## A. MORPHOLOGY

### I. Cytology

#### a) General and Molecular Cytology. By Professor

ANTHONY W. ROBARDS .....	1
1. Ontogeny and Development of Plastids .....	1
2. The Structure of Plastids .....	2
a) Proplastids .....	2
b) Eoplasts .....	2
c) Amyloplasts .....	2
d) Amoeboid Plastids .....	2
e) Pregranal Plastids .....	2
f) Etioplasts .....	2
g) Mature Chloroplasts .....	2
h) Senescing Chloroplasts .....	7
i) Chromoplasts .....	7
j) Elaioplasts .....	7
k) Proteoplasts .....	8
l) Sieve Element Plastids .....	8
3. Mitochondria .....	8
References .....	10

#### b) Special Cytology: Differentiated Cells and Cell Development in Higher Plants. By EBERHARD SCHNEPF .....

1. Secretory Cells .....	13
a) Mucilage-Secreting Cells .....	13
b) Nectaries .....	14
c) Salt Glands and Hydathodes .....	14
d) Glands of Carnivorous Plants .....	14
e) Glands with Terpenoid, Flavonoid and Phenolic Secretions .....	15
2. Idioblasts .....	16
a) Oil Idioblasts .....	16
b) Oxalate Crystal Idioblasts .....	16
3. Epidermis .....	16
a) Guard Cell Structure .....	16
b) Guard Cell Development .....	17
c) Cuticle .....	17
4. Aleurone Cells, Endosperm .....	18
5. Motor Cells for Leaf Movement, Gravity Sensitive Cells .....	18
6. Animal Food Tissue, Galls .....	19
a) Cells of Ant and Beetle Food Tissue .....	19
b) Galls .....	20
7. Seasonal Variations in Cell Structure .....	20

## VI Contents

8. Cell Development .....	20
a) General Considerations, Models .....	20
b) Spore Germination .....	21
c) Tip Growth .....	22
d) The Plane of Division .....	23
e) Senescence, Abscission, Formation of Inter-cellular Spaces .....	23
References .....	24
<u>c) Oberflächenskulpturen bei höheren Pflanzen. Von</u>	
Dr. WILHELM BARTHLOTT und Professor Dr. RÄINER SCHILL ..	27
1. Allgemeines und Methodik .....	27
2. Epidermale Oberflächen .....	27
a) Mikromorphologische Aspekte .....	28
b) Taxonomische Aspekte .....	29
c) Funktionell-ökologische Aspekte .....	30
3. Pollen .....	31
Literatur .....	34
<u>II. Reproductive Structures of the Flowering Plants.</u>	
By Professor Dr. PETER K. ENDRESS .....	39
1. Introduction .....	39
2. Inflorescences .....	39
3. Flowers .....	40
a) Systematic and Evolutionary Aspects .....	40
b) Flower Ontogeny and Phyllotaxis of Floral Organs .	41
c) Perianth .....	41
d) Androecium .....	42
e) Gynoecium .....	43
4. Fruits and Seeds .....	44
5. Historical Surveys .....	45
References .....	46
<u>B. PHYSIOLOGY</u>	
<u>I. Photosynthesis. The Photosynthetic Reaction Center.</u>	
By Professor Dr. J. AMESZ. With 1 Figure .....	49
1. Introduction .....	49
2. Photosystem 2 Electron Transport .....	50
3. Delayed Fluorescence of Chlorophyll .....	52
a) Emission Spectra .....	52
b) Decay Kinetics and Temperature Dependence .....	54
c) Stimulation by an Electric Field .....	55
d) Thermolinescence .....	56
4. The Reaction Center of Green Photosynthetic Bateria .	56
References .....	59
<u>II. Metabolism of Organic Acids. By Professor Dr.</u>	
MANFRED KLUGE .....	64
Crassulacean Acid Metabolism (CAM) .....	64
1. Current Review on CAM .....	64
2. Taxonomic Distribution of CAM .....	64
3. Carbon Flow in CAM .....	65
a) $\beta$ -Carboxylation as Initial Step of CAM .....	65

