## Inhaltsverzeichnis. Contents. — Table des matières.

<b>Der Kohlenhydratstoffwechsel der Gräser.</b> Von H. H. SCHLUBACH, Chemisches Staatsinstitut, Universität Hamburg .....	1
I. Einleitung .....	1
II. Das Pflanzenmaterial .....	2
III. Die Isolierung der löslichen Kohlenhydrate .....	3
IV. Die analytischen Methoden .....	5
V. Die Konstitution der Polysaccharide der Gräser.....	7
VI. Die niedermolekularen Kohlenhydrate in den Gräsern.....	12
VII. Die Biogenese der Oligo- und Polysaccharide der Gräser .....	14
VIII. Abwandlungen des Kohlenhydrat- und des Eiweißgehaltes im Laufe einer Vegetationsperiode.....	17
IX. Anwendungen auf die Grünlandwirtschaft.....	23
Literaturverzeichnis .....	27
<b>Some in vitro Conversions of Naturally Occurring Carotenoids.</b>	
By L. ZECHMEISTER, California Institute of Technology, Pasadena, California .....	31
I. Introductory Remarks.....	32
<i>normal</i> and <i>retro</i> Structures 33. — Addition of Hydrogen to the Chromophore 34. — Addition of Oxygen to Terminal Double Bonds of the Chromophore 35. — Lengthening of the Chromo- phore 36.	
II. Preparation and Conversions of Carotenoids by Means of N-Bromosuccin- imide .....	36
1. Dehydrogenation of Colorless Compounds to Carotenoid Pigments Squalene 37. — Phytoene and Phytofluene 37.	37
2. Action of N-Bromosuccinimide on $\beta$ -Carotene .....	40
a) N-Bromosuccinimide and $\beta$ -Carotene in Carbon Tetrachloride Solution .....	40
<i>retro</i> -Dehydrocarotene 40. — <i>retro</i> -Bisdehydrocarotene 40. — Anhydro-eschscholtzanthin 41. — 3,4,3',4'-Bisdehydro- $\beta$ -caro- tene 41. — 3,4-Dehydro- $\beta$ -carotene 42.	

b) N-Bromosuccinimide and $\beta$ -Carotene in Ethanol-Containing Chloroform Solution .....	42
Formation of Ketones 42. — 4-Keto-3',4'-dehydro- $\beta$ -carotene 43. — 4-Keto- $\beta$ -carotene and 4,4'-Diketo- $\beta$ -carotene 45. — Identification of 4-Keto- $\beta$ -carotene and 4,4'-Diketo- $\beta$ -carotene with Natural Products 47. — Addendum 47.	
3. Action of N-Bromosuccinimide on $\alpha$ -Carotene .....	48
3,4-Dehydro- $\alpha$ -carotene 48.	
4. Action of N-Bromosuccinimide on Lycopene .....	49
5. Action of N-Bromosuccinimide on Cryptoxanthin .....	49
6. Action of N-Bromosuccinimide on Physaliene .....	49
III. Conversions of Carotenoids via their Boron Trifluoride Complexes ...	50
1. Cleavage Products of the $\beta$ -Carotene-BF <sub>3</sub> Complex .....	51
2. Cleavage Products of the $\alpha$ -Carotene-BF <sub>3</sub> Complex .....	52
3. Cleavage Products of the BF <sub>3</sub> Complexes of Some Dehydrogenated Carotenes .....	55
a) <i>retro</i> -Dehydrocarotene-BF <sub>3</sub> .....	55
b) 3,4-Dehydro- $\alpha$ -carotene-BF <sub>3</sub> and 3,4-Dehydro- $\beta$ -carotene-BF <sub>3</sub> .....	56
c) <i>retro</i> -Bisdehydrocarotene-BF <sub>3</sub> .....	57
4. Cleavage Products of the Lycopene-BF <sub>3</sub> Complex .....	58
5. Cleavage Products of the $\gamma$ -Carotene-BF <sub>3</sub> Complex .....	60
6. Cleavage Product of the Anhydrovitamin A <sub>1</sub> -BF <sub>3</sub> Complex .....	61
IV. Dehydration and Dehydrogenation of Lutein .....	62
V. Some Spectroscopic Observations .....	63
Position of the Maxima 65. — Lengthening of the $\beta$ -Carotene Chromophore 67. — Influence of the Spatial Configuration 70. — Transition from <i>normal</i> to <i>retro</i> Structures 73. — Spectral Curves 75.	
References .....	76
<b>The Chemistry of Podophyllum.</b> By J. L. HARTWELL and A. W. SCHRECKER, Laboratory of Chemical Pharmacology, National Cancer Institute, National Institutes of Health, Public Health Service, U. S. Department of Health, Education and Welfare, Bethesda, Maryland	83
I. History .....	84
II. Preparation of Podophyllin .....	88
III. Composition of Podophyllum .....	88
IV. Other Sources of Podophyllum Lignans .....	93
V. Isolation Procedures .....	94
1. Isolation without Chromatography .....	95
2. Adsorption Chromatography .....	96
3. Partition Chromatography .....	97

