Contributors

Liane Peña Alampay is Associate Professor at the Department of Psychology, Ateneo de Manila University, Philippines. Her research is in the areas of parenting and child adjustment, adolescent development, and interventions for children and families at risk.

Suha Al-Hassan specializes in early childhood and special education. Currently she works as an Associate Professor and Dean of Queen Rania Faculty for Childhood at the Hashemite University in Jordan. She received her Ph.D. in special education/applied behaviour analysis from the Ohio State University. In addition to her academic experience, Suha has 10 years of consultancy work in Jordan. She has worked on the development of early learning development standards for the government of Libya, the assessment of learning readiness of first grade students in Jordan, evaluation of a better parenting program, evaluation of early childhood education programs, and she has co-developed standards for kindergartens and nurseries in Jordan.

Patricia Anderson is a Jamaican sociologist and currently an independent researcher. She previously held the position of Professor of Applied Sociology at the University of the West Indies, Mona Campus. Her doctoral training was in Sociology and Demography at the University of Chicago, and her research interests include labour market analysis, education, gender and poverty. patandy44@yahoo.com

I.K. Annie is Assistant Professor of Community Medicine in RUHSA (Rural Unit for Health and Social Affairs), Department of Christian Medical College, Vellore, India. She works in rural, underserved areas. Her area of interest has been in Community Based Rehabilitation of the most vulnerable and marginalized people in the service area.

Emmanuel D. Babatunde is a Professor of Anthropology at Lincoln University, PA, USA and Chair of Sociology, Anthropology, Criminal Justice and Human Services. Dr. Babatunde earned M.Litt. and D.Phil. degrees in Social Anthropology at Oxford University. He has had post-doctoral fellowships as the Sasakawa Foundation Japanese Studies Seminar, the American Association of Colleges and Universities Japanese Seminar and is a Fulbright Senior Program Specialist, with

expertise in globalization and the marginalization of Sub-Saharan Africa. He has written grants that seek to utilize strengths in African and African Diaspora cultures to solve social problems, such as food insecurity and poverty reduction grants in Nigeria and Nicaragua.

Karen M. Benzies is a Professor with the Faculty of Nursing, and Adjunct Research Professor in the Department of Pediatrics, Faculty of Medicine, at the University of Calgary. She received a Ph.D. from the University of Alberta and completed post-doctoral fellowships at Stockholm University and the University of Ottawa. She leads a program of research in early parent and child relationships with a focus on children at biological and psychosocial risk for developmental delays. Dr. Benzies' most satisfying accomplishments come from creating linkages among researchers, clinicians, and policy makers to improve the health and well being of young children and their families.

Marc H. Bornstein is Senior Investigator and Head of Child and Family Research at the Eunice Kennedy Shriver National Institute of Child Health and Human Development. He holds a B.A. from Columbia College, M.S. and Ph.D. degrees from Yale University, and an honorary doctorate from the University of Padua. He is founding editor of the journal, *Parenting: Science and Practice*. His research interests include parenting and child development across diverse contexts. Marc_H_Bornstein@nih.gov

Ioakim Boutakidis is an Assistant Professor of Child and Adolescent Studies in the College of Health and Human Development at California State University, Fullerton. His research as a doctoral student focused on Asian American parenting and academic achievement, as well as the role of bilingualism in adolescent outcomes. His current research continues this focus on ethnic minority youth, particularly Latino/a adolescents, in examining the role of self-beliefs and engagement in explaining academic performance differentials across ethnic groups in the United States.

Dana A. Breakstone graduated from Colby College, Maine, USA with a B.A. in Psychology and Creative Writing. She was part of the post-baccalaureate training program at the Child and Family Research section of the Eunice Kennedy Shriver National Institute of Child Health and Human Development before moving on to a position at the University of Maryland College Park. Ms. Breakstone researches early social cognitive development and plans to earn a doctorate in clinical psychology. breakstoneda@mail.nih.gov

Kevin Ray Bush is an Associate Professor of Family Studies and Social Work and Associate Dean for Partnerships, Research and Grants in the School of Education, Health and Society at Miami University in Oxford, Ohio. His research interests focus on child and adolescent development in the contexts of family, school, community and culture. He has conducted studies with diverse US (Appalachian, African American, Asian American, and Latinos) and international (Chinese, Chilean, Mexican, South Korean, and Russian) samples of children, adolescents and parents. Dr. Bush earned his Ph.D. in Human Ecology from The Ohio State University.