b) Intracellular Localization of PEP-C and Other CAM Enzymes .....	66
c) Nocturnal Storage of Malic Acid .....	67
d) Malic Acid Consumption in CAM .....	68
e) Studies of Carbon Isotope Composition in Context with CAM Carbon Flow .....	70
The Role of Malate and PEP-Carboxylase-Mediated CO <sub>2</sub> Fixation in Nitrogen Metabolism .....	70
References .....	71
<u>III. Metabolism of Inorganic Nitrogen Compounds.</u>	
By Professor Dr. ERICH KESSLER .....	74
1. Dinitrogen Reduction .....	74
a) Dinitrogen Reduction by Free-Living Organisms ....	74
b) Symbiotic Dinitrogen Reduction .....	76
2. Nitrate Reduction .....	77
a) Assimilatory Nitrate Reduction .....	77
b) Dissimilatory Nitrate Reduction .....	78
3. Nitrification .....	79
References .....	79
<u>IV. Secondary Plant Substances. Some Tyrosine- and Phenylalanine-Derived Alkaloids.</u> By Professor Dr. HORST-ROBERT SCHÜTTE. With 10 Figures .....	83
1. Introduction .....	83
2. Reticuline and Other Benzylisoquinolines .....	83
3. Bisbenzylisoquinolines .....	85
4. Aporphine Alkaloids .....	86
5. Sebiferine .....	89
6. <i>Erythrina</i> Alkaloids .....	90
7. <i>Cephalotaxus</i> and <i>Homoerythrina</i> Alkaloids .....	93
References .....	97
<u>V. Growth.</u> By Professor Dr. NIKOLAUS AMRHEIN.	
With 5 Figures .....	100
1. Gibberellins .....	100
a) Chemistry .....	100
b) Methods of Isolation and Determination .....	101
c) Occurrence .....	101
d) Biosynthesis and Metabolism .....	102
e) Action .....	105
2. Brassinolide .....	107
3. Cytokinins .....	108
a) Analytical Methods .....	108
b) Occurrence .....	109
c) Biogenesis and Metabolism .....	111
d) Action .....	112
References .....	114
<u>C. GENETICS</u>	
<u>I. Replication.</u> By Professor Dr. WALTER NAGL. With 5 Figures .....	119
1. Reviews and Methods .....	119

VIII Contents

2. Regulation of Initiation of DNA Synthesis ..... 119  
3. Rate and Fidelity of Elongation ..... 122  
4. Pattern and Termination of Replication ..... 123  
5. Enzymes Involved in Replication ..... 124  
6. Endoreplication, Meiotic, and Differential DNA  
Replication ..... 126  
References ..... 128

II. Recombination – Recombination in Higher Plants.

By Professor Dr. HORST BINDING and Dipl.-Biol.  
REINHARD NEHLS ..... 132  
1. Introduction ..... 132  
2. Sexual Recombination ..... 132  
a) Structural Control of Meiotic Processes ..... 132  
b) Physiological Processes in Chiasma Formation ..... 133  
c) Genetic Control of Meiotic Processes ..... 133  
d) Analyses of Linkage Groups ..... 133  
3. Asexual Recombination ..... 134  
a) Somatic Crossing-Over ..... 134  
b) Sister Chromatid Exchange ..... 134  
c) Protoplast Fusion Techniques ..... 134  
d) Markers in Protoplast Fusion Experiments ..... 135  
e) Regeneration of Plants from Fusion Bodies ..... 135  
f) Chromosomal Behavior in Hybrid Cell Lines and  
Plants ..... 135  
g) Fates of Extrakaryotic Genophores ..... 136  
h) Asexual Recombination in Plant Breeding ..... 137  
References ..... 137

III. Mutation: Higher Plants. By Professor Dr. WERNER

GOTTSCHALK ..... 139  
1. Methods for Inducing Gene and Chromosome Mutations .. 139  
a) Physical Mutagens ..... 139  
b) Chemical Mutagens ..... 139  
c) Protection Against Genetic Damage and Repair of  
Breaks ..... 141  
2. Gene Mutations ..... 141  
a) Genes Controlling Meiosis and Mitosis ..... 141  
b) Mutant Genes of Interest in Applied Genetics ..... 142  
3. Genome Mutations ..... 143  
a) Natural and Experimental Possibilities for  
Obtaining Polyploid Plants ..... 143  
b) Autopolyploids ..... 144  
c) Experimentally Produced Allopolyploid Plants ..... 145  
d) The Genomic Constitution of Natural Polyploid  
Species ..... 145  
e) Aneuploids ..... 146  
f) Haploids and Polyhaploids ..... 147  
4. Chromosome Mutations ..... 148  
References ..... 149

IV. Function of Genetic Material. Genetics of Storage  
Proteins and Gene-Enzymes Relationships in Higher  
Plants. By Priv.Do. Dr. R. BLAICH ..... 153

1. Genetics of Storage Proteins ..... 153  
a) The Zein-Biosynthesis in Maize ..... 153  
b) Structural Genes Coding for Zein ..... 154  
c) Genes Influencing Zein Synthesis ..... 155

2. Regulation of Gene Expression ..... 155  
 a) Gene Number Estimates ..... 155  
 b) Transcription ..... 156  
 c) Double-Stranded RNA in a Higher Plant ..... 156  
 3. Genetics and Enzymes ..... 156  
 References ..... 157

