

# Atlas of Practical Cardiac Applications of MRI

# Atlas of Practical Cardiac Applications of MRI

Guillem Pons-Lladó, MD. Director, Cardiac Imaging Unit, Cardiology Department, Hospital de la Santa Creu i Sant Pau, Universitat Autònoma de Barcelona, Barcelona, Spain.

Francesc Carreras, MD. Cardiac Imaging Unit, Cardiology Department, Hospital de la Santa Creu i Sant Pau, Universitat Autònoma de Barcelona, Barcelona, Spain.

Xavier Borrás, MD. Cardiac Imaging Unit, Cardiology Department, Hospital de la Santa Creu i Sant Pau, Associate Professor of Medicine, Universitat Autònoma de Barcelona, Barcelona, Spain.

Maite Subirana, MD. Director, Unit of Congenital Heart Diseases, Cardiology Department, Hospital de la Santa Creu i Sant Pau, Universitat Autònoma de Barcelona, Barcelona, Spain.

*and*

Luís J. Jiménez-Borreguero, MD. Cardiology Department, Hospital Príncipe de Asturias, Alcalá de Henares, Madrid, Spain.

<b>Introduction</b>	2
<b>Glossary</b>	4
<b>Chapter 1: <i>Basics of Cardiac Magnetic Resonance and Normal Views</i></b>	6
1.1 Definition and Physical Basics	6
a. Definition and historical background	6
b. Physical basics	6
1.2 Technical Modalities	10
a. Spin echo	12
b. Gradient echo	12
c. Fast gradient echo	13
d. Specialized techniques	13
e. Techniques under clinical investigation	13
1.3 Study Methodology: Normal Anatomy	13
a. Technical equipment	13
b. Medical personnel	13
c. Preparation of the patient	13
d. Normal MRI anatomy	17
References	17
<b>Chapter 2: <i>Ventricular Morphology and Function: Study of Cardiomyopathies</i></b>	26
2.1 Morphological Study of Heart Chambers	26
a. Left ventricle	26
b. Right ventricle	31
2.2 Ventricular Function	31
a. Left ventricular function	31
b. Right ventricular function	33
2.3 Cardiomyopathies	33
a. Dilated cardiomyopathy	33
b. Hypertrophic cardiomyopathy	33
c. Restrictive cardiomyopathy	35
d. Arrhythmogenic dysplasia of the right ventricle	35
References	35
<b>Chapter 3: <i>Acquired Diseases of the Aorta</i></b>	38
3.1 Technical Aspects of the Aortic Study by MRI: Imaging the Normal Aorta	38
3.2 Aortic Aneurysm	43
3.3 Aortic Dissection and Related Entities	43
a. Strategy for the study of aortic dissection by MRI	43
b. Differential diagnosis of aortic dissection by MRI	47
References	49

<b>Chapter 4: Study of Valvular Heart Disease</b>	<b>54</b>
4.1 Introduction	54
4.2 Velocity Calculation and Flow Quantitation	54
4.3 Anatomical Evaluation	55
4.4 Aortic Regurgitation	57
a. Quantitation with cine MR velocity mapping	57
b. Quantitation of regurgitant volume using Simpson's method	57
c. Evaluation of regurgitation with cine gradient echo	58
4.5 Mitral and Tricuspid Regurgitation	58
a. Quantitation with cine velocity mapping	58
b. Quantitation of regurgitant volume using Simpson's method	58
c. Evaluation with cine gradient echo	58
4.6 Pulmonary Regurgitation	58
4.7 Pulmonary Hypertension	60
4.8 Valvular Stenosis	60
a. Cine velocity mapping	60
b. Cine gradient echo	60
4.9. Prosthetic valves	60
References	62
<b>Chapter 5: Magnetic Resonance Imaging of Ischemic Heart Disease</b>	<b>64</b>
5.1 Introduction	64
5.2 Acute Myocardial Infarction	64
5.3 Complications of Myocardial Infarction	64
a. Ventricular aneurysm	64
b. Subacute ventricular rupture and ventricular pseudoaneurysm	64
c. Intraventricular thrombosis	64
d. Mitral regurgitation	64
5.4 Study of Ventricular Function	64
a. Global ventricular function	64
b. Regional ventricular function	69
c. Evaluation under pharmacological stress	69
5.5 Imaging of Coronary Arteries	73
References	77
<b>Chapter 6: Cardiac and Paracardiac Masses</b>	<b>80</b>
6.1. Introduction	80
6.2 Technical Aspects in the Evaluation of Masses with MRI	81
6.3 Malignant Primary Cardiac Tumors	82
a. Angiosarcoma	82
b. Myxosarcoma	82
c. Pericardial tumors	84
6.4 Benign Primary Cardiac Tumors	84
a. Lipomas	84
b. Pericardial masses and tumors	84
c. Myocardial tumors	84
6.5 Secondary Cardiac Tumors	87
a. Mediastinal lymphomas	87
b. Lung neoplasms	87

6.6	Benign Paracardiac Masses or Pseudotumors	87
6.7	Intracavitary Thrombi	92
	References	92

## **Chapter 7: Diseases of the Pericardium** 96

7.1	The Normal Pericardium in Magnetic Resonance	96
7.2	Acute Pericarditis	97
7.3	Pericardial Effusion	97
7.4	Constrictive Pericarditis	97
7.5	Congenital Pericardial Diseases	100
	References	103

## **Chapter 8: Congenital Heart Disease** 106

8.1	Segmental Study of Congenital Heart Disease	106
8.2	Study of Atria and Venous Connections	107
8.3	Atrioventricular Connections	110
8.4	Ventriculoarterial Connections	111
8.5	Study of Shunts	113
8.6	Atrial Septal Defect	113
8.7	Ventricular Septal Defect	115
8.8	Atrioventricular Defects	115
8.9	Patent Ductus Arteriosus	117
8.10	Obstructive Lesions	117
a.	Right ventricular outflow tract obstruction	118
b.	Valvular and supra-ventricular pulmonary stenosis	118
c.	Subvalvular and supra-ventricular aortic stenosis	118
d.	Coarctation of the aorta	118
8.11	Complex Congenital Heart Diseases	121
a.	Tetralogy of Fallot	121
b.	Truncus arteriosus	122
c.	Complete transposition of the great arteries	122
d.	Tricuspid atresia	125
e.	Single ventricle	125
f.	Double outlet right ventricle	126
8.12	Postoperative Studies	129
a.	Surgical arteriovenous fistulas	129
b.	Banding of the pulmonary artery	129
	References	132

## **Chapter 9: Contrast Agents in Cardiac MRI** 134

9.1	Introduction	134
9.2	Contrast Agents in the Study of Abnormal Cardiac and Paracardiac Masses	135
9.3	Contrast Agents in the Assessment of Ischemic Heart Disease	135
a.	Myocardial perfusion	135
b.	Myocardial infarction	137
c.	Patency of the infarct-related artery	137
d.	Myocardial viability	139
	References	139