Cleonice Camino obtained her Ph.D. at the University of Louvain (Belgium). She is Professor of Developmental Psychology at the State University of Paraíba (Brazil) and researcher of CNPq (Brazilian Research Foundation). She is also an Editorial Staff member of different journals for developmental and social psychology. She is currently researching topics on parental practices and their influences on moral and social values development, understanding development of human rights and educational practices to improve human rights.

Leoncio Camino obtained his Ph.D. at the University of Louvain (Belgium). He is Professor Emeritus of Social Psychology at the State University of Paraíba (Brazil) and researcher of CNPq (Brazilian Research Foundation). He is also an Editorial Staff member of different national and international journals in the fields of social and political psychology. He conducts research in social and political psychology and publishes studies concerning areas such as political socialization, social movements, electoral behavior and prejudice.

Edie Cruise has been a Research Personnel Graduate Fellow of the Government of Castilla-La Mancha, Spain, and has her European Doctorate of Psychology from the University of Castilla-La Mancha. Her research interests concern parental socialization and adolescent adjustment, specifically analyzing cultural differences in these areas between the United States and Spain. Her work has centered on the relation between parental socialization styles and adolescent adjustment, including self-esteem, anti-social behavior, drug and alcohol use and academic achievement in the United States.

Camille Daley is a sociology doctoral candidate and a Teaching Assistant in the Department of Sociology, Psychology and Social Work, University of the West Indies, Mona Campus. She teaches courses in Social Policy and Social Research Methods. Her research interests include education, parenting, gender and psychosocial impacts of sickle cell disease. She is also Director of the Sickle Cell Support Club of Jamaica, which provides support to persons affected by sickle cell disease and raises public awareness about this often debilitating genetic illness. camille.daley@uwimona.edu.jm.

Betsy Davis is of Cherokee ancestry, a member of the Willamette Tsa-La-Gi Community and an Associate Research Scientist at the Oregon Research Institute in Eugene, Oregon. She received her Ph.D. in Educational Psychology/Research Methodology and Statistics from the University of Oregon. She has served as Principal Investigator on three NIDA (National Institute of Drug Abuse)-funded grants, two evaluating the effectiveness of culturally-adapted, family-based interventions for the treatment and prevention of substance use and HIV-risk and one creating methods for culturally appropriate tools to motivate and engage Indigenous peoples into family strengthening programs.

Khanh T. Dinh is Professor of Psychology at the University of Massachusetts Lowell. Dr. Dinh received her Ph.D. in Clinical Psychology from the University of Washington at Seattle. Her primary research interests are in the area of immigrant

psychology and communities, particularly focusing on acculturation and psychosocial adjustment of immigrant youth and families. She served as a Research Fellow for the Institute for Asian American Studies at the University of Massachusetts Boston and as a Scholar-in-the-City for the Patrick J. Mogan Cultural Center in Lowell, Massachusetts.

Renda Dionne is a member of the Turtle Mountain Band of Chippewa Indians and a Licensed Clinical Psychologist. She received her Ph.D. in Clinical Psychology from the California School of Professional Psychology in San Diego. Dr. Dionne has experience adapting, implementing and evaluating culturally-tailored child and parent programs. As an Associate Research Scientist at Oregon Research Institute, Dr. Dionne served as Co-Investigator on three NIDA-funded prevention projects with Dr. Betsy Davis. She has also served as Project Director on several Administration of Children, Youth & Family and Administration of Native American service delivery grants, working to strengthen families within the tribal regions of Riverside and San Bernardino Counties.

Kathleen Fite is a consultant, writer, and educator. She serves on the Gesell Institute Advisory Council and the Board for the Association of Childhood Education International. She is a Professor of Education at Texas State University-San Marcos and has taught public school as well as undergraduate students through doctoral levels classes at the university.

