Computer Aided Surgery

7th Asian Conference on Computer Aided Surgery
Bangkok, Thailand, August 2011
Proceedings
Preface

The 7th Asian Conference on Computer-Aided Surgery, ACCAS 2011, was held at the Bangkok Convention Center, Central World, Bangkok, Thailand August 26–27, 2011.

The Asian Conference on Computer-Aided Surgery (ACCAS) is an international scientific congress focusing on the advancement of new technologies for medical services. The ACCAS series provides a forum for academic researchers, clinical scientists, surgeons and industrial partners to exchange new ideas, techniques, and the latest developments in the field. The ACCAS has remained a truly international meeting, bringing together researchers from all fields related to medical activity visualization, simulation and modeling, virtual reality for computer-aided surgery (CAS), image-guided diagnosis and therapies, CAS for minimally invasive intervention, medical robotics and instrumentation, surgical navigation, clinical application of CAS, teledicine and telesurgery, and CAS education. The ACCAS is also interested in promoting collaboration among people from different disciplines and different countries in Asia and other parts of the world.

As a high-impact workshop, the ACCAS continues to grow. For this year, the ACCAS focused on the topic of “Improving Medical Services with Emerging and Frontier Technologies”. Not only computer-related but all advanced technologies were introduced and presented in order to share new ideas with surgeons and other doctors in all fields of medicine. We received a record of 67 submissions from Japan, Korea, China, Thailand, and other Asian countries. These papers were presented in double-track oral and poster sessions, which covered medical robotics, medical imaging, surgical navigation, biomedical signal processing and instrumentation, virtual reality in medicine, simulation and modeling, and diagnostic tools in biomedical engineering.

This is the first time for us to use Springer Proceedings in Information and Communications Technology (PICT) to publish the ACCAS conference proceedings. For this volume, we selected 16 papers on the basis of the recommendations of session chairs and the Award Selection Committee of ACCAS 2011. All papers were resubmitted and reviewed again by up to three reviewers. The review process was kept to a very tight schedule, and we appreciate the commitment and professionalism shown by all of those who took part.

Organizing ACCAS 2011 was very much a team effort, and we are extremely grateful to Professor Soottiporn Chittmittrapap, the General Chair, who organized this successful conference, Prof. Somkiat Wattanasirichaigoon, the General Co-chair, who helped organize the conference, Prof. Jackrit Suthakorn, the Program Chair, who tirelessly spent his valuable time arranging the technical program and session chairs, Prof. Niyom Laoopugsin, the Scientific Exhibition Chair, who provided full support in organizing the scientific and commercial
exhibitions, Miss Choosri Keedumrongkool, the Conference Secretariat, who compiled the list of abstracts and had the Program and Abstract Book published, and all members of the Organizing Committee and the Scientific Committee for their hard work on this well-organized conference.

We would also like to thank the invited speakers Professor Yoshiyuki Sankai from the University of Tsukuba in Japan for his lecture on advanced robotics, and Professor Pairash Thajchayapong from the National Science and Technology Development Agency in Thailand, Professor Jackrit Suthakorn and Professor Sunai Leewansangtong from Mahidol University in Thailand, and Dr. Tassanai Parittotokkaporn from Srinakharinwirot University in Thailand for their inspiring and entertaining presentations on computer-aided surgery.

It was our great pleasure to welcome the attendees to Bangkok for this year’s ACCAS conference. For those who were not able to join us, we hope this volume will serve as a valuable reference. The 8th Asian Conference on Computer-Aided Surgery will be held in Beijing, China, and will be a 2-day conference May 26–30, 2012, in conjunction with the World Congress on Medical Physics and Biomedical Engineering 2012. We look forward to seeing you there.

