The Chinese University of Hong Kong, Shatin, Hong Kong

The series “Advances in Intelligent Systems and Computing” contains publications on theory, applications, and design methods of Intelligent Systems and Intelligent Computing. Virtually all disciplines such as engineering, natural sciences, computer and information science, ICT, economics, business, e-commerce, environment, healthcare, life science are covered. The list of topics spans all the areas of modern intelligent systems and computing such as: computational intelligence, soft computing including neural networks, fuzzy systems, evolutionary computing and the fusion of these paradigms, social intelligence, ambient intelligence, computational neuroscience, artificial life, virtual worlds and society, cognitive science and systems, Perception and Vision, DNA and immune based systems, self-organizing and adaptive systems, e-Learning and teaching, human-centered and human-centric computing, recommender systems, intelligent control, robotics and mechatronics including human-machine teaming, knowledge-based paradigms, learning paradigms, machine ethics, intelligent data analysis, knowledge management, intelligent agents, intelligent decision making and support, intelligent network security, trust management, interactive entertainment, Web intelligence and multimedia.

The publications within “Advances in Intelligent Systems and Computing” are primarily proceedings of important conferences, symposia and congresses. They cover significant recent developments in the field, both of a foundational and applicable character. An important characteristic feature of the series is the short publication time and world-wide distribution. This permits a rapid and broad dissemination of research results.

**\*\* Indexing: The books of this series are submitted to ISI Proceedings, EI-Compendex, DBLP, SCOPUS, Google Scholar and Springerlink \*\***

Dr. Manjaree Pandit, MITS, Gwalior

# Preface

Optimization may be defined as finding the solution to a problem where it is necessary to maximize or minimize a single or set of objective functions within a domain which contains the acceptable values of variables while some restrictions are to be satisfied. There might be a large number of sets of variables in the domain that maximize or minimize the objective function(s) while satisfying the described restrictions. They are called as the acceptable solutions, and the solution which is the best among them is called the optimum solution to the problem. An objective function expresses the main aim of the model which is to be either minimized or maximized. For example, in a manufacturing process, the aim may be to maximize the profit or minimize the cost. In designing a structure, the aim may be to maximize the strength or minimize the deflection or a combination of many objectives. The use of optimization techniques helps the engineers in improving the system's performance, utilization, reliability, and cost.

An international conference on “Advanced Engineering Optimization Through Intelligent Techniques (AEOTIT 2018)” was held during August 03–05, 2018, at Sardar Vallabhbhai National Institute of Technology, Surat, India. The objective of the conference was to bring together experts from academic institutions, industries, and research organizations and professional engineers for sharing of knowledge, expertise, and experience in the emerging trends related to advanced engineering optimization techniques and their applications. There had been an overwhelming response to the call for papers. More than 200 research papers were received from the researchers and academicians of the leading institutes and organizations. However, only 76 good-quality papers have been selected based on the recommendations of the reviewers for inclusion in the proceedings. These papers have covered various intelligent optimization techniques including meta-heuristics, neural networks, decision-making methods, and statistical tools.

We are extremely thankful to the authors of the papers, national and international advisory committee members, session chairmen, faculty and staff members of SVNIT, Surat, and CUT, Cracow, and student volunteers for their cooperation and

help. We are grateful to the team members of Springer Nature for their support and help in producing these proceedings. We are confident that these proceedings would benefit the optimization research community.

# Contents

<b>Combined Intelligent and Adaptive Optimization in End Milling of Multi-layered 16MnCr5/316L</b> . . . . .	1
Uros Zuperl and Franc Cus	
<b>Jaya: A New Meta-heuristic Algorithm for the Optimization of Braced Dome Structures</b> . . . . .	13
Tayfun Dede, Maksym Grzywiński and R. Venkata Rao	
<b>Damage Detection of Truss Employing Swarm-Based Optimization Techniques: A Comparison</b> . . . . .	21
Swarup K. Barman, Dipak K. Maiti and Damodar Maity	
<b>Multi-objective Optimization of Wire-Electric Discharge Machining Process Using Multi-objective Artificial Bee Colony Algorithm</b> . . . . .	39
P. J. Pawar and M. Y. Khalkar	
<b>Optimization of Process Parameters in Pulsed Electrochemical Honing Process Using Evolutionary Algorithms</b> . . . . .	47
Sunny Diyaley and Shankar Chakraborty	
<b>Modeling and Simulation of Huge AC Power Network for Optimization of Corona Power Loss Through TLBO Algorithm</b> . . . . .	59
Manan Pathak and Ishita Bhatt	
<b>Optimization of Water Distribution Networks Using Cuckoo Search Algorithm</b> . . . . .	67
Maduukuri Naveen Naidu, Pankaj Sriman Boindala, A. Vasana and Murari R. R. Varma	
<b>GA-Based Hybrid Approach to Solve Fuzzy Multi-objective Optimization Model of Multi-application-Based COTS Selection Problem</b> . . . . .	75
Anita Ravi Tailor and Jayesh M. Dhodiya	

