Since 1978, China's political and social systems have transformed significantly to accommodate the world's largest population and second largest economy. These changes have grown more complex and challenging as China deals with modernization, globalization, and informatization. The unique path of sociopolitical development of China hardly fits within any existing frame of reference. The number of scientific explorations of China's political and social development, as well as contributions to international literature from Chinese scholars living and researching in Mainland China, has been growing fast. This series publishes research by Chinese and international scholars on China's politics, diplomacy, public affairs, and social and economic issues for the international academic community.

For my parents

ACKNOWLEDGEMENTS

This book is based on my Ph.D. project conducted during 2011–2016 at London School of Economics and Political Science (LSE) as well as follow-up research in the past few years. It cannot be completed without support and help from many in my academic and personal life.

I would like to give special thanks first to my Ph.D. supervisor, Professor Chris Alden, who provided me with constructive advices and constant encouragement during the Ph.D. years and guided me through the ten-month-long fieldwork in Africa.

I would express my gratitude to Dr. Sérgio Chichava (based in Instituto de Estudos Sociais e Económicos, Mozambique) and Ms. Angela Harding (based in Pretoria University, South Africa) for their tremendous help in facilitating my fieldwork in the two countries. Sincere thanks also to all the informants in Mozambique and South Africa for their time, as well as the invaluable information and opinions they shared with me.

I'm particularly grateful to Professor Julia C. Strauss (based in SOAS University of London) and Professor Tang Xiaoyang (based in Tsinghua University, China), who provided critical, detailed and constructive advices to help me improve the structure and arguments of this research.

I am also deeply indebted to my parents and Professor Xiao Jialing for their enduring love and support over the years. I'd like to thank in particular my husband, Wei, for his company, patience, encouragement and love that sustained me in the process of writing the book. I also want to say thanks to Maddalena Procopio, my colleague and dear friend

in London, who provided me so generous support academically and emotionally.

I would like to give thanks to Mr. Ge Xinqiang and Chen Kaiyuan who funded my studies in London, and LSE who provided financial and intellectual support to my fieldwork. Last but not least, great thanks to Fudan University, my alma mater in China, who supports me to get the book published.
