# Contents

<b>1</b>	<b>Introduction</b> .....	1
1.1	Plant Innate Immunity.....	2
1.2	Salicylic Acid Signaling.....	2
1.3	Jasmonate Signaling.....	4
1.4	Ethylene Signaling.....	5
1.5	Abscisic Acid Signaling.....	6
1.6	Auxin Signaling.....	7
1.7	Cytokinins.....	8
1.8	Gibberellins.....	8
1.9	Brassinosteroids.....	9
1.10	Plant Hormone Signaling Network.....	10
1.11	Can Molecular Manipulation of Plant Hormone Signaling Network Help the Plant to Win the War Against Pathogens?.....	12
	References.....	13
<b>2</b>	<b>Salicylic Acid Signaling in Plant Innate Immunity</b> .....	27
2.1	Salicylic Acid as an Endogenous Immune Signal in Plants.....	29
2.2	Biosynthesis of Salicylic Acid in Plants.....	29
2.2.1	Phenylalanine Pathway.....	29
2.2.2	Isochorismate Pathway.....	31
2.2.3	Role of Regulatory Proteins (EDS1, EDS4, PAD4, EDS5, SID2) in Salicylic Acid Biosynthesis.....	31
2.2.4	An RNA-Binding Protein (RBP) May Be Involved in SA Biosynthesis Pathway.....	34
2.2.5	GH3.5 Is Involved in Salicylic Acid Biosynthesis.....	34
2.2.6	Role of CDR1 Gene in SA Biosynthesis.....	35
2.2.7	Role of FMO1 Gene in SA Biosynthesis Pathway.....	36
2.2.8	Cytokinin May Be Involved in Activation of Salicylic Acid Biosynthesis.....	36
2.2.9	Some Transcription Factors May Be Involved in Accumulation of Salicylic Acid.....	36

2.3	Upstream of Salicylic Acid Signaling System .....	39
2.3.1	G-Proteins Trigger Salicylic Acid Biosynthesis in SA Signaling System .....	39
2.3.2	Calcium Signaling May Act Upstream of Salicylic Acid Accumulation .....	40
2.3.3	MAP Kinases May Act Upstream of Salicylic Acid Accumulation.....	43
2.3.4	Reactive Oxygen Species May Act Upstream of Salicylic Acid Accumulation .....	44
2.3.5	Nitric Oxide May Act Upstream of Salicylic Acid Accumulation .....	45
2.4	Downstream Events in Salicylic Acid Signaling .....	46
2.4.1	Generation of Salicylic Acid Conjugates .....	46
2.4.2	ROS Signaling System May Act Downstream of SA Accumulation.....	47
2.4.3	NO May Act Downstream of SA Accumulation.....	48
2.4.4	MAPK Signaling Cascade May Act Downstream in SA Signaling System .....	48
2.5	SA Signaling Induces Increased Expression of Transcription Factors to Activate SA-Responsive Defense-Related Genes .....	49
2.5.1	SA Induces WRKY Transcription Factors .....	49
2.5.2	SA Induces ERF Transcription Factors.....	51
2.6	NPR1 Is Master Regulator of SA Signaling .....	52
2.6.1	NPR1 Acts Downstream of SA Signal.....	52
2.6.2	SA Controls Nuclear Translocation of NPR1 .....	52
2.6.3	SA Modulates Proteasome-Mediated Degradation of NPR1 .....	53
2.6.4	NPR1 Interacting Proteins.....	55
2.6.5	SA-Dependent NPR1-Activated Transcription Factors .....	55
2.6.6	SA-Induced Expression of PR Genes, Independent of NPR1 .....	57
2.7	Role of SUMO in SA Signaling System.....	57
2.8	SA Induces Transcription of Various Defense Genes .....	58
2.9	Role of SA Signaling in Stomatal Closure-Related Immune Responses Against Bacterial Pathogens .....	58
2.10	SA Induces Resistance Against Viruses by Modulating AOX-Mediated Alternative Respiratory Pathway.....	59
2.11	SA Triggers Small RNA-Directed RNA Silencing System .....	60
2.12	Enhancement of Small RNA-Directed RNA Silencing by Salicylate Signaling System.....	62
2.13	Interplay Between SA-Induced AOX-Mediated Redox Signaling and SA-Induced Small RNA-Directed RNA Silencing .....	62
2.14	Salicylic Acid Signaling Is Involved in Induction of Systemic Acquired Resistance.....	64

