Junjie James Zhang, Charlotte, USA

**** Indexing: The books of this series are submitted to ISI Proceedings, EI-Compendex, SCOPUS, MetaPress, Springerlink ****

Lecture Notes in Electrical Engineering (LNEE) is a book series which reports the latest research and developments in Electrical Engineering, namely:

- Communication, Networks, and Information Theory
- Computer Engineering
- Signal, Image, Speech and Information Processing
- Circuits and Systems
- Bioengineering
- Engineering

The audience for the books in LNEE consists of advanced level students, researchers, and industry professionals working at the forefront of their fields. Much like Springer's other Lecture Notes series, LNEE will be distributed through Springer's print and electronic publishing channels.

For general information about this series, comments or suggestions, please use the contact address under "service for this series".

To submit a proposal or request further information, please contact the appropriate Springer Publishing Editors:

Grandness Scientist Xuesen Qian's Sky-high Estimation for the Man-Machine-Environment System Engineering

龙升照同志:

我收到您主编的《人机环境系统工程研究进展(第一卷)》,翻阅了之后,感到非常高兴,1985年秋提出的一个想法,现在8年之后已编出丛书,500多页的巨卷!而且研究范围已大大超出原来航天,内容涉及航空、航天、航海、兵器、电子、能源、交通、电力、煤炭、冶金、体育、康复、管理……等领域!你们是在社会主义中国开创了这门重要现代科学技术!

此致

敬礼!

钱学森

1993-10-22

Grandness Scientist Xuesen Qian's Congratulatory Letter to the 20th Anniversary Commemorative Conference of Man-Machine-Environment System Engineering Foundation

龙升照同志：

你的来信已收到。欣悉人-机-环境系统工程创立 20 周年纪念大会暨第五届全国人-机-环境系统工程学术会议即将召开，我向你们表示最热烈的祝贺！

20 年来，你们在人-机-环境系统工程这一新兴科学领域进行了积极的开拓和探索，并取得了非常可喜的成绩，我感到由衷的高兴。

希望你们今后再接再厉，大力推动人-机-环境系统工程理论及应用的蓬勃发展，为中国乃至世界科学技术的进步作出积极贡献！

祝

工作顺利！

钱学森
2001年6月26日

Preface

In 1981, under the directing of the great scientist Xuesen Qian, an integrated frontier science—Man-Machine-Environment System Engineering (MMESE)—came into being in China. Xuesen Qian gave high praise to this emerging science. In the letter to Shengzhao Long, he pointed out, **“You are creating this very important modern science and technology in China!”** on October 22, 1993.

In the congratulation letter to the commemoration meeting of 20th anniversary of establishing the Man-Machine-Environment System Engineering, the great scientist Xuesen Qian stated, “You have made active development and exploration in this new emerging science of MMESE, and obtained encouraging achievements. I am sincerely pleased and hope you can do even more to make prosper development in the theory and application of MMESE, and **make positive contribution to the progress of science and technology in China, and even in the whole world**” in June 26, 2001.

October 22, which is the day that the great scientist Xuesen Qian gave high praise to MMESE, was determined to be Foundation Commemoration Day of MMESE by the 2nd conference of the 5th MMESE Committee on October 22, 2010. On this very special day, the great scientists Xuesen Qian pointed out in the letter to Shengzhao Long, **“You are creating this very important modern science and technology in China!”**

The 18th International Conference on MMESE will be held in Nanjing, China, on October 20–22 of this year; hence, we will dedicate *Man-Machine-Environment System Engineering: Proceedings of the 18th International Conference on MMESE* to our readers.

Man-Machine-Environment System Engineering: Proceedings of the 18th International Conference on MMESE is the academic showcases of the 18th International Conference on MMESE joint held by MMESE Committee of China and Beijing KeCui Academe of MMESE in Nanjing, China. The *Man-Machine-Environment System Engineering: Proceedings of the 18th International Conference on MMESE* consists of 83 more excellent papers selected from more than 400 papers. Due to limitations on space, some excellent papers have been left out, and we feel deeply sorry for that. Crudeness in contents and possible

incorrectness are inevitable due to the somewhat pressing editing time, and we hope you kindly point them out promptly, and your valuable comments and suggestions are also welcomed.