Michelle Fortin is the Executive Director of Watari Youth, Community and Family Services in the Downtown Eastside (DTES) area of Vancouver, British Columbia Canada. Ms. Fortin received her B.A. degree in Psychology from York University, Toronto, Ontario and a graduate diploma in individual and group counseling from the Counsellor Training Institute, Vancouver, BC. She served as a Co-Investigator on Dr. Betsy Davis' NIDA-funded HIV-risk prevention grant working with First Nations families in the DTES. Ms. Fortin focuses her work on developing services that are congruent to the needs of specific populations.

Robert A. Fox is Professor of Counselor Education and Counseling Psychology at Marquette University in Milwaukee, Wisconsin. He is also founder of the Behavior Clinic which provides in-home, mental health services to children under 5 years of age who reside with families living in poverty. Dr. Fox has written numerous journal articles on his primary research area, namely, parenting young children including treatment outcomes for families served through the Behavior Clinic.

Michael P. Fung is a second-year doctoral student in counseling psychology at Marquette University Milwaukee, Wisconsin, USA. He has worked as both a mental health clinician and career counselor at various non-profit institutions. Currently, Michael works as a research assistant/project supervisor at the Behavior Clinic in Milwaukee, Wisconsin, providing mental health services to Latino families with young children who present with severe behavior problems. His background includes a diverse array of cultural experiences, such as studying in France, providing residential care for individuals with developmental disabilities in Spain, and working at a domestic violence clinic in Nicaragua.

Fernando García is a Professor of Psychological Methods and Design of Research Studies in the Department of Methodology of the Behavioral Sciences at the University of Valencia, Spain, where he pursues a research agenda on methodology themes—robust statistics, power analysis and confidence intervals—and measurement techniques of self-esteem and family socialization. He also has conducted research examining the cross-cultural validity of the four-typology model of parental socialization.

Enrique Gracia is Professor of Social Psychology at the University of Valencia, Spain. He has published and conducted research on family issues such as family socialization practices, child maltreatment, and partner violence against women, with particular emphasis on public perceptions and attitudes, and social environment-related variables. He is Editor of the journal *Psychosocial Intervention*.

Jena Derakhshani Hamadani is a paediatrician and also received her doctoral degree in child development from the Institute of Child Health, University College London, UK. She is a scientist at icddr,b and is the Head of its Child Development Unit. She has conducted several observational and interventional studies on child development and is a consultant for several Early Childhood Development programs in Bangladesh and abroad. Dr. Jena has over 50 publications in peer reviewed journals.

Puanani Hee (phee@hawaii.edu) received her B.A. from Oregon State University. She is currently a graduate student in clinical psychology at University of Hawaii at Manoa.

Susan D. Holloway is a Professor in the Graduate School of Education at the University of California, Berkeley. She earned a doctoral degree in 1983 from the School of Education at Stanford University. Dr. Holloway has been interested in family life, child rearing, and education in Japan for over three decades. She is the author of *Women and Family in Contemporary Japan*.

Ziarat Hossain received a Ph.D. in Child and Family Studies from Syracuse University. He is an Associate Professor and program chair of Family Studies at the University of New Mexico. His research documents patterns of paternal involvement in understudied populations and has implications for deconstructing stereotypical findings on the levels of fathers' involvement in international and ethnic minority families in the United States. He served as president of the Society for Cross-Cultural Research.

Rita Isaac is Professor of Community Medicine in the Department of RUHSA (Rural Unit for Health and Social Affairs), Christian Medical College, Vellore, Tamilnadu, India. Currently she is the Director of RUHSA. Her areas of interest have been nutritional issues and intestinal function in HIV-infected individuals and in women's health, and nutrition in women and children.

Jennifer E. Lansford is a developmental psychologist and Research Professor at the Social Science Research Institute and Center for Child and Family Policy at Duke University in Durham, NC, USA. Dr. Lansford's research focuses on the

development of aggression and other behavior problems in children and adolescents, with an emphasis on how parents and peers contribute to or protect against these outcomes in diverse cultural contexts. She leads the Parenting Across Cultures project, a longitudinal study of mothers, fathers, and children in nine countries.

Jon Lasser is an Associate Professor at Texas State University-San Marcos in the School Psychology Program. His research interests include parenting, ethics, child development, and school psychology practice issues.