<b>Optimization of Parameters for Steel Recycling Process by Using Particle Swarm Optimization Algorithm</b> .....	87
S. Allurkar Baswaraj and M. Sreenivasa Rao	
<b>Modeling 3D WSN to Maximize Coverage Using Harmony Search Scheme</b> .....	95
Deepika Sharma and Vrinda Gupta	
<b>An Efficient Jaya Algorithm for Multi-objective Permutation Flow Shop Scheduling Problem</b> .....	113
Aseem Kumar Mishra, Divya Shrivastava, Bhasker Bundela and Surabhi Sircar	
<b>Multi-objective Optimization of EDM Process Parameters Using Jaya Algorithm Combined with Grey Relational Analysis</b> .....	127
Ashish Khachane and Vijaykumar Jatti	
<b>Application of Fuzzy Integrated JAYA Algorithm for the Optimization of Surface Roughness of DMLS Made Specimen: Comparison with GA</b> .....	137
Hiren Gajera, Veera Darji and Komal Dave	
<b>Comparative Analysis of Fruit Categorization Using Different Classifiers</b> .....	153
Chirag C. Patel and Vimal K. Chaudhari	
<b>Design Optimization of Plate-Fin Heat Exchanger by Using Modified Jaya Algorithm</b> .....	165
Kiran Chunilal More and R. Venkata Rao	
<b>Prediction of Factor of Safety For Slope Stability Using Advanced Artificial Intelligence Techniques</b> .....	173
Abhiram Chebrolu, Suwendu Kumar Sasmal, Rabi Narayan Behera and Sarat Kumar Das	
<b>The Use of Grey Relational Analysis to Determine Optimum Parameters for Plasma Arc Cutting of SS-316L</b> .....	183
K. S. Patel and A. B. Pandey	
<b>Jaya Algorithm Based Intelligent Color Reduction</b> .....	193
Raghu Vamshi Hemadri and Ravi Kumar Jatoth	
<b>Tooth Profile Optimization of Helical Gear with Balanced Specific Sliding Using TLBO Algorithm</b> .....	203
Paridhi Rai and Asim Gopal Barman	
<b>Optimization of Nanofluid Minimum Quantity Lubrication (NanoMQL) Technique for Grinding Performance Using Jaya Algorithm</b> .....	211
R. R. Chakule, S. S. Chaudhari and P. S. Talmale	

**Performance Evaluation of Jaya Optimization Technique for the Production Planning in a Dairy Industry** . . . . . 223  
 Aparna Chaparala, Radhika Sajja, K. Karteeka Pavan and Sreelatha Moturi

**Multi-objective Optimization in WEDM of Inconel 750 Alloy: Application of TOPSIS Embedded Grey Wolf Optimizer** . . . . . 231  
 G. Venkata Ajay Kumar and K. L. Narasimhamu

**Experimental Investigations and Selection of Solid Lubricant Assisted Lubrication Strategy in Machining with the Use of PROMETHEE** . . . . . 241  
 M. A. Makhesana and K. M. Patel

**BPSO-Based Feature Selection for Precise Class Labeling of Diabetic Retinopathy Images** . . . . . 253  
 Rahul Kumar Chaurasiya, Mohd Imroze Khan, Deeksha Karanjgaokar and B. Krishna Prasanna

**Dynamic Analysis and Life Estimation of the Artificial Hip Joint Prosthesis** . . . . . 265  
 Akbar Basha Shaik and Debasish Sarkar

**Modeling Elastic Constants of Keratin-Based Hair Fiber Composite Using Response Surface Method and Optimization Using Grey Taguchi Method** . . . . . 275  
 P. Divakara Rao, C. Udaya Kiran and K. Eshwara Prasad

**A Decennary Survey on Artificial Intelligence Methods for Image Segmentation** . . . . . 291  
 B. Vinoth Kumar, S. Sabareeswaran and G. Madumitha

**Air Quality Assessment Using Fuzzy Inference Systems** . . . . . 313  
 Seema A. Nihalani, Nandini Moondra, A. K. Khambete, R. A. Christian and N. D. Jariwala

