Preface

Dear Colleagues,

welcome to Jerusalem 1999 – an appropriate place for our professional gathering at the dawn of the coming millennium!

An “All-Star” team of teachers is here for the Post-Graduate Course. They will focus on modern issues that are less frequently discussed at international conferences, emphasizing the radiological expression of patho-physiological processes. Lectures include topics on high resolution imaging in chest and abdomen, in bone and soft tissues. Discussions on pre- and post-therapy imaging will help underline our role in diagnosis and in therapy. This Syllabus includes detailed lecture manuscripts from the 22nd Post-Graduate Course.

We would like to express our gratitude to the faculty of lecturers for their time and efforts, to the Bracco Company for sponsoring the Syllabus, and to Springer-Verlag for editing and printing this book.