Man-Machine-Environment System Engineering: Proceedings of the 18th International Conference on MMESE will be published by Springer-Verlag, German. Springer-Verlag is also responsible for the related matters on index of Index to EI, so that the world can know the research quality and development trend of MMESE theory and application. Therefore, the publication of *Man-Machine-Environment System Engineering: Proceedings of the 18th International Conference on MMESE* will greatly promote the vigorous development of MMESE in the world and realize the grand object of “**making positive contribution to the progress of science and technology in China, and even in the whole world**” proposed by Xuesen Qian.

We would like to express our sincere thanks to Springer-Verlag, German, for their full support and help of during the publishing process.

Beijing, China

Program and Technical Committee Information

General Chairman

Professor Shengzhao Long, Astronaut Research and Training Center of China

Program Committee Chairman

Professor Balbir S. Dhillon, University of Ottawa, Canada

Technical Committee Chairman

Professor Enrong Mao, College of Engineering, China Agricultural University, China

Program and Technical Committee Members

Professor Yanping Chen, University of Management and Technology, USA

Professor Hongfeng Gao, University of California, USA

Professor Michael Greenspan, Queen's University, Canada

Professor Birsen Donmez, University of Toronto, Canada

Professor Xiangshi Ren, Kochi University of Technology, Japan

Professor Kinhuat Low, Nanyang Technological University, Singapore

Professor Baiqiao Huang, System Engineering Research Institute of China State Shipbuilding Corporation, China

Professor Baoqing Xia, Weapon Industrial Hygiene Research Institute, China

Professor Chenming Li, The Quartermaster Research Institute of Engineering and Technology, China

Professor Fang Xie, China North Vehicle Research Institute, China

Professor Guangtao Ma, Shenyang Jianzhu University, China

Professor Haoting Liu, University of Science and Technology Beijing, China

Professor Hongjun Xue, Northwestern Polytechnical University, China

Professor Lijing Wang, Beijing University of Aeronautics and Astronautics, China

Professor Long Ye, Beijing Jiaotong University, China

Senior Engineer, Qichao Zhao, Beijing King Far Technology Co., Ltd., China

Professor Qing Liu, Jingtangshan University, China

Professor Weijun Chen, Shanghai Maritime University, China

Professor Xiaochao Guo, Institute of Aviation Medicine, Air Force, China

Professor Yongqing Hou, China Academy of Space Technology, China

Professor Yanqi Wang, Weapon Industrial Hygiene Research Institute, China

Professor Yinying Huang, Agricultural Bank of China, China

Professor Yuhong Shen, The Quartermaster Research Institute of Engineering and Technology, China

Contents

Part I Research on the Man Character

Study on Pilot Personality Selection with an SVM-Based Classifier	3
Jicheng Sun, Xiao Xiao, Shan Cheng, Chao Shen, Jin Ma and Wendong Hu	
Eye Tracking for Assessment of Mental Workload and Evaluation of RVD Interface	11
Yu Tian, Shaoyao Zhang, Chunhui Wang, Qu Yan and Shanguang Chen	
The Contrastive Analysis of Three Models About Human Energy Expenditure	19
Chenming Li, Tianhao Wang and Yuhong Shen	
Development of a Three-Dimensional Finite Element Model of Spine	27
Tianhao Wang, Chenming Li and Yan Wang	
The Study of Evaluation Technologies for Human Energy Metabolism Based on Physiological Parameter	33
Tianhao Wang, Chenming Li and Yan Wang	
School Emergencies and College Student Psychological Crisis Intervention	41
Yu Luo, Yunde Sun, Xia Chen, Chunlei Ren and Xuechen Yao	
Effect of Physical Fatigue on Cognitive Ability of Workers in Furniture CNC Operation	49
Na Yu and Peiwen Wu	
Study on Fatigue of Workers in the Row Drilling Operation of Furniture Manufacturing Based on Operational Energy Efficiency Analysis	57
Na Yu, Jing Guo, Lian Hong, Peiwen Wu and Jing Li	

