Regional Analysis and Policy
This book is the result of hard work and collective action of many people and institutions. The 46th Congress of the European Regional Science Association held in Volos in 2006 offered the platform for Greek regional scientists to present and discuss the most recent research findings on Regional Science issues. These circumstances inspired the initial considerations of publishing a collective volume on Regional Analysis and Policy in Greece.

We would like to thank the authors of the volume for their contributions and the continuous cooperation for the preparation of the book. We also thank the Department of Planning and Regional Development of the University of Thessaly for providing the infrastructure, the human resources and the administrative support for organizing this publication. Part of the work for this book was conducted at the Hellenic Observatory of the London School of Economics from September 2007 to February 2008 while Yannis Psycharis was a National Bank of Greece Senior Research Fellow. We thank the Hellenic Observatory of the London School of Economics for the hospitality and for providing access to invaluable sources.

We particularly acknowledge the technical assistance of Panayotis Pantazis who worked with us meticulously towards the final version of the book. We greatly acknowledge the editorial assistance of Rachel Finnie that resulted in a substantial improvement of the papers submitted. We also thank the Springer editorial team for their professional support and excellent cooperation.

We believe that this volume provides many interesting insights from Greek regional science research and could facilitate further discussion and debate about regional science, regional development and regional policy issues.
