
GI Surgery Annual

Series editor

T.K. Chattopadhyay
Department of HPB Surgery
Institute of Liver and Biliary Sciences
New Delhi
India

This compendium of reviews in gastrointestinal surgery covers topics that are of contemporary interest to surgeons reflecting the popular trends in this field. Started by the *Indian Association of Surgical Gastroenterology* (IASG), the *GI Surgery Annual* has covered a journey of over 2 decades which speaks for its relevance and popularity among general and gastrointestinal surgeons. The reviews contain up-to-date scientific content of enduring academic interest with each new volume covering 10-12 topics. From 2016 onwards, this Annual turns a new page in its academic journey by publishing the forthcoming titles with Springer. The editorial control continues to remain with the IASG and the current editorial board. The Idea of *GI Surgery Annual* was first conceived during the annual conference of *Indian Association of Surgical Gastroenterology* in 1991 and the First Volume came into existence in the year 1994, through the efforts of Professor T.K. Chattopadhyay and his team of co-editors. Professor T.K. Chattopadhyay continues to head the editorial board in his current capacity as Professor Emeritus, AIIMS, New Delhi. This Annual is an essential resource for postgraduate and postdoctoral trainees in surgery and gastrointestinal surgery, for practising surgeons who wish to keep up-to-date with developments in the field and for established academic surgeons as well.

Preface

The publication of the *GI Surgery Annual*, 2015 coincides with 25 years of existence of the Indian Association of Surgical Gastroenterology. The Annual was started with the aim to disseminate knowledge in various aspects of GI Surgery in the pre-internet era when people in far off places did not have easy access to sources of information. The Annual has since then become a ready source of information to various groups of GI surgeons—trainee, teacher and practitioner. Various authors from both India and abroad have contributed immensely to make this a reality. I express my gratitude to all of them and wish that they continue to contribute in the years to come. To our readers I solemnly pledge to continue the editorial team's efforts in the future too.

This publication has been possible due to the timely contributions from the authors. My thanks to them as well as other people involved in the process of publishing the *GI Surgery Annual* every year.
