Minato Nakazawa, Kobe, Japan

The world population is expected to expand by 39.4 % to 9.6 billion in 2060 (UN World Population Prospects, revised 2010). Meanwhile, Japan is expected to see its population contract by nearly one-third to 86.7 million, and its proportion of the elderly (65 years of age and over) will account for no less than 39.9 % (National Institute of Population and Social Security Research in Japan, Population Projections for Japan 2012). Japan has entered the post-demographic transitional phase and will be the fastest shrinking country in the world, followed by former Eastern bloc nations, leading other Asian countries that are experiencing drastic changes.

A declining population that is rapidly aging impacts a country's economic growth, labor market, pensions, taxation, health care, and housing. The social structure and geographical distribution in the country will drastically change, and short-term as well as long-term solutions for economic and social consequences of this trend will be required.

This series aims to draw attention to Japan's entering the post-demographic transition phase and to present cutting-edge research in Japanese population studies. It will include compact monographs under the editorial supervision of the Population Association of Japan (PAJ).

The PAJ was established in 1948 and organizes researchers with a wide range of interests in population studies of Japan. The major fields are (1) population structure and aging; (2) migration, urbanization, and distribution; (3) fertility; (4) mortality and morbidity; (5) nuptiality, family, and households; (6) labor force and unemployment; (7) population projection and population policy (including family planning); and (8) historical demography. Since 1978, the PAJ has been publishing the academic journal *Jinkogaku Kenkyu* (The Journal of Population Studies), in which most of the articles are written in Japanese.

Thus, the scope of this series spans the entire field of population issues in Japan, impacts on socioeconomic change, and implications for policy measures. It includes population aging, fertility and family formation, household structures, population health, mortality, human geography and regional population, and comparative studies with other countries.

This series will be of great interest to a wide range of researchers in other countries confronting a post-demographic transition stage, demographers, population geographers, sociologists, economists, political scientists, health researchers, and practitioners across a broad spectrum of social sciences.

# Contents

<b>1</b>	<b>“Diverging Destinies”: A Review of the Research</b>	<b>1</b>
1.1	Introduction	1
1.2	“Diverging Destinies” as Part of the Second Demographic Transition	2
1.3	Implications of Differential Family Change	4
1.4	Posited Explanations	7
1.5	Generality and Variation Across Time and Space	9
1.6	Summary	12
<b>2</b>	<b>The Japanese Context and Existing Empirical Evidence</b>	<b>15</b>
2.1	Introduction	15
2.2	Reasons not to Expect a Pattern of Diverging Destinies in Japan	16
2.2.1	Homogenous Family Life Course	16
2.2.2	Contraceptive Environment	17
2.2.3	Gender Division of Labor	17
2.3	Reasons to Expect a Pattern of Diverging Destinies in Japan	18
2.3.1	Public Policy	18
2.3.2	Changing Employment Environment	19
2.3.3	Growing Inequality	20
2.3.4	Trends in Educational Attainment	21
2.4	Empirical Evidence	22
2.4.1	Union Formation and Dissolution	22
2.4.2	Childbearing	26
2.5	Synthesis of Existing Research	30
<b>3</b>	<b>Union Formation and Dissolution</b>	<b>31</b>
3.1	Introduction	31
3.2	The National Fertility Survey	31
3.3	Early Marriage	33

- 3.4 Husband’s Educational Attainment. . . . . 36