Evaluation of Workload, Arousal, Fatigue, and Attention on Time-Series Vigilance Task	65
Deqian Zhang, Wenjiao Cheng and Hezhi Yang	
Deep Thinking on Talents Cultivation in the Field of Civil–Military Integration Under the Domain of Science, Technology, and Equipment of National Defense	71
Jinxin Li, Peng Gong, Yunqiang Xiang, Guiqi Liu and Wenying Xing	
A Study on the Skill of Plotting Air Condition by Hand of the Cartographer	79
Hongyan Ou, Zhibing Pang, Hailiang Li, Zhijun Li, Hao Liu and Deyang Zhang	
Two-Step Subjective Rating Technique of Pilot Evaluation in Q–Q Test for Aircraft Cockpit	87
Xiaochao Guo, Qingfeng Liu, Duanqin Xiong and Yanyan Wang	
A Method and Realization of Constructing Chinese Standard Digital Human Body	97
Xibin Kao, Lijing Ji, Yanqi Wang, Baoqing Xia, Jun He, Qiaoli Yang, Wei Kong and Shun Chen	
Part II Research on the Machine Character	
Structure Design and Motion Simulation of a Microprocessor-Controlled Prosthetic Knee	107
Wujing Cao, Hongliu Yu, Weiliang Zhao, Qiaoling Meng and Wenming Chen	
Rethinking the Characteristics and Expression of Modern Office Building Design	115
Zhen Li and Fang Liu	
Study on the Cable-Controlled Household Upper Limb Rehabilitation Robot	121
Xiaohai Huang, Hongliu Yu, Yinxin Xu, Xinwei Li, Weisheng Zhang and Wujing Cao	
Design and Kinematics Analysis of a Lower Limb Exoskeleton Robot	131
Xiaodong Wei, Hongliu Yu, Qingyun Meng and Bingshan Hu	
Task-Based Trajectory Planning for an Exoskeleton Upper Limb Rehabilitation Robot	141
Qiaoling Meng, Haicun Shao, Lulu Wang and Hongliu Yu	

A Novel Method for Designing and Implementing a Training Device for Hand Rehabilitation 151
 Duojin Wang and Hongliu Yu

The Unfolding of a Clock Based on the Arduino Control 165
 Yanli Zhou, Xiaolei Tan, Jiejie Zhang and Feng Sha

Toilet System Design in Public High-End Places 175
 Zhixuan Lin, Canqun He and Muhan Zhang

Research on the Design of FMD Desktop 3D Printer Based on a User-Centered Perspective 187
 Hang Yin and Yi Pan

Construction and Application of Digital Slide Network Teaching System in Histology Courses 195
 Wenying Xing, Chang Mei and Ruo Feng

Analysis of Key Technologies and Performances of Fire-Control Radar of Low Probability of Intercept 201
 Yan Zhu, Wei Yu, Hao Sun, Kun Li and Jiang Luo

The Application of Jack Software in the Size Study of the Exhaust Hood on a Welding Torch 209
 Jianwu Chen, Zhenfang Chen, Bin Yang, Shasha Liang, Delei Zhao, Jinhui Tao and Xun Xu

Design of a Central-Driven Upper Limb Rehabilitation Robot in Respect of Human Safety 219
 Bingshan Hu, Fei Zhang and Hongliu Yu

A Low-Cost Solution of Eye Movement Data Acquisition Based on Computer Vision 229
 Haoshu Gu and Junming Du

Research on Intermittent Failure Mechanism of the Electrical Connector of the Missile Launch Vehicle 239
 Guanqian Deng, Guiyou Hao, Yingjie Lv and Ying Zhou

Research on Children’s Functional Shoes’ Design Based on Ergonomics 247
 Haijiao Sun

Part III Research on the Environment Character

Development and Validity of Chinese Hazard Perception Test 257
 Long Sun, Shuang Li and Ruosong Chang

A Kind of Extravehicular Lighting Environment Analysis Method of Shenzhou Spacecraft 263
 Haoting Liu, Shuo Yang, Weidong Dong, Shunliang Pan and Jin Yang