2.15	Mobile Long-Distance Signals for Induction of Systemic Acquired Resistance.....	65
2.15.1	Search for Long-Distance Mobile Signal.....	65
2.15.2	Methyl Salicylate May Be a Mobile Signal .....	65
2.15.3	DIR1 and Glycerol-3-Phosphate-Dependent Factor Mobile Signal Complex .....	68
2.15.4	Azelaic Acid May Be a Mobile Signal.....	70
2.15.5	Dehydroabietinal as a Mobile Signal .....	70
2.15.6	Pipecolic Acid as an SAR Long-Distance Signal .....	71
2.16	Role of Mediator Complex in SA-Mediated Systemic Acquired Resistance.....	73
2.17	Salicylic Acid Triggers Priming and Induces Systemic Acquired Resistance.....	75
2.17.1	What Is SA-Triggered Priming? .....	75
2.17.2	Accumulation of Dormant MAPKs May Be Involved in SA-Triggered Priming.....	76
2.17.3	Histone Modifications May Be Involved in Gene Priming in SA-Induced SAR .....	77
2.17.4	NPR1 May Be Involved in Chromatin Modification-Induced Priming .....	78
2.17.5	Histone Replacement May Be Instrumental for Priming of SA-Responsive Loci.....	79
2.18	Next-Generation Systemic Acquired Resistance .....	80
2.19	Crosstalk Between Salicylate and Jasmonate Signaling Systems....	81
2.19.1	Antagonism Between SA and JA Signaling Systems .....	81
2.19.2	SA May Block JA Biosynthesis .....	81
2.19.3	SA May Suppress JA-Responsive Gene Expression.....	82
2.19.4	NPR1 in the Cytosol Modulates Crosstalk Between SA and JA Signaling Systems.....	83
2.19.5	Role of Glutaredoxin and TGA Transcription Factors in the SA–JA Crosstalk.....	85
2.19.6	Role of MAP Kinase 4 (MPK4) in SA and JA Crosstalk.....	86
2.19.7	SA May Suppress JA Signaling by Targeting GCC-Box Motifs in JA-Responsive Promoters .....	87
2.19.8	JA May Inhibit SA Signaling .....	88
2.19.9	Synergism Between SA and JA Signaling Pathways .....	88
2.20	Crosstalk Between SA and ET Signaling Systems .....	89
2.21	Crosstalk Between SA and ABA Signaling Systems.....	89
2.22	Crosstalk Between SA and Auxin Signaling Systems .....	89
2.23	Negative Regulation of Salicylate-Mediated Immunity by Brassinosteroid Signaling .....	90
2.24	SA Signaling System May Induce Resistance Against a Wide Range of Pathogens .....	90