**Optimization of Water Releases from Ukai Reservoir Using Jaya Algorithm** . . . . . 323  
 Vijendra Kumar and S. M. Yadav

**Design of Antenna Arrays Using Chaotic Jaya Algorithm** . . . . . 337  
 R. Jaya Lakshmi and T. Mary Neebha

**Optimization of Friction Drilling Process by Response Surface Methodology** . . . . . 351  
 Akshay Potdar and Sagar Sapkal

**Optimization of Parameters in Friction Stir Welding of AA6101-T6 by Taguchi Approach** . . . . . 361  
 Deepak Kumar and Jatinder Kumar

<b>Evolutionary Optimization in Master Production Scheduling: A Case Study</b> .....	371
Radhika Sajja, K. Karteeka Pavan, Ch. Srinivasa Rao and Swapna Dhulipalla	
<b>Optimal Irrigation Planning in the Eastern Gandak Project Using Linear Programming—A Case Study</b> .....	381
M. Bhushan and L. B. Roy	
<b>Optimization of Squeeze Casting Process Parameters to Investigate the Mechanical Properties of AA6061/Al<sub>2</sub>O<sub>3</sub>/SiC Hybrid Metal Matrix Composites by Taguchi and Anova Approach</b> .....	393
L. Natrayan, M. Senthil Kumar and Mukesh Chaudhari	
<b>Parametric Optimization of Electrochemical Machining Process Using Taguchi Method and Super Ranking Concept While Machining on Inconel 825</b> .....	407
Partha Protim Das and Shankar Chakraborty	
<b>Dependency of Bead Geometry Formation During Weld Deposition of 316 Stainless Steel Over Constructional Steel Plate</b> .....	417
M. K. Saha, S. Sadhu, P. Ghosh, A. Mondal, R. Hazra and S. Das	
<b>Performance Assessment of Inter-Digital Capacitive Structure-Finite Element Approach</b> .....	431
Sheeja P. George, Johny Isaac and Jacob Philip	
<b>MADM-Based Approach for Selection of Welding Process for Aluminum Tube Manufacturing</b> .....	441
Ravindra Singh Saluja and Varinder Singh	
<b>Screening of Organic Brake Pad Materials Using MADM Technique</b> .....	451
K. N. Hendre and B. D. Bachchhav	
<b>Selection of Coating and Nitriding Process for AISI 4140 Steel Material to Enhance Tribological Properties</b> .....	463
Pathan Firojkhan, Nikhil Kadam and S. G. Dambhare	
<b>Risk-Pooling Approach in Inventory Control Model for Multi-products in a Distribution Network Under Uncertainty</b> .....	475
Vats Peeyush, Soni Gunjan and A. P. S. Rathore	
<b>Optimization of Magnetic Abrasive Finishing Process Using Principal Component Analysis</b> .....	489
S. B. Gunjal and P. J. Pawar	

**Dynamic Distribution Network Expansion Planning Under Energy Storage Integration Using PSO with Controlled Particle Movement** ..... 497  
 Santosh Kumari, Prerna Jain, Dipti Saxena and Rohit Bhakar

**Development of Plant Layout for Improving Organizational Effectiveness by Hybridizing GT, TOPSIS and SLP** ..... 515  
 Biswanath Chakraborty and Santanu Das

**Optimization of Process Parameters Using Hybrid Taguchi and VIKOR Method in Electrical Discharge Machining Process** ..... 527  
 B. Singaravel, S. Deva Prasad, K. Chandra Shekar, K. Mangapathi Rao and G. Gowtham Reddy

**Multi-response Optimization of Burnishing of Friction-Welded AA6082-T6 Using Principal Component Analysis** ..... 537  
 R. S. Tajane and P. J. Pawar

**Design Optimization of Helicopter Rotor with Trailing-Edge Flaps Using Genetic Algorithm** ..... 553  
 Saijal Kizhakke Kodakkattu

**Statistical Model for Spot Welding of Aluminum Alloy 6082T651 Using an Interlayer** ..... 563  
 Arick. M. Lakhani and P. H. Darji

**Fuzzy Programming Technique for Solving Uncertain Multi-objective, Multi-item Solid Transportation Problem with Linear Membership Function** ..... 575  
 Vandana Y. Kakran and Jayesh M. Dhodiya

**Investigation of Influence of Process Parameters in Deep Drawing of Square Cup** ..... 589  
 Chandra Pal Singh, Prachi Kanherkar, Lokesh Bajpai and Geeta Agnihotri