Viviana Lemos received her Ph.D. in Psychology. She is the coordinator of a group linked to the Interdisciplinary Center for Research in Mathematics and Experimental Psychology (CIIPME) in Entre Ríos, Argentina. She is also the Director of the Center for Research in Psychology and Related Sciences (CIPCA) in the River Plate Adventist University (UAP). She teaches Research Methodology and Psychometrics and has done basic and applied research on the subject of emotional and social resources in children.

Eli Lieber serves as the Co-Director of the Fieldwork and Qualitative Data Research Laboratory in the UCLA Center for Culture and Health and the president and CEO of Socio Cultural Research Consultants, LLC. Initially trained as a quantitative psychologist specializing in social-cognitive development and measurement at the University of Illinois, Urbana-Champaign, his post-doctoral training and subsequent work in both the USA and Asia have included teaming with colleagues from a wide variety of social science disciplines with focus on parenting, and the adaptation of families with attention to culture in the interest of healthy child development.

Isabel Martínez is a Professor of Social Psychology at the University of Castilla-La Mancha (Spain). She has been a research fellow of the Social Psychology Department at the University Federal of Paraíba (Brazil) and she has her doctorate in Psychology from the University of Valencia (Spain). She has conducted research and published studies concerning different areas of social influence, cultural values and family socialization. She has analyzed the relation of parental practices with different variables of adjustment in adolescents in Brazil, Spain and the United States, and she has examined the cross-cultural validity of the four-typology model of parental socialization in Brazil and Spain.

James P. McHale is Professor and Chair of Psychology at the University of South Florida, St. Petersburg. He received his Ph.D. in Clinical Psychology from the University of California at Berkeley. His research interests are coparenting in diverse family systems, prevention, and infant-family mental health. He is co-editor (with Kristin Lindahl) of *Coparenting: A Conceptual and Clinical Look at Family Systems* (APA Books), and over 50 books and articles on the topic of coparenting.

Tatyana Mestechkina is in pursuit of her Ph.D. in Clinical Psychology at Hofstra University in Hempstead, NY. She obtained her Bachelors in Psychology from Stony Brook University in New York and her Masters in Psychology from Hofstra University. Her clinical interests include working with children, adolescents and families. For the past 3 years, she has been conducting Parent-Child Interaction

Therapy (PCIT), which is an empirically-supported treatment for conduct-disordered young children that places emphasis on improving the quality of the parent–child relationship and changing parent–child interaction patterns.

Ayumi Nagase is a graduate student in the Graduate School of Education at the University of California, Berkeley. She is currently working on her doctoral dissertation on parenting behaviors and child development. She came to the United States from Japan, and earned a master’s degree from the University of California at Berkeley. Her research interest is parenting and its intersection with cultural and social institutions.

Kingsley Nyarko received his Ph.D. from the University of Munich, and is now a lecturer in the Psychology Department at the University of Ghana. His research interests have focused on parental involvement in children’s and adolescents’ education, the impact of divorce on children’s and adolescents’ education, the influence of the peer and parental relationship on children’s self-esteem, and creativity. He also engages in youth empowerment activities through presentations at seminars, conferences and workshops.

Gary W. Peterson is Professor and Chair of Family Studies and Social Work at the University of Miami in Oxford, Ohio. His areas of scholarly interest are parent-child/adolescent relations, cross-cultural influences on adolescent development, and family theory. He is editor or co-editor of books on fatherhood, cross-cultural parent-adolescent relations, and adolescent development in families. Dr. Peterson’s current research is concerned with how aspects of parent-adolescent relationships influence dimensions of adolescent social competence using samples from several countries, with a special focus on Mexican parent-adolescent relations. Dr. Peterson is a Fellow of the National Council on Family Relations.

H.R. Prashanth is Assistant Professor of Community Medicine and has a faculty position in RUHSA (Rural Unit for Health and Social Affairs) Department of Christian Medical College, Vellore, India. He has been involved in improving the outreach health service programme.