2.24.1	SA Signaling System Is Involved in Conferring Fungal and Oomycete Disease Resistance.....	90
2.24.2	SA Signaling System Is Involved in Conferring Bacterial Disease Resistance.....	91
2.24.3	SA Signaling System Is Involved in Conferring Virus Disease Resistance.....	93
2.25	Pathogens May Suppress SA Signaling System to Cause Disease..	94
2.25.1	Pathogens May Secrete Effectors to Suppress SA Signaling System.....	94
2.25.2	Pathogen Produces Toxin and Suppresses SA Signaling System to Promote Disease Development .....	94
2.25.3	Pathogen Manipulates the Antagonistic Effect Between SA and JA Signaling Systems to Promote Disease Development.....	96
	References.....	96
<b>3</b>	<b>Jasmonate Signaling System in Plant Innate Immunity .....</b>	<b>123</b>
3.1	Jasmonate Signaling System Is a Key Component in PAMP-Triggered Innate Immunity .....	124
3.2	Biosynthesis of Jasmonates.....	125
3.3	Jasmonate Biosynthesis Intermediate OPDA in Defense Signaling.....	126
3.4	JA Metabolites Involved in Defense Signaling .....	126
3.4.1	Methyl Jasmonate.....	126
3.4.2	Jasmonoyl-Isoleucine.....	128
3.5	Upstream of JA Biosynthesis.....	129
3.5.1	PAMP Triggers Enhanced Biosynthesis and Accumulation of JA .....	129
3.5.2	G-Proteins in the Induction of JA Biosynthesis .....	130
3.5.3	G-Proteins-Activated Polyamine Synthesis in Triggering JA Biosynthesis .....	131
3.5.4	Calcium Signature Triggers JA Biosynthesis.....	134
3.5.5	Role of ROS in JA Biosynthesis Pathway.....	135
3.5.6	Role of NO in JA Biosynthesis Pathway.....	135
3.5.7	Mitogen-Activated Protein Kinases Functioning Upstream in JA Biosynthesis Pathway.....	137
3.5.8	Systemin Triggers JA Biosynthesis in Tomato.....	138
3.6	Jasmonate Receptor Complex in JA Signal Perception .....	139
3.6.1	COI1, an F-Box Protein, Is a Jasmonate Receptor.....	139
3.6.2	COI1–JAZ Receptor Complex .....	140
3.6.3	InsP5 Potentiates JA Perception by COI1–JAZ1 Complex.....	140
3.6.4	JA-Ile Promotes Physical Interaction Between JAZ1 and COI1 .....	140

3.7	JA Signaling Pathway .....	141
3.7.1	JAZ Proteins Suppress JA Signaling .....	141
3.7.2	Role of COI1 Protein in the Degradation of JAZ Proteins by E3 Ubiquitin Ligase.....	142
3.7.3	Role of JA-Ile in the JAZ Degradation by 26S Proteasome.....	143
3.7.4	MYC2, MYC3, and MYC4 Transcription Factors Regulate JA-Responsive Gene Expression.....	144
3.8	Mediator Complex Regulates Transcription of JA-Responsive Genes by Interacting with Transcription Factors .....	147
3.9	MAP Kinases May Regulate the Downstream Events in JA Signaling Pathway .....	150
3.10	Histone Acetylation May Regulate JA-Mediated Signaling Systems.....	152
3.11	JA-Induced Pep1 Peptide Amplifies JA Downstream Signaling to Induce JA-Responsive Genes .....	153
3.12	Transcription Factors Acting Downstream of JA in Defense Signaling System .....	154
3.13	JA Signaling System-Activated Defense Genes .....	156
3.14	JA Signaling System Triggers Immune Responses Against Necrotrophic Pathogens.....	157
3.15	JA and Ethylene Signaling Pathways May Operate Concomitantly in Plant Innate Immune System .....	158
3.15.1	Cooperative Function of JA and ET Signaling Pathways in Plant Innate Immunity.....	158
3.15.2	ERF Transcription Factors May Concurrently Modulate JA and ET Signaling Pathways in Plant Immune System .....	159
3.15.3	Role of Ethylene Transcription Factors EIN3 and EIL1 in JA/ET Signaling Synergy.....	160
3.15.4	Ethylene Signaling System May Protect JA Signaling System Against Its SA-Mediated Suppression.....	161
3.16	JA Signaling May Suppress SA Signaling System.....	162
3.17	Suppression of JA Signaling by SA Signaling System.....	163
3.17.1	SA Suppresses Biosynthesis of JA.....	163
3.17.2	SA Suppresses JA Signaling System by Targeting GCC-Box Motifs in JA-Responsive Promoters .....	164
3.17.3	Role of WRKY62 Transcription Factor in the Suppression of JA Signaling by SA .....	165
3.17.4	Role of WRKY70 and MYB Transcription Factors in the Suppression of JA Signaling by SA .....	166
3.17.5	WRKY50 and WRKY51 Transcription Factors May Modulate JA Signaling Suppression by SA.....	166
3.17.6	Role of TGA Transcription Factors in the Suppression of JA Signaling by SA.....	167