V. Extranuclear Inheritance: Plastid Genetics. By  
 Professor Dr. RUDOLF HAGEMANN and Dr. sc. THOMAS BÖRNER.  
 With 3 Figures ..... 159  
 1. Introduction ..... 159  
 2. The Replication of Plastid DNA Molecules ..... 159  
 3. The Number of Plastid DNA Molecules per Plastid ..... 161  
 4. Repair of Damage of Plastid DNA ..... 162  
 5. Transcription of Plastid DNA and Its Regulation ..... 162  
 6. The Localization of Plastid Genes ..... 164  
 a) Restriction Maps and Physical Maps of the Plastid  
 Chromosome ..... 164  
 b) Organization of Ribosomal DNA ..... 167  
 c) Transfer RNA Genes and Transfer RNA Sequences .... 168  
 d) The Gene for the Large Subunit of RuBP-Carboxylase 169  
 e) Genes for Thylakoid Polypeptides ..... 170  
 References ..... 170

VI. Population Genetics. By Professor Dr. KLAUS WÖHRMANN  
 and Dr. JÜRGEN TOMIUK ..... 174  
 1. Introduction ..... 174  
 2. Theoretical Approach ..... 174  
 a) The Origin of Genetic Variability ..... 174  
 b) Multilocus Systems ..... 176  
 c) Sexuality ..... 176  
 d) Environment and Polymorphism ..... 177  
 e) Frequency and Density-Dependent Selection ..... 178  
 f) Random Drift and Neutrality of Mutations ..... 178  
 g) The Unit of Selection ..... 179  
 3. Investigations on Natural Populations ..... 179  
 a) Enzyme Polymorphism ..... 179  
 b) Quantitative Traits ..... 181  
 c) Breeding Systems and Polymorphism ..... 181  
 d) Selection Experiments ..... 181  
 e) Geographic Differentiation and Adaptation ..... 182  
 f) Genetic Diversity and Relationship ..... 183  
 References ..... 184

D. TAXONOMY

I. Systematics and Evolution of Seed Plants. By Dr.  
 HANS-HELMUT POPPENDIECK. With 1 Figure. With a  
 Contribution by Professor Dr. KLAUS KUBITZKI ..... 188  
 1. Introduction ..... 188  
 2. Problems of Classification ..... 189  
 a) The Art of Phylogenetic Reconstruction ..... 189  
 b) Identification of Primitive Character States ..... 190  
 c) Handling Diversity ..... 191  
 3. Morphology ..... 192

X Contents

- a) Anatomy and Micromorphology ..... 192
- b) Vegetative Structures ..... 193
- c) Floral Structures ..... 193
- d) Palynology and Embryology ..... 194
- 4. Karyology and Cytogenetics ..... 196
  - a) Karyotypes and DNA Content ..... 196
  - b) Cytogenetics ..... 197
  - c) Variation of Chromosome Numbers ..... 197
- 5. Chemical Systematics. By KLAUS KUBITZKI ..... 199
  - a) Origin of Secondary Compounds as Allelochemicals . 199
  - b) Ecogeographical Differentiation and Community Relationships of Secondary Metabolites ..... 200
  - c) Chemosystematic Principles and Practice ..... 201
- 6. Reproductive Biology ..... 204
  - a) Costs and Benefits of Reproduction ..... 204
  - b) Sex Distribution and Related Topics ..... 205
  - c) Dispersal ..... 206
- 7. Evolution ..... 207
  - a) General Considerations ..... 207
  - b) Populations and Species ..... 208
  - c) Geographical and Ecological Aspects ..... 210
- 8. Plants and Man ..... 212
- 9. Evolution and Classification of Higher Taxa ..... 214
  - a) Early Angiosperms ..... 214
  - b) "Living Fossils" ..... 215
  - c) Angiosperm Systematics ..... 216
- 10. Seed Plant Systematics on the Family Level and Below. 219
- References ..... 223

II. Paläobotanik. Von Dr. FRIEDEMANN SCHAARSCHMIDT ..... 236

- 1. Allgemeines ..... 236
- 2. Thallophyta ..... 236
- 3. Psilophyta ..... 238
- 4. Lycophyta ..... 241
- 5. Spenophyta ..... 242
- 6. Filicophyta ..... 243
- 7. Pteridospermae ..... 244
- 8. Coniferophyta ..... 245
- 9. Angiospermae ..... 246
- Literatur ..... 251

E. GEBOTANY

I. The History of Flora and Vegetation During the Quaternary. By Professor Dr. BURKHARD FRENZEL ..... 255

- 1. Pleistocene Stratigraphy ..... 255
- 2. Vegetation History ..... 257
  - a) Caucasia ..... 257
  - b) The Black Sea ..... 258
  - c) The Caspian Sea ..... 258
  - d) The European Part of the USSR ..... 259
  - e) Northeastern Europe ..... 261
  - f) Northeastern Siberia ..... 262
  - g) The Soviet Far East ..... 264
  - h) Central Asia ..... 264
- References ..... 265

