**** Indexing: The books of this series are submitted to ISI Proceedings, EI-Compendex, SCOPUS, MetaPress, Springerlink ****

Lecture Notes in Electrical Engineering (LNEE) is a book series which reports the latest research and developments in Electrical Engineering, namely:

- Communication, Networks, and Information Theory
- Computer Engineering
- Signal, Image, Speech and Information Processing
- Circuits and Systems
- Bioengineering
- Engineering

The audience for the books in LNEE consists of advanced level students, researchers, and industry professionals working at the forefront of their fields. Much like Springer's other Lecture Notes series, LNEE will be distributed through Springer's print and electronic publishing channels.

For general information about this series, comments or suggestions, please use the contact address under "service for this series".

Preface

This LNEE volume contains the papers presented at the iCatse International Conference on Mobile and Wireless Technology, and iTAIWAN workshop, which were held in Hong Kong, China, during June 25–27, 2018.

The conferences will provide an excellent international conference for sharing knowledge and results in Mobile and Wireless Technology. The aim of the conferences is to provide a platform to the researchers and practitioners from both academia as well as industry to meet the share cutting-edge development in the field.

The primary goal of the conference is to exchange, share, and distribute the latest research and theories from our international community. The conference will be held every year to make it an ideal platform for people to share views and experiences in related fields.

On behalf of the Organizing Committee, we would like to thank Springer for publishing the proceedings of the conferences. We also would like to express our gratitude to the ‘Program Committee and Reviewers’ for providing extra help in the review process. The quality of a refereed volume depends mainly on the expertise and dedication of the reviewers. We are indebted to the Program Committee members for their guidance and coordination in organizing the review process, and to the authors for contributing their research results to the conference.

Our sincere thanks to the Institute of Creative Advanced Technology, Engineering and Science for designing the conference Web page and spending countless days in preparing the final program in time for printing. We would also like to thank our organizing committee for their hard work in sorting our manuscripts from our authors.

We look forward to seeing all of you next year’s conference.