**Selection of Machining Parameters in Ultrasonic Machining Process Using CART Algorithm** ..... 599  
 Shruti Dandge and Shankar Chakraborty

**PSF-Based Spectrum Occupancy Prediction in Cognitive Radio** ..... 609  
 Jayesh Patil, Neeraj Bokde, Sudhir Kumar Mishra and Kishore Kulat

**Hertzian Contact Stress Analysis in Roller Power Transmission One-Way Clutch by Using Finite Element Analysis** ..... 621  
 Karan A. Dutt, S. B. Soni and D. V. Patel

**Numerical Simulation and Experimental Study on Lightweight Mechanical Member** ..... 631  
 G. Lakshmi Srinivas and Arshad Javed

<b>Robust Analysis of T-S Fuzzy Controller for Nonlinear System Using H-Infinity</b> .....	643
Manivasagam Rajendran, P. Parthasarathy and R. Anbumozhi	
<b>Adsorption of Crystal Violet Dye: Parameter Optimization Using Taguchi's Experimental Methodology</b> .....	653
T. B. Gupta, D. H. Lataye and S. T. Kurwadkar	
<b>Minimization of Springback in Seamless Tube Cold Drawing Process Using Advanced Optimization Algorithms</b> .....	667
D. B. Karanjule, S. S. Bhamare and T. H. Rao	
<b>Integrated Production Planning and Scheduling for Parallel Production Lines</b> .....	679
K. C. Bhosale and P. J. Pawar	
<b>Optimization of Surface Modification Phenomenon for P20+Ni Die Steel Using EDM with P/M Composite Electrode</b> .....	689
Jayantigar Lakhmangar Ramdatti and Ashishkumar Vitthaldas Gohil	
<b>Optimization of Tool Wear and Surface Roughness of Hybrid Ceramic Tools</b> .....	699
G. Amith Kumar and T. Jagadeesha	
<b>Assessment of Viscosity of Coconut-Oil-Based CeO<sub>2</sub>/CuO Hybrid Nano-lubricant Using Artificial Neural Network</b> .....	707
Ayamannil Sajeeb and Perikinalil Krishnan Rajendrakumar	
<b>Elimination of Nick Defect by Process Optimization for Input Shaft Reverse Gear Section</b> .....	717
Sagar U. Sapkal and Tejas A. Bhilawade

## About the Editors

**Dr. R. Venkata Rao** is a Professor at the Department of Mechanical Engineering, S. V. National Institute of Technology, Surat, India. He has more than 28 years of teaching and research experience. He completed his B.Tech. in 1988, M.Tech. in 1991, Ph.D. in 2002, and obtained his D.Sc. in 2017. Dr. Rao's research interests include: advanced optimization algorithms and their applications to design, thermal and manufacturing engineering, and fuzzy multiple attribute decision-making (MADM) methods and their industrial applications. He has more than 300 research papers to his credit, published in national and international journals and conference proceedings. He has received national and international awards for his research efforts. He is a reviewer for more than 80 national and international journals and serves on the editorial boards of several international journals. He has also been a Visiting Professor at Cracow University of Technology, Poland in January 2016, November 2016, and June 2018, at BITS Pilani Dubai campus in 2017, and at the Asian Institute of Technology, Bangkok in 2008, 2010, 2015 and 2018. He has authored six books entitled "Decision Making in the Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods" (Volume 1 (2007) and Volume 2 (2013)), "Advanced Modeling and Optimization of Manufacturing Processes: International Research and Development" (2010), "Mechanical Design Optimization Using Advanced Optimization Techniques" (2012), "Teaching-Learning-Based Optimization Algorithm And Its Engineering Applications" (2016), and "Jaya: An Advanced Optimization Algorithm And Its Engineering Applications" (2018), all of which were published by Springer.

**Dr. Jan Taler** is a Professor and Director of the Institute of Thermal Power Engineering of Cracow University of Technology, Poland. He has more than 40 years of teaching and research experience, having completed his M.Sc. in 1974, Ph.D. in 1977, and D.Sc. in 1987. He has published about 300 articles in scientific journals. He has authored 10 books and over 20 chapters in scientific monographs and entries in the Encyclopedia of Thermal Stresses. He conducts research in the field of heat transfer engineering and thermal power engineering with special

interest in the following areas – inverse heat conduction problems, measurement of heat flux and heat transfer coefficient, ash fouling and slagging in steam boilers, dynamics of large steam boilers, and optimization of thermal systems. He has participated in many research projects funded by industry and the Polish Committee for Scientific Research. Many of his innovative technical solutions have been implemented in power plants.
