IN MEMORY OF EDWIN T. JAYNES . . . . .	vii
PREFACE.....	ix
MASSIVE INFERENCE AND MAXIMUM ENTROPY	
John Skilling.....	1
CV-NP BAYESIANISM BY MCMC	
Carlos Rodriguez .....	15
WHICH ALGORITHMS ARE FEASIBLE? A MAXENT APPROACH	
D. E. Cooke, V. Kreinovich, and L. Longpré.....	25
MAXIMUM ENTROPY, LIKELIHOOD AND UNCERTAINTY: A COMPARISON	
Amos Golan.....	35
PROBABILISTIC METHODS FOR DATA FUSION	
Ali Mohammed-Djafari.....	57
WHENCE THE LAWS OF PROBABILITY?	
Anthony J. M. Garrett.....	71
BAYESIAN GROUP ANALYSIS	
W. von der Linden, V. Dose, and A. Ramaswami.....	87
SYMMETRY-GROUP JUSTIFICATION OF MAXIMUM ENTROPY METHOD AND GENERALIZED MAXIMUM ENTROPY METHODS IN IMAGE PROCESSING	
Olga Kosheleva.....	101
PROBABILITY SYNTHESIS, HOW TO EXPRESS PROBABILITIES IN TERMS OF EACH OTHER	
Anthony J. M. Garrett.....	115
INVERSION BASED ON COMPUTATIONAL SIMULATIONS	
Kenneth Hanson, G. S. Cunningham, and S. S. Saquib.....	121
MODEL COMPARISON WITH ENERGY CONFINEMENT DATA FROM LARGE FUSION EXPERIMENTS	
R. Preuss, V. Dose, and W. von der Linden.....	137
DECONVOLUTION BASED ON EXPERIMENTALLY DETERMINED APPARATUS FUNCTIONS	
V. Dose, R. Fischer, and W. von der Linden.....	147
A BAYESIAN APPROACH FOR THE DETERMINATION OF THE CHARGE DENSITY FROM ELASTIC ELECTRON SCATTERING DATA	
A. Mohammad-Djafari and H. G. Miller.....	153

INTEGRATED DEFORMABLE BOUNDARY FINDING USING BAYESIAN STRATEGIES Amit Chakraborty and James Duncan.....	171
SHAPE RECONSTRUCTION IN X-RAY TOMOGRAPHY FROM A SMALL NUMBER OF PROJECTIONS USING DEFORMABLE MODELS Ali Mohammad-Djafari and Ken Sauer.....	183
AN EMPIRICAL MODEL OF BRAIN SHAPE James Gee and L. Le Briquer.....	199
DIFFICULTIES APPLYING BLIND SOURCE SEPARATION TECHNIQUES TO EEG AND MEG Kevin H. Knuth.....	209
THE HISTORY OF PROBABILITY THEORY Anthony J. M. Garrett.....	223
WE MUST CHOOSE THE SIMPLEST PHYSICAL THEORY: LEVIN-LI-VITÁNYI THEOREM AND ITS POTENTIAL PHYSICAL APPLICATIONS D. Fox, M. Schmidt, M. Koshelev, V. Kreinovich, L. Longpré, and J. Kuhn.....	239
MAXIMUM ENTROPY AND ACAUSAL PROCESSES: ASTROPHYSICAL APPLICATIONS AND CHALLENGES M. Koshelev.....	253
COMPUTATIONAL EXPLORATION OF THE ENTROPIC PRIOR OVER SPACES OF LOW DIMENSIONALITY Holly E. Fitzgerald and Everett G. Larson.....	263
ENVIRONMENTALLY-ORIENTED PROCESSING OF MULTI-SPECTRAL SATELLITE IMAGES: NEW CHALLENGES FOR BAYESIAN METHODS S. A. Starks and V. Kreinovich.....	271
MAXIMUM ENTROPY APPROACH TO OPTIMAL SENSOR PLACEMENT FOR AEROSPACE NON-DESTRUCTIVE TESTING R. Osegueda, C. Ferregut, M.J. George, J. M. Gutierrez, and V. Kreinovich.....	277
MAXIMUM ENTROPY UNDER UNCERTAINTY Henryk Gzyl.....	291
SUBJECT INDEX.....	296

## IN MEMORY OF EDWIN T. JAYNES

With the passing of Edwin Thompson Jaynes on April 30, 1998, his many friends in the MAXENT community and beyond must say good-bye to a very special person.

His openness and unselfishness, his independent and original thought, and his uncompromising high standards have made an indelible impact. His written work was so lucid that it was in and of itself a pleasure to read; his speaking style was every bit as penetrating and intelligible as his writing.

Beyond his prodigious scientific contributions and wisdom, much more could be said about those personal qualities which made Ed's friendship over the years a rare privilege. But as anyone who knew him understands, Ed believed that such matters are by their nature private, and would have been uncomfortable with public profession of the grief which naturally accompanies this loss.

He will be keenly missed.

## PREFACE

This volume has its origin in the Seventeenth International Workshop on Maximum Entropy and Bayesian Methods, MAXENT 97. The workshop was held at Boise State University in Boise, Idaho, on August 4 - 8, 1997. As in the past, the purpose of the workshop was to bring together researchers in different fields to present papers on applications of Bayesian methods (these include maximum entropy) in science, engineering, medicine, economics, and many other disciplines.

Thanks to significant theoretical advances and the personal computer, much progress has been made since our first Workshop in 1981. As indicated by several papers in these proceedings, the subject has matured to a stage in which computational algorithms are the objects of interest, the thrust being on feasibility, efficiency and innovation. Though applications are proliferating at a staggering rate, some in areas that hardly existed a decade ago, it is pleasing that due attention is still being paid to foundations of the subject. The following list of descriptors, applicable to papers in this volume, gives a sense of its contents: deconvolution, inverse problems, instrument (point-spread) function, model comparison, multisensor data fusion, image processing, tomography, reconstruction, deformable models, pattern recognition, classification and group analysis, segmentation/edge detection, brain shape, marginalization, algorithms, complexity, Ockham's razor as an inference tool, foundations of probability theory, symmetry, history of probability theory and computability.

MAXENT 97 and these proceedings could not have been brought to final form without the support and help of a number of people. In particular, SCP Global Technologies helped with the realization of MAXENT 97. The editors, Gary Erickson, Josh Rychert, and Ray Smith, express their gratitude to all the speakers and are appreciative for the additional time and effort authors expended in producing a finished manuscript.

This preface must end on a sad note: Professor E. T. Jaynes died on April 30, 1998, in St. Louis, Missouri.