Diane L. Putnick is a developmental psychologist and statistician with the Child and Family Research section at the Eunice Kennedy Shriver National Institute of Child Health and Human Development. Dr. Putnick holds a B.A. from the University of Delaware and a Ph.D. from the George Washington University. Her research interests include child development and parenting across diverse contexts. putnickd@mail.nih.gov

Karen Mui-Teng Quek is an Associate Professor in the Couple and Family Therapy Program at Alliant International University in California, USA. She is a licensed professional clinical counselor as well as a marriage and family therapist. Her research interest is in the study of family and couple relationships, which examines the interplay of various diversity constructs in the context of evolving societal changes. Some of her recent publications include “Gender Equality during Transition to Parenthood: Longitudinal Study of Dual-Career Singaporean Couples” and “Cultural Values, Self-Disclosure and Conflict Tactics as Predictors of Marital Satisfaction among Singaporean Husbands and Wives”.

Nirmala Rao is Professor, Faculty of Education and Director of Graduate Studies and Associate Dean, Graduate School, The University of Hong Kong. Dr. Rao received her Ph.D. in Developmental Psychology from Tulane University. She is a Developmental and Chartered (Educational) Psychologist internationally recognized for her research on early child development and education in Asian cultural contexts. This research has focused on the development, evaluation, and dissemination of evidence-based programmes for children during early childhood. She is currently leading the development of a pan-Asian measure of early child development.

María Cristina Richaud de Minzi is Director of the Interdisciplinary Center of Research in Mathematical and Experimental Psychology at the National Council of Scientific and Technological Sciences (CONICET). She received her Ph.D. in Psychology at the University of Buenos Aires. Her research concentrates on the study of parental styles, development of socioemotional processes (attachment and empathy) and their influence on cognitive development. She is conducting a research project and intervention program about the strengthening of psychological resources in children in situations of social vulnerability.

Nicolette V. Roman received her master's in Child and Family Studies from the University of the Western Cape (UWC) South Africa. She then completed a Ph.D. in Psychology (UWC). She currently heads the Child and Family Studies Programme. Nicolette's research focuses on individual and family psychological well being, family functioning and parenting research within the context of Self-Determination Theory. She has collaborative research projects with colleagues at the Universities of St Louis and Columbia in Missouri, USA, and the Katholieke Universiteit in Leuven.

Jael Vargas Rubilar has a master's degree in psychology and works at the Interdisciplinary Center of Research in Mathematical and Experimental Psychology at the National Council of Scientific and Technological Research of Argentina (CONICET) and at the Center of Research in Psychology and Related Sciences (CIPCA-UAP). Her research concerns parental styles and attachment, child development, and resilience and strengthening of psychological resources in children in situations of social vulnerability.

Helaine Selin has recently retired from being a Faculty Associate and Science Librarian at Hampshire College, Amherst, Massachusetts, USA. She is the editor of the *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* (2nd ed. Springer 2008; winner of a Choice Outstanding Academic Book award; third edition is due in 2015) and six books in Springer's Science Across Cultures series: *Astronomy Across Cultures* (2000), *Mathematics Across Cultures* (2000), *Medicine Across Cultures* (2002), and *Nature Across Cultures* (2002), *Childbirth Across Cultures* (2009), and *Happiness Across Cultures* (2012). She has also co-edited the *Encyclopaedia of Classical Indian Science*. She has two fantastic children, one born in Malawi, Africa and one in New York and is the proud grandparent of 3.

Miri Scharf is a senior lecturer at the Department of Counseling and Human Development in the University of Haifa in Israel. She is interested in attachment and close relationships across the life span, parenting, and developmental trajectories of resilience and risk.

Paul L. Schvaneveldt is a Professor and department chair in Child and Family Studies at Weber State University, Utah. He has published several articles on Latin American families, focusing mostly on Ecuadorian children and families. He was a Fulbright Scholar in Ecuador working with a Marriage and Family Therapy program at Universidad Del Azuay in Cuenca, Ecuador. He has also been involved with humanitarian organizations serving as the Executive Director of Idaho-Ecuador Partners of the Americas and as a volunteer with Orphanage Support Services Organization in Ecuador.