3.18	Interplay Between JA and Abscisic Acid Signaling Systems in Plant Immune Responses .....	168
3.19	Crosstalk Between JA Signaling and Small RNA Signaling Systems .....	169
3.20	JA Signaling in Induced Systemic Immunity.....	171
3.20.1	JA Signaling Plays Major Role in Induced Systemic Resistance .....	171
3.20.2	Mobile Signal Involved in Induced Systemic Resistance .....	173
3.20.3	Priming in Induced Systemic resistance .....	173
	References.....	174
<b>4</b>	<b>Ethylene Signaling System in Plant Innate Immunity.....</b>	<b>195</b>
4.1	Ethylene Signaling Is an Important Component in Plant Innate Immunity .....	196
4.2	Ethylene Biosynthesis in Plants.....	197
4.2.1	Enzymes Involved in Ethylene Biosynthesis .....	197
4.2.2	Pathogen Infection Triggers Enhanced Expression of Ethylene Biosynthesis Genes.....	199
4.2.3	PAMPs/HAMPs Induce Expression of ET Biosynthesis Genes and Trigger ET Biosynthesis.....	199
4.2.4	G-Proteins May Trigger Ethylene Biosynthesis Pathway.....	200
4.2.5	Role of Ca <sup>2+</sup> Influx-Mediated Ca <sup>2+</sup> Signature in Ethylene Biosynthesis .....	201
4.2.6	Role of Calcium-Dependent Protein Kinase (CDPK) in Induction of Ethylene Biosynthesis .....	202
4.2.7	Reactive Oxygen Species May Trigger Transcription of Ethylene Biosynthesis Genes.....	202
4.2.8	Nitric Oxide May Trigger Activation of Ethylene Biosynthesis Enzymes.....	204
4.2.9	MAP Kinase Cascades May Induce Biosynthesis of Ethylene .....	204
4.2.10	Role of Ubiquitin–Proteasome in Ethylene Biosynthesis .....	208
4.3	Ethylene Signal Transduction Downstream of Ethylene Biosynthesis.....	208
4.3.1	Ethylene Signal Perception by Membrane-Bound Receptor Complex.....	208
4.3.2	Ethylene Receptors Physically Interact with CTR1 and Transmit the Ethylene Signal .....	211
4.3.3	EIN2 Acts as the Central Regulator of Ethylene Signaling .....	212
4.3.4	Regulation of the Interaction of EIN2 and Ethylene Receptors by Protein Phosphorylation.....	213

4.3.5	EIN3/EIL Family of Proteins Functioning Downstream of EIN2 in Ethylene Signaling Pathway .....	215
4.3.6	ETR1–RTE1-Mediated CTR1-Independent Ethylene Signaling Pathway.....	218
4.4	ERF Transcription Factors Functioning Downstream in Ethylene Signaling System .....	219
4.5	ROS and NO Signaling Systems Activate Transcription of Ethylene-Responsive Genes .....	221
4.6	MAPK Cascade May Regulate Ethylene Signaling System.....	222
4.7	Ethylene Signaling Triggers Transcription of Plant Pattern Recognition Receptors (PRRs) in PAMP–PRR Signaling System .....	223
4.8	Ethylene Triggers Ca <sup>2+</sup> Influx in Downstream Ethylene Signaling System .....	224
4.9	Ethylene and Jasmonate Signaling Interdependency in Triggering Plant Immune Responses .....	225
4.10	Ethylene Induces Transcription of Defense-Related Genes.....	228
4.11	Ethylene Signaling System Modulates Plant Immune Signaling System Triggering Resistance or Susceptibility Against Different Pathogens .....	229

