## Titles in the Series

---

*M. A. Khan* and *N. C. Yannelis* (Eds.)  
Equilibrium Theory in Infinite Dimensional  
Spaces

*C. D. Aliprantis*, *K. C. Border*  
and *W. A. J. Luxemburg* (Eds.)  
Positive Operators, Riesz Spaces, and Economics

*D. G. Saari*  
Geometry of Voting

*C. D. Aliprantis* and *K. C. Border*  
Infinite Dimensional Analysis

*J.-P. Aubin*  
Dynamic Economic Theory

*M. Kurz* (Ed.)  
Endogenous Economic Fluctuations

*J.-F. Laslier*  
Tournament Solutions and Majority Voting

*A. Alkan*, *C. D. Aliprantis* and *N. C. Yannelis*  
(Eds.)  
Theory and Applications

*J. C. Moore*  
Mathematical Methods for Economic Theory 1

*J. C. Moore*  
Mathematical Methods for Economic Theory 2

*M. Majumdar*, *T. Mitra* and *K. Nishimura*  
Optimization and Chaos

*K. K. Sieberg*  
Criminal Dilemmas

*M. Florenzano* and *C. Le Van*  
Finite Dimensional Convexity and Optimization

*K. Vind*  
Independence, Additivity, Uncertainty

*T. Cason* and *C. Noussair* (Eds.)  
Advances in Experimental Markets

## Acknowledgments

We appreciate the patience and help of our families, first of all of our wives, Inna Aleskerov and Cornelia Monjardet, and our children, Sara and Tair Aleskerov and Sylvain Monjardet.

Several colleagues and friends made many helpful comments: Rafiq Agaev, Pavel Chebotarev, Tümer Kapan, Viacheslav Yakuba and the Aleskerovs' students in the course 'Advanced binary relations' in Boğaziçi University.

Viacheslav Yakuba prepared all figures. Mrs. Natalia Andryushina put a lot of work into preparing the text in camera-ready form. Mr. Vadim Shkol'nikov helped to solve all computer problems. We are particularly grateful to these friends.

We are grateful to Professor C. Aliprantis and Dr. W. Mueller for support this project and for their help with our work.

Fuad Aleskerov's work on these research topics was initiated in 1976 by discussions with his dear friend and teacher Mark Aizerman. His friendly supervision (not only in science) is unforgettable.

Recently his work has been partly supported by Boğaziçi University (Istanbul), the Institute of Control Sciences (Moscow) and the Russian Foundation for Basic Research (grant #02-01-00301). An invitation from Université Paris I allowed him to work on the manuscript in a very comfortable environment. All this support is gratefully acknowledged. Aleskerov would also like to thank several colleagues and friends who have supported him over the years: Kenneth Arrow, Salvador Barberà, Hasan Ersel, Hervé Moulin, Charles Plott, Iveri Prangishvili, Amartya Sen.

Bernard Monjardet's work on this book was supported by CERMSEM (Université Paris I). Among his CERMSEM colleagues he would particularly like to thank Cuong Le Van, Alain Chateaufneuf, Patrick Gourdel and Eric Soutif for material or scientific support. He would like also to mention that his interest in these topics was aroused a long time ago by G. T. Guilbaud's fascinating lectures and kept alive by contacts with many people, in particular, Mark Aizerman, Jean-Paul Doignon, Peter Fishburn and Philippe Vincke.

Naturally, all shortcomings are our own responsibility.

# Contents

|          |   |            |
|----------|---|------------|
| <b>1</b> | <b>Introduction</b>   | <b>1</b>   |
| 1.1      | Background and overview . . . . .   | 1          |
| 1.2      | Content of the chapters . . . . .   | 8          |
| <b>2</b> | <b>Preference, Utility, and Choice: Classic Models</b>  | <b>15</b>  |
| 2.1      | Introduction . . . . .  | 15         |
| 2.2      | Binary relations and preferences . . . . .  | 16         |
| 2.3      | Binary relations and choice . . . . .   | 26         |
| 2.4      | Utility and choice . . . . .  | 30         |
| 2.5      | Expansion-contraction axioms . . . . .  | 34         |
| 2.6      | Relations between the classes of choice functions . . . . .   | 43         |
| 2.7      | Concluding remarks and guide to the literature . . . . .  | 46         |
| <b>3</b> | <b>Utility Maximization Within a Constant Threshold or a Threshold Depending on One Alternative</b> | <b>51</b>  |
| 3.1      | Introduction . . . . .  | 51         |
| 3.2      | Non-negative threshold functions: the interval choice case  | 52         |
| 3.3      | Interval orders, semiorders, and interval choice . . . . .  | 54         |
| 3.4      | Properties of interval orders and semiorders . . . . .  | 67         |
| 3.5      | Interval choice and maximal antichains . . . . .  | 84         |
| 3.6      | Choice functions rationalizable by interval orders and semiorders . . . . .                         | 90         |
| 3.7      | Arbitrary threshold functions and biorders . . . . .  | 95         |
| 3.8      | Choice functions rationalizable by biorders . . . . .   | 104        |
| 3.9      | Concluding remarks and guide to the literature . . . . .  | 107        |
| <b>4</b> | <b>Utility Maximization Within a Threshold Depending on Both Compared Alternatives</b>              | <b>113</b> |
| 4.1      | Introduction . . . . .  | 113        |
| 4.2      | Representation theorems . . . . .   | 113        |
| 4.3      | Additive threshold function . . . . .   | 117        |
| 4.4      | Multiplicative threshold function . . . . .   | 119        |
| 4.5      | Properties of choice functions . . . . .  | 136        |
| 4.6      | Concluding remarks and guide to the literature . . . . .  | 137        |
