CONTENTS

Part I	Section on China	1
1	Coal Energy in Japan and China: Mine Closures, Rail Developments and Post-311 Energy Narratives	3
2	Connecting Macro-Regions in the 1930s to the 1960s: A Comparative Historical Survey of the Role of Railway Technology in Coal Delivery in Japan and Northeast China	13
3	A Survey of Modern and Contemporary China's Coal Railway Development	49
4	The Historical Development of Shanxi's Coal Industry as a Case Study	77
5	Coal Use and Transportation in Contemporary China	99

Part II Section on Japan	129
6 Coal Delivery in Japan	131
7 The Final Coal Mine Closures in Japan: A Historical Overview Utilizing the Conceptual Perspective of Mine Closure Policy Implementation Studies	143
8 Historical Background of the Japanese Coal Industry Decline	165
9 Natural Gas or Clean Coal in the Post-311 Scenario? A Narrative Analysis, Historical Overview and Selected Public Policy Commentary of Japan and Other Comparative Case Studies	203
Part III Epilogue	237
10 Epilogue	239
Index	241

LIST OF FIGURES

- Fig. 2.1 This is a photo of the Mitsubishi-owned Nagasaki shipyard today. Photo taken by the author during his fieldtrip to Nagasaki on 28 June 2014 27
- Fig. 2.2 This was the original site of the oldest shipyard dock in Nagasaki dating back to the early twentieth century. Photo author's own, taken during his fieldwork on 28 June 2014 28
- Fig. 2.3 Other examples of uses of coal power are like this 1850 kiln reactor found in Saga prefecture that utilizes coal to produce unnamed industrial products (probably the likes of bricks and other mass-manufactured products). The photo on the right depicts figurines of workers inserting coal fuels into the kiln. Photo author's own, taken in the public area outside Saga train station, during his study trip in summer 2013 29
- Fig. 2.4 Other examples of uses of coal power are like this 1850 kiln reactor found in Saga prefecture that utilizes coal to produce unnamed industrial products (probably the likes of bricks and other mass-manufactured products). The photo on the right depicts figurines of workers inserting coal fuels into the kiln. Photo author's own, taken in the public area outside Saga train station, during his study trip in summer 2013 30
- Fig. 2.5 This is a photo of a modern electrified railway train plying southern China today. Photo author's own, taken in Hong Kong in 2013. This train is travelling between Guangzhou and Hung Hom station of Hong Kong 37

Fig. 2.6	The contemporary electrified railway line in Shenzhen in southern China. Photo author's own	37
Fig. 2.7	There was also wet paddy cultivation in the Omuta area. Photo taken during the June 2014 fieldtrip	38
Fig. 2.8	The food and beverage processing industry near Omuta. Photo taken during the June 2014 fieldtrip	39
Fig. 2.9	The contemporary Japanese railway system is dual-tracked and electrified. Photos author's own, taken at the Nakano-ku of Shinjuku area in December 2013	40
Fig. 2.10	The contemporary Japanese railway system is dual-tracked and electrified. Photos author's own, taken at the Nakano-ku of Shinjuku area in December 2013	40
Fig. 2.11	The above photo shows a typical electrified contemporary train running through a dual-tracked railway system. Photo taken at Nakano-ku in Shinjuku in December 2013	41
Fig. 2.12	The above photos show typical electricity generation equipment, power generators and transformers that are used for providing electricity to the trains in Japan. Photo author's own, taken at Nakano-ku Shinjuku in December 2013	41
Fig. 2.13	The above photos show typical electricity generation equipment, power generators and transformers that are used for providing electricity to the trains in Japan. Photo author's own, taken at Nakano-ku Shinjuku in December 2013	42
Fig. 3.1	Spatial diagram of pre-war coal distribution	60
Fig. 4.1	Spatial diagram of contemporary coal distribution (Shenhua Group)	86
Fig. 4.2	Spatial diagram of the distribution of coal resources by Shenhua coal mining group	87
Fig. 4.3	Spatial diagram of contemporary coal distribution by Shenhua Group	88
Fig. 4.4	Spatial diagram of power distribution based on Shenhua's power distribution network	89
Fig. 4.5	Venn diagram: Coal supply between producers (Shanxi) and consumers (Metropolitan cities like Beijing and Tianjin)	90
Fig. 5.1	The neon lights-driven glitzy shopping area of Buyecheng in Xian, with a Las Vegas-like atmosphere that combines traditional with modern architectural designs. Some visible features include fluctuating artistic light emitting diodes, pillars with projected images, trees decorated in Christmas lights in a shopping area whose name means "a city that never sleeps". A monorail system connects these sights	106