VI. Podophyllotoxin .....	98
1. Properties .....	98
2. Structure .....	99
3. The Apopicropodophyllins .....	108
4. Stereochemistry .....	111
5. Synthetic Approaches .....	119
VII. Desoxypodophyllotoxin .....	121
VIII. Dehydropodophyllotoxin .....	123
IX. 4'-Demethylpodophyllotoxin .....	124
X. The Peltatins .....	126
XI. Sikkimotoxin .....	130
XII. Lignan Glucosides .....	133
XIII. Ionic Derivatives of Podophyllotoxin and of the Peltatins .....	136
XIV. Flavonols .....	138
XV. Absorption Spectra .....	139
1. Ultraviolet Spectra .....	139
2. Infrared Spectra .....	143
XVI. Biological Action .....	143
XVII. Tables .....	145
1. Well-characterized Compounds Isolated from <i>Podophyllum</i> Species .....	145
2. Solvates and Modifications of Podophyllotoxin .....	146
3. Molecular Rotations of Compounds in the Conidendrin and Desoxy- podophyllotoxin Series .....	146
4. Podophyllotoxin and Derivatives .....	147
5. Desoxypodophyllotoxin and Derivatives .....	150
6. 4'-Demethylpodophyllotoxin and Derivatives .....	150
7. Peltatins and Derivatives .....	151
8. Sikkimotoxin and Derivatives .....	152
9. Lignan Glucosides and Derivatives .....	152
10. Maximum Tolerated Doses (MTD) and Minimum Effective Doses (MED) in Mice Bearing Sarcoma 37 .....	153
11. Ionic Derivatives of Podophyllotoxin and of the Peltatins, and Intermediates .....	154
12. Flavonols and Derivatives .....	155
13. Ultraviolet Absorption Maxima of <i>Podophyllum</i> Lignans and of Some of Their Derivatives .....	156
References .....	157

<b>X-ray Analysis and the Structure of Vitamin B<sub>12</sub>.</b> By DOROTHY CROWFOOT HODGKIN, University Museum, Oxford .....	167
I. Introduction .....	167
II. Some Characteristics of the X-ray Crystallographic Methods Applied to the Analysis of Vitamin B <sub>12</sub> .....	169
III. The Determination of the Structure of Vitamin B <sub>12</sub> .....	173
1. Preliminary Crystallographic Measurements and Observations .....	173
2. The Stages of Atom Identification .....	176
a) The Cyanide Group .....	179
b) The "Nucleotide" Group .....	179
c) The Corrin Nucleus .....	183
d) The Side-chains Attached to the Nucleus .....	185
e) The Propanolamine Groups .....	189
3. The Problem of Right and Wrong Atoms .....	194
4. The Refinement of the Atomic Positions .....	195
5. The Absolute Configuration of the Molecule .....	196
6. The Chemical Formulae of Vitamin B <sub>12</sub> and the Hexacarboxylic Acid .....	196
IV. The Chemical Reactions of Vitamin B <sub>12</sub> .....	202
V. Biochemical Problems Connected with the B <sub>12</sub> Structure .....	207
VI. The Crystal Structures of Vitamin B <sub>12</sub> and the Hexacarboxylic Acid ..	212
VII. Conclusion .....	218
References .....	218
