Logic, Epistemology, and the Unity of Science
Logic, Epistemology, and the Unity of Science aims to reconsider the question of the unity of science in light of recent developments in logic. At present, no single logical, semantical or methodological framework dominates the philosophy of science. However, the editors of this series believe that formal techniques like, for example, independence friendly logic, dialogical logics, multimodal logics, game theoretic semantics and linear logics, have the potential to cast new light on basic issues in the discussion of the unity of science.

This series provides a venue where philosophers and logicians can apply specific technical insights to fundamental philosophical problems. While the series is open to a wide variety of perspectives, including the study and analysis of argumentation and the critical discussion of the relationship between logic and the philosophy of science, the aim is to provide an integrated picture of the scientific enterprise in all its diversity.

Otto Neurath and the Unity of Science
## Contents

1 Neurath and the Unity of Science: An Introduction ................................. 1  
Olga Pombo, John Symons, and Juan Manuel Torres

### Part I On Neurath

2 Unity of Science and Logical Empiricism: A Reply ......................... 15  
Otto Neurath

3 The Neurath–Horkeimer-Controversy Reconsidered:  
Otto Neurath’s Erwiderung to Max Horkheimer’s Attack  
Against the Vienna Circle ......................................................... 31  
Karlheinz Barck

4 Otto Neurath’s Epistemology and Its Paradoxes ............................ 41  
Jan Sebestik

5 Neurath and the Encyclopaedic Project of Unity of Science ............ 59  
Olga Pombo

6 Principles and Practices of Neurath’s Picture Language ................ 71  
Ahti -Veikko Pietarinen

7 Conceptions of Reality – Schlick, Carnap, Neurath ...................... 83  
Thomas Bonk

8 Keeping Track of Neurath’s Bill: Abstract Concepts, 
Stock Models and the Unity of Classical Physics .......................... 95  
Sheldon Steed, Gabriele Contessa, and Nancy Cartwright

9 G. Itelson – A Socratic Philosopher ........................................... 109  
Gideon Freudenthal and Tatiana Karachentsev

### Part II On the Unity of Science

10 Unity Without Myths ............................................................... 129  
Daniel Andler