Fig. 5.2	The neon lights-driven glitzy shopping area of Buyecheng in Xian, with a Las Vegas-like atmosphere that combines traditional with modern architectural designs. Some visible features include fluctuating artistic light emitting diodes, pillars with projected images, trees decorated in Christmas lights in a shopping area whose name means “a city that never sleeps”. A monorail system connects these sights	107
Fig. 5.3	The neon lights-driven glitzy shopping area of Buyecheng in Xian, with a Las Vegas-like atmosphere that combines traditional with modern architectural designs. Some visible features include fluctuating artistic light emitting diodes, pillars with projected images, trees decorated in Christmas lights in a shopping area whose name means “a city that never sleeps”. A monorail system connects these sights	108
Fig. 5.4	The neon lights-driven glitzy shopping area of Buyecheng in Xian, with a Las Vegas-like atmosphere that combines traditional with modern architectural designs. Some visible features include fluctuating artistic light emitting diodes, pillars with projected images, trees decorated in Christmas lights in a shopping area whose name means “a city that never sleeps”. A monorail system connects these sights	109
Fig. 5.5	Conspicuous consumption in Buyecheng, a shopping “city that never sleeps”	110
Fig. 5.6	Conspicuous consumption in Buyecheng, a shopping “city that never sleeps”	110
Fig. 5.7	Conspicuous consumption in Buyecheng, a shopping “city that never sleeps”	111
Fig. 5.8	Photo (left) taken in the suburbs of Xian, Shaanxi province, shows brown dust enveloping a highway. Right photo: a hazy day, seen from the old Ming dynasty-era city gates of Xian	114
Fig. 5.9	Photo (left) taken in the suburbs of Xian, Shaanxi province, shows brown dust enveloping a highway. Right photo: a hazy day, seen from the old Ming dynasty-era city gates of Xian	115
Fig. 5.10	Photo (left) shows a hazy day viewed from the highway heading out from Xian towards Banpo. Right photo: a hazy day at downtown Xian	116
Fig. 5.11	Photo (left) shows a hazy day viewed from the highway heading out from Xian towards Banpo. Right photo: a hazy day at downtown Xian	117
Fig. 5.12	A stone carrying an environmental protection message located at the tourist site of Qianling in Shaanxi province	118

Fig. 5.13	Government-linked companies (GLCs) and the private sector also sponsor campaign slogans to remind the public to protect the environment. This sign is found in Qianling in Shanxi province	118
Fig. 6.1	When I did my fieldwork in Tagawa in summer 2012, I took a panoramic picture of Onga River and its surroundings	132
Fig. 6.2	When I did my fieldwork in Tagawa in summer 2012, I took a panoramic picture of Onga River and its surroundings	134
Fig. 6.3	When I did my fieldwork in Tagawa in summer 2012, I took a panoramic picture of Onga River and its surroundings	135
Fig. 6.4	Spatial diagram of contemporary coal distribution (in Tagawa in the Chikuho region)	136
Fig. 6.5	A model of coal distribution at Tagawa before 1868	137
Fig. 8.1	Wide atrium space in front of Tagawa coal mining museum where young skaters practise their skateboarding skills. This open space is built near the site of Tagawa's first coal mining spot	181
Fig. 8.2	A playground facility found near Tagawa's first coal mining location	182
Fig. 8.3	Public campaign slogan advocating a "beautiful Tagawa (<i>utsukushi Tagawa</i>)"	182
Fig. 8.4	The original spot where Tagawa coal was first mined. It is now commemorated with a pyramid and plaque	183
Fig. 8.5	A sculpture of a male and female coal miner as testimony to the brave men and women in Tagawa who risked their lives to extract coal for the Japanese economy	183
Fig. 8.6	Rice paddy fields in the suburbs of Omuta. In the photo on the right, one can see a white crane stalking the paddy fields for food	186
Fig. 8.7	Rice paddy fields in the suburbs of Omuta. In the photo on the right, one can see a white crane stalking the paddy fields for food	187
Fig. 9.1	Spectrum of arguments supporting or resisting continued use of fossil fuels	211
Fig. 9.2	Diffusion of environmental technologies from the advanced economies to other developing and emerging economies	212

LIST OF TABLES

Table 2.1	Indicating the “new-style” modern coal mines located around Huabei railway lines	17
Table 3.1	Prewar coal use for power generation between 1932 and 1934	53
Table 4.1	Distribution of coal reserves	79
Table 4.2	The costs involved in transporting coal from Datong to Tianjin port	84
Table 4.3	Costs of coal delivery from Datong to Shanghai in 1935	85
Table 5.1	Tabulated narratives of secondary sources that indicate that geographical factors and distance continue to be crucial in determining the cost of coal delivery	112