Image Quality Evaluation Metric of Brightness Contrast 271
 Haoting Liu, Fenggang Xu, Shuo Yang, Weidong Dong and Shunliang Pan

Short-Term Public Transportation Passenger Flow Forecasting Method Based on Multi-source Data and Shepard Interpolating Prediction Method 281
 Wenzhou Jin, Peng Li, Weitiao Wu and Lanhui Wei

The Color Choices of Chinese Pilots for Aircraft Cabin Interior 295
 Jian Du, Chunmei Gui, Xiaochao Guo, Yanyan Wang, Qinglin Zhou, Yu Bai, Guowei Shi and Duanqin Xiong

Part IV Research on the Man-Machine Relationship

Comparative Study on Cab’s H Point Design Model Based on Human Factors Engineering 305
 Jiangli He, Chenxuan Yang, Tong Zhu, Xiaoyong Wang and Yueqi Hu

Human–Machine Analysis of Bus Station Identification System in Changzhou 315
 Canqun He, Jinting Hu and Xiaolei Tan

Research About UI Color Preference for Mobile Terminal Based on the User’s Visual Thinking and Perception 323
 Jing Jin and Huaqing Shen

Interface Ergonomics Evaluation Methods and Applied Research for Fighter Cockpit 333
 Haijing Song and Xiaofang Xu

Study on the Optimization Design Method of Human–Machine Interface of Vehicle Equipment 341
 Nan Men, Zhibing Pang, Fenghua Wang, Honglei Li, Pengdong Zhang and Quanliang Yin

Ergonomics Evaluation of Large Screen Display in Cockpit Based on Eye-Tracking Technology 347
 Yanyan Wang, Qingfeng Liu, Wanli Lou, Duanqin Xiong, Yu Bai, Jian Du and Xiaochao Guo

Position of Heading Information Presented in HUD for Aircraft Cockpit 357
 Xiaochao Guo, Yanyan Wang, Qingfeng Liu and Duanqin Xiong

Human-Computer Interaction Design Testing Based on Decision-Making Process Model 365
 Baiqiao Huang, Pengyi Zhang and Chuan Wang

Contact Position Relation Between Car Bumpers and Lower Limbs of Pedestrians Involved in Crashes 373
 Quan Yuan, Song Chen, Chuanzhou Qin and Haojie Yang

Part V Research on the Man-Environment Relationship

Effect of Tight-Fitting Sportswear Compression on Sports Fatigue 383
 Yuxiu Yan, Xuan Li, Ke Liu, Zimin Jin and Jing Jin

Study on the Effects of Noise on Crew’s Mental Workload in Information Processing 393
 Kaixuan Zhao, Weiping Liu, Binhe Fu and Junfeng Nie

Study About the Effects of Noise on Crew’s Thinking Ability 401
 Kaixuan Zhao, Weiping Liu, Binhe Fu and Bo Yang

Research on Protective Performance of Basketball Knee Pads Based on 3D Motion Capture 409
 Yuxiu Yan, Quan Wang, Zimin Jin and Jianwei Tao

Study on 5-km Armed Cross-Country Training in the Plateau Hypoxic Environment 417
 Shuai Mu, Ming Kong, Huifang Wang and Hai Chang

The Influence of Short-Time Head-Down Tilt Simulated Weightlessness on Performance of Motion Direction Judgment 425
 Duming Wang, Qipei Han and Yu Tian

The Development of Military Helmet for Bare-Handed Combat 433
 Xiaobin Yang

Study on Human Adaptability in Urban Underground Space Combat Environment Under Special Circumstances 441
 Wang Wang and Hangdong Wang

Study on the Influence of Interior Decoration of Ship Cabin on Crew’s Visual Work Efficiency 449
 Hangtao Cheng, Chuan Wang and Zhe Wang

Part VI Research on the Machine-Environment Relationship

The Shock Resistance Research of Light Seamless Knitted Fabric 457
 Yuanyuan Wang, Zimin Jin and Yuanyuan Qi

Calculation and Analysis of FCR Burn-Through Range with Noise Jamming 463
Wei Yu, Hong He, Xiaonian Wang, Boqi Wang, Kun Li and Jiang Luo