<b>9</b>	<b>Brassinosteroid Signaling in Plant Immune System.....</b>	<b>403</b>
9.1	Brassinosteroids Modulate Plant Immune Responses.....	404
9.2	Biosynthesis of Brassinosteroids.....	404
9.2.1	Pathogen Triggers Brassinosteroid (BR) Biosynthesis.....	404
9.2.2	BR Biosynthesis via Mevalonate Pathway.....	405
9.2.3	Early and Late C-6 Oxidation Pathways Involved in BR Biosynthesis.....	407
9.2.4	C-22 Oxidation Branch in Brassinosteroid Biosynthetic Pathway.....	408
9.2.5	Homeostasis of Brassinosteroids.....	408
9.3	Brassinosteroid Signaling System.....	411
9.3.1	BRI1 as a Brassinosteroid Receptor.....	411
9.3.2	BRL1 as an Additional BR Receptor.....	412
9.3.3	BAK1 Acts as a Co-receptor in BR Signal Reception.....	413
9.3.4	Autophosphorylation of BRI1 and BAK1.....	414
9.3.5	BKI1, a Negative Regulator of BRI1 Signaling.....	415
9.3.6	BR Signaling Events Downstream of BR Signal Perception.....	415
9.3.7	Brassinosteroid-Signaling Kinases (BSKs).....	418
9.3.8	BRI1 SUPPRESSOR 1 (BSU1) Phosphatase.....	419
9.3.9	MSBP1 Negatively Regulates Brassinosteroid Signaling.....	420
9.3.10	CDG1 in BR Signal Transduction.....	420
9.3.11	BIN2 Negatively Regulates BR Signaling.....	421
9.3.12	Protein Phosphatase 2A (PP2A).....	422
9.3.13	BZR1 and BES1 (BZR2) Transcription Factors.....	422
9.3.14	Function of 14-3-3 Proteins in Regulation of Activities of BZR Transcription Factors.....	424
9.4	Pathogen Modulates Brassinosteroid Signaling System in Infected Plants.....	425
9.5	BR Signaling Triggers Plant Disease Resistance.....	427
9.6	BAK1 in the BR Signaling Pathway Triggers Plant Disease Resistance.....	427

9.7	BR Signaling Machinery Negatively Regulates Plant Immune Responses and Induces Susceptibility .....	428
9.8	Brassinosteroid Signaling Negatively Regulates Salicylate-Mediated Immunity.....	428
9.9	BR Signaling Negatively Regulates Gibberellic Acid (GA)-Mediated Plant Immune Responses .....	429
9.10	Interplay Between BR and PAMP–PRR Signaling Systems .....	430
9.10.1	PAMP–PRR Signaling Complex.....	430
9.10.2	Crosstalk Between BR Biosynthesis Pathway and PAMP–PRR Signaling.....	431
9.10.3	Overexpression of BRI1 Antagonizes BAK1-Mediated PAMP–PRR Signaling .....	431
9.10.4	BR-Responsive Transcription Regulator BZR1 May Suppress PAMP–PRR Signaling System .....	433
9.10.5	Antagonistic Regulation of PAMP–Triggered Immunity by the bHLH transcription Factor HBI1 .....	433
9.10.6	Activation of BRI1 Pathway Leads to Inhibition of PAMP-Triggered Immunity .....	433
9.10.7	Inhibition of PRR-Mediated Immune Signaling by BR Perception .....	435
9.11	Pathogen Hijacks Brassinosteroid Signaling Machinery to Cause Disease .....	435
9.12	Crosstalk Between BR and Other Hormone Signaling Systems .....	435
	References.....	436