December 2011
Takeyoshi Dohi
Hongen Liao
ACCAS 2011 Organization

Advisory Chairs
Takeyoshi Dohi The University of Tokyo, Japan
Masaki Kitajima Keio University School of Medicine, Japan
Makoto Hashizume Kyushu University, Japan
Young Soo Kim Hanyang University Medical Center, Korea

General Chair and Co-chairs
Soottiporn Chittmittrapap (Chair) The National Research Council of Thailand, Thailand
Somkiat Wattanasirichaigoon Srinakharinwirot University, Thailand
Woo Jung Lee Yonsei University College of Medicine, Korea
Jing Fang Peking University, China
Chee Kong Chui National University of Singapore, Singapore
Hurng-Sheng Wu Show Chwan Memorial Hospital, Taiwan

Scientific Chair and Co-chairs
Jackrit Suthakorn (Chair) Mahidol University, Thailand
Pornarong Chotiwan Chulalongkorn University, Thailand
Suthee Phoojaroenchanachai National Electronics and Computer Technology Center, Thailand
Hiroshi Iseki Tokyo Women’s Medical University, Japan
Hongen Liao The University of Tokyo, Japan
Jaesung Hong Daegu Gyeongbuk Institute of Science and Technology, Korea

Exhibition Chair and Co-chairs
Niyom Laoopugsin (Chair) Srinakharinwiroj University, Thailand
Patpong Navicharern Chulalongkorn University, Thailand

Organizing Committee
Pornarong Chotiwan (Thailand) Mana Sriyudthsak (Thailand)
Krissanapong Kirtikara (Thailand) Jackrit Suthakorn (Thailand)
Djitt Laowattana (Thailand) Pairash Thajchayapong (Thailand)
Patpong Navicharern (Thailand) Somkiat Wattanasirichaigoon (Thailand)
Suthee Phoojaroenchanachai (Thailand)
Scientific Committee

Shanglian Bao (China)  Ryoichi Nakamura (Japan)
Wolfgang Birkfellner (Austria)  Phornphop Naiyanetr (Thailand)
Yiyu Cai (Singapore)  Yoshikazu Nakajima (Japan)
Hung-Chi Chang (Taiwan)  Patpong Navicharern (Thailand)
Toshiro Chiba (Japan)  Isao Ohnishi (Japan)
Kiyoyuki Chinzei (Japan)  Masazumi Okajima (Japan)
Somsak Chomchuay (Thailand)  Manukid Panichkul (Thailand)
Chee Kong Chui (Singapore)  Jong Il Park (Korea)
Hui Ding (China)  Jong Oh Park (Korea)
Jing Fang (China)  Chuchart Pintavirooj (Thailand)
Masakatsu G. Fujie (Japan)  Pradya Prempraneerach (Thailand)
Hideo Fujimoto (Japan)  Panrassie Ritthipravat (Thailand)
Lixu Gu (China)  Ichiro Sakuma (Japan)
Koji Ikuta (Japan)  Yoshinobu Sato (Japan)
Hiroshi Iseki (Japan)  Chakaphan Sookcharoen (Thailand)
Linhhong Ji (China)  Jackrit Suthakorn (Thailand)
Yung Ho Jo (Korea)  Wenchang Tan (China)
Kyung Hwan Kim (Korea)  Chanchai Thajiam (Thailand)
Yoon Hyuk Kim (Korea)  Qi Tian (Singapore)
Etsuko Kobayashi (Japan)  Yih-Huei Uen (Taiwan)
Dong Soo Kwon (Korea)  Guangzhi Wang (China)
Kyung Jin Lee (Korea)  Hwei-Ming Wang (Taiwan)
Shih-Tseng Lee (Taiwan)  Tianmiao Wang (China)
Wei-Jei Lee (Taiwan)  Weu Wang (Taiwan)
Jin-Tung Liang (Taiwan)  Zhibiao Wang (China)
Hui-Ping Liu (Taiwan)  Po-Li Wei (Taiwan)
Jimmy Liu (Singapore)  Chumpon Wilasrusmee (Thailand)
Shiuh-Inn Liu (Taiwan)  Yodchanan Wongsawat (Thailand)
Tsang-Pai Liu (Taiwan)  Chieh-Tsai Wu (Taiwan)
Thavida Maneewan (Thailand)  Yasushi Yamauchi (Japan)
Ken Masamune (Japan)  Mei-Due Yang (Taiwan)
Mamoru Mitsuishi (Japan)  Byung Joo Yi (Korea)
Yoshihiro Muragaki (Japan)  Jue Zhang (China)

Exhibition Committee

Niyom Laoopugsin (Thailand)  Dechrit Maneetham (Thailand)
Unchalee Sanguanpong (Thailand)  Benchalak Muangmeesri (Thailand)

Conference Secretariat

Choosri Keedumrongkool (Thailand)