Hilal Sen is a senior Ph.D. student in developmental psychology program at Koc University, Turkey. She graduated from Middle East Technical University with a B.A. in psychology and earned an M.A. in developmental psychology from Koc University. Her research interests involve the role of parenting and child characteristics in social and emotional development in early childhood. Her recent research explores the interplay between parenting cognitions and child-rearing behaviors, and the relations between theory of mind and social competence in children.

Kelebogile Setiloane is an Associate Professor of Nutrition in the Department of Behavioral Health and Nutrition at the University of Delaware.

Barbara H. Settles earned a Ph.D. from Ohio State University and is Professor of Human Development and Family Studies at the University of Delaware. She was National Council on Family Relations Vice-President for Public Policy, Groves Conference President, President, Family Research Committee of the International Sociological Association, founding member and corporate officer Family Science Association, and President of the Delaware/Panama Partners of the Americas. Her areas of research and publication include long term planning for family futures, work and family, gender and marriage equity, intergenerational relationships, family immigration and migration, family policy and family theory.

Rudy Ray Seward is Vice President of the International Sociological Association's Committee on Family Research. He has taught and researched the family at the University of North Texas. He earned his Ph.D. at Southern Illinois University, Carbondale. He has authored a book, book chapters, and journal articles dealing with family issues, including demographic history, fathers, and work/life balance and edited two special journal issues on family issues. Currently he is researching changes and cross-cultural differences in parent-child relations and the impact of commuting on families.

Daniel T.L. Shek is Chair and Professor in the Department of Applied Social Sciences, The Hong Kong Polytechnic University; Advisory Professor of East China Normal University, Shanghai; Honorary Professor of Kiang Wu Nursing

College of Macau, Macau; Adjunct Professor of Division of Adolescent Medicine, Department of Pediatrics, University of Kentucky College of Medicine, USA. He is Chief Editor of the *Journal of Youth Studies*, Editorial Advisor of the *British Journal of Social Work*, and editorial board member of many other journals. He has served on many government advisory bodies, including the Action Committee against Narcotics, Commission on Youth, Fight Crime Committee, and Family Council.

Jin Y. Shin is an Associate Professor of Psychology at Hofstra University, New York. She has been conducting research on the outcomes of early intervention programs for families of children with special needs in Vietnam. Her publications explore the role of social support and stigma on parenting stress in Vietnamese parents who have children with intellectual disabilities. Her current work in Vietnam involves teachers who train parents of children with developmental delays through home visit programs and exploring the strategies of effective early intervention work in Vietnam.

Pedro Solís-Cámara is Professor of Social Psychology and founder of the Laboratory of Psychology: Research and Intervention at the Universidad de Guadalajara (Campus CUCiénega, Mexico). He is a member of the National System of Researchers of Mexico (National Science and Technology Council-CONACYT). Dr. Solís-Cámara's main areas of research are parenting and cognitive development. He published with Robert Fox the Parenting Young Children Programs as well as the Spanish version of the Parent Behavior Checklist, renamed as the Escala de Comportamientos para Madres y Padres de Niños Pequeños (Behavioral Scale for Mothers and Fathers with Young Children).

Nguyen Duc Son is an Assistant Professor in the department of psychology and education at Hanoi National University of Education in Vietnam. He has been conducting research in social psychology and personality psychology. He has been involved in studies on how Vietnamese students' personalities and their parent's parenting style correlate with their children's behaviors. His publications focus on the children's personality traits and parents' attitude on the children's education.

Leslie Stanley-Stevens is Professor of Sociology at Tarleton State University, Texas. She earned a Ph.D. from the University of North Texas. Dr. Stanley-Stevens surveyed and interviewed expectant mothers and fathers about their ideals and practices regarding work and family. Later she completed follow-up interviews of the same parents, now with small children, regarding paid work and raising children. Findings from these surveys and interviews have been the basis for numerous presentations and academic journal articles as well as her recently published book *What They Didn't Know When They Were Expecting: And How They Became Better Parents* (2012, Charleston, SC: CreateSpace).

Rachel C.F. Sun is Assistant Professor in the Faculty of Education, The University of Hong Kong. She is a Principal Investigator of school misbehavior research studies, and Co-Principal Investigator of a positive youth development program and a university's leadership program in Hong Kong. Her research areas include academic achievement motivation, school satisfaction, life satisfaction, positive youth devel-

opment, problem behavior, school misbehavior, adolescent suicidal ideation and psychological health. In terms of community and academic services, she is an executive committee member of the Society of Boys' Centres, and a member of the editorial board of *Research on Social Work Practice*.

