Contents

1	Why I Ventilate a Patient Non Invasively	1
	Suggested Reading	3
2	The Physiology of Mechanical Ventilation	5
	Suggested Reading	7
3	(Almost) Everything You Wanted to Know	
	About a Ventilator	9
	3.1 How a Ventilator Works	10
	3.1.1 Pressurized Gas System	10
	3.1.2 Source of Gas	11
	3.1.3 Inspiratory and Expiratory Valves	11
	3.1.4 Inspiratory and Expiratory Triggers	12
	3.1.5 Alarms	12
	3.1.6 The Monitoring System	12
	3.1.7 Comparative Studies	13
	Suggested Reading	14
4	The Interfaces for NIV	15
	4.1 Mouthpieces	16
	4.2 Nasal Masks	16
	4.3 Nasal Pillows	17
	4.4 Face Masks	17
	4.5 Helmets	17
	Suggested Reading	19
5	When to Start (or Not) Ventilation Treatment	21
	5.1 The Timing of Application	21
	5.2 Arterial Blood-Gas Analysis	22
	5.3 Dyspnea	23
	5.4 Cyanosis, Tachypnea, and Recruitment of Accessory Muscles	24
	5.5 Neurological Status	25
	5.6 Cough Efficacy	25

5.7	Other Clinical Considerations.	26
	Suggested Reading	27
6	How I Ventilate a Patient Non Invasively	29
6.1	Continuous Positive Airway Pressure	29
6.1.1	Applications.	31
6.2	Volume Modes.	32
6.2.1	Assisted/Controlled Ventilation	33
6.2.2	Synchronized Intermittent Mandatory Ventilation.	34
6.3	Pressure Modes	35
6.3.1	Pressure Support Ventilation	35
6.3.2	Pressure Controlled Ventilation	37
6.3.3	Proportional Assist Ventilation.	38
	Suggested Reading	40
7	How I Set a Ventilator	43
7.1	What do Volume and Pressure Mode Settings Have in Common?	43
7.1.1	The Trigger	43
7.1.2	The Respiratory Rate	45
7.1.3	Fraction of Inspired Oxygen	46
7.2	Specific Setting of Volume Modes	47
7.2.1	Tidal Volume.	47
7.2.2	Expiratory Pressure.	48
7.2.3	Inspiratory Flow.	48
7.2.4	Inspiratory/Expiratory Ratio.	49
7.2.5	Setting Pressure Modes	49
	Suggested Reading	55
8	Other Modes of Ventilation	57
8.1	Neurally Adjusted Ventilatory Assist	57
8.2	Airway Pressure-Release Ventilation or Biphasic Positive Airway Pressure.	58
8.3	High Frequency Ventilation.	58
8.4	Volume-Assured Pressure Support Ventilation and Volume-Guaranteed Ventilation	60
	Suggested Reading	60
9	Why is NIV Good?	63
	Suggested Reading	65
10	Myths, Prejudices and Real Problems	67
10.1	The Side Effects are Negligible	67
10.2	NIV Does Not Work in Severely Ill Patients	70

10.3	The Work Load Necessary for NIV is Too Onerous	70
10.4	The Helmet is the Interface of Choice	72
10.5	It is Better Not to Use an Interface with a Large Dead Space	73
10.6	A Patient Being Non Invasively Ventilated Must Not Be Sedated	73
10.7	It is (Almost) Impossible to Use NIV in a Comatose Patient	75
10.8	Reimbursement for NIV Through the DRG System	75
	Suggested Reading	77
11	NIV in the Treatment of Acute Respiratory Failure:	
	The Magnificent Five	79
11.1	Exacerbation of COPD	79
11.2	Acute Pulmonary Edema	82
11.3	Pneumonia in Immunocompromised Patients	83
11.4	Weaning from Invasive Ventilation in COPD	84
11.5	Prevention of Post-Extubation Respiratory Failure in High-Risk Subjects	86
	Suggested reading	87
12	NIV in the Treatment of Acute Respiratory Failure:	
	Emerging Indications	91
12.1	Prevention and Treatment of Surgical Complications	91
12.2	Obesity Hypoventilation Syndrome	92
12.3	Palliation of Symptoms in the Terminally Ill Patient	92
12.4	Asthma	94
12.5	Restrictive Neuromuscular and Chest Cage Disorders	94
12.6	Ventilatory Support During Bronchoscopy	95
12.7	Future Indications Supported by Single Studies	95
	Suggested Reading	96
13	NIV in the Treatment of Acute Respiratory Failure:	
	Controversial Indications	99
13.1	Pneumonia	99
13.2	Acute Respiratory Distress Syndrome	100
13.3	Treatment of Post-extubation Respiratory Failure	101
13.4	Severe Acute Respiratory Syndrome and Other Pandemics	102
	Suggested Reading	103