# Table of Contents

## Medical Robotics and Instruments

Nonmetallic Guide Sheath with Negative Pressure Shapelocking for Minimally Invasive Image-Guided Surgery .......................... 1  
  *Siyang Zuo, Ken Masamune, Kenta Kuwana, and Takeyoshi Dohi*

Study of Design Method for Surgical Robot Using Surgeon’s Operation Manner .......................................................... 10  
  *Hiroto Seno, Kazuya Kawamura, Yo Kobayashi, and Masakatsu G. Fujie*

Prototype Design of Robotic Surgical Instrument for Minimally Invasive Robot Surgery ........................................... 20  
  *Man Bok Hong and Yung-Ho Jo*

Polarizing Beam Splitter Endoscope for Simultaneously Observing Front and Lateral View ........................................... 29  
  *Tomoya Tsuruyama, Noriaki Yamanaka, Kenta Kuwana, Ken Masamune, Keri Kim, and Takeyoshi Dohi*

## CAS for Minimally Invasive Intervention

Clipping Device with a Clear Liquid-Flushing Endoscope Equipping Wide View Coaxial Nozzle for Edge-to-Edge Repair Surgery without Heart-Lung Machine .......................................................... 38  
  *Tetsuya Horiuchi, Ken Masamune, Hiroyuki Tsukihara, Noboru Motomura, Kenta Kuwana, and Takeyoshi Dohi*

Cooling Effect of the Ligamentum Flavum for Preventing Dural Puncture during the Epidural Anesthesia ......................... 47  
  *Kiyoshi Naemura*

An Algorithm for Control of Flexing Instruments for Single-Incision Laparoscopic Surgery .............................................. 55  
  *Yuki Horise, Atsushi Nishikawa, Yu Kitanaka, Mitsugu Sekimoto, Norikatsu Miyoshi, Shuji Takiguchi, Yuichiro Doki, Masaki Mori, and Fumio Miyazaki*

A Laser Steering Endoscope with High Laser Transmission Efficiency ......................... 65  
  *Noriaki Yamanaka, Ken Masamune, Kenta Kuwana, Hiromasa Yamashita, Toshio Chiba, and Takeyoshi Dohi*
Image Guided Diagnosis and Therapies

Video Information Management System for Information Guided Neurosurgery ................................................................. 75
Takashi Suzuki, Kitaro Yoshimitsu, Manabu Tamura, Yoshihiro Muragaki, and Hiroshi Iseki

Development of a Laparoscopic Surgical Training System with Simulation Open Framework Architecture (SOFA) ...................... 83
Youngjun Kim, Kyunghwan Kim, Frédéric Roy, and Sehyung Park

Intuitive Touch Panel Navigation System through Kyoto Digital Sosui Network ........................................................................... 92
Junichi Shimada, Kazuhiro Ito, Daishiro Kato, Masanori Shimomura, Hiroaki Tsunezuka, Satoru Okada, Kaori Ichise, and Shunta Ishihara

EEG-Based Acute Pain Control System .................................................. 101
Nattakul Saithong, Waraporn Poolpoem, Pradkij Panavaranan, Jannipa Saetang, and Yodchanan Wongsawat

Medical Image Computing

High-Quality Intra-operative Ultrasound Reconstruction Based on Catheter Path ........................................................................... 113
Kuan Luan, Takashi Ohya, Hongen Liao, and Ichiro Sakuma

Nonlinear Reaction Force Analysis for Characterization of Breast Tissues ..................................................................................... 125
Mariko Tsukune, Yo Kobayashi, Takeharu Hoshi, Yasuyuki Shiraishi, Tomoyuki Miyashita, Tomoyuki Yambe, and Masakatsu G. Fujie

MRI Based Sulcal Pattern Analysis for Diagnosis and Clinical Application in Neurosurgery ......................................................... 135
Manabu Tamura, Hiroki Nishibayashi, Mitsuhiro Ogura, Yuji Uematsu, Toru Itakura, Jean François Mangin, Jean Régis, Soko Ikuta, Kitaro Yoshimitsu, Takashi Suzuki, Chiharu Niki, Yoshihiro Muragaki, and Hiroshi Iseki

Adaptive Rendering Method for Low Resolution Auto-stereoscopic 3-D Medical Images ................................................................ 144
Takehito Teraguchi, Kenta Kuwana, Ken Masamune, Takeyoshi Dohi, Susumu Nakajima, and Hongen Liao

Author Index ....................................................................................... 155
