To all the women who influenced us

Acknowledgments

This book is the output of a long study, starting in 2008 and culminating in 2013. During this time period many people aided our attempt to study the status of women workers in the IT sector.

The study is partly based on the output of a research project “Women, Work and Education”, undertaken by the Institute of Development Studies Kolkata (IDSK), India, and funded by Rosa Luxemborg Society (Berlin, Germany). We wish to thank the funding agency for their generous assistance and to IDSK for providing the necessary infrastructural and administrative support to undertake the study. In particular we wish to thank Prof. Amiya Bagchi, Dr. Ramkrishna Chatterjee and Prof. Achin Chakraborty for their encouragement and support. We thank our Research Assistants, Sangeeta Dutta and Sanchita Mukherjee, for their hard and sincere efforts on the field, and during the process of data cleaning, editing, entry and analysis and Mr. Surit Das for his painstaking copy editing.

Initial findings were presented at three seminars—Annual Conference of The Indian Association of Labour Economics, Lucknow, India, 13–15 December 2008; Conference on International Competitiveness and Inclusive Development, organized by United Nations Conference on Trade And Development (UNCTAD) and Centre for Development Studies, Trivandrum, India, 20–21 October 2008; and Conference on Women, Work and Education, organized by IDSK, 22–23 August 2008. We are grateful to participants for their comments and suggestions that have helped to improve our work.

We received valuable comments from Prof. Bina Agrawal, Institute of Economic Growth, New Delhi, India. She suggested several useful papers that not only added breadth to the study, but also enabled us to situate the research problem in a historical framework. Anonymous reviewers also provided incisive comments and suggestions that greatly sharpened the thrust of the work. Any remaining errors remain our responsibility.

Finally, we wish to thank the respondents of the main survey undertaken in 2008 and the follow-up survey in 2013, for their patient responses to our probing, and those who facilitated the interviews.

Contents

1	Women, Work and Agency: An Introduction	1
1.1	Introduction	1
1.2	Women in IT Sector	3
1.3	Empowerment and Agency	3
1.3.1	Towards an Understanding of Empowerment	4
1.3.2	Macro Measures	5
1.3.3	Sen's Capability Approach	6
1.3.4	Micro-Based Measures	7
1.3.5	Agency	8
1.4	Employment, Capabilities and Empowerment	10
1.5	Research Objective	12
1.6	Methodology	13
1.7	Chapter Scheme	16
	References	16
2	Women, Work and Exploitation: A Binary Perspective	21
2.1	Introduction	21