II. Vegetation Science (Sociological Geobotany). By  
 Professor Dr. RÜDIGER KNAPP ..... 269

1. Fundamental Perspectives, Comprehensive Volumes, Bibliographies ..... 269
2. General Results and Methods ..... 270
  - a) Niche Concepts in Vegetation ..... 270
  - b) Biomathematic Approaches in Vegetation Dynamics .. 271
  - c) Actual Aspects of Syntaxonomy ..... 271
  - d) Integrated Multi-Regional Vegetation Maps ..... 272
3. Boreal and Subarctic Vegetation ..... 273
  - a) Boreal and Subarctic Vegetation in Highly Oceanic Climates ..... 273
  - b) Mire Vegetation in Northern Europe ..... 273
4. Temperate, Meridional, and Subtropical Vegetation ... 274
  - a) Forest and Shrub Vegetation in East Asia ..... 274
  - b) Vegetation of South-Eastern North America ..... 275
5. Tropical Vegetation ..... 276
  - a) Vegetation of Monsoonal South East Asia ..... 276
  - b) Central Polynesian and Micronesian Vegetation ... 276
  - c) Vegetation of the Antilles, of the Bahamas, and of the Bermudas ..... 276
6. Vegetation of the Extra-Tropical Southern Hemisphere. 277
  - a) Vegetation of Extra-Tropical South America ..... 277
  - b) Antarctic Vegetation ..... 277

References ..... 278

III. Experimental Ecology (Ecological Geobotany). By  
 Priv.-Doz. Dr. WOLFGANG SCHMIDT ..... 284

1. General ..... 284
2. Productivity and Ecosystem Research ..... 285
  - a) Photosynthesis, Respiration and Carbon Cycle .... 285
  - b) Biomass and Productivity ..... 291
  - c) Litter Fall, Decomposition, and Nutrient Cycle ... 297

References ..... 302

F. SPECIAL TOPICS

I. Floral Ecology. Report on the Years 1978(76) to 1981.  
 By Professor Dr. STEFAN VOGEL ..... 310

1. General ..... 310
2. Metabolism and Movements ..... 310
3. Means of Attraction ..... 311
  - a) Production of Scents and Resin ..... 311
  - b) Visual Patterns and Pigmentation ..... 312
  - c) Nectararies; Nectar and Oil Secretion ..... 313
  - d) Pollen and Its Imitation; Pollen Attachment ..... 314
4. Foraging Strategies of Pollinators ..... 315
5. Flower Classes and Their Evolution ..... 317
  - a) Zoophily ..... 317
  - b) Anemophily and Hydrogamy ..... 320
6. Pollination of Particular Groups ..... 321
  - a) Various Angiosperms ..... 321
  - b) Orchids ..... 322
  - c) Ficus ..... 323

## XII Contents

7. Community Structure and Pollination .....	324
a) Distribution of Flower Types .....	324
b) Pollinator Competition .....	325
c) Flower Competition and Seasonality .....	326
d) Floral Synergism on Community Level .....	327
e) Pollination of Sympatric Congeners .....	328
8. Populational Aspects and Compatibility .....	328
a) Pollen Flow .....	328
b) Autogamy and Cleistogamy; Apomixis .....	329
c) Stigmatic Secretions and Pollen Germination .....	330
d) Incompatibility .....	331
9. Dioecism, Monoecism, Sex Distribution .....	333
10. Heterostyly .....	334
Conclusion .....	336
References .....	337

### II. Proteins in Plant Evolution and Systematics. By

Professor Dr. UWE JENSEN .....	344
1. Systematical Significance .....	344
2. Cytochrome c-Type Proteins .....	345
3. Ferredoxin .....	346
4. Plastocyanin .....	348
5. Fraction-I-Protein ("Rubisco") .....	349
6. Isozymes .....	352
a) Isozyme Banding Comparison .....	353
b) Allozyme Comparison .....	353
c) Genetic Polymorphism .....	354
d) Additivity of Bands in Hybrids .....	354
e) Systematically Relevant Results .....	354
f) Limitations of Taxonomic Interpretation .....	355
7. Pollen and Spore Proteins .....	356
8. Other Nonstorage Proteins .....	356
9. Crude Tuber Proteins (Potato) .....	357
10. Seed Storage Proteins .....	357
a) Purified Proteins or Defined Fractions .....	357
b) Crude Seed Extracts .....	360
11. Conclusion .....	362
References .....	362

<u>Subject Index</u> .....	371