Research on Noise Measurement of a Self-propelled Weapon System and Its Noise-Reduction Measures 471
Pengdong Zhang, Zhibing Pang, Xuechen Yao, Changsheng Wang, Yong Kang and Nan Men

Part VII Research on the Overall Performance of Man-Machine-Environment System

Design on the Virtual Maintenance Training System of Some-Type Equipment Based on the Virtual Reality 479
Zuohui Bao, Yong Wang, Zuobin Yang, Chunfeng Zhu and Cheng Jin

Analysis of the Risk Assessment of Subway Stampede 489
QiQuan Wang, Jiaxin Wu, Li Li and Jingjing Shao

Research on Emergency Evacuation Simulation of Old Dormitory Building Based on Pathfinder 499
Yan Li, Yan Zhang and Jianpin Jiang

Analysis of Risk Dissemination in Supply Chain Based on Knowledge Dissemination Network Model 509
Yan Li, Zixin Su and Jianping Jiang

Research on Reality-Based Training and Management Issues in Air Defense Forces Troops by Governing the Military Under the Rule of Law 519
Peng Gong, Yunqiang Xiang, Guiqi Liu, Zhenguo Mei and Ye Tao

The Dialectical Thinking on Leadership of the Commanders and the Fighting Capability of Troops Under the Target of Building a Strong Military 527
Zaochen Liu, Peng Gong, Doudou Shan, Ye Tao and Shenzhen Zheng

Analysis on the Effect of Safety Culture Construction Factors 535
Zhenguo Mei, Chang Mei, Peng Gong, Ye Tao and Wenying Xing

On Academic Evaluation Index System of Weaponry Subject 543
Hai Chang, Bingjun Zhang, Zengjun Ji and Shuai Mu

Analysis and Monitoring on Training Intensity of Single Unit Based on Oximeter RAD-57 551
Cheng Jin, Di Liu, Genhua Qi, Zhibing Pang, Haitao Zhao and Zhaofeng Luo

Research on Field Rescue Based on Expedient Material 559
 Zhingbing Pang, Huawei Li, Mingming Sui, Kunyuan Hu, Zhaofeng Luo
 and Shuai Mu

Research on the Training of Air Observation Post Operator 567
 Haitao Zhao, Genhua Qi, Zhibing Pang, Cheng Jin, Honglei Li
 and Hongyan Ou

Application of Crisis Intervention After Aircraft Mishap 575
 Qingfeng Liu, Xiaochao Guo, Fei Peng, Wanli Lou, Duanqin Xiong,
 Lei Yang, Yu Bai and Yanyan Wang

**Missile Maintenance Management Using Data Flow Analysis
 and Discrete Event Simulation** 583
 Fang Liu, Jinshi Xiao, Jun Huang, Qiang Zou and Haoting Liu

**Key Chain Buffer Setting Method for Uncertainty of Project
 Duration** 593
 Fenglin Zhang and Xingming Gao

**Flight Test Risk Mechanism with Man-Machine-Environment
 System of Civil Aircraft** 601
 Yuanyuan Guo, Youchao Sun and Longbiao Li

**Residual Risk Assessment of Civil Aircraft for Airworthiness
 Requirements** 611
 Yuanyuan Guo, Youchao Sun and Longbiao Li

**Airworthiness Safety Construction of Civil Aircraft Based
 on Operational Data** 619
 Yuanyuan Guo, Youchao Sun and Longbiao Li

**Experimental Study on Simulated Flight Performance with
 Monochrome and Colorful Display for See-Through Displays** 627
 Duanqin Xiong, Qing He, Xiaochao Guo, Yu Bai, Yanyan Wang,
 Fei Peng, Jian Du and Qingfeng Liu

**Application of the Grey Clustering Evaluation Model in Risk
 Level Assessment of Merchant Ships** 637
 Feng Li and Hong Yi

**Research on Metacognitive Training Method of
 Six-Degree-of-Freedom Observation and Control** 647
 Jie Li, Jiayi Cai, Weifen Huang, Liwei Zhang, Jing Zhao, Yanlei Wang,
 Xiang Zhang and Qianxiang Zhou