Joan T.D. Suwalsky is a developmental psychologist with the Child and Family Research section at the Eunice Kennedy Shriver National Institute of Child Health and Human Development. She holds a B.A. in Child Study from Vassar College and an M.A. in Human Development and Family Studies from Cornell University. Her research interests include early parent-child interaction and socio-emotional development, with a special interest in these areas as they apply to adoptive families. suwalskj@mail.nih.gov

Hanan Takash is a specialist in mental health. An Associate Professor, she works as the Head of the Department of Special Education, and Vice Dean of Queen Rania Faculty of Childhood at the Hashemite University, Jordan. She has translated specialized books such as *Child Psychiatry* by Robert Goodman and Stephen Scott. She is interested in the fields of family violence, children's and adolescents' mental health, and stressors.

Fahmida Tofail is an associate scientist and consultant physician at the International Centre for Diarrhoeal Disease Research, Bangladesh (icddr,b). Her research interest is focused on maternal and child health, nutrition, development and mental health. She is a faculty member of the Early Childhood Development course at BRAC, Dhaka University and Teacher's Development Institute, a fellow at the Royal Society of Tropical Medicine and Hygiene, and has more than 30 scientific journal articles. She obtained her M.B.B.S. from Bangladesh, Ph.D. from the Centre for International Child Health, UCL, UK, and is currently conducting her post-doctoral fellowship at Karolinska Institutet, Stockholm, Sweden.

Pamela Akinyi Wadende is a researcher, educator, and writer. She is a faculty member of the Psychology Department of Maseno University, Kenya. Her research interests include parenting, women's education and development. She has published widely in the field of education, gender issues, and community development.

Yiyuan Xu (yiyuan@hawaii.edu) received his Ph.D. from the University of Southern California. He is currently an Associate Professor in the Department of Psychology at University of Hawaii at Manoa.

Bilge Yagmur obtained her Ph.D. from the University of Melbourne. She is a developmental psychologist with research interests focusing on the mechanisms underlying individual differences in children's social behavior and socio-cognitive abilities (theory of mind and social information processing). Part of her current work investigates the interplay of intrinsic child characteristics (e.g., temperament), parenting, and contextual factors in the development of competent and maladaptive functioning in young children. Another area concerns studies designed to explore parental belief systems and child rearing among mothers in Turkey and in immigration contexts. She also conducts research on psychosocial well-being of disadvantaged children and their parents.

H. Melis Yavuz-Muren obtained her Bachelor's degree in psychology and master's degree in developmental psychology from Koc University, Turkey. Currently she is a Ph.D. student in the developmental psychology program there. Her main research interests include the influence of positive parenting (maternal sensitivity, emotional availability) and child temperament on behavioral development. Her recent research also examines the role of culture and social context in parenting behaviors and cognitions, social competence in atypical populations (i.e., children with disabilities and autism spectrum disorder), and the association between parenting and child obesity.

Relindis D. Yovsi received her Ph.D. in Cultural and Developmental Psychology from the University of Osnabrueck, Germany, where she later worked as a Research Associate. She pursued a Masters in Public Health Methodology at the School of Public Health, Free University of Brussels, Belgium, and started working as an independent professional in early childhood care and development as well as in research and development. Her interests are holistic early childhood development, cross-cultural infant and young child feeding practices, maternal and child health, parenting-child relationship across cultures, and the development and implementation of comprehensive early childhood development programmes.

Riffat Moazam Zaman obtained her Ph.D. in Clinical Psychology from Michigan State University. She is currently Professor in the Department of Psychiatry of the Aga Khan University, Karachi, Pakistan. Prior to this she worked as a clinical psychologist at the Counseling Center at American University. Dr. Zaman has published on different aspects of psychotherapy in Pakistan and cross-cultural bioethics.

Lijin Zhang (zhangli6@nxu.edu.cn) received her Ph.D. from the Chinese Academy of Science. She is currently a Professor in the Department of Psychology at Ningxia University, China.