14	Eight Rules to Remember When Ventilating a Patient Non Invasively	107
14.1	Everything Must be Ready and Everything Must be Familiar	107
14.2	There is No Such Thing as the Best Method of Ventilation.	107
14.3	Choose the Ventilator According to the Patient's Need.	108
14.4	There is no Single Interface Valid for All Patients	108
14.5	Explain What You Want to Do to the Patient	109
14.6	Never Work Alone	109
14.7	Be Aware of Your Limits	110
14.8	Monitor and Record What You Do.	110
	Suggested Reading	111
15	Tricks and Traps of NIV	113
15.1	Tubing	113
15.2	The Connections.	114
15.3	Non-rebreathing Devices	115
15.4	Humidification	116
15.5	Administration of Bronchodilators	118
15.6	Administration of Oxygen	119
	Suggested Reading	120
16	Predictors of Failure.	121
16.1	Hypercapnic Respiratory Failure.	121
16.2	Hypoxic Respiratory Failure	123
	Suggested Reading	124
17	Where to Ventilate a Patient with NIV	125
	Suggested Reading	128
18	Monitoring During NIV	131
18.1	Level I Monitoring	132
18.1.1	Physical Examination	132
18.1.2	Respiratory Rate.	133
18.1.3	Dyspnea	133
18.1.4	Blood-Gas Analyses and Related Parameters	134
18.1.5	Pulse Oximetry	134
18.1.6	Basic Monitoring of Cardiovascular Function (ECG and Non Invasively Measured Systemic Arterial Blood Pressure)	134
18.1.7	Exhaled Tidal Volume	135
18.1.8	Prognostic Scores	135
18.1.9	Delirium	136

18.2	Level II Monitoring	136
18.2.1	Measure of the Efficacy of the Respiratory Muscles.	136
18.2.2	Transcutaneous Monitoring of Gases (PtcCO ₂ and PtcO ₂)	137
18.2.3	Capnometry and Capnography	137
18.2.4	The Alveolar-Capillary O ₂ Gradient	138
18.2.5	Peripheral Venous Pressure	138
18.2.6	Invasive Arterial Blood Pressure	138
18.2.7	Static Lung Volumes	138
18.2.8	Color-Doppler Echocardiography	138
18.2.9	Ultrasonography	139
18.3	Level III Invasive or Highly Specialized Monitoring	139
18.3.1	Measurements of Respiratory Mechanics.	139
18.3.2	Electromyography of the Respiratory Muscles	140
18.3.3	Inductive Plethysmography	140
18.3.4	Hemodynamics.	140
18.3.5	Mixed Venous Blood O ₂ Saturation and Venous Admixture	141
	Suggested Reading	141
19	How to Interpret the Curves on the Ventilator Screen.	143
	Suggested Reading	148
20	Chronic Mechanical Ventilation: Is There a Rationale?	149
	Suggested Reading	153
21	Chronic Ventilation in COPD	155
21.1	Indications for Prescribing NIV and Possible Outcomes	163
21.2	Conclusions	165
	Suggested Reading	165
22	Ventilation in Patients with Restrictive Disorders	169
22.1	Duchenne's Muscular Dystrophy	171
22.2	Indications for NIV in Patients with Restrictive Chest Diseases or with Restrictive Chest Disease	172
	Suggested Reading	174
23	Rationale for Ventilation Therapy During Sleep	177
23.1	Physiology.	177
23.2	Pathological Conditions.	179
23.3	Chronic Respiratory Failure	187

23.4	Obstructive Sleep Apnea Syndrome:	
	Obesity-Hypoventilation Syndrome	187
	Suggested Reading	191
24	Nocturnal Ventilation: When to Use CPAP, When NIV	195
24.1	Obstructive Sleep Apnea Syndrome	195
24.1.1	Titration of CPAP	198
24.1.2	Adherence to Treatment	199
24.1.3	Side Effects	200
24.2	Persistence of OSA Despite CPAP Treatment	200
24.2.1	Therapeutic Alternatives to CPAP During OSAS	201
24.3	Obesity-Hypoventilation Syndrome	202
24.4	Alveolar Hypoventilation During Sleep	204
24.4.1	Procedures for Prescribing Long-Term NIV	204
	Suggested Reading	209
