, Technische Universität München, D-8000 München 2, Arcisstr. 21

Section C: Professor Dr. K. ESSER, Lehrstuhl für Allgemeine Botanik Ruhr-Universität Bochum, D-4630 Bochum, Postfach 2148

Section D: Professor Dr. H. MERXMÜLLER, Institut für Systematische Botanik der Universität München, D-8000 München 19, Menzingerstr. 67