**Intermittent Failure Combing Analysis and Prevention
 of a Certain Type of Missile Weaponry** 657
 Guanqian Deng, Guiyou Hao, Yingjie Lv and Ying Zhou

High Altitude Oxygen Production and Implementation of Special Vehicle 663
Haiyan Niu, Liang Tian, Yaofeng He and Jianquan Ding

Study on Test Specification for Vibration Control of Heavy Vehicles 671
Heping Wang, Mei Zhang and Xiaoyu Zhong

The Multiple Classification Method of Signal Recognition for Spacecraft Based on SAE Network 679
Wei Lan, Yixin Liu, Zhang Qi, Shimin Song, Chun He, Lijing Wang and Ke Li

Part VIII Theory and Application Research

Evaluation on the Design of Man-Machine-Environment System of Interactive Experience Space in Library 693
Kunzhu Zhang, Liyan Tan and Yang Liu

The Dilemma Generated by Automated Driving Considered from Ethical Aspect 703
Tianrui Qin, Quan Yuan and Wenjie Lu

Application of Man-Machine-Environment System Engineering in Shipboard Equipment 711
Baiqiao Huang and Pengyi Zhang

Space design of Display Console on Ship-Based Man-Machine-Environment System Engineering 721
Jingyu Song and Baiqiao Huang

About the Editors

Prof. Shengzhao Long is the Founder of the Man-Machine-Environment System Engineering (MMESE), the Chairman of the Man-Machine-Environment System Engineering (MMESE) Committee of China, the Chairman of the Beijing KeCui Academy of Man-Machine-Environment System Engineering (MMESE), and the Former Director of Ergonomics Lab of Astronaut Research and Training Center of China. On October 1992, he is honored by the National Government Specific Allowance.

He graduated from the Shanghai Science and Technology University in 1965, China. In 1981, directing under famous Scientist Xuesen Qian, he founded the MMESE theory. In 1982, he proposed and developed human fuzzy control model using fuzzy mathematics. From August of 1986 to August of 1987, he conducted research in man-machine system as a Visiting Scholar at Tufts University, Massachusetts, USA. In 1993, he organized Man-Machine-Environment System Engineering (MMESE) Committee of China. He has published “Foundation of theory and application of Man-Machine-Environment System Engineering” (2004) and “Man-Machine-Environment System Engineering” (1987). He also edited “Proceedings of the 1st–17th Conference on Man-Machine-Environment System Engineering” (1993–2017). e-mail: shzhleng@sina.com

Dr. Balbir S. Dhillon is a Professor of Engineering Management in the Department of Mechanical Engineering at the University of Ottawa, Canada. He has served as a Chairman/Director of Mechanical Engineering Department/Engineering Management Program for over 10 years at the same institution. He has published over 345 (i.e., 201 journals + 144 conference proceedings) articles on reliability, safety, engineering management, etc. He is or has been on the editorial boards of nine international scientific journals. In addition, he has written 34 books on various aspects of reliability, design, safety, quality, and engineering management published by Wiley (1981), Van Nostrand (1982), Butterworth (1983), Marcel Dekker (1984), Pergamon (1986), etc. His books are being used in over 85 countries, and many of them are translated into languages such as German, Russian,

and Chinese. He has served as General Chairman of two international conferences on reliability and quality control held in Los Angeles and Paris in 1987.

He has served as a consultant to various organizations and bodies and has many years of experience in the industrial sector. At the University of Ottawa, he has been teaching reliability, quality, engineering management, design, and related areas for over 29 years and he has also lectured in over 50 countries, including keynote addresses at various international scientific conferences held in North America, Europe, Asia, and Africa. In March 2004, he was a Distinguished Speaker at the Conf./Workshop on Surgical Errors (sponsored by White House Health and Safety Committee and Pentagon), held at the Capitol Hill (One Constitution Avenue, Washington, D.C.).

He attended the University of Wales where he received a B.S. in electrical and electronic engineering and an M.S. in mechanical engineering. He received a Ph.D. in industrial engineering from the University of Windsor. e-mail: dhillon@genie.uottawa.ca
