Acknowledgements

Let me begin by thanking *The Transactions of the Charles S. Peirce Society* for permission to use parts of two articles published in the *Transactions*: "Peirce on Metaphor," vol. XX, no. 4, Fall 1984 and "The Evolution of Peirce's Concept of Abduction," vol. XXII, no. 2, Spring 1986. It would be difficult to try to name all those who have had some hand in getting me to the point of writing a book in philosophy. Let me therefore make a short list. First, thanks to my mother whose direct and common sense approach to life has had probably a greater influence on my philosophical thought than the great works themselves. Thanks also to Dr. Fred McConnell and Mr. Chris Russell who both showed me that philosophy can be a passionate way of life as well as an intellectual discipline. And perhaps most importantly I am indebted to Dr. Carl Hausman who exemplifies the truth that diligence, genius, and good-heartedness are not mutually exclusive.

On the more recent matter of preparing the final text, I should first like to thank my colleagues Bob Long, Bob Levy, and Vis Klive for shouldering all the introductory courses so that I would have time to complete my work. Thanks also to my students, Tim Miller and Melissa Witte (and to the Honors class which brought them to me), for getting the index ready on schedule. And finally, I am grateful to Tracy Logan who by Socratic method taught me to understand computers as they understand themselves.
